**Request:**

The applicant is requesting a master plan modification to a previously approved Master Plan. The site was previously master planned for self-storage by H 21-56, approved by the Board of County Commissioners on January 11, 2022 (Resolution 2022-16). The Board action on January 11, 2022, also included the approval of a small scale comprehensive plan amendment designating the site with a Commercial future land use (Ord. 2022-01). Please see the attached information regarding the past history.

**Project Description:**

The applicant is proposing to retain the existing vested use for self-storage (mini warehouse) and is requesting a master plan modification to make the following changes:

- Replace the outdoor storage/RV parking) with single-story self-storage along the southern buffer
- Establish maximum building footprint square footage at 85,000 square feet (135,000 sf with second floor)
- Combine the two-story self-storage buildings (2) facing Landover Boulevard into one building

No other changes to the master plan or approved performance conditions are requested. The previously approved buffers and landscape requirements will remain in effect. All site lighting will be full cutoff fixtures to retain light on site and security lighting will be shielded from the residential area to the south.

Utilities are available along the adjacent roadway and the soils are conducive to development and stormwater retention. The proposed use will generate minimal traffic in this busy area and will provide storage capacity for the surrounding multifamily and single family homes. There will be no direct access to Landover Boulevard. The building will also meet the County architectural and design guidelines.

**Comprehensive Plan Consistency:**

The subject property is designated Commercial on the future land use map and is consistent with the following Goals, Objectives and Strategies from the Hernando County 2040 Comprehensive Plan.

**Commercial Category**

Objective 1.04G: The Commercial Category allows primarily retail, office, and commercial service uses with an overall average gross floor area ratio of 0.35 but also includes limited

industrial, recreational and institutional uses. Residential and mixed uses may be allowed subject to locational criteria and performance standards.

Strategy 1.04G(1): Commercial development as envisioned on the Future Land Use Map is intended primarily for locations at major intersections and along major corridors where service to local and regional markets are enhanced by transportation patterns. New commercial zoning is directed to these mapped areas. Commercial areas that are not mapped but are allowed under this Future Land Use Category include neighborhood commercial and specialty commercial uses as described in this Plan, commercial approved as part of mixed use developments, commercial designated by planned development districts, the infill development of existing commercial areas, commercial areas extending from designated commercial nodes, and pre-existing commercially developed and designated areas. Frontage roads and cross-access between commercial uses is required where needed in accordance with the provisions of this Plan and adopted land development regulations.

*Analysis:* The County previously determined that the site was appropriate for a commercial land use designation and development as a self-storage use (H 21-56). This section of Landover Boulevard is characterized by extensive non-residential development, including medical offices, a funeral home, light business services and a Springstead High School.

**Proposed Dimensional Standards:**

Maximum building square feet-135,000 square feet (85,000 sf building footprint)

Maximum Height - 45 feet

**Minimum Setbacks**

Front- 35 feet (Deviation from 75 feet previously approved)

Sides- 20 feet

Rear- 35 feet

**Buffers**

Landover Boulevard (North)- 10' Landscape Buffer

Chapel Drive (East)-15' Landscape Buffer

Rear (South adjacent to existing residential)- 20' Vegetative Buffer

Alcan Ave (West)-15' Vegetative Buffer

The western and southern buffers shall have a minimum height of 5 feet, a maximum height of 8 feet, or an evergreen hedge with a minimum height of 5 feet at the time of planting.

## Site Conditions

### Topography

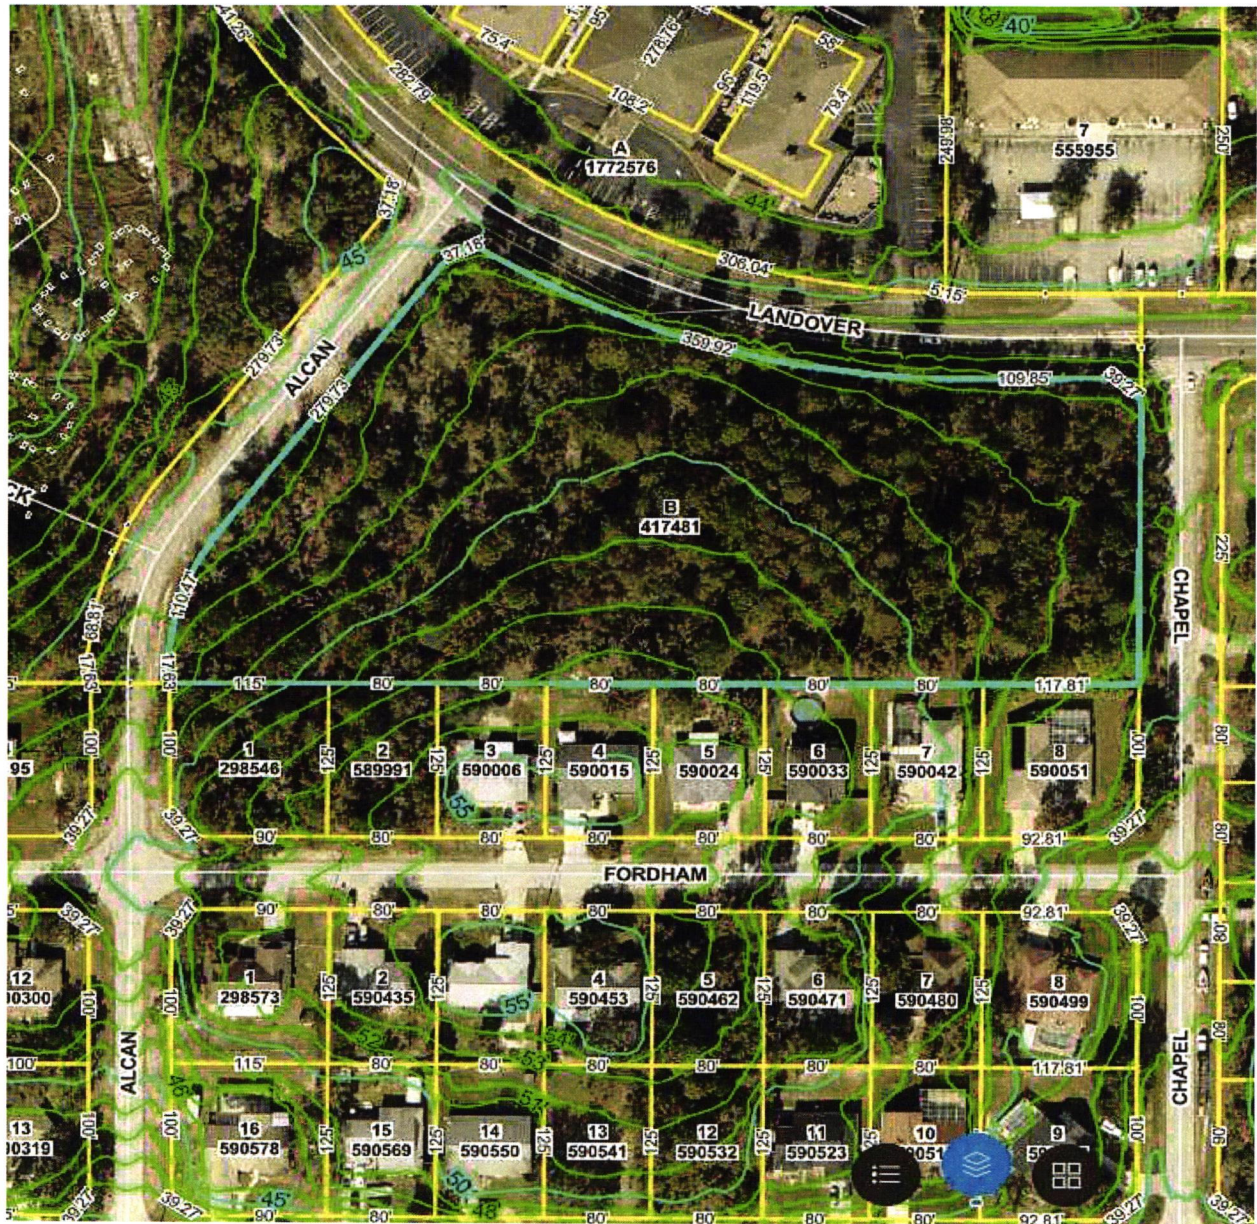

Figure 4. Parcel Key 417481-Topography Map

## Floodplain

The site is not located in a designated floodplain. Please refer to Figure 5.

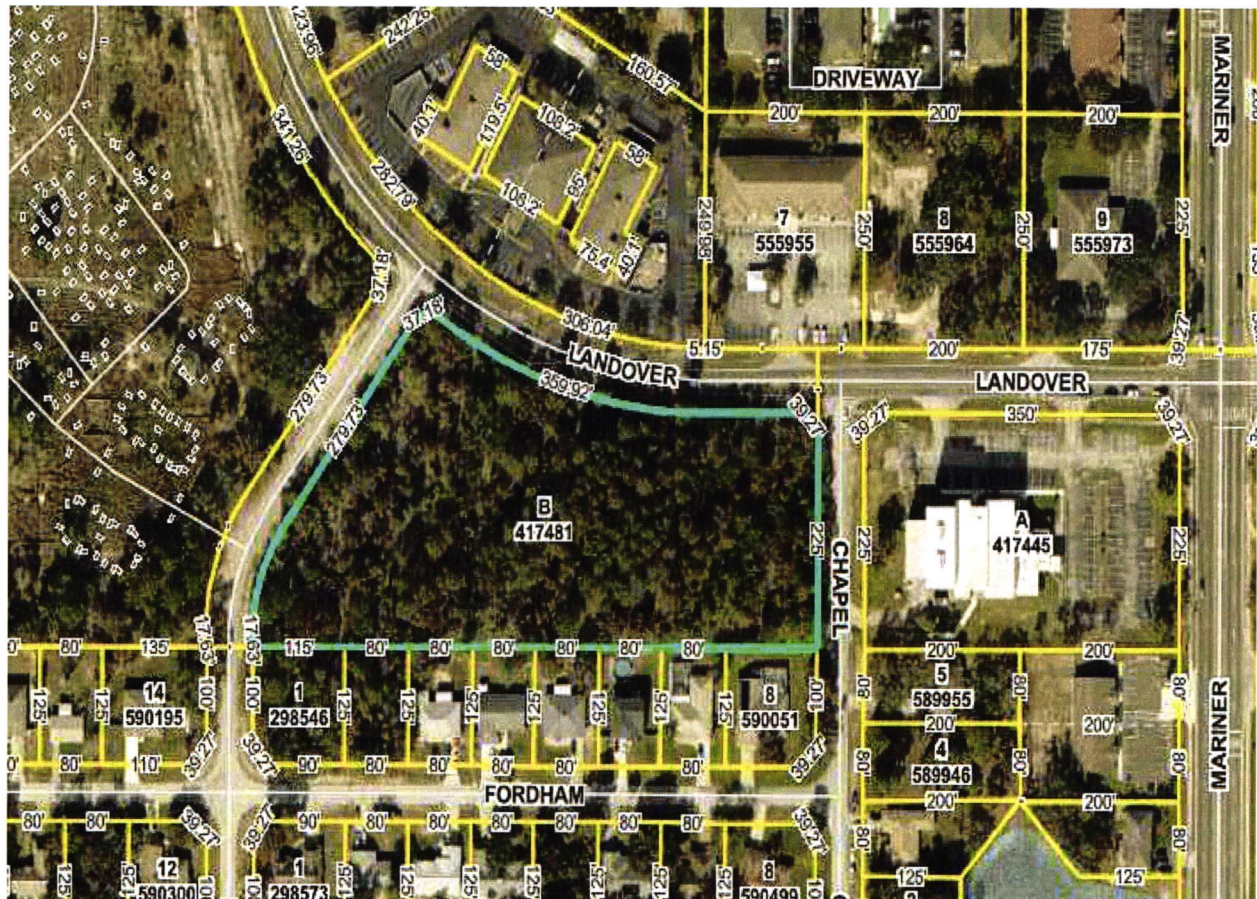

Figure 5. Parcel Key 417481 -Floodplain Map

**Figure 6. Parcel Key 417481 -Soils Map**

## Site Environmental

- The subject property is currently wooded vacant lot
- The property is comprised of upland forest dominated by Longleaf Pine and Laurel Oak
- No jurisdictional wetlands or other surface waters are present on the property
- A Gopher Tortoise survey has not been completed

## **Infrastructure**

### **Adequate Access/Transportation**

The site is located along Landover Boulevard which connects to Mariner Boulevard approximately 450 feet to the east and Northcliffe Boulevard approximately 4,000 feet to the north. All three roadways are designated thoroughfares by the Comprehensive Plan. While traffic flow is significant in this area, the proposed use is an extremely low traffic generator and provides storage capacity for the surrounding multifamily and single family dwellings. Access to the site will be taken from the side streets, Alcan and Chapel Avenues. No direct access to Landover Boulevard is proposed.

### **Utilities**

Both potable water and central sewer will be provided by the Hernando County Utilities Department. There is an existing 4-inch water main that runs along the west side of Alcan Avenue, an existing 6-inch water main that runs along the west side of Chapel Avenue, and an existing 8-inch water main that runs along the north side of Landover Boulevard. There is an existing 8-inch sewer gravity main that runs along Landover Boulevard.

### **Drainage**

The stormwater management system will be designed and constructed as permitted by the Southwest Florida Water Management District (SWFWMD).

### **Deviations**

No deviations to the dimensional standards are proposed.

The following deviation was previously approved:

Minimum Setbacks

Front- 35 feet (Deviation from 75 feet)
