PETITION NO. 25-324

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: ALTO ASSET COMPANY 5 LLC
PARCEL KEY NO: 00217893

SUMMARY OF EVIDENCE

1 The Petitioner, NATASHA ELLIOTT of RYAN LLC for ALTO ASSET COMPANY 5 LLC did appear telephonically before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The Property Appraiser shows a just value of $192,852 ($164/SF heated, $126/SF adjusted), an assessed or capped value of $192,709, and a taxable value of $192,709.

3 The Petitioner estimated the just value to be $181,525.

4 *Subject Property Type:* The subject is a 1,175 heated base SF (1,457 SF adjusted) single family residence. It was constructed in 1969. The parcel is located at 1145 Trellis Ave., Spring Hill.

5 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

6 The Petitioners evidence consists of a petition, hearing notice, correspondence, sales analysis, sales map and verbal testimony.

7 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

8 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

9 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

10 The PAO performed their analysis utilizing adjusted SF in their sales analysis report. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

11 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average.

12 The subject property did not transfer in the 3 years prior to the lien date.

13 The PAO supplied 3 improved sales on their statistical grid. PAO Sale 3 was an outlier or was to dissimilar to be reliable (and was not weighted). The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 10% for COS. After adjustment, these sales indicated a range of $157/SF to $186/SF adjusted before extra features (median $172/SF adjusted). The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($171.50/SF adjusted) $249,875 and that the subject IS NOT over assessed.

14 The PAO and Petitioner have 1 sale in common. This sale(s) was analyzed herein among the PAO dataset, unless it is the only reliable Petitioner Sale.

15 The Petitioner supplied 6 improved sale comparables. Sales 5 and 6 was/were outliers and/or too dissimilar and not weighted. This analysis does not note garages, extra feature values, amenities or the difference between gross, adjusted and heated SF. The sales will be adjusted at 4%/year for market conditions (the Petitioner used 0% adjustment), for age/condition, adjusted for land size/value if warranted, adjusted for differences in heated SF at $110/SF heated, and in this instance a 10% COS factor is warranted. After adjustment, these remaining sales indicated a range of $212,580 to $237,240 (median $234,090). The Petitioner sales indicate a credible and reliable just value for the subject of $230,000 and that the subject IS NOT over assessed.

16 Reviewing all the sales presented by both parties, the evidence credibly and reliably supports a just value of $240,000 for the subject and that the subject IS NOT over assessed.

17 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 8-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 2-3%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

18 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

19 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

20 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

21 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

22 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

"Factors to consider in deriving just valuation*. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for

unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."

The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID (marginally) establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID NOT overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS NOT shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES NOT exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS NOT satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be denied.

PETITION NO. 25-325

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: MONTPELIER ASSETS LLC
PARCEL KEY NO: 00542657

SUMMARY OF EVIDENCE

1 The Petitioner, NATASHA ELLIOTT of RYAN LLC for MONTPELIER ASSETS LLC did appear telephonically before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The Property Appraiser shows a just value of $273,170 ($178/SF heated, $111/SF adjusted), an assessed or capped value of $273,170, and a taxable value of $273,170.

3 The Petitioner estimated the just value to be $231,766.

4 *Subject Property Type:* The subject is a 1,534 heated base SF (1,885 SF adjusted) single family residence. It was constructed in 1987. The parcel is located at 3337 Grayton Dr., Spring Hill.

5 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

6 The Petitioners evidence consists of a petition, hearing notice, correspondence, sales analysis, sales map and verbal testimony.

7 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

8 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

9 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

10 The PAO performed their analysis utilizing adjusted SF in their sales analysis report. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

11 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average.

12 The subject property had no qualified transfer in the 3 years prior to the lien date.

13 The PAO supplied 3 improved sales on their statistical grid. PAO No sale was an outlier or was too dissimilar to be reliable (and was not weighted). The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 9% for COS. After adjustment, these sales indicated a range of $143/SF to $181/SF adjusted before extra features (median $164/SF adjusted). The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($164/SF adjusted) $309,140 and that the subject IS NOT over assessed.

14 The PAO and Petitioner have 0 sale(s) in common. Sale(s) in common are analyzed herein among the PAO dataset, unless it is the only reliable Petitioner Sale.

15 The Petitioner supplied 6 improved sale comparables. Sale 5 was/were outliers and/or too dissimilar and not weighted. This analysis does not note garages, extra feature values, amenities or the difference between gross, adjusted and heated SF. The sales will be adjusted at 4%/year for market conditions (the Petitioner used 0% adjustment), for age/condition, adjusted for land size/value if warranted, adjusted for differences in heated SF at $125/SF heated, and in this instance a 9% COS factor is warranted. After adjustment, these remaining sales indicated a range of $287,196 to $357,266 (median

$329,238). The Petitioner sales indicate a credible and reliable just value for the subject of $329,000 and that the subject IS NOT over assessed.

16 Reviewing all the sales presented by both parties, the evidence credibly and reliably supports a just value of $319,000 for the subject and that the subject IS NOT over assessed.

17 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 8-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 2-3%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

18 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

19 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

20 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

21 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

22 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

***"Factors to consider in deriving just valuation**. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."

The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID (marginally) establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID NOT overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS NOT shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES NOT exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS NOT satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be denied.

VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: ALTO ASSET COMPANY 1 LLC
PARCEL KEY NO: 00550834

SUMMARY OF EVIDENCE

1 The Petitioner, NATASHA ELLIOTT of RYAN LLC for ALTO ASSET COMPANY 1 LLC did appear telephonically before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The Property Appraiser shows a just value of $267,337 ($171/SF heated, $147/SF adjusted), an assessed or capped value of $244,225, and a taxable value of $244,225.

3 The Petitioner estimated the just value to be $240,775.

4 *Subject Property Type:* The subject is a 1,566 heated base SF (1,803 SF adjusted) single family residence. It was constructed in 2017. The parcel is located at 3240 Beaver Ave., Spring Hill.

5 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

6 The Petitioners evidence consists of a petition, hearing notice, correspondence, sales analysis, sales map and verbal testimony.

7 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

8 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

9 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

10 The PAO performed their analysis utilizing adjusted SF in their sales analysis report. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

11 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average.

12 The subject property had no qualified transfer (excluding portfolio sales) in the 3 years prior to the lien date.

13 The PAO supplied 3 improved sales on their statistical grid. PAO Sale 1 was an outlier or was too dissimilar to be reliable (and was not weighted). The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 10% for COS. After adjustment, these sales indicated a range of $164/SF to $167/SF adjusted before extra features (median $165/SF adjusted). The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($165/SF adjusted) $297,495 and that the subject IS NOT over assessed.

14 The PAO and Petitioner have 0 sale(s) in common. Sale(s) in common are analyzed herein among the PAO dataset, unless it is the only reliable Petitioner Sale.

15 The Petitioner supplied 2 improved sale comparables. No sale was/were outliers and/or too dissimilar and not weighted. This analysis does not note garages, extra feature values, amenities or the difference between gross, adjusted and heated SF. The sales will be adjusted at 4%/year for market conditions (the Petitioner used 0% adjustment), for age/condition, adjusted for land size/value if warranted, adjusted for differences in heated SF at $120/SF heated, and in this instance a 10% COS factor is warranted. After adjustment, these remaining sales indicated a range of $241,470 to $293,580 (median

$267,525). The Petitioner sales indicate a credible and reliable just value for the subject of $280,000 and that the subject IS NOT over assessed.

16 Reviewing all the sales presented by both parties, the evidence credibly and reliably supports a just value of $285,000 for the subject and that the subject IS NOT over assessed.

17 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 8-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 2-3%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

18 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

19 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

20 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

21 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

22 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

***"Factors to consider in deriving just valuation**. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."

The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID (marginally) establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID NOT overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS NOT shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES NOT exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS NOT satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be denied.

PETITION NO. 25-327

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: RH PARTNERS OWNERCO 2 LLC
PARCEL KEY NO: 00561145

SUMMARY OF EVIDENCE

1 The Petitioner, NATASHA ELLIOTT of RYAN LLC for RH PARTNERS OWNERCO 2 LLC did appear telephonically before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The Property Appraiser shows a just value of $323,476 ($146/SF heated, $131/SF adjusted), an assessed or capped value of $274,001, and a taxable value of $274,001.

3 The Petitioner estimated the just value to be $284,558.

4 *Subject Property Type:* The subject is a 2,222 heated base SF (2,447 SF adjusted) single family residence. It was constructed in 2005. The parcel is located at 4183 Castle Ave., Spring Hill.

5 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

6 The Petitioners evidence consists of a petition, hearing notice, correspondence, sales analysis, sales map and verbal testimony.

7 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

8 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

9 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

10 The PAO performed their analysis utilizing adjusted SF in their sales analysis report. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

11 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average.

12 The subject property had no qualified transfer (excluding portfolio sales) in the 3 years prior to the lien date.

13 The PAO supplied 3 improved sales on their statistical grid. PAO No sale was an outlier or was too dissimilar to be reliable (and was not weighted). The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 9% for COS. After adjustment, these sales indicated a range of $130/SF to $141/SF adjusted before extra features (median $135/SF adjusted). The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($132.50/SF adjusted) $324,227 and that the subject IS NOT over assessed.

14 The PAO and Petitioner have 2 sale(s) in common. Sale(s) in common are analyzed herein among the PAO dataset, unless it/they are the only reliable Petitioner Sale(s).

15 The Petitioner supplied 6 improved sale comparables. Sales 3 & 6 was/were outliers and/or too dissimilar and not weighted. This analysis does not note garages, extra feature values, amenities or the difference between gross, adjusted and heated SF. The sales will be adjusted at 4%/year for market conditions (the Petitioner used 0% adjustment), for age/condition, adjusted for land size/value if warranted, adjusted for differences in heated SF at $100/SF heated, and in this instance a 9% COS factor is warranted. After adjustment, these remaining sales indicated a range of $285,649 to $362,635 (median

$324,142). The Petitioner sales indicate a credible and reliable just value for the subject of $324,000 and that the subject IS NOT over assessed.

16 Reviewing all the sales presented by both parties, the evidence credibly and reliably supports a just value of $324,000 for the subject and that the subject IS NOT over assessed.

17 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 8-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 2-3%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

18 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

19 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

20 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

21 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

22 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

***"Factors to consider in deriving just valuation**. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."

The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID (marginally) establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID NOT overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS NOT shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES NOT exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS NOT satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be denied.

PETITION NO. 25-328

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: ALTO ASSET COMPANY 1 LLC
PARCEL KEY NO: 00618451

SUMMARY OF EVIDENCE

1 The Petitioner, NATASHA ELLIOTT of RYAN LLC for ALTO ASSET COMPANY 1 LLC did appear telephonically before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The Property Appraiser shows a just value of $310,040 ($132/SF heated, $127/SF adjusted), an assessed or capped value of $243,793, and a taxable value of $243,793.

3 The Petitioner estimated the just value to be $276,580.

4 *Subject Property Type:* The subject is a 2,357 heated base SF (2,387 SF adjusted) single family residence. It was constructed in 1986. The parcel is located at 11367 Outrigger Ave., Spring Hill.

5 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

6 The Petitioners evidence consists of a petition, hearing notice, correspondence, sales analysis, sales map and verbal testimony.

7 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

8 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

9 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

10 The PAO performed their analysis utilizing adjusted SF in their sales analysis report. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

11 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average.

12 The subject property had no qualified transfer (excluding portfolio sales) in the 3 years prior to the lien date.

13 The PAO supplied 3 improved sales on their statistical grid. PAO Sale 3 was an outlier or was too dissimilar to be reliable (and was not weighted). The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 9% for COS. After adjustment, these sales indicated a range of $124/SF to $139/SF adjusted before extra features (median $132/SF adjusted). The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($132.75/SF adjusted) $316,874 and that the subject IS NOT over assessed.

14 The PAO and Petitioner have 0 sale(s) in common. Sale(s) in common are analyzed herein among the PAO dataset, unless it/they are the only reliable Petitioner Sale(s).

15 The Petitioner supplied 5 improved sale comparables. Sales 1, 2, 4 & 5 was/were outliers and/or too dissimilar and not weighted. This analysis does not note garages, extra feature values, amenities or the difference between gross, adjusted and heated SF. The sales will be adjusted at 4%/year for market conditions (the Petitioner used 0% adjustment), for age/condition, adjusted for land size/value if warranted, adjusted for differences in heated SF at $100/SF heated, and in this instance a 9% COS factor is warranted. After adjustment, these remaining sales indicated a range of $317,317 to $317,317

(median $317,317). The Petitioner sales indicate a credible and reliable just value for the subject of $317,317 and that the subject IS NOT over assessed.

16 Reviewing all the sales presented by both parties, the evidence credibly and reliably supports a just value of $317,000 for the subject and that the subject IS NOT over assessed.

17 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 8-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 2-3%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

18 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

19 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

20 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

21 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

22 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

***"Factors to consider in deriving just valuation**. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."

The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID (marginally) establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID NOT overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS NOT shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES NOT exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS NOT satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be denied.

PETITION NO. 25-329

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: SFR JV 2 2022 2 BORROWER LLC
PARCEL KEY NO: 00731603

SUMMARY OF EVIDENCE

1 The Petitioner, NATASHA ELLIOTT of RYAN LLC for SFR JV 2 2022 2 BORROWER LLC did appear telephonically before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The Property Appraiser shows a just value of $308,379 ($190/SF heated, $163/SF adjusted), an assessed or capped value of $308,379, and a taxable value of $308,379.

3 The Petitioner estimated the just value to be $301,036.

4 *Subject Property Type:* The subject is a 1,623 heated base SF (1,852 SF adjusted) single family residence. It was constructed in 2013. The parcel is located at 6681 Freeport Dr., Spring Hill.

5 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

6 The Petitioners evidence consists of a petition, hearing notice, correspondence, sales analysis, sales map and verbal testimony.

7 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

8 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

9 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

10 The PAO performed their analysis utilizing adjusted SF in their sales analysis report. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

11 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average.

12 The subject property transferred for $253,700 in January of 2022.

13 The PAO supplied 3 improved sales on their statistical grid. PAO Sale 3 was an outlier or was too dissimilar to be reliable (and was not weighted). The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 9% for COS. After adjustment, these sales indicated a range of $163/SF to $168/SF adjusted before extra features (median $166/SF adjusted). The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($166/SF adjusted) $307,432 and that the subject IS over assessed.

14 The PAO and Petitioner have 0 sale(s) in common. Sale(s) in common are analyzed herein among the PAO dataset, unless it/they are the only reliable Petitioner Sale(s).

15 The Petitioner supplied 3 improved sale comparables. Sales 3 was/were outliers and/or too dissimilar and not weighted. This analysis does not note garages, extra feature values, amenities or the difference between gross, adjusted and heated SF. The sales will be adjusted at 4%/year for market conditions (the Petitioner used 0% adjustment), for age/condition, adjusted for land size/value if warranted, adjusted for differences in heated SF at $125/SF heated, and in this instance a 9% COS factor is warranted. After adjustment, these remaining sales indicated a range of $295,477 to $341,432 (median $318,454). The Petitioner sales indicate a credible and reliable just value for the subject of $318,500 and that the subject IS NOT over assessed.

16 Reviewing all the sales presented by both parties, the evidence credibly and reliably supports a just value of $312,000 for the subject and that the subject IS NOT over assessed.

17 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 8-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 2-3%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

18 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

19 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

20 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

21 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

22 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

***"Factors to consider in deriving just valuation**. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."

The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID (marginally) establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID NOT overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS NOT shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES NOT exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS NOT satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be denied.

IN RE: THE PETITION OF: SFR JV 1 2021 1 BORROWER LLC
PARCEL KEY NO: 00319168

SUMMARY OF EVIDENCE

1 The Petitioner, NATASHA ELLIOTT of RYAN LLC for SFR JV 1 2021 1 BORROWER LLC did appear telephonically before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The Property Appraiser shows a just value of $294,213 ($144/SF heated, $130/SF adjusted), an assessed or capped value of $294,213, and a taxable value of $294,213.

3 The Petitioner estimated the just value to be $283,781.

4 *Subject Property Type:* The subject is a 2,047 heated base SF (2,248 SF adjusted) single family residence. It was constructed in 2003. The parcel is located at 9297 Oak Grove St., Spring Hill.

5 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

6 The Petitioners evidence consists of a petition, hearing notice, correspondence, sales analysis, sales map and verbal testimony.

7 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

8 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

9 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

10 The PAO performed their analysis utilizing adjusted SF in their sales analysis report. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

11 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average.

12 The subject property transferred for $286,200 in June of 2021.

13 The PAO supplied 3 improved sales on their statistical grid. PAO Sale 3 was an outlier or was too dissimilar to be reliable (and was not weighted). The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 10% for COS. After adjustment, these sales indicated a range of $129/SF to $144/SF adjusted before extra features (median $136/SF adjusted). The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($136/SF adjusted) $305,728 and that the subject IS NOT over assessed.

14 The PAO and Petitioner have 1 sale(s) in common. Sale(s) in common are analyzed herein among the PAO dataset, unless it/they are the only reliable Petitioner Sale(s).

15 The Petitioner supplied 6 improved sale comparables. Sales 2, 5, and 6 was/were outliers and/or too dissimilar and not weighted. This analysis does not note garages, extra feature values, amenities or the difference between gross, adjusted and heated SF. The sales will be adjusted at 4%/year for market conditions (the Petitioner used 0% adjustment), for age/condition, adjusted for land size/value if warranted, adjusted for differences in heated SF at $105/SF heated, and in this instance a 10% COS factor is warranted. After adjustment, these remaining sales indicated a range of $284,760 to $361,260 (median $323,010). The Petitioner sales indicate a credible and reliable just value for the subject of $300,000 and that the subject IS NOT over assessed.

16 Reviewing all the sales presented by both parties, the evidence credibly and reliably supports a just value of $302,500 for the subject and that the subject IS NOT over assessed.

17 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 8-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 2-3%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

18 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

19 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

20 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

21 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

22 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

***"Factors to consider in deriving just valuation**. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."

The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID (marginally) establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID NOT overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS NOT shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES NOT exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS NOT satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be denied.

FINDINGS OF FACT

ADMISSIBILITY OF EVIDENCE:

The evidence submitted by the Property Appraiser and Petitioner is deemed relevant, credible and admissible with no objections raised. The evidence for the both parties was admitted.

ADVISORY MEMORANDUM:

A recent memorandum was provided by Stephen J. Keller, Chief Legal Counsel for Property Tax Litigation and VAB Oversight, Florida Department of Revenue, in response to questions/ issues presented by Ms. Sheryl A Edwards, Legal Counsel to the Sarasota County Value Adjustment Board. The Memorandum is dated March 25, 2022.

Subject: Advisory Assistance on Mathematically Correct Methods for Deducting Costs of Sale in the Income Capitalization Approach.

"Exhibits 2 and 3 attached hereto contain statewide summaries showing, for 2020 and 2021, respectively, the cost of sale deductions each county applied in arriving at just valuations and then reported to DOR on Form DR-493. Almost all of Florida's 67 counties, including Sarasota County, reported cost of sale deductions of 15 percent and this has been the accepted standard practice in Florida for several decades.

Given that property appraisers' cost of sale deductions are a long-standing, well-known, and widely accepted practice and are generally made uniformly and across-the-board in accordance with applicable law, ***such deductions are a professionally accepted appraisal practice, which VABs and their special magistrates must apply as well."***

"Consistent with law and professionally accepted appraisal practices, SCPAO has an expressed, professionally accepted policy of making and reporting 15 percent cost of sale deductions in arriving at just valuations under Florida law. Accordingly, in just valuation reviews, the Sarasota County VAB and its special magistrates are compelled by law to correctly apply 15 percent cost of sale deductions without double-counting."

Property Tax Overview Bulletin 11-01, Provided by Steven Keller, Office of General Counsel (Department of Revenue, indicates the following:

FLORIDA DEPARTMENT OF REVENUE

PROPERTY TAX INFORMATIONAL BULLETIN

Value Adjustment Board Petitions and the Eighth Criterion

This advisement addresses issues regarding the eighth just valuation criterion in subsection 193.011(8), F.S., which must be properly considered in administrative reviews. The Department's value adjustment board training contains more information on the eighth criterion. This bulletin must be used in conjunction with the training and consistent with law.

Advisement

1. The Department's value adjustment board training and this bulletin supersede prior Department letters OPN 90-0039 (dated August 20, 1990) and OPN 95-0002 (dated January 9, 1995).

2. In accordance with Florida Statutes and applicable case law, applicability of the eighth criterion in subsection 193.011(8), F.S., is not limited to a sales comparison valuation approach or to property that was sold. This bulletin addresses the proper consideration of the eighth criterion in administrative reviews involving the income capitalization and cost less depreciation approaches to valuation of real property.

3. The eighth criterion must be properly considered in the income capitalization and cost less depreciation approaches. This requires proper consideration of an adjustment for both costs of sale and personal property where appropriate. See subsection 193.011(8), F.S.

4. When justified by sufficiently relevant and credible evidence, the Board or special magistrate should make an eighth criterion adjustment to a value indication developed by the income capitalization or cost less depreciation approach to arrive at just valuation. This adjustment must include any adjustment necessary to exclude the just value of personal property from just valuations of real property.

Analysis

In long-established and accepted practice, Florida property appraisers routinely apply across-the board eighth criterion adjustments in just valuations of real property, without regard to the valuation approach used or whether the property was sold. See Forms DR-493 reported annually by property appraisers, and Southern Bell Telephone and Telegraph Co. v. Broward County, 665 So.2d 272 (Fla. 4th DCA 1995) review denied 673 So.2d 30 (Fla. 1996). Also, see Louisville and National Railroad Co. v. Department of Revenue, State of Fla., 736 F.2d 1495 (11th Cir.(Fla.) July 24, 1984). An eighth criterion adjustment made in the just valuation of a single parcel was approved in Roden v. GAC Liquidating Trust, 462 So.2d 92 (Fla. 2nd DCA 1985).

When an actual sale of the property has not occurred, the appraiser must, in arriving at just valuation, place himself or herself in the position of the parties to a hypothetical sale. See Southern Bell Telephone and Telegraph Co. v. Dade County, 275 So.2d 4 (Fla. 1973) and Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). ***The just valuation standards of section 193.011, F.S., which include the eighth criterion, must be properly considered regardless of the valuation approach used and whether the property was sold.***

The case of Bystrom v. Equitable Life Assurance Society, 416 So.2d 1133 (Fla. 3rd Conclusion DCA 1982) reviewed a 1978 assessment based on 1977 statutes. Later, in 1979, the eighth criterion was amended to add a personal property component. See Chapter 79-334, Laws of Florida. The law on which the long-established operation of the eighth criterion is based has changed substantially since the assessment date in Bystrom.

Conclusion

The eighth criterion must be properly considered in each of the three approaches to valuation. When justified by sufficiently relevant and credible evidence, the Board or special magistrate should make an eighth criterion adjustment in any of the three valuation approaches.

Board attorneys should ensure that all Board members and special magistrates receive a copy of this bulletin. Questions on this bulletin can be sent by e-mail to VAB@dor.state.fl.us.

The **DR-493 form (Hernando County)**, indicates that a 15% adjustment should be made for the subject's use code.

The Property Appraiser indicates that the cost of sale is accounted for internally, using their CAMA system, and has been considered. However, in this case, the Property Appraiser did not present competent, substantial evidence showing that the Property Appraiser applied the 15% cost of sale deduction reflected in their DR-493 form (Hernando County) for the subject property. Therefore, the Property Appraiser has failed to establish a presumption of correctness. Based upon the evidence and testimony presented at the hearing, the Petitioner did prove by a preponderance of the evidence that the Property Appraiser's just value does not represent just value. Petitioner then proved just value by competent, substantial evidence and the new value is established. Therefore, the petition is **GRANTED**.

HEARING SUMMARY

The subject is a single-family residence.

PROPERTY APPRAISER PRESENTATION

The Property Appraiser provided a sales analysis report, containing three sales of similar single-family residences that closed in 2024. Each of the sales are in the same or similar neighborhood to the subject. The subject, as well as the comparables are presented and analyzed on "Adjusted Square Footage".

The sales indicate adjusted values (adjusted 15% for Cost of Sale/ COS, per Department of Revenue/ DOR requirements) of approximately $121/ SF and $246,500, overall. The subject assessment reflects a value of $133/ SF and $279,179, overall, above the value indication. Therefore, based on this sales data, the subject assessment is unsupported.

PETITIONER PRESENTATION

The Petitioner provided several sales for consideration. The Petitioner's sales data is analyzed based on total square footage, while the Property Appraiser's analysis is based on adjusted square footage.

Property Appraiser Sales Year Built difference: 9 Years

Petitioner Sales' Year Built difference: 17 Years

Property Appraiser Sales Average Size Difference: 5%

Petitioner Sales's Average Size Difference: 1%

In this case, the Property Appraiser indicated that one of the Petitioner's sales is not on MLS. This sale represents a significant outlier. Removing the outlier results in the following values:

CONCLUSION	**$250,000**					

CONCLUSION

The best market evidence available (Property Appraiser Sales) supports an adjustment to the assessment **($250,000)**.

CONCLUSION OF LAW

The evidence submitted by the Property Appraiser and Petitioner is deemed relevant, credible and admissible with no objections raised. The evidence for the both parties was admitted.

The Property Appraiser indicates that the cost of sale is accounted for internally, using their CAMA system, and has been considered. However, in this case, the Property Appraiser did not present competent, substantial evidence showing that the Property Appraiser applied the 15% cost of sale deduction reflected in their DR-493 form (Hernando County) for the subject property. Therefore, the Property Appraiser has failed to establish a presumption of correctness. Based upon the evidence and testimony presented at the hearing, the Petitioner did prove by a preponderance of the evidence that the Property Appraiser's just value does not represent just value. Petitioner then proved just value by competent, substantial evidence and the new value is established. Therefore, the petition is **GRANTED**.

FINDINGS OF FACT

ADMISSIBILITY OF EVIDENCE:

The evidence submitted by the Property Appraiser and Petitioner is deemed relevant, credible and admissible with no objections raised. The evidence for the both parties was admitted.

ADVISORY MEMORANDUM:

A recent memorandum was provided by Stephen J. Keller, Chief Legal Counsel for Property Tax Litigation and VAB Oversight, Florida Department of Revenue, in response to questions/ issues presented by Ms. Sheryl A Edwards, Legal Counsel to the Sarasota County Value Adjustment Board. The Memorandum is dated March 25, 2022.

Subject: Advisory Assistance on Mathematically Correct Methods for Deducting Costs of Sale in the Income Capitalization Approach.

"Exhibits 2 and 3 attached hereto contain statewide summaries showing, for 2020 and 2021, respectively, the cost of sale deductions each county applied in arriving at just valuations and then reported to DOR on Form DR-493. Almost all of Florida's 67 counties, including Sarasota County, reported cost of sale deductions of 15 percent and this has been the accepted standard practice in Florida for several decades.

Given that property appraisers' cost of sale deductions are a long-standing, well-known, and widely accepted practice and are generally made uniformly and across-the-board in accordance with applicable law, ***such deductions are a professionally accepted appraisal practice, which VABs and their special magistrates must apply as well."***

"Consistent with law and professionally accepted appraisal practices, SCPAO has an expressed, professionally accepted policy of making and reporting 15 percent cost of sale deductions in arriving at just valuations under Florida law. Accordingly, in just valuation reviews, the Sarasota County VAB and its special magistrates are compelled by law to correctly apply 15 percent cost of sale deductions without double-counting."

Property Tax Overview Bulletin 11-01, Provided by Steven Keller, Office of General Counsel (Department of Revenue, indicates the following:

FLORIDA DEPARTMENT OF REVENUE

PROPERTY TAX INFORMATIONAL BULLETIN

Value Adjustment Board Petitions and the Eighth Criterion

This advisement addresses issues regarding the eighth just valuation criterion in subsection 193.011(8), F.S., which must be properly considered in administrative reviews. The Department's value adjustment board training contains more information on the eighth criterion. This bulletin must be used in conjunction with the training and consistent with law.

Advisement

1. The Department's value adjustment board training and this bulletin supersede prior Department letters OPN 90-0039 (dated August 20, 1990) and OPN 95-0002 (dated January 9, 1995).

2. In accordance with Florida Statutes and applicable case law, applicability of the eighth criterion in subsection 193.011(8), F.S., is not limited to a sales comparison valuation approach or to property that was sold. This bulletin addresses the proper consideration of the eighth criterion in administrative reviews involving the income capitalization and cost less depreciation approaches to valuation of real property.

3. The eighth criterion must be properly considered in the income capitalization and cost less depreciation approaches. This requires proper consideration of an adjustment for both costs of sale and personal property where appropriate. See subsection 193.011(8), F.S.

4. When justified by sufficiently relevant and credible evidence, the Board or special magistrate should make an eighth criterion adjustment to a value indication developed by the income capitalization or cost less depreciation approach to arrive at just valuation. This adjustment must include any adjustment necessary to exclude the just value of personal property from just valuations of real property.

Analysis

In long-established and accepted practice, Florida property appraisers routinely apply across-the board eighth criterion adjustments in just valuations of real property, without regard to the valuation approach used or whether the property was sold. See Forms DR-493 reported annually by property appraisers, and Southern Bell Telephone and Telegraph Co. v. Broward County, 665 So.2d 272 (Fla. 4th DCA 1995) review denied 673 So.2d 30 (Fla. 1996). Also, see Louisville and National Railroad Co. v. Department of Revenue, State of Fla., 736 F.2d 1495 (11th Cir.(Fla.) July 24, 1984). An eighth criterion adjustment made in the just valuation of a single parcel was approved in Roden v. GAC Liquidating Trust, 462 So.2d 92 (Fla. 2nd DCA 1985).

When an actual sale of the property has not occurred, the appraiser must, in arriving at just valuation, place himself or herself in the position of the parties to a hypothetical sale. See Southern Bell Telephone and Telegraph Co. v. Dade County, 275 So.2d 4 (Fla. 1973) and Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). ***The just valuation standards of section 193.011, F.S., which include the eighth criterion, must be properly considered regardless of the valuation approach used and whether the property was sold.***

The case of Bystrom v. Equitable Life Assurance Society, 416 So.2d 1133 (Fla. 3rd Conclusion DCA 1982) reviewed a 1978 assessment based on 1977 statutes. Later, in 1979, the eighth criterion was amended to add a personal property component. See Chapter 79-334, Laws of Florida. The law on which the long-established operation of the eighth criterion is based has changed substantially since the assessment date in Bystrom.

Conclusion

The eighth criterion must be properly considered in each of the three approaches to valuation. When justified by sufficiently relevant and credible evidence, the Board or special magistrate should make an eighth criterion adjustment in any of the three valuation approaches.

Board attorneys should ensure that all Board members and special magistrates receive a copy of this bulletin. Questions on this bulletin can be sent by e-mail to VAB@dor.state.fl.us.

The **DR-493 form (Hernando County)**, indicates that a 15% adjustment should be made for the subject's use code.

The Property Appraiser indicates that the cost of sale is accounted for internally (CAMA), and has been considered. However, in this case, the Property Appraiser did not physically show any cost of sale deduction in their analysis for this property. Therefore, the Property Appraiser has failed to establish their presumption of correctness. The Petitioner did not, however, prove by a preponderance of the evidence that the Property Appraiser's just value does not represent just value nor did the Petitioner prove that the Property Appraiser's just valuation is arbitrarily based on appraisal practices that are different from the appraisal practices generally applied by the Property Appraiser to comparable property within the same county. The Petitioner did not present competent, substantial evidence to reduce the value below the market value provided by the Property Appraiser. Therefore, the petition is **DENIED.**

HEARING SUMMARY

The subject is a single-family residence.

PROPERTY APPRAISER PRESENTATION

The Property Appraiser provided a sales analysis report, containing three sales of similar single-family residences that closed in 2024. Each of the sales are in the same or similar neighborhood to the subject. The subject, as well as the comparables are presented and analyzed on "Adjusted Square Footage".

The sales indicate adjusted values (adjusted 15% for Cost of Sale/ COS, per Department of Revenue/ DOR requirements) of approximately $122/ SF and $289,000, overall. The subject assessment reflects a value of $112/ SF and $266,152, overall, above the value indication. Therefore, based on this sales data, the subject assessment is supported.

PETITIONER PRESENTATION

The Petitioner provided several sales for consideration. The Petitioner's sales data is analyzed based on total square footage, while the Property Appraiser's analysis is based on adjusted square footage. However, the Petitioner's sales are not more similar to the subject than the Property Appraiser's. For example;

Property Appraiser Sales Year Built difference: 3 Years

Petitioner Sales' Year Built difference: 2 Years

Property Appraiser Sales Average Size Difference: 1%

Petitioner Sales's Average Size Difference: 25%

DIFFERENCE (SF)			687			
DIFFERENCE (LARGER/ SMALLER)			25%			

CONCLUSION

The Property Appraiser's sales are more similar to the subject, and support the assessment.

CONCLUSION OF LAW

The evidence submitted by the Property Appraiser and Petitioner is deemed relevant, credible and admissible with no objections raised by either party. The evidence for both parties was admitted.

The Property Appraiser did not physically show any cost of sale deduction in their analysis for this property. Therefore, the Property Appraiser has failed to establish their presumption of correctness. The Petitioner did not, however, prove by a preponderance of the evidence that the Property Appraiser's just value does not represent just value nor did the Petitioner prove that the Property Appraiser's just valuation is arbitrarily based on appraisal practices that are different from the appraisal practices generally applied by the Property Appraiser to comparable property within the same county. The Petitioner did not present competent, substantial evidence to reduce the value below the market value provided by the Property Appraiser. Therefore, the petition is **DENIED.**

Property Tax Overview Bulletin 11-01, Provided by Steven Keller, Office of General Counsel (Department of Revenue, indicates the following:

FLORIDA DEPARTMENT OF REVENUE

PROPERTY TAX INFORMATIONAL BULLETIN

Value Adjustment Board Petitions and the Eighth Criterion

This advisement addresses issues regarding the eighth just valuation criterion in subsection 193.011(8), F.S., which must be properly considered in administrative reviews. The Department's value adjustment board training contains more information on the eighth criterion. This bulletin must be used in conjunction with the training and consistent with law.

Advisement

1. The Department's value adjustment board training and this bulletin supersede prior Department letters OPN 90-0039 (dated August 20, 1990) and OPN 95-0002 (dated January 9, 1995).

2. In accordance with Florida Statutes and applicable case law, applicability of the eighth criterion in subsection 193.011(8), F.S., is not limited to a sales comparison valuation approach or to property that was sold. This bulletin addresses the proper consideration of the eighth criterion in administrative reviews involving the income capitalization and cost less depreciation approaches to valuation of real property.

3. The eighth criterion must be properly considered in the income capitalization and cost less depreciation approaches. This requires proper consideration of an adjustment for both costs of sale and personal property where appropriate. See subsection 193.011(8), F.S.

4. When justified by sufficiently relevant and credible evidence, the Board or special magistrate should make an eighth criterion adjustment to a value indication developed by the income capitalization or cost less depreciation approach to arrive at just valuation. This adjustment must include any adjustment necessary to exclude the just value of personal property from just valuations of real property.

Analysis

In long-established and accepted practice, Florida property appraisers routinely apply across-the board eighth criterion adjustments in just valuations of real property, without regard to the valuation approach used or whether the property was sold. See Forms DR-493 reported annually by property appraisers, and Southern Bell Telephone and Telegraph Co. v. Broward County, 665 So.2d 272 (Fla. 4th DCA 1995) review denied 673 So.2d 30 (Fla. 1996). Also, see Louisville and National Railroad Co. v. Department of Revenue, State of Fla., 736 F.2d 1495 (11th Cir.(Fla.) July 24, 1984). An eighth criterion adjustment made in the just valuation of a single parcel was approved in Roden v. GAC Liquidating Trust, 462 So.2d 92 (Fla. 2nd DCA 1985).

When an actual sale of the property has not occurred, the appraiser must, in arriving at just valuation, place himself or herself in the position of the parties to a hypothetical sale. See Southern Bell Telephone and Telegraph Co. v. Dade County, 275 So.2d 4 (Fla. 1973) and Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). ***The just valuation standards of section 193.011, F.S., which include the eighth criterion, must be properly considered regardless of the valuation approach used and whether the property was sold.***

The case of Bystrom v. Equitable Life Assurance Society, 416 So.2d 1133 (Fla. 3rd Conclusion DCA 1982) reviewed a 1978 assessment based on 1977 statutes. Later, in 1979, the eighth criterion was amended to add a personal property component. See Chapter 79-334, Laws of Florida. The law on which the long-established operation of the eighth criterion is based has changed substantially since the assessment date in Bystrom.

Conclusion

The eighth criterion must be properly considered in each of the three approaches to valuation. When justified by sufficiently relevant and credible evidence, the Board or special magistrate should make an eighth criterion adjustment in any of the three valuation approaches.

Board attorneys should ensure that all Board members and special magistrates receive a copy of this bulletin. Questions on this bulletin can be sent by e-mail to VAB@dor.state.fl.us.

The **DR-493 form (Hernando County)**, indicates that a 15% adjustment should be made for the subject's use code.

The Property Appraiser indicates that the cost of sale is accounted for internally, using their CAMA system, and has been considered. However, in this case, the Property Appraiser did not present competent, substantial evidence showing that the Property Appraiser applied the 15% cost of sale deduction reflected in their DR-493 form (Hernando County) for the subject property. Therefore, the Property Appraiser has failed to establish a presumption of correctness. Based upon the evidence and testimony presented at the hearing, the Petitioner did prove by a preponderance of the evidence that the Property Appraiser's just value does not represent just value. Petitioner then proved just value by competent, substantial evidence and the new value is established. Therefore, the petition is **GRANTED**.

HEARING SUMMARY

The subject is a single-family residence.

PROPERTY APPRAISER PRESENTATION

The Property Appraiser provided a sales analysis report, containing three sales of similar single-family residences that closed in 2024. Each of the sales are in the same or similar neighborhood to the subject. The subject, as well as the comparables are presented and analyzed on "Adjusted Square Footage".

The sales indicate adjusted values (adjusted 15% for Cost of Sale/ COS, per Department of Revenue/ DOR requirements) of approximately $139/ SF and $255,000, overall. The subject assessment reflects a value of $144/ SF and $268,000, overall, above the value indication. Therefore, based on this sales data, the subject assessment is unsupported.

SUBJECT ASSESSMENT	**$268,085**				**$129.51**	**/SF**
CONCLUSION	**$265,000**					

CONCLUSION

The best market evidence available (Property Appraiser Sales) supports an adjustment to the assessment **($260,000)**.

CONCLUSION OF LAW

The evidence submitted by the Property Appraiser and Petitioner is deemed relevant, credible and admissible with no objections raised. The evidence for the both parties was admitted.

The Property Appraiser indicates that the cost of sale is accounted for internally, using their CAMA system, and has been considered. However, in this case, the Property Appraiser did not present competent, substantial evidence showing that the Property Appraiser applied the 15% cost of sale deduction reflected in their DR-493 form (Hernando County) for the subject property. Therefore, the Property Appraiser has failed to establish a presumption of correctness. Based upon the evidence and testimony presented at the hearing, the Petitioner did prove by a preponderance of the evidence that the Property Appraiser's just value does not represent just value. Petitioner then proved just value by competent, substantial evidence and the new value is established. Therefore, the petition is **GRANTED**.

FINDINGS OF FACT

ADMISSIBILITY OF EVIDENCE:

The evidence submitted by the Property Appraiser and Petitioner is deemed relevant, credible and admissible with no objections raised. The evidence for the both parties was admitted.

ADVISORY MEMORANDUM:

A recent memorandum was provided by Stephen J. Keller, Chief Legal Counsel for Property Tax Litigation and VAB Oversight, Florida Department of Revenue, in response to questions/ issues presented by Ms. Sheryl A Edwards, Legal Counsel to the Sarasota County Value Adjustment Board. The Memorandum is dated March 25, 2022.

Subject: Advisory Assistance on Mathematically Correct Methods for Deducting Costs of Sale in the Income Capitalization Approach.

"Exhibits 2 and 3 attached hereto contain statewide summaries showing, for 2020 and 2021, respectively, the cost of sale deductions each county applied in arriving at just valuations and then reported to DOR on Form DR-493. Almost all of Florida's 67 counties, including Sarasota County, reported cost of sale deductions of 15 percent and this has been the accepted standard practice in Florida for several decades.

Given that property appraisers' cost of sale deductions are a long-standing, well-known, and widely accepted practice and are generally made uniformly and across-the-board in accordance with applicable law, ***such deductions are a professionally accepted appraisal practice, which VABs and their special magistrates must apply as well."***

"Consistent with law and professionally accepted appraisal practices, SCPAO has an expressed, professionally accepted policy of making and reporting 15 percent cost of sale deductions in arriving at just valuations under Florida law. Accordingly, in just valuation reviews, the Sarasota County VAB and its special magistrates are compelled by law to correctly apply 15 percent cost of sale deductions without double-counting."

Property Tax Overview Bulletin 11-01, Provided by Steven Keller, Office of General Counsel (Department of Revenue, indicates the following:

FLORIDA DEPARTMENT OF REVENUE

PROPERTY TAX INFORMATIONAL BULLETIN

Value Adjustment Board Petitions and the Eighth Criterion

This advisement addresses issues regarding the eighth just valuation criterion in subsection 193.011(8), F.S., which must be properly considered in administrative reviews. The Department's value adjustment board training contains more information on the eighth criterion. This bulletin must be used in conjunction with the training and consistent with law.

Advisement

1. The Department's value adjustment board training and this bulletin supersede prior Department letters OPN 90-0039 (dated August 20, 1990) and OPN 95-0002 (dated January 9, 1995).

2. In accordance with Florida Statutes and applicable case law, applicability of the eighth criterion in subsection 193.011(8), F.S., is not limited to a sales comparison valuation approach or to property that was sold. This bulletin addresses the proper consideration of the eighth criterion in administrative reviews involving the income capitalization and cost less depreciation approaches to valuation of real property.

3. The eighth criterion must be properly considered in the income capitalization and cost less depreciation approaches. This requires proper consideration of an adjustment for both costs of sale and personal property where appropriate. See subsection 193.011(8), F.S.

4. When justified by sufficiently relevant and credible evidence, the Board or special magistrate should make an eighth criterion adjustment to a value indication developed by the income capitalization or cost less depreciation approach to arrive at just valuation. This adjustment must include any adjustment necessary to exclude the just value of personal property from just valuations of real property.

Analysis

In long-established and accepted practice, Florida property appraisers routinely apply across-the board eighth criterion adjustments in just valuations of real property, without regard to the valuation approach used or whether the property was sold. See Forms DR-493 reported annually by property appraisers, and Southern Bell Telephone and Telegraph Co. v. Broward County, 665 So.2d 272 (Fla. 4th DCA 1995) review denied 673 So.2d 30 (Fla. 1996). Also, see Louisville and National Railroad Co. v. Department of Revenue, State of Fla., 736 F.2d 1495 (11th Cir.(Fla.) July 24, 1984). An eighth criterion adjustment made in the just valuation of a single parcel was approved in Roden v. GAC Liquidating Trust, 462 So.2d 92 (Fla. 2nd DCA 1985).

When an actual sale of the property has not occurred, the appraiser must, in arriving at just valuation, place himself or herself in the position of the parties to a hypothetical sale. See Southern Bell Telephone and Telegraph Co. v. Dade County, 275 So.2d 4 (Fla. 1973) and Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). ***The just valuation standards of section 193.011, F.S., which include the eighth criterion, must be properly considered regardless of the valuation approach used and whether the property was sold.***

The case of Bystrom v. Equitable Life Assurance Society, 416 So.2d 1133 (Fla. 3rd Conclusion DCA 1982) reviewed a 1978 assessment based on 1977 statutes. Later, in 1979, the eighth criterion was amended to add a personal property component. See Chapter 79-334, Laws of Florida. The law on which the long-established operation of the eighth criterion is based has changed substantially since the assessment date in Bystrom.

Conclusion

The eighth criterion must be properly considered in each of the three approaches to valuation. When justified by sufficiently relevant and credible evidence, the Board or special magistrate should make an eighth criterion adjustment in any of the three valuation approaches.

Board attorneys should ensure that all Board members and special magistrates receive a copy of this bulletin. Questions on this bulletin can be sent by e-mail to VAB@dor.state.fl.us.

The **DR-493 form (Hernando County)**, indicates that a 15% adjustment should be made for the subject's use code.

The Property Appraiser indicates that the cost of sale is accounted for internally, using their CAMA system, and has been considered. However, in this case, the Property Appraiser did not present competent, substantial evidence showing that the Property Appraiser applied the 15% cost of sale deduction reflected in their DR-493 form (Hernando County) for the subject property. Therefore, the Property Appraiser has failed to establish a presumption of correctness. Based upon the evidence and testimony presented at the hearing, the Petitioner did prove by a preponderance of the evidence that the Property Appraiser's just value does not represent just value. Petitioner then proved just value by competent, substantial evidence and the new value is established. Therefore, the petition is **GRANTED**.

HEARING SUMMARY

The subject is a single-family residence.

PROPERTY APPRAISER PRESENTATION

The Property Appraiser provided a sales analysis report, containing three sales of similar single-family residences that closed in 2024. Each of the sales are in the same or similar neighborhood to the subject. The subject, as well as the comparables are presented and analyzed on "Adjusted Square Footage".

The sales indicate adjusted values (adjusted 15% for Cost of Sale/ COS, per Department of Revenue/ DOR requirements) of approximately $130/ SF and $300,050, overall. The subject assessment reflects a value of $138/ SF and $326,733, overall, above the value indication. Therefore, based on this sales data, the subject assessment is unsupported.

CONCLUSION	**$305,000**					

PETITIONER PRESENTATION

The Petitioner provided several sales for consideration. The Petitioner's sales data is analyzed based on total square footage, while the Property Appraiser's analysis is based on adjusted square footage. However, the Petitioner's sales are not more similar to the subject than the Property Appraiser's. For example;

Property Appraiser Sales Year Built difference: 2 Years

Petitioner Sales' Year Built difference: 5 Years

Property Appraiser Sales Average Size Difference: 3%

Petitioner Sales's Average Size Difference: 30%

EXHIBIT D

PET SALES						
ADDRESS	**SALE PRICE**	**YEAR BLT**	**TOTAL SF**	**ADJ. SF**	**$/ SF**	**COMMENTS**
1040 FIRWOOD	$306,000	2004	2,230		$137.22	
13406 MONTEREY	$267,750	2003	1,666		$160.71	
13426 AMANDA	$331,500	1997	1,939		$170.96	
AVERAGE	**$301,750**	**2001**	**1,945**		**$156.30**	
MEDIAN	**$306,000**		**1,939**		**$160.71**	
SUBJECT (ADJ. SF)	**$326,733**	**5 YRS**	**2,758**		**$118.47**	
DIFFERENCE (SF)			816			
DIFFERENCE (LARGER/ SMALLER)			30%			

CONCLUSION

The Property Appraiser's sales are more similar to the subject. However, the best market evidence available (Property Appraiser Sales) supports an adjustment to the assessment **($305,000)**.

CONCLUSION OF LAW

The evidence submitted by the Property Appraiser and Petitioner is deemed relevant, credible and admissible with no objections raised. The evidence for the both parties was admitted.

The Property Appraiser indicates that the cost of sale is accounted for internally, using their CAMA system, and has been considered. However, in this case, the Property Appraiser did not present competent, substantial evidence showing that the Property Appraiser applied the 15% cost of sale deduction reflected in their DR-493 form (Hernando County) for the subject property. Therefore, the Property Appraiser has failed to establish a presumption of correctness. Based upon the evidence and testimony presented at the hearing, the Petitioner did prove by a preponderance of the evidence that the Property Appraiser's just value does not represent just value. Petitioner then proved just value by competent, substantial evidence and the new value is established. Therefore, the petition is **GRANTED**.

"Consistent with law and professionally accepted appraisal practices, SCPAO has an expressed, professionally accepted policy of making and reporting 15 percent cost of sale deductions in arriving at just valuations under Florida law. Accordingly, in just valuation reviews, the Sarasota County VAB and its special magistrates are compelled by law to correctly apply 15 percent cost of sale deductions without double-counting."

Property Tax Overview Bulletin 11-01, Provided by Steven Keller, Office of General Counsel (Department of Revenue, indicates the following:

FLORIDA DEPARTMENT OF REVENUE

PROPERTY TAX INFORMATIONAL BULLETIN

Value Adjustment Board Petitions and the Eighth Criterion

This advisement addresses issues regarding the eighth just valuation criterion in subsection 193.011(8), F.S., which must be properly considered in administrative reviews. The Department's value adjustment board training contains more information on the eighth criterion. This bulletin must be used in conjunction with the training and consistent with law.

Advisement

1. The Department's value adjustment board training and this bulletin supersede prior Department letters OPN 90-0039 (dated August 20, 1990) and OPN 95-0002 (dated January 9, 1995).

2. In accordance with Florida Statutes and applicable case law, applicability of the eighth criterion in subsection 193.011(8), F.S., is not limited to a sales comparison valuation approach or to property that was sold. This bulletin addresses the proper consideration of the eighth criterion in administrative reviews involving the income capitalization and cost less depreciation approaches to valuation of real property.

3. The eighth criterion must be properly considered in the income capitalization and cost less depreciation approaches. This requires proper consideration of an adjustment for both costs of sale and personal property where appropriate. See subsection 193.011(8), F.S.

4. When justified by sufficiently relevant and credible evidence, the Board or special magistrate should make an eighth criterion adjustment to a value indication developed by the income capitalization or cost less depreciation approach to arrive at just valuation. This adjustment must include any adjustment necessary to exclude the just value of personal property from just valuations of real property.

Analysis

In long-established and accepted practice, Florida property appraisers routinely apply across-the board eighth criterion adjustments in just valuations of real property, without regard to the valuation approach used or whether the property was sold. See Forms DR-493 reported annually by property appraisers, and Southern Bell Telephone and Telegraph Co. v. Broward County, 665 So.2d 272 (Fla. 4th DCA 1995) review denied 673 So.2d 30 (Fla. 1996). Also, see Louisville and National Railroad Co. v. Department of Revenue, State of Fla., 736 F.2d 1495 (11th Cir.(Fla.) July 24, 1984). An eighth criterion adjustment made in the just valuation of a single parcel was approved in Roden v. GAC Liquidating Trust, 462 So.2d 92 (Fla. 2nd DCA 1985).

When an actual sale of the property has not occurred, the appraiser must, in arriving at just valuation, place himself or herself in the position of the parties to a hypothetical sale. See Southern Bell Telephone and Telegraph Co. v. Dade County, 275 So.2d 4 (Fla. 1973) and Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). ***The just valuation standards of section 193.011, F.S., which include the eighth criterion, must be properly considered regardless of the valuation approach used and whether the property was sold.***

The case of Bystrom v. Equitable Life Assurance Society, 416 So.2d 1133 (Fla. 3rd Conclusion DCA 1982) reviewed a 1978 assessment based on 1977 statutes. Later, in 1979, the eighth criterion was amended to add a personal property component. See Chapter 79-334, Laws of Florida. The law on which the long-established operation of the eighth criterion is based has changed substantially since the assessment date in Bystrom.

Conclusion

The eighth criterion must be properly considered in each of the three approaches to valuation. When justified by sufficiently relevant and credible evidence, the Board or special magistrate should make an eighth criterion adjustment in any of the three valuation approaches.

Board attorneys should ensure that all Board members and special magistrates receive a copy of this bulletin. Questions on this bulletin can be sent by e-mail to VAB@dor.state.fl.us.

The **DR-493 form (Hernando County)**, indicates that a 15% adjustment should be made for the subject's use code.

The Property Appraiser indicates that the cost of sale is accounted for internally, using their CAMA system, and has been considered. However, in this case, the Property Appraiser did not present competent, substantial evidence showing that the Property Appraiser applied the 15% cost of sale deduction reflected in their DR-493 form (Hernando County) for the subject property. Therefore, the Property Appraiser has failed to establish a presumption of correctness. Based upon the evidence and testimony presented at the hearing, the Petitioner did prove by a preponderance of the evidence that the Property Appraiser's just value does not represent just value. Petitioner then proved just value by competent, substantial evidence and the new value is established. Therefore, the petition is **GRANTED**.

HEARING SUMMARY

The subject is a single-family residence.

PROPERTY APPRAISER PRESENTATION

The Property Appraiser provided a sales analysis report, containing three sales of similar single-family residences that closed in 2024. Each of the sales are in the same or similar neighborhood to the subject. The subject, as well as the comparables are presented and analyzed on "Adjusted Square Footage".

The sales indicate adjusted values (adjusted 15% for Cost of Sale/ COS, per Department of Revenue/ DOR requirements) of approximately $119/ SF and $297,500, overall. The subject assessment reflects a value of $154/ SF and $419,213, overall, above the value indication. Therefore, based on this sales data, the subject assessment is unsupported.

FINDINGS OF FACT

ADMISSIBILITY OF EVIDENCE:

The evidence submitted by the Property Appraiser and Petitioner is deemed relevant, credible and admissible with no objections raised. The evidence for the both parties was admitted.

ADVISORY MEMORANDUM:

A recent memorandum was provided by Stephen J. Keller, Chief Legal Counsel for Property Tax Litigation and VAB Oversight, Florida Department of Revenue, in response to questions/ issues presented by Ms. Sheryl A Edwards, Legal Counsel to the Sarasota County Value Adjustment Board. The Memorandum is dated March 25, 2022.

Subject: Advisory Assistance on Mathematically Correct Methods for Deducting Costs of Sale in the Income Capitalization Approach.

"Exhibits 2 and 3 attached hereto contain statewide summaries showing, for 2020 and 2021, respectively, the cost of sale deductions each county applied in arriving at just valuations and then reported to DOR on Form DR-493. Almost all of Florida's 67 counties, including Sarasota County, reported cost of sale deductions of 15 percent and this has been the accepted standard practice in Florida for several decades.

Given that property appraisers' cost of sale deductions are a long-standing, well-known, and widely accepted practice and are generally made uniformly and across-the-board in accordance with applicable law, ***such deductions are a professionally accepted appraisal practice, which VABs and their special magistrates must apply as well."***

"Consistent with law and professionally accepted appraisal practices, SCPAO has an expressed, professionally accepted policy of making and reporting 15 percent cost of sale deductions in arriving at just valuations under Florida law. Accordingly, in just valuation reviews, the Sarasota County VAB and its special magistrates are compelled by law to correctly apply 15 percent cost of sale deductions without double-counting."

Property Tax Overview Bulletin 11-01, Provided by Steven Keller, Office of General Counsel (Department of Revenue, indicates the following:

FLORIDA DEPARTMENT OF REVENUE

PROPERTY TAX INFORMATIONAL BULLETIN

Value Adjustment Board Petitions and the Eighth Criterion

This advisement addresses issues regarding the eighth just valuation criterion in subsection 193.011(8), F.S., which must be properly considered in administrative reviews. The Department's value adjustment board training contains more information on the eighth criterion. This bulletin must be used in conjunction with the training and consistent with law.

Advisement

1. The Department's value adjustment board training and this bulletin supersede prior Department letters OPN 90-0039 (dated August 20, 1990) and OPN 95-0002 (dated January 9, 1995).

2. In accordance with Florida Statutes and applicable case law, applicability of the eighth criterion in subsection 193.011(8), F.S., is not limited to a sales comparison valuation approach or to property that was sold. This bulletin addresses the proper consideration of the eighth criterion in administrative reviews involving the income capitalization and cost less depreciation approaches to valuation of real property.

3. The eighth criterion must be properly considered in the income capitalization and cost less depreciation approaches. This requires proper consideration of an adjustment for both costs of sale and personal property where appropriate. See subsection 193.011(8), F.S.

4. When justified by sufficiently relevant and credible evidence, the Board or special magistrate should make an eighth criterion adjustment to a value indication developed by the income capitalization or cost less depreciation approach to arrive at just valuation. This adjustment must include any adjustment necessary to exclude the just value of personal property from just valuations of real property.

Analysis

In long-established and accepted practice, Florida property appraisers routinely apply across-the board eighth criterion adjustments in just valuations of real property, without regard to the valuation approach used or whether the property was sold. See Forms DR-493 reported annually by property appraisers, and Southern Bell Telephone and Telegraph Co. v. Broward County, 665 So.2d 272 (Fla. 4th DCA 1995) review denied 673 So.2d 30 (Fla. 1996). Also, see Louisville and National Railroad Co. v. Department of Revenue, State of Fla., 736 F.2d 1495 (11th Cir.(Fla.) July 24, 1984). An eighth criterion adjustment made in the just valuation of a single parcel was approved in Roden v. GAC Liquidating Trust, 462 So.2d 92 (Fla. 2nd DCA 1985).

When an actual sale of the property has not occurred, the appraiser must, in arriving at just valuation, place himself or herself in the position of the parties to a hypothetical sale. See Southern Bell Telephone and Telegraph Co. v. Dade County, 275 So.2d 4 (Fla. 1973) and Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). ***The just valuation standards of section 193.011, F.S., which include the eighth criterion, must be properly considered regardless of the valuation approach used and whether the property was sold.***

The case of Bystrom v. Equitable Life Assurance Society, 416 So.2d 1133 (Fla. 3rd Conclusion DCA 1982) reviewed a 1978 assessment based on 1977 statutes. Later, in 1979, the eighth criterion was amended to add a personal property component. See Chapter 79-334, Laws of Florida. The law on which the long-established operation of the eighth criterion is based has changed substantially since the assessment date in Bystrom.

Conclusion

The eighth criterion must be properly considered in each of the three approaches to valuation. When justified by sufficiently relevant and credible evidence, the Board or special magistrate should make an eighth criterion adjustment in any of the three valuation approaches.

Board attorneys should ensure that all Board members and special magistrates receive a copy of this bulletin. Questions on this bulletin can be sent by e-mail to VAB@dor.state.fl.us.

The **DR-493 form (Hernando County)**, indicates that a 15% adjustment should be made for the subject's use code.

The Property Appraiser indicates that the cost of sale is accounted for internally (CAMA), and has been considered. However, in this case, the Property Appraiser did not physically show any cost of sale deduction in their analysis for this property. Therefore, the Property Appraiser has failed to establish their presumption of correctness. The Petitioner did not, however, prove by a preponderance of the evidence that the Property Appraiser's just value does not represent just value nor did the Petitioner prove that the Property Appraiser's just valuation is arbitrarily based on appraisal practices that are different from the appraisal practices generally applied by the Property Appraiser to comparable property within the same county. The Petitioner did not present competent, substantial evidence to reduce the value below the market value provided by the Property Appraiser. Therefore, the petition is **DENIED.**

HEARING SUMMARY

The subject is a single-family residence.

PROPERTY APPRAISER PRESENTATION

The Property Appraiser provided a sales analysis report, containing three sales of similar single-family residences that closed in 2024. Each of the sales are in the same or similar neighborhood to the subject. The subject, as well as the comparables are presented and analyzed on "Adjusted Square Footage".

The sales indicate adjusted values (adjusted 15% for Cost of Sale/ COS, per Department of Revenue/ DOR requirements) of approximately $126/ SF and $280,500, overall. The subject assessment reflects a value of $121/ SF and $268,014, overall, above the value indication. Therefore, based on this sales data, the subject assessment is unsupported.

DIFFERENCE (LARGER/ SMALLER)			-2%			

CONCLUSION

The Property Appraiser's sales are more similar to the subject, and support the assessment.

CONCLUSION OF LAW

The evidence submitted by the Property Appraiser and Petitioner is deemed relevant, credible and admissible with no objections raised by either party. The evidence for both parties was admitted.

The Property Appraiser did not physically show any cost of sale deduction in their analysis for this property. Therefore, the Property Appraiser has failed to establish their presumption of correctness. The Petitioner did not, however, prove by a preponderance of the evidence that the Property Appraiser's just value does not represent just value nor did the Petitioner prove that the Property Appraiser's just valuation is arbitrarily based on appraisal practices that are different from the appraisal practices generally applied by the Property Appraiser to comparable property within the same county. The Petitioner did not present competent, substantial evidence to reduce the value below the market value provided by the Property Appraiser. Therefore, the petition is **DENIED.**

ADVISORY MEMORANDUM:

A recent memorandum was provided by Stephen J. Keller, Chief Legal Counsel for Property Tax Litigation and VAB Oversight, Florida Department of Revenue, in response to questions/ issues presented by Ms. Sheryl A Edwards, Legal Counsel to the Sarasota County Value Adjustment Board. The Memorandum is dated March 25, 2022.

Subject: Advisory Assistance on Mathematically Correct Methods for Deducting Costs of Sale in the Income Capitalization Approach.

"Exhibits 2 and 3 attached hereto contain statewide summaries showing, for 2020 and 2021, respectively, the cost of sale deductions each county applied in arriving at just valuations and then reported to DOR on Form DR-493. Almost all of Florida's 67 counties, including Sarasota County, reported cost of sale deductions of 15 percent and this has been the accepted standard practice in Florida for several decades.

Given that property appraisers' cost of sale deductions are a long-standing, well-known, and widely accepted practice and are generally made uniformly and across-the-board in accordance with applicable law, ***such deductions are a professionally accepted appraisal practice, which VABs and their special magistrates must apply as well."***

"Consistent with law and professionally accepted appraisal practices, SCPAO has an expressed, professionally accepted policy of making and reporting 15 percent cost of sale deductions in arriving at just valuations under Florida law. Accordingly, in just valuation reviews, the Sarasota County VAB and its special magistrates are compelled by law to correctly apply 15 percent cost of sale deductions without double-counting."

Property Tax Overview Bulletin 11-01, Provided by Steven Keller, Office of General Counsel (Department of Revenue, indicates the following:

FLORIDA DEPARTMENT OF REVENUE

PROPERTY TAX INFORMATIONAL BULLETIN

Value Adjustment Board Petitions and the Eighth Criterion

This advisement addresses issues regarding the eighth just valuation criterion in subsection 193.011(8), F.S., which must be properly considered in administrative reviews. The Department's value adjustment board training contains more information on the eighth criterion. This bulletin must be used in conjunction with the training and consistent with law.

Advisement

1. The Department's value adjustment board training and this bulletin supersede prior Department letters OPN 90-0039 (dated August 20, 1990) and OPN 95-0002 (dated January 9, 1995).

2. In accordance with Florida Statutes and applicable case law, applicability of the eighth criterion in subsection 193.011(8), F.S., is not limited to a sales comparison valuation approach or to property that was sold. This bulletin addresses the proper consideration of the eighth criterion in administrative reviews involving the income capitalization and cost less depreciation approaches to valuation of real property.

3. The eighth criterion must be properly considered in the income capitalization and cost less depreciation approaches. This requires proper consideration of an adjustment for both costs of sale and personal property where appropriate. See subsection 193.011(8), F.S.

4. When justified by sufficiently relevant and credible evidence, the Board or special magistrate should make an eighth criterion adjustment to a value indication developed by the income capitalization or cost less depreciation approach to arrive at just valuation. This adjustment must include any adjustment necessary to exclude the just value of personal property from just valuations of real property.

Analysis

In long-established and accepted practice, Florida property appraisers routinely apply across-the board eighth criterion adjustments in just valuations of real property, without regard to the valuation approach used or whether the property was sold. See Forms DR-493 reported annually by property appraisers, and Southern Bell Telephone and Telegraph Co. v. Broward County, 665 So.2d 272 (Fla. 4th DCA 1995) review denied 673 So.2d 30 (Fla. 1996). Also, see Louisville and National Railroad Co. v. Department of Revenue, State of Fla., 736 F.2d 1495 (11th Cir.(Fla.) July 24, 1984). An eighth criterion adjustment made in the just valuation of a single parcel was approved in Roden v. GAC Liquidating Trust, 462 So.2d 92 (Fla. 2nd DCA 1985).

When an actual sale of the property has not occurred, the appraiser must, in arriving at just valuation, place himself or herself in the position of the parties to a hypothetical sale. See Southern Bell Telephone and Telegraph Co. v. Dade County, 275 So.2d 4 (Fla. 1973) and Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). ***The just valuation standards of section 193.011, F.S., which include the eighth criterion, must be properly considered regardless of the valuation approach used and whether the property was sold.***

The case of Bystrom v. Equitable Life Assurance Society, 416 So.2d 1133 (Fla. 3rd Conclusion DCA 1982) reviewed a 1978 assessment based on 1977 statutes. Later, in 1979, the eighth criterion was amended to add a personal property component. See Chapter 79-334, Laws of Florida. The law on which the long-established operation of the eighth criterion is based has changed substantially since the assessment date in Bystrom.

Conclusion

The eighth criterion must be properly considered in each of the three approaches to valuation. When justified by sufficiently relevant and credible evidence, the Board or special magistrate should make an eighth criterion adjustment in any of the three valuation approaches.

Board attorneys should ensure that all Board members and special magistrates receive a copy of this bulletin. Questions on this bulletin can be sent by e-mail to VAB@dor.state.fl.us.

The **DR-493 form (Hernando County)**, indicates that a 15% adjustment should be made for the subject's use code.

The Property Appraiser indicates that the cost of sale is accounted for internally, using their CAMA system, and has been considered. However, in this case, the Property Appraiser did not present competent, substantial evidence showing that the Property Appraiser applied the 15% cost of sale deduction reflected in their DR-493 form (Hernando County) for the subject property. Therefore, the Property Appraiser has failed to establish a presumption of correctness. Based upon the evidence and testimony presented at the hearing, the Petitioner did prove by a preponderance of the evidence that the Property Appraiser's just value does not represent just value. Petitioner then proved just value by competent, substantial evidence and the new value is established. Therefore, the petition is **GRANTED**.

HEARING SUMMARY

The subject is a single-family residence.

PROPERTY APPRAISER PRESENTATION

The Property Appraiser provided a sales analysis report, containing three sales of similar single-family residences that closed in 2024. Each of the sales are in the same or similar neighborhood to the subject. The subject, as well as the comparables are presented and analyzed on "Adjusted Square Footage".

The sales indicate adjusted values (adjusted 15% for Cost of Sale/ COS, per Department of Revenue/ DOR requirements) of approximately $140/ SF and $247,350, overall. The subject assessment reflects a value of $157/ SF and $262,602, overall, above the value indication. Therefore, based on this sales data, the subject assessment is unsupported.

CONCLUSION OF LAW

The evidence submitted by the Property Appraiser and Petitioner is deemed relevant, credible and admissible with no objections raised. The evidence for the both parties was admitted.

The Property Appraiser indicates that the cost of sale is accounted for internally, using their CAMA system, and has been considered. However, in this case, the Property Appraiser did not present competent, substantial evidence showing that the Property Appraiser applied the 15% cost of sale deduction reflected in their DR-493 form (Hernando County) for the subject property. Therefore, the Property Appraiser has failed to establish a presumption of correctness. Based upon the evidence and testimony presented at the hearing, the Petitioner did prove by a preponderance of the evidence that the Property Appraiser's just value does not represent just value. Petitioner then proved just value by competent, substantial evidence and the new value is established. Therefore, the petition is **GRANTED**.

FINDINGS OF FACT

ADMISSIBILITY OF EVIDENCE:

The evidence submitted by the Property Appraiser and Petitioner is deemed relevant, credible and admissible with no objections raised. The evidence for the both parties was admitted.

ADVISORY MEMORANDUM:

A recent memorandum was provided by Stephen J. Keller, Chief Legal Counsel for Property Tax Litigation and VAB Oversight, Florida Department of Revenue, in response to questions/ issues presented by Ms. Sheryl A Edwards, Legal Counsel to the Sarasota County Value Adjustment Board. The Memorandum is dated March 25, 2022.

Subject: Advisory Assistance on Mathematically Correct Methods for Deducting Costs of Sale in the Income Capitalization Approach.

"Exhibits 2 and 3 attached hereto contain statewide summaries showing, for 2020 and 2021, respectively, the cost of sale deductions each county applied in arriving at just valuations and then reported to DOR on Form DR-493. Almost all of Florida's 67 counties, including Sarasota County, reported cost of sale deductions of 15 percent and this has been the accepted standard practice in Florida for several decades.

Given that property appraisers' cost of sale deductions are a long-standing, well-known, and widely accepted practice and are generally made uniformly and across-the-board in accordance with applicable law, ***such deductions are a professionally accepted appraisal practice, which VABs and their special magistrates must apply as well."***

"Consistent with law and professionally accepted appraisal practices, SCPAO has an expressed, professionally accepted policy of making and reporting 15 percent cost of sale deductions in arriving at just valuations under Florida law. Accordingly, in just valuation reviews, the Sarasota County VAB and its special magistrates are compelled by law to correctly apply 15 percent cost of sale deductions without double-counting."

Property Tax Overview Bulletin 11-01, Provided by Steven Keller, Office of General Counsel (Department of Revenue, indicates the following:

FLORIDA DEPARTMENT OF REVENUE

PROPERTY TAX INFORMATIONAL BULLETIN

Value Adjustment Board Petitions and the Eighth Criterion

This advisement addresses issues regarding the eighth just valuation criterion in subsection 193.011(8), F.S., which must be properly considered in administrative reviews. The Department's value adjustment board training contains more information on the eighth criterion. This bulletin must be used in conjunction with the training and consistent with law.

Advisement

1. The Department's value adjustment board training and this bulletin supersede prior Department letters OPN 90-0039 (dated August 20, 1990) and OPN 95-0002 (dated January 9, 1995).

2. In accordance with Florida Statutes and applicable case law, applicability of the eighth criterion in subsection 193.011(8), F.S., is not limited to a sales comparison valuation approach or to property that was sold. This bulletin addresses the proper consideration of the eighth criterion in administrative reviews involving the income capitalization and cost less depreciation approaches to valuation of real property.

3. The eighth criterion must be properly considered in the income capitalization and cost less depreciation approaches. This requires proper consideration of an adjustment for both costs of sale and personal property where appropriate. See subsection 193.011(8), F.S.

4. When justified by sufficiently relevant and credible evidence, the Board or special magistrate should make an eighth criterion adjustment to a value indication developed by the income capitalization or cost less depreciation approach to arrive at just valuation. This adjustment must include any adjustment necessary to exclude the just value of personal property from just valuations of real property.

Analysis

In long-established and accepted practice, Florida property appraisers routinely apply across-the board eighth criterion adjustments in just valuations of real property, without regard to the valuation approach used or whether the property was sold. See Forms DR-493 reported annually by property appraisers, and Southern Bell Telephone and Telegraph Co. v. Broward County, 665 So.2d 272 (Fla. 4th DCA 1995) review denied 673 So.2d 30 (Fla. 1996). Also, see Louisville and National Railroad Co. v. Department of Revenue, State of Fla., 736 F.2d 1495 (11th Cir.(Fla.) July 24, 1984). An eighth criterion adjustment made in the just valuation of a single parcel was approved in Roden v. GAC Liquidating Trust, 462 So.2d 92 (Fla. 2nd DCA 1985).

When an actual sale of the property has not occurred, the appraiser must, in arriving at just valuation, place himself or herself in the position of the parties to a hypothetical sale. See Southern Bell Telephone and Telegraph Co. v. Dade County, 275 So.2d 4 (Fla. 1973) and Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). ***The just valuation standards of section 193.011, F.S., which include the eighth criterion, must be properly considered regardless of the valuation approach used and whether the property was sold.***

The case of Bystrom v. Equitable Life Assurance Society, 416 So.2d 1133 (Fla. 3rd Conclusion DCA 1982) reviewed a 1978 assessment based on 1977 statutes. Later, in 1979, the eighth criterion was amended to add a personal property component. See Chapter 79-334, Laws of Florida. The law on which the long-established operation of the eighth criterion is based has changed substantially since the assessment date in Bystrom.

Conclusion

The eighth criterion must be properly considered in each of the three approaches to valuation. When justified by sufficiently relevant and credible evidence, the Board or special magistrate should make an eighth criterion adjustment in any of the three valuation approaches.

Board attorneys should ensure that all Board members and special magistrates receive a copy of this bulletin. Questions on this bulletin can be sent by e-mail to VAB@dor.state.fl.us.

The **DR-493 form (Hernando County)**, indicates that a 15% adjustment should be made for the subject's use code.

The Property Appraiser indicates that the cost of sale is accounted for internally, using their CAMA system, and has been considered. However, in this case, the Property Appraiser did not present competent, substantial evidence showing that the Property Appraiser applied the 15% cost of sale deduction reflected in their DR-493 form (Hernando County) for the subject property. Therefore, the Property Appraiser has failed to establish a presumption of correctness. Based upon the evidence and testimony presented at the hearing, the Petitioner did prove by a preponderance of the evidence that the Property Appraiser's just value does not represent just value. Petitioner then proved just value by competent, substantial evidence and the new value is established. Therefore, the petition is **GRANTED**.

HEARING SUMMARY

The subject is a single-family residence.

PROPERTY APPRAISER PRESENTATION

The Property Appraiser provided a sales analysis report, containing three sales of similar single-family residences that closed in 2024. Each of the sales are in the same or similar neighborhood to the subject. The subject, as well as the comparables are presented and analyzed on "Adjusted Square Footage".

The sales indicate adjusted values (adjusted 15% for Cost of Sale/ COS, per Department of Revenue/ DOR requirements) of approximately $118/ SF and $331,500, overall. The subject assessment reflects a value of $123/ SF and $342,490, overall, above the value indication. Therefore, based on this sales data, the subject assessment is unsupported.

SUBJECT ASSESSMENT	**$342,490**				**$123.33**	**/SF**
CONCLUSION	**$330,000**					

PETITIONER PRESENTATION

The Petitioner provided several sales for consideration. The Petitioner's sales data is analyzed based on total square footage, while the Property Appraiser's analysis is based on adjusted square footage. However, the Petitioner's sales are not more similar to the subject than the Property Appraiser's. For example;

Property Appraiser Sales Year Built difference: 0 Years

Petitioner Sales' Year Built difference: 1 Year

Property Appraiser Sales Average Size Difference: 3%

Petitioner Sales's Average Size Difference: 6%

EXHIBIT D

PET SALES						
ADDRESS	**SALE PRICE**	**YEAR BLT**	**TOTAL SF**	**ADJ. SF**	**$/ SF**	**COMMENTS**
3996 BRAEMERE	$330,000	2007	2,813		$117.31	
4070 BRAEMERE	$359,500	2006	3,306		$108.74	
4213 CANONGATE	$435,000	2005	2,959		$147.01	
4446 MARSALIS	$422,000	2008	2,956		$142.76	
14606 DEACON	$355,000	2007	3,259		$108.93	
14649 DEACON	$350,000	2006	3,259		$107.39	
AVERAGE	**$375,250**	**2007**	**3,092**		**$122.02**	
MEDIAN	**$357,250**		**3,109**		**$113.12**	
SUBJECT (ADJ. SF)	**$342,490**	**-1 YRS**	**3,296**		**$103.91**	
DIFFERENCE (SF)			196			
DIFFERENCE (LARGER/ SMALLER)			6%			

CONCLUSION

The Property Appraiser's sales are more similar to the subject. However, the best market evidence available (Property Appraiser Sales) supports an adjustment to the assessment **($330,000)**.

CONCLUSION OF LAW

The evidence submitted by the Property Appraiser and Petitioner is deemed relevant, credible and admissible with no objections raised. The evidence for the both parties was admitted.

The Property Appraiser indicates that the cost of sale is accounted for internally, using their CAMA system, and has been considered. However, in this case, the Property Appraiser did not present competent, substantial evidence showing that the Property Appraiser applied the 15% cost of sale deduction reflected in their DR-493 form (Hernando County) for the subject property. Therefore, the Property Appraiser has failed to establish a presumption of correctness. Based upon the evidence and testimony presented at the hearing, the Petitioner did prove by a preponderance of the evidence that the Property Appraiser's just value does not represent just value. Petitioner then proved just value by competent, substantial evidence and the new value is established. Therefore, the petition is **GRANTED**.

Property Tax Overview Bulletin 11-01, Provided by Steven Keller, Office of General Counsel (Department of Revenue, indicates the following:

FLORIDA DEPARTMENT OF REVENUE

PROPERTY TAX INFORMATIONAL BULLETIN

Value Adjustment Board Petitions and the Eighth Criterion

This advisement addresses issues regarding the eighth just valuation criterion in subsection 193.011(8), F.S., which must be properly considered in administrative reviews. The Department's value adjustment board training contains more information on the eighth criterion. This bulletin must be used in conjunction with the training and consistent with law.

Advisement

1. The Department's value adjustment board training and this bulletin supersede prior Department letters OPN 90-0039 (dated August 20, 1990) and OPN 95-0002 (dated January 9, 1995).

2. In accordance with Florida Statutes and applicable case law, applicability of the eighth criterion in subsection 193.011(8), F.S., is not limited to a sales comparison valuation approach or to property that was sold. This bulletin addresses the proper consideration of the eighth criterion in administrative reviews involving the income capitalization and cost less depreciation approaches to valuation of real property.

3. The eighth criterion must be properly considered in the income capitalization and cost less depreciation approaches. This requires proper consideration of an adjustment for both costs of sale and personal property where appropriate. See subsection 193.011(8), F.S.

4. When justified by sufficiently relevant and credible evidence, the Board or special magistrate should make an eighth criterion adjustment to a value indication developed by the income capitalization or cost less depreciation approach to arrive at just valuation. This adjustment must include any adjustment necessary to exclude the just value of personal property from just valuations of real property.

Analysis

In long-established and accepted practice, Florida property appraisers routinely apply across-the board eighth criterion adjustments in just valuations of real property, without regard to the valuation approach used or whether the property was sold. See Forms DR-493 reported annually by property appraisers, and Southern Bell Telephone and Telegraph Co. v. Broward County, 665 So.2d 272 (Fla. 4th DCA 1995) review denied 673 So.2d 30 (Fla. 1996). Also, see Louisville and National Railroad Co. v. Department of Revenue, State of Fla., 736 F.2d 1495 (11th Cir.(Fla.) July 24, 1984). An eighth criterion adjustment made in the just valuation of a single parcel was approved in Roden v. GAC Liquidating Trust, 462 So.2d 92 (Fla. 2nd DCA 1985).

When an actual sale of the property has not occurred, the appraiser must, in arriving at just valuation, place himself or herself in the position of the parties to a hypothetical sale. See Southern Bell Telephone and Telegraph Co. v. Dade County, 275 So.2d 4 (Fla. 1973) and Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). ***The just valuation standards of section 193.011, F.S., which include the eighth criterion, must be properly considered regardless of the valuation approach used and whether the property was sold.***

The case of Bystrom v. Equitable Life Assurance Society, 416 So.2d 1133 (Fla. 3rd Conclusion DCA 1982) reviewed a 1978 assessment based on 1977 statutes. Later, in 1979, the eighth criterion was amended to add a personal property component. See Chapter 79-334, Laws of Florida. The law on which the long-established operation of the eighth criterion is based has changed substantially since the assessment date in Bystrom.

Conclusion

The eighth criterion must be properly considered in each of the three approaches to valuation. When justified by sufficiently relevant and credible evidence, the Board or special magistrate should make an eighth criterion adjustment in any of the three valuation approaches.

Board attorneys should ensure that all Board members and special magistrates receive a copy of this bulletin. Questions on this bulletin can be sent by e-mail to VAB@dor.state.fl.us.

The **DR-493 form (Hernando County)**, indicates that a 15% adjustment should be made for the subject's use code.

The Property Appraiser indicates that the cost of sale is accounted for internally (CAMA), and has been considered. However, in this case, the Property Appraiser did not physically show any cost of sale deduction in their analysis for this property. Therefore, the Property Appraiser has failed to establish their presumption of correctness. The Petitioner did not, however, prove by a preponderance of the evidence that the Property Appraiser's just value does not represent just value nor did the Petitioner prove that the Property Appraiser's just valuation is arbitrarily based on appraisal practices that are different from the appraisal practices generally applied by the Property Appraiser to comparable property within the same county. The Petitioner did not present competent, substantial evidence to reduce the value below the market value provided by the Property Appraiser. Therefore, the petition is **DENIED.**

HEARING SUMMARY

The subject is a single-family residence.

PROPERTY APPRAISER PRESENTATION

The Property Appraiser provided a sales analysis report, containing three sales of similar single-family residences that closed in 2024. Each of the sales are in the same or similar neighborhood to the subject. The subject, as well as the comparables are presented and analyzed on "Adjusted Square Footage".

The sales indicate adjusted values (adjusted 15% for Cost of Sale/ COS, per Department of Revenue/ DOR requirements) of approximately $136/ SF and $238,000, overall (Supporting approximately $280,000). The subject assessment reflects a value of $119/ SF and $280,206, overall. Therefore, based on this sales data, the subject assessment is supported.

EXHIBIT C

FINDINGS OF FACT

ADMISSIBILITY OF EVIDENCE:

The evidence submitted by the Property Appraiser and Petitioner is deemed relevant, credible and admissible with no objections raised. The evidence for the both parties was admitted.

ADVISORY MEMORANDUM:

A recent memorandum was provided by Stephen J. Keller, Chief Legal Counsel for Property Tax Litigation and VAB Oversight, Florida Department of Revenue, in response to questions/ issues presented by Ms. Sheryl A Edwards, Legal Counsel to the Sarasota County Value Adjustment Board. The Memorandum is dated March 25, 2022.

Subject: Advisory Assistance on Mathematically Correct Methods for Deducting Costs of Sale in the Income Capitalization Approach.

"Exhibits 2 and 3 attached hereto contain statewide summaries showing, for 2020 and 2021, respectively, the cost of sale deductions each county applied in arriving at just valuations and then reported to DOR on Form DR-493. Almost all of Florida's 67 counties, including Sarasota County, reported cost of sale deductions of 15 percent and this has been the accepted standard practice in Florida for several decades.

Given that property appraisers' cost of sale deductions are a long-standing, well-known, and widely accepted practice and are generally made uniformly and across-the-board in accordance with applicable law, ***such deductions are a professionally accepted appraisal practice, which VABs and their special magistrates must apply as well."***

"Consistent with law and professionally accepted appraisal practices, SCPAO has an expressed, professionally accepted policy of making and reporting 15 percent cost of sale deductions in arriving at just valuations under Florida law. Accordingly, in just valuation reviews, the Sarasota County VAB and its special magistrates are compelled by law to correctly apply 15 percent cost of sale deductions without double-counting."

Property Tax Overview Bulletin 11-01, Provided by Steven Keller, Office of General Counsel (Department of Revenue, indicates the following:

FLORIDA DEPARTMENT OF REVENUE

PROPERTY TAX INFORMATIONAL BULLETIN

Value Adjustment Board Petitions and the Eighth Criterion

This advisement addresses issues regarding the eighth just valuation criterion in subsection 193.011(8), F.S., which must be properly considered in administrative reviews. The Department's value adjustment board training contains more information on the eighth criterion. This bulletin must be used in conjunction with the training and consistent with law.

Advisement

1. The Department's value adjustment board training and this bulletin supersede prior Department letters OPN 90-0039 (dated August 20, 1990) and OPN 95-0002 (dated January 9, 1995).

2. In accordance with Florida Statutes and applicable case law, applicability of the eighth criterion in subsection 193.011(8), F.S., is not limited to a sales comparison valuation approach or to property that was sold. This bulletin addresses the proper consideration of the eighth criterion in administrative reviews involving the income capitalization and cost less depreciation approaches to valuation of real property.

3. The eighth criterion must be properly considered in the income capitalization and cost less depreciation approaches. This requires proper consideration of an adjustment for both costs of sale and personal property where appropriate. See subsection 193.011(8), F.S.

4. When justified by sufficiently relevant and credible evidence, the Board or special magistrate should make an eighth criterion adjustment to a value indication developed by the income capitalization or cost less depreciation approach to arrive at just valuation. This adjustment must include any adjustment necessary to exclude the just value of personal property from just valuations of real property.

Analysis

In long-established and accepted practice, Florida property appraisers routinely apply across-the board eighth criterion adjustments in just valuations of real property, without regard to the valuation approach used or whether the property was sold. See Forms DR-493 reported annually by property appraisers, and Southern Bell Telephone and Telegraph Co. v. Broward County, 665 So.2d 272 (Fla. 4th DCA 1995) review denied 673 So.2d 30 (Fla. 1996). Also, see Louisville and National Railroad Co. v. Department of Revenue, State of Fla., 736 F.2d 1495 (11th Cir.(Fla.) July 24, 1984). An eighth criterion adjustment made in the just valuation of a single parcel was approved in Roden v. GAC Liquidating Trust, 462 So.2d 92 (Fla. 2nd DCA 1985).

When an actual sale of the property has not occurred, the appraiser must, in arriving at just valuation, place himself or herself in the position of the parties to a hypothetical sale. See Southern Bell Telephone and Telegraph Co. v. Dade County, 275 So.2d 4 (Fla. 1973) and Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). ***The just valuation standards of section 193.011, F.S., which include the eighth criterion, must be properly considered regardless of the valuation approach used and whether the property was sold.***

The case of Bystrom v. Equitable Life Assurance Society, 416 So.2d 1133 (Fla. 3rd Conclusion DCA 1982) reviewed a 1978 assessment based on 1977 statutes. Later, in 1979, the eighth criterion was amended to add a personal property component. See Chapter 79-334, Laws of Florida. The law on which the long-established operation of the eighth criterion is based has changed substantially since the assessment date in Bystrom.

Conclusion

The eighth criterion must be properly considered in each of the three approaches to valuation. When justified by sufficiently relevant and credible evidence, the Board or special magistrate should make an eighth criterion adjustment in any of the three valuation approaches.

Board attorneys should ensure that all Board members and special magistrates receive a copy of this bulletin. Questions on this bulletin can be sent by e-mail to VAB@dor.state.fl.us.

The **DR-493 form (Hernando County)**, indicates that a 15% adjustment should be made for the subject's use code.

The Property Appraiser indicates that the cost of sale is accounted for internally, using their CAMA system, and has been considered. However, in this case, the Property Appraiser did not present competent, substantial evidence showing that the Property Appraiser applied the 15% cost of sale deduction reflected in their DR-493 form (Hernando County) for the subject property. Therefore, the Property Appraiser has failed to establish a presumption of correctness. Based upon the evidence and testimony presented at the hearing, the Petitioner did prove by a preponderance of the evidence that the Property Appraiser's just value does not represent just value. Petitioner then proved just value by competent, substantial evidence and the new value is established. Therefore, the petition is **GRANTED**.

HEARING SUMMARY

The subject is a single-family residence.

PROPERTY APPRAISER PRESENTATION

The Property Appraiser provided a sales analysis report, containing three sales of similar single-family residences that closed in 2024. Each of the sales are in the same or similar neighborhood to the subject. The subject, as well as the comparables are presented and analyzed on "Adjusted Square Footage".

The sales indicate adjusted values (adjusted 15% for Cost of Sale/ COS, per Department of Revenue/ DOR requirements) of approximately $122/ SF and $284,750, overall. The subject assessment reflects a value of $163/ SF and $417,356, overall, above the value indication. Therefore, based on this sales data, the subject assessment is unsupported.

CONCLUSION	**$300,000**					

PETITIONER PRESENTATION

The Petitioner provided several sales for consideration. The Petitioner's sales data is analyzed based on total square footage, while the Property Appraiser's analysis is based on adjusted square footage. However, the Petitioner's sales are not more similar to the subject than the Property Appraiser's. For example;

Property Appraiser Sales Year Built difference: 2 Years

Petitioner Sales' Year Built difference: 11 Years

Property Appraiser Sales Average Size Difference: 6%

Petitioner Sales's Average Size Difference: 13%

EXHIBIT D

PET SALES						
ADDRESS	**SALE PRICE**	**YEAR BLT**	**TOTAL SF**	**ADJ. SF**	**$/ SF**	**COMMENTS**
11001 HOBSON	$410,000	1983	2,586		$158.55	
11032 RED COACH	$330,000	2006	2,432		$135.69	
2314 EVANGELINA	$319,000	2002	2,452		$130.10	
2313 EVANGELINA	$335,000	2004	2,641		$126.85	
AVERAGE	**$348,500**	**1999**	**2,528**		**$137.80**	
MEDIAN	**$332,500**		**2,519**		**$132.89**	
SUBJECT (ADJ. SF)	**$417,356**	**11 YRS**	**2,896**		**$144.11**	
DIFFERENCE (SF)			373			
DIFFERENCE (LARGER/ SMALLER)			13%			

CONCLUSION

The Property Appraiser's sales are more similar to the subject. However, the best market evidence available (Property Appraiser Sales) supports an adjustment to the assessment **($300,000)**.

CONCLUSION OF LAW

The evidence submitted by the Property Appraiser and Petitioner is deemed relevant, credible and admissible with no objections raised. The evidence for the both parties was admitted.

The Property Appraiser indicates that the cost of sale is accounted for internally, using their CAMA system, and has been considered. However, in this case, the Property Appraiser did not present competent, substantial evidence showing that the Property Appraiser applied the 15% cost of sale deduction reflected in their DR-493 form (Hernando County) for the subject property. Therefore, the Property Appraiser has failed to establish a presumption of correctness. Based upon the evidence and testimony presented at the hearing, the Petitioner did prove by a preponderance of the evidence that the Property Appraiser's just value does not represent just value. Petitioner then proved just value by competent, substantial evidence and the new value is established. Therefore, the petition is **GRANTED**.

CONCLUSION

The Property Appraiser's sales are more similar to the subject. However, the best market evidence available (Property Appraiser Sales) supports an adjustment to the assessment **($230,000)**.

CONCLUSION OF LAW

The evidence submitted by the Property Appraiser and Petitioner is deemed relevant, credible and admissible with no objections raised. The evidence for the both parties was admitted.

The Property Appraiser indicates that the cost of sale is accounted for internally, using their CAMA system, and has been considered. However, in this case, the Property Appraiser did not present competent, substantial evidence showing that the Property Appraiser applied the 15% cost of sale deduction reflected in their DR-493 form (Hernando County) for the subject property. Therefore, the Property Appraiser has failed to establish a presumption of correctness. Based upon the evidence and testimony presented at the hearing, the Petitioner did prove by a preponderance of the evidence that the Property Appraiser's just value does not represent just value. Petitioner then proved just value by competent, substantial evidence and the new value is established. Therefore, the petition is **GRANTED**.

FINDINGS OF FACT

ADMISSIBILITY OF EVIDENCE:

The evidence submitted by the Property Appraiser and Petitioner is deemed relevant, credible and admissible with no objections raised. The evidence for the both parties was admitted.

ADVISORY MEMORANDUM:

A recent memorandum was provided by Stephen J. Keller, Chief Legal Counsel for Property Tax Litigation and VAB Oversight, Florida Department of Revenue, in response to questions/ issues presented by Ms. Sheryl A Edwards, Legal Counsel to the Sarasota County Value Adjustment Board. The Memorandum is dated March 25, 2022.

Subject: Advisory Assistance on Mathematically Correct Methods for Deducting Costs of Sale in the Income Capitalization Approach.

"Exhibits 2 and 3 attached hereto contain statewide summaries showing, for 2020 and 2021, respectively, the cost of sale deductions each county applied in arriving at just valuations and then reported to DOR on Form DR-493. Almost all of Florida's 67 counties, including Sarasota County, reported cost of sale deductions of 15 percent and this has been the accepted standard practice in Florida for several decades.

Given that property appraisers' cost of sale deductions are a long-standing, well-known, and widely accepted practice and are generally made uniformly and across-the-board in accordance with applicable law, ***such deductions are a professionally accepted appraisal practice, which VABs and their special magistrates must apply as well."***

"Consistent with law and professionally accepted appraisal practices, SCPAO has an expressed, professionally accepted policy of making and reporting 15 percent cost of sale deductions in arriving at just valuations under Florida law. Accordingly, in just valuation reviews, the Sarasota County VAB and its special magistrates are compelled by law to correctly apply 15 percent cost of sale deductions without double-counting."

Property Tax Overview Bulletin 11-01, Provided by Steven Keller, Office of General Counsel (Department of Revenue, indicates the following:

FLORIDA DEPARTMENT OF REVENUE

PROPERTY TAX INFORMATIONAL BULLETIN

Value Adjustment Board Petitions and the Eighth Criterion

This advisement addresses issues regarding the eighth just valuation criterion in subsection 193.011(8), F.S., which must be properly considered in administrative reviews. The Department's value adjustment board training contains more information on the eighth criterion. This bulletin must be used in conjunction with the training and consistent with law.

Advisement

1. The Department's value adjustment board training and this bulletin supersede prior Department letters OPN 90-0039 (dated August 20, 1990) and OPN 95-0002 (dated January 9, 1995).

2. In accordance with Florida Statutes and applicable case law, applicability of the eighth criterion in subsection 193.011(8), F.S., is not limited to a sales comparison valuation approach or to property that was sold. This bulletin addresses the proper consideration of the eighth criterion in administrative reviews involving the income capitalization and cost less depreciation approaches to valuation of real property.

3. The eighth criterion must be properly considered in the income capitalization and cost less depreciation approaches. This requires proper consideration of an adjustment for both costs of sale and personal property where appropriate. See subsection 193.011(8), F.S.

4. When justified by sufficiently relevant and credible evidence, the Board or special magistrate should make an eighth criterion adjustment to a value indication developed by the income capitalization or cost less depreciation approach to arrive at just valuation. This adjustment must include any adjustment necessary to exclude the just value of personal property from just valuations of real property.

Analysis

In long-established and accepted practice, Florida property appraisers routinely apply across-the board eighth criterion adjustments in just valuations of real property, without regard to the valuation approach used or whether the property was sold. See Forms DR-493 reported annually by property appraisers, and Southern Bell Telephone and Telegraph Co. v. Broward County, 665 So.2d 272 (Fla. 4th DCA 1995) review denied 673 So.2d 30 (Fla. 1996). Also, see Louisville and National Railroad Co. v. Department of Revenue, State of Fla., 736 F.2d 1495 (11th Cir.(Fla.) July 24, 1984). An eighth criterion adjustment made in the just valuation of a single parcel was approved in Roden v. GAC Liquidating Trust, 462 So.2d 92 (Fla. 2nd DCA 1985).

When an actual sale of the property has not occurred, the appraiser must, in arriving at just valuation, place himself or herself in the position of the parties to a hypothetical sale. See Southern Bell Telephone and Telegraph Co. v. Dade County, 275 So.2d 4 (Fla. 1973) and Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). ***The just valuation standards of section 193.011, F.S., which include the eighth criterion, must be properly considered regardless of the valuation approach used and whether the property was sold.***

The case of Bystrom v. Equitable Life Assurance Society, 416 So.2d 1133 (Fla. 3rd Conclusion DCA 1982) reviewed a 1978 assessment based on 1977 statutes. Later, in 1979, the eighth criterion was amended to add a personal property component. See Chapter 79-334, Laws of Florida. The law on which the long-established operation of the eighth criterion is based has changed substantially since the assessment date in Bystrom.

Conclusion

The eighth criterion must be properly considered in each of the three approaches to valuation. When justified by sufficiently relevant and credible evidence, the Board or special magistrate should make an eighth criterion adjustment in any of the three valuation approaches.

Board attorneys should ensure that all Board members and special magistrates receive a copy of this bulletin. Questions on this bulletin can be sent by e-mail to VAB@dor.state.fl.us.

The **DR-493 form (Hernando County)**, indicates that a 15% adjustment should be made for the subject's use code.

The Property Appraiser indicates that the cost of sale is accounted for internally, using their CAMA system, and has been considered. However, in this case, the Property Appraiser did not present competent, substantial evidence showing that the Property Appraiser applied the 15% cost of sale deduction reflected in their DR-493 form (Hernando County) for the subject property. Therefore, the Property Appraiser has failed to establish a presumption of correctness. Based upon the evidence and testimony presented at the hearing, the Petitioner did prove by a preponderance of the evidence that the Property Appraiser's just value does not represent just value. Petitioner then proved just value by competent, substantial evidence and the new value is established. Therefore, the petition is **GRANTED**.

HEARING SUMMARY

The subject is a single-family residence.

PROPERTY APPRAISER PRESENTATION

The Property Appraiser provided a sales analysis report, containing three sales of similar single-family residences that closed in 2024. Each of the sales are in the same or similar neighborhood to the subject. The subject, as well as the comparables are presented and analyzed on "Adjusted Square Footage".

The sales indicate adjusted values (adjusted 15% for Cost of Sale/ COS, per Department of Revenue/ DOR requirements) of approximately $149/ SF and $301,750, overall. The subject assessment reflects a value of $161/ SF and $328,008, overall, above the value indication. Therefore, based on this sales data, the subject assessment is unsupported.

FINDINGS OF FACT

ADMISSIBILITY OF EVIDENCE:

The evidence submitted by the Property Appraiser and Petitioner is deemed relevant, credible and admissible with no objections raised. The evidence for the both parties was admitted.

ADVISORY MEMORANDUM:

A recent memorandum was provided by Stephen J. Keller, Chief Legal Counsel for Property Tax Litigation and VAB Oversight, Florida Department of Revenue, in response to questions/ issues presented by Ms. Sheryl A Edwards, Legal Counsel to the Sarasota County Value Adjustment Board. The Memorandum is dated March 25, 2022.

Subject: Advisory Assistance on Mathematically Correct Methods for Deducting Costs of Sale in the Income Capitalization Approach.

"Exhibits 2 and 3 attached hereto contain statewide summaries showing, for 2020 and 2021, respectively, the cost of sale deductions each county applied in arriving at just valuations and then reported to DOR on Form DR-493. Almost all of Florida's 67 counties, including Sarasota County, reported cost of sale deductions of 15 percent and this has been the accepted standard practice in Florida for several decades.

Given that property appraisers' cost of sale deductions are a long-standing, well-known, and widely accepted practice and are generally made uniformly and across-the-board in accordance with applicable law, ***such deductions are a professionally accepted appraisal practice, which VABs and their special magistrates must apply as well."***

"Consistent with law and professionally accepted appraisal practices, SCPAO has an expressed, professionally accepted policy of making and reporting 15 percent cost of sale deductions in arriving at just valuations under Florida law. Accordingly, in just valuation reviews, the Sarasota County VAB and its special magistrates are compelled by law to correctly apply 15 percent cost of sale deductions without double-counting."

Property Tax Overview Bulletin 11-01, Provided by Steven Keller, Office of General Counsel (Department of Revenue, indicates the following:

FLORIDA DEPARTMENT OF REVENUE

PROPERTY TAX INFORMATIONAL BULLETIN

Value Adjustment Board Petitions and the Eighth Criterion

This advisement addresses issues regarding the eighth just valuation criterion in subsection 193.011(8), F.S., which must be properly considered in administrative reviews. The Department's value adjustment board training contains more information on the eighth criterion. This bulletin must be used in conjunction with the training and consistent with law.

Advisement

1. The Department's value adjustment board training and this bulletin supersede prior Department letters OPN 90-0039 (dated August 20, 1990) and OPN 95-0002 (dated January 9, 1995).

2. In accordance with Florida Statutes and applicable case law, applicability of the eighth criterion in subsection 193.011(8), F.S., is not limited to a sales comparison valuation approach or to property that was sold. This bulletin addresses the proper consideration of the eighth criterion in administrative reviews involving the income capitalization and cost less depreciation approaches to valuation of real property.

3. The eighth criterion must be properly considered in the income capitalization and cost less depreciation approaches. This requires proper consideration of an adjustment for both costs of sale and personal property where appropriate. See subsection 193.011(8), F.S.

4. When justified by sufficiently relevant and credible evidence, the Board or special magistrate should make an eighth criterion adjustment to a value indication developed by the income capitalization or cost less depreciation approach to arrive at just valuation. This adjustment must include any adjustment necessary to exclude the just value of personal property from just valuations of real property.

Analysis

In long-established and accepted practice, Florida property appraisers routinely apply across-the board eighth criterion adjustments in just valuations of real property, without regard to the valuation approach used or whether the property was sold. See Forms DR-493 reported annually by property appraisers, and Southern Bell Telephone and Telegraph Co. v. Broward County, 665 So.2d 272 (Fla. 4th DCA 1995) review denied 673 So.2d 30 (Fla. 1996). Also, see Louisville and National Railroad Co. v. Department of Revenue, State of Fla., 736 F.2d 1495 (11th Cir.(Fla.) July 24, 1984). An eighth criterion adjustment made in the just valuation of a single parcel was approved in Roden v. GAC Liquidating Trust, 462 So.2d 92 (Fla. 2nd DCA 1985).

When an actual sale of the property has not occurred, the appraiser must, in arriving at just valuation, place himself or herself in the position of the parties to a hypothetical sale. See Southern Bell Telephone and Telegraph Co. v. Dade County, 275 So.2d 4 (Fla. 1973) and Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). ***The just valuation standards of section 193.011, F.S., which include the eighth criterion, must be properly considered regardless of the valuation approach used and whether the property was sold.***

The case of Bystrom v. Equitable Life Assurance Society, 416 So.2d 1133 (Fla. 3rd Conclusion DCA 1982) reviewed a 1978 assessment based on 1977 statutes. Later, in 1979, the eighth criterion was amended to add a personal property component. See Chapter 79-334, Laws of Florida. The law on which the long-established operation of the eighth criterion is based has changed substantially since the assessment date in Bystrom.

Conclusion

The eighth criterion must be properly considered in each of the three approaches to valuation. When justified by sufficiently relevant and credible evidence, the Board or special magistrate should make an eighth criterion adjustment in any of the three valuation approaches.

Board attorneys should ensure that all Board members and special magistrates receive a copy of this bulletin. Questions on this bulletin can be sent by e-mail to VAB@dor.state.fl.us.

The **DR-493 form (Hernando County)**, indicates that a 15% adjustment should be made for the subject's use code.

The Property Appraiser indicates that the cost of sale is accounted for internally (CAMA), and has been considered. However, in this case, the Property Appraiser did not physically show any cost of sale deduction in their analysis for this property. Therefore, the Property Appraiser has failed to establish their presumption of correctness. The Petitioner did not, however, prove by a preponderance of the evidence that the Property Appraiser's just value does not represent just value nor did the Petitioner prove that the Property Appraiser's just valuation is arbitrarily based on appraisal practices that are different from the appraisal practices generally applied by the Property Appraiser to comparable property within the same county. The Petitioner did not present competent, substantial evidence to reduce the value below the market value provided by the Property Appraiser. Therefore, the petition is **DENIED.**

HEARING SUMMARY

The subject is a single-family residence.

PROPERTY APPRAISER PRESENTATION

The Property Appraiser provided a sales analysis report, containing three sales of similar single-family residences that closed in 2024. Each of the sales are in the same or similar neighborhood to the subject. The subject, as well as the comparables are presented and analyzed on "Adjusted Square Footage".

The sales indicate adjusted values (adjusted 15% for Cost of Sale/ COS, per Department of Revenue/ DOR requirements) of approximately $136/ SF and $250,750, overall (Supporting approximately $253,000). The subject assessment reflects a value of $134/ SF and $253,764, overall. Therefore, based on this sales data, the subject assessment is supported.

AVERAGE	**$283,583**	**2015**	**2,047**		**$138.94**	
MEDIAN	**$286,250**		**2,031**		**$137.97**	
SUBJECT (ADJ. SF)	**$253,764**	**1 YRS**	**2,185**		**$116.14**	
DIFFERENCE (SF)			147			
DIFFERENCE (LARGER/ SMALLER)			7%			

CONCLUSION

The Property Appraiser's sales are more similar to the subject, and the Property Appraiser's sales support the assessment. The Petition should be **Denied.**

CONCLUSION OF LAW

The evidence submitted by the Property Appraiser and Petitioner is deemed relevant, credible and admissible with no objections raised by either party. The evidence for both parties was admitted.

The Property Appraiser did not physically show any cost of sale deduction in their analysis for this property. Therefore, the Property Appraiser has failed to establish their presumption of correctness. The Petitioner did not, however, prove by a preponderance of the evidence that the Property Appraiser's just value does not represent just value nor did the Petitioner prove that the Property Appraiser's just valuation is arbitrarily based on appraisal practices that are different from the appraisal practices generally applied by the Property Appraiser to comparable property within the same county. The Petitioner did not present competent, substantial evidence to reduce the value below the market value provided by the Property Appraiser. Therefore, the petition is **DENIED.**

FINDINGS OF FACT

ADMISSIBILITY OF EVIDENCE:

The evidence submitted by the Property Appraiser and Petitioner is deemed relevant, credible and admissible with no objections raised. The evidence for the both parties was admitted.

ADVISORY MEMORANDUM:

A recent memorandum was provided by Stephen J. Keller, Chief Legal Counsel for Property Tax Litigation and VAB Oversight, Florida Department of Revenue, in response to questions/ issues presented by Ms. Sheryl A Edwards, Legal Counsel to the Sarasota County Value Adjustment Board. The Memorandum is dated March 25, 2022.

Subject: Advisory Assistance on Mathematically Correct Methods for Deducting Costs of Sale in the Income Capitalization Approach.

"Exhibits 2 and 3 attached hereto contain statewide summaries showing, for 2020 and 2021, respectively, the cost of sale deductions each county applied in arriving at just valuations and then reported to DOR on Form DR-493. Almost all of Florida's 67 counties, including Sarasota County, reported cost of sale deductions of 15 percent and this has been the accepted standard practice in Florida for several decades.

Given that property appraisers' cost of sale deductions are a long-standing, well-known, and widely accepted practice and are generally made uniformly and across-the-board in accordance with applicable law, ***such deductions are a professionally accepted appraisal practice, which VABs and their special magistrates must apply as well."***

"Consistent with law and professionally accepted appraisal practices, SCPAO has an expressed, professionally accepted policy of making and reporting 15 percent cost of sale deductions in arriving at just valuations under Florida law. Accordingly, in just valuation reviews, the Sarasota County VAB and its special magistrates are compelled by law to correctly apply 15 percent cost of sale deductions without double-counting."

Property Tax Overview Bulletin 11-01, Provided by Steven Keller, Office of General Counsel (Department of Revenue, indicates the following:

FLORIDA DEPARTMENT OF REVENUE

PROPERTY TAX INFORMATIONAL BULLETIN

Value Adjustment Board Petitions and the Eighth Criterion

This advisement addresses issues regarding the eighth just valuation criterion in subsection 193.011(8), F.S., which must be properly considered in administrative reviews. The Department's value adjustment board training contains more information on the eighth criterion. This bulletin must be used in conjunction with the training and consistent with law.

Advisement

1. The Department's value adjustment board training and this bulletin supersede prior Department letters OPN 90-0039 (dated August 20, 1990) and OPN 95-0002 (dated January 9, 1995).

2. In accordance with Florida Statutes and applicable case law, applicability of the eighth criterion in subsection 193.011(8), F.S., is not limited to a sales comparison valuation approach or to property that was sold. This bulletin addresses the proper consideration of the eighth criterion in administrative reviews involving the income capitalization and cost less depreciation approaches to valuation of real property.

3. The eighth criterion must be properly considered in the income capitalization and cost less depreciation approaches. This requires proper consideration of an adjustment for both costs of sale and personal property where appropriate. See subsection 193.011(8), F.S.

4. When justified by sufficiently relevant and credible evidence, the Board or special magistrate should make an eighth criterion adjustment to a value indication developed by the income capitalization or cost less depreciation approach to arrive at just valuation. This adjustment must include any adjustment necessary to exclude the just value of personal property from just valuations of real property.

Analysis

In long-established and accepted practice, Florida property appraisers routinely apply across-the board eighth criterion adjustments in just valuations of real property, without regard to the valuation approach used or whether the property was sold. See Forms DR-493 reported annually by property appraisers, and Southern Bell Telephone and Telegraph Co. v. Broward County, 665 So.2d 272 (Fla. 4th DCA 1995) review denied 673 So.2d 30 (Fla. 1996). Also, see Louisville and National Railroad Co. v. Department of Revenue, State of Fla., 736 F.2d 1495 (11th Cir.(Fla.) July 24, 1984). An eighth criterion adjustment made in the just valuation of a single parcel was approved in Roden v. GAC Liquidating Trust, 462 So.2d 92 (Fla. 2nd DCA 1985).

When an actual sale of the property has not occurred, the appraiser must, in arriving at just valuation, place himself or herself in the position of the parties to a hypothetical sale. See Southern Bell Telephone and Telegraph Co. v. Dade County, 275 So.2d 4 (Fla. 1973) and Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). ***The just valuation standards of section 193.011, F.S., which include the eighth criterion, must be properly considered regardless of the valuation approach used and whether the property was sold.***

The case of Bystrom v. Equitable Life Assurance Society, 416 So.2d 1133 (Fla. 3rd Conclusion DCA 1982) reviewed a 1978 assessment based on 1977 statutes. Later, in 1979, the eighth criterion was amended to add a personal property component. See Chapter 79-334, Laws of Florida. The law on which the long-established operation of the eighth criterion is based has changed substantially since the assessment date in Bystrom.

Conclusion

The eighth criterion must be properly considered in each of the three approaches to valuation. When justified by sufficiently relevant and credible evidence, the Board or special magistrate should make an eighth criterion adjustment in any of the three valuation approaches.

Board attorneys should ensure that all Board members and special magistrates receive a copy of this bulletin. Questions on this bulletin can be sent by e-mail to VAB@dor.state.fl.us.

The **DR-493 form (Hernando County)**, indicates that a 15% adjustment should be made for the subject's use code.

The Property Appraiser indicates that the cost of sale is accounted for internally, using their CAMA system, and has been considered. However, in this case, the Property Appraiser did not present competent, substantial evidence showing that the Property Appraiser applied the 15% cost of sale deduction reflected in their DR-493 form (Hernando County) for the subject property. Therefore, the Property Appraiser has failed to establish a presumption of correctness. Based upon the evidence and testimony presented at the hearing, the Petitioner did prove by a preponderance of the evidence that the Property Appraiser's just value does not represent just value. Petitioner then proved just value by competent, substantial evidence and the new value is established. Therefore, the petition is **GRANTED**.

HEARING SUMMARY

The subject is a single-family residence.

PROPERTY APPRAISER PRESENTATION

The Property Appraiser provided a sales analysis report, containing three sales of similar single-family residences that closed in 2024. Each of the sales are in the same or similar neighborhood to the subject. The subject, as well as the comparables are presented and analyzed on "Adjusted Square Footage".

The sales indicate adjusted values (adjusted 15% for Cost of Sale/ COS, per Department of Revenue/ DOR requirements) of approximately $145/ SF and $246,500, overall (indicating $235,000). The subject assessment reflects a value of $154/ SF and $242,196, overall, above the value indication. Therefore, based on this sales data, the subject assessment is unsupported.

DIFFERENCE (SF)			-89			
DIFFERENCE (LARGER/ SMALLER)			-5%			

CONCLUSION

The Property Appraiser's sales are more similar to the subject. However, the best market evidence available (Property Appraiser Sales) supports an adjustment to the assessment **($235,000)**.

CONCLUSION OF LAW

The evidence submitted by the Property Appraiser and Petitioner is deemed relevant, credible and admissible with no objections raised. The evidence for the both parties was admitted.

The Property Appraiser indicates that the cost of sale is accounted for internally, using their CAMA system, and has been considered. However, in this case, the Property Appraiser did not present competent, substantial evidence showing that the Property Appraiser applied the 15% cost of sale deduction reflected in their DR-493 form (Hernando County) for the subject property. Therefore, the Property Appraiser has failed to establish a presumption of correctness. Based upon the evidence and testimony presented at the hearing, the Petitioner did prove by a preponderance of the evidence that the Property Appraiser's just value does not represent just value. Petitioner then proved just value by competent, substantial evidence and the new value is established. Therefore, the petition is **GRANTED**.

Property Tax Overview Bulletin 11-01, Provided by Steven Keller, Office of General Counsel (Department of Revenue, indicates the following:

FLORIDA DEPARTMENT OF REVENUE

PROPERTY TAX INFORMATIONAL BULLETIN

Value Adjustment Board Petitions and the Eighth Criterion

This advisement addresses issues regarding the eighth just valuation criterion in subsection 193.011(8), F.S., which must be properly considered in administrative reviews. The Department's value adjustment board training contains more information on the eighth criterion. This bulletin must be used in conjunction with the training and consistent with law.

Advisement

1. The Department's value adjustment board training and this bulletin supersede prior Department letters OPN 90-0039 (dated August 20, 1990) and OPN 95-0002 (dated January 9, 1995).

2. In accordance with Florida Statutes and applicable case law, applicability of the eighth criterion in subsection 193.011(8), F.S., is not limited to a sales comparison valuation approach or to property that was sold. This bulletin addresses the proper consideration of the eighth criterion in administrative reviews involving the income capitalization and cost less depreciation approaches to valuation of real property.

3. The eighth criterion must be properly considered in the income capitalization and cost less depreciation approaches. This requires proper consideration of an adjustment for both costs of sale and personal property where appropriate. See subsection 193.011(8), F.S.

4. When justified by sufficiently relevant and credible evidence, the Board or special magistrate should make an eighth criterion adjustment to a value indication developed by the income capitalization or cost less depreciation approach to arrive at just valuation. This adjustment must include any adjustment necessary to exclude the just value of personal property from just valuations of real property.

Analysis

In long-established and accepted practice, Florida property appraisers routinely apply across-the board eighth criterion adjustments in just valuations of real property, without regard to the valuation approach used or whether the property was sold. See Forms DR-493 reported annually by property appraisers, and Southern Bell Telephone and Telegraph Co. v. Broward County, 665 So.2d 272 (Fla. 4th DCA 1995) review denied 673 So.2d 30 (Fla. 1996). Also, see Louisville and National Railroad Co. v. Department of Revenue, State of Fla., 736 F.2d 1495 (11th Cir.(Fla.) July 24, 1984). An eighth criterion adjustment made in the just valuation of a single parcel was approved in Roden v. GAC Liquidating Trust, 462 So.2d 92 (Fla. 2nd DCA 1985).

When an actual sale of the property has not occurred, the appraiser must, in arriving at just valuation, place himself or herself in the position of the parties to a hypothetical sale. See Southern Bell Telephone and Telegraph Co. v. Dade County, 275 So.2d 4 (Fla. 1973) and Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). ***The just valuation standards of section 193.011, F.S., which include the eighth criterion, must be properly considered regardless of the valuation approach used and whether the property was sold.***

The case of Bystrom v. Equitable Life Assurance Society, 416 So.2d 1133 (Fla. 3rd Conclusion DCA 1982) reviewed a 1978 assessment based on 1977 statutes. Later, in 1979, the eighth criterion was amended to add a personal property component. See Chapter 79-334, Laws of Florida. The law on which the long-established operation of the eighth criterion is based has changed substantially since the assessment date in Bystrom.

Conclusion

The eighth criterion must be properly considered in each of the three approaches to valuation. When justified by sufficiently relevant and credible evidence, the Board or special magistrate should make an eighth criterion adjustment in any of the three valuation approaches.

Board attorneys should ensure that all Board members and special magistrates receive a copy of this bulletin. Questions on this bulletin can be sent by e-mail to VAB@dor.state.fl.us.

The **DR-493 form (Hernando County)**, indicates that a 15% adjustment should be made for the subject's use code.

The Property Appraiser indicates that the cost of sale is accounted for internally (CAMA), and has been considered. However, in this case, the Property Appraiser did not physically show any cost of sale deduction in their analysis for this property. Therefore, the Property Appraiser has failed to establish their presumption of correctness. The Petitioner did not, however, prove by a preponderance of the evidence that the Property Appraiser's just value does not represent just value nor did the Petitioner prove that the Property Appraiser's just valuation is arbitrarily based on appraisal practices that are different from the appraisal practices generally applied by the Property Appraiser to comparable property within the same county. The Petitioner did not present competent, substantial evidence to reduce the value below the market value provided by the Property Appraiser. Therefore, the petition is **DENIED.**

HEARING SUMMARY

The subject is a single-family residence.

PROPERTY APPRAISER PRESENTATION

The Property Appraiser provided a sales analysis report, containing three sales of similar single-family residences that closed in 2024. Each of the sales are in the same or similar neighborhood to the subject. The subject, as well as the comparables are presented and analyzed on "Adjusted Square Footage".

The sales indicate adjusted values (adjusted 15% for Cost of Sale/ COS, per Department of Revenue/ DOR requirements) of approximately $134/ SF and $246,500, overall (Supporting approximately $253,000). The subject assessment reflects a value of $112/ SF and $219,097, overall. Therefore, based on this sales data, the subject assessment is supported.

CONCLUSION

The Property Appraiser's sales are more similar to the subject, and the Property Appraiser's sales support the assessment. The Petition should be **Denied.**

CONCLUSION OF LAW

The evidence submitted by the Property Appraiser and Petitioner is deemed relevant, credible and admissible with no objections raised by either party. The evidence for both parties was admitted.

The Property Appraiser did not physically show any cost of sale deduction in their analysis for this property. Therefore, the Property Appraiser has failed to establish their presumption of correctness. The Petitioner did not, however, prove by a preponderance of the evidence that the Property Appraiser's just value does not represent just value nor did the Petitioner prove that the Property Appraiser's just valuation is arbitrarily based on appraisal practices that are different from the appraisal practices generally applied by the Property Appraiser to comparable property within the same county. The Petitioner did not present competent, substantial evidence to reduce the value below the market value provided by the Property Appraiser. Therefore, the petition is **DENIED.**

PETITION NO. 25-346

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: PR BORROWER 26 LLC
PARCEL KEY NO: 00284640

SUMMARY OF EVIDENCE

1 The Petitioner, NATASHA ELLIOTT of RYAN LLC for PR BORROWER 26 LLC did appear telephonically before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The Property Appraiser shows a just value of $254,485 ($174/SF heated, $135/SF adjusted), an assessed or capped value of $192,751, and a taxable value of $192,751.

3 The Petitioner estimated the just value to be $236,662.

4 *Subject Property Type:* The subject is a 1,465 heated base SF (1,865 SF adjusted) single family residence. It was constructed in 1986. The parcel is located at 12478 Linden Dr., Spring Hill.

5 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

6 The Petitioners evidence consists of a petition, hearing notice, correspondence, sales analysis, sales map and verbal testimony.

7 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

8 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

9 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

10 The PAO performed their analysis utilizing adjusted SF in their sales analysis report. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

11 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average.

12 The subject property has not had a qualified sale in the 3 years prior to the lien date.

13 The PAO supplied 3 improved sales on their statistical grid. PAO Sale 1 was an outlier or was too dissimilar to be reliable (and was not weighted). The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 10% for COS. After adjustment, these sales indicated a range of $145/SF to $152/SF adjusted before extra features (median $149/SF adjusted). The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($148.75/SF adjusted) $277,419 and that the subject IS NOT over assessed.

14 The PAO and Petitioner have 0 sale(s) in common. Sale(s) in common are analyzed herein among the PAO dataset, unless it/they are the only reliable Petitioner Sale(s).

15 The Petitioner supplied 6 improved sale comparables. Sales 1, 4, 5, and 6 was/were outliers and/or too dissimilar and not weighted. This analysis does not note garages, extra feature values, amenities or the difference between gross, adjusted and heated SF. The sales will be adjusted at 4%/year for market conditions (the Petitioner used 0% adjustment), for age/condition, adjusted for land size/value if warranted, adjusted for differences in heated SF at $125/SF heated, and in this instance a 10% COS factor is warranted. After adjustment, these remaining sales indicated a range of $248,490 to $260,460

(median $254,475). The Petitioner sales indicate a credible and reliable just value for the subject of $254,500 and that the subject IS NOT over assessed.

16 Reviewing all the sales presented by both parties, the evidence credibly and reliably supports a just value of $265,000 for the subject and that the subject IS NOT over assessed.

17 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 8-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 2-3%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

18 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

19 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

20 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

21 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

22 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

***"Factors to consider in deriving just valuation**. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."

The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID (marginally) establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID NOT overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS NOT shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES NOT exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS NOT satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be denied.

PETITION NO. 25-347

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: PROGRESS RESIDENTIAL BORROWER 2 LLC
PARCEL KEY NO: 00496859

SUMMARY OF EVIDENCE

1 The Petitioner, NATASHA ELLIOTT of RYAN LLC for PROGRESS RESIDENTIAL BORROWER 2 LLC did appear telephonically before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The Property Appraiser shows a just value of $279,828 ($136/SF heated, $111/SF adjusted), an assessed or capped value of $240,480, and a taxable value of $240,480.

3 The Petitioner estimated the just value to be $248,333.

4 *Subject Property Type:* The subject is a 2,050 heated base SF (2,490 SF adjusted) single family residence. It was constructed in 1986. The parcel is located at 2483 Amherst Ave., Spring Hill.

5 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

6 The Petitioners evidence consists of a petition, hearing notice, correspondence, sales analysis, sales map and verbal testimony.

7 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

8 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

9 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

10 The PAO performed their analysis utilizing adjusted SF in their sales analysis report. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

11 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average.

12 The subject property has not had a qualified sale in the 3 years prior to the lien date.

13 The PAO supplied 3 improved sales on their statistical grid. PAO sale 2 was an outlier or was too dissimilar to be reliable (and was not weighted). The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 10% for COS. After adjustment, these sales indicated a range of $130/SF to $141/SF adjusted before extra features (median $135/SF adjusted). The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($135/SF adjusted) $336,150 and that the subject IS NOT over assessed.

14 The PAO and Petitioner have 0 sale(s) in common. Sale(s) in common are analyzed herein among the PAO dataset, unless it/they are the only reliable Petitioner Sale(s).

15 The Petitioner supplied 6 improved sale comparables. Sales 2, 3, and 4 was/were outliers and/or too dissimilar and not weighted. This analysis does not note garages, extra feature values, amenities or the difference between gross, adjusted and heated SF. The sales will be adjusted at 4%/year for market conditions (the Petitioner used 0% adjustment), for age/condition, adjusted for land size/value if warranted, adjusted for differences in heated SF at $100/SF heated, and in this instance a 10% COS factor is warranted. After adjustment, these remaining sales indicated a range of $249,840 to $335,790

(median $307,260). The Petitioner sales indicate a credible and reliable just value for the subject of $307,500 and that the subject IS NOT over assessed.

16 Reviewing all the sales presented by both parties, the evidence credibly and reliably supports a just value of $320,000 for the subject and that the subject IS NOT over assessed.

17 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 8-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 2-3%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

18 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

19 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

20 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

21 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

22 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

***"Factors to consider in deriving just valuation**. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."

The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID (marginally) establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID NOT overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS NOT shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES NOT exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS NOT satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be denied.

PETITION NO. 25-348

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: PROGRESS RESIDENTIAL BORROWER 20 LLC
PARCEL KEY NO: 00280528

SUMMARY OF EVIDENCE

1 The Petitioner, NATASHA ELLIOTT of RYAN LLC for PROGRESS RESIDENTIAL BORROWER 20 LLC did appear telephonically before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The Property Appraiser shows a just value of $407,966 ($190/SF heated, $155/SF adjusted), an assessed or capped value of $407,966, and a taxable value of $407,966.

3 The Petitioner estimated the just value to be $301,305.

4 *Subject Property Type:* The subject is a 2,142 heated base SF (2,560 SF adjusted) single family residence. It was constructed in 2000. The parcel is located at 11515 Linden Dr., Spring Hill.

5 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

6 The Petitioners evidence consists of a petition, hearing notice, correspondence, sales analysis, sales map and verbal testimony.

7 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

8 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

9 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

10 The PAO performed their analysis utilizing adjusted SF in their sales analysis report. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

11 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average.

12 The subject property has not had a qualified sale in the 3 years prior to the lien date.

13 The PAO supplied 3 improved sales on their statistical grid. PAO Sale 2 was an outlier or was too dissimilar to be reliable (and was not weighted). The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 9% for COS. After adjustment, these sales indicated a range of $144/SF to $145/SF adjusted before extra features (median $145/SF adjusted). The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($144.50/SF adjusted) $369,920 and that the subject IS over assessed.

14 The PAO and Petitioner have 0 sale(s) in common. Sale(s) in common are analyzed herein among the PAO dataset, unless it/they are the only reliable Petitioner Sale(s).

15 The Petitioner supplied 6 improved sale comparables. Sales 1, 2, and 4 was/were outliers and/or too dissimilar and not weighted. This analysis does not note garages, extra feature values, amenities or the difference between gross, adjusted and heated SF. The sales will be adjusted at 4%/year for market conditions (the Petitioner used 0% adjustment), for age/condition, adjusted for land size/value if warranted, adjusted for differences in heated SF at $105/SF heated, and in this instance a 9% COS factor is warranted. After adjustment, these remaining sales indicated a range of $321,412 to $369,096

(median $349,713). The Petitioner sales indicate a credible and reliable just value for the subject of $350,000 and that the subject IS over assessed.

16 Reviewing all the sales presented by both parties, the evidence credibly and reliably supports a just value of $360,000 for the subject and that the subject IS over assessed.

17 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 8-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 2-3%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

18 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

19 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

20 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

21 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

22 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

***"Factors to consider in deriving just valuation**. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."

The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID (marginally) establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS NOT reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be GRANTED in part with a reduction in the just value to $360,000.

PETITION NO. 25-349

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: PROGRESS RESIDENTIAL BORROWER 5 LLC
PARCEL KEY NO: 00215109

SUMMARY OF EVIDENCE

1 The Petitioner, NATASHA ELLIOTT of RYAN LLC for PROGRESS RESIDENTIAL BORROWER 5 LLC did appear telephonically before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The Property Appraiser shows a just value of $243,977 ($157/SF heated, $155/SF adjusted), an assessed or capped value of $192,760, and a taxable value of $192,760.

3 The Petitioner estimated the just value to be $211,230.

4 *Subject Property Type:* The subject is a 1,555 heated base SF (1,843 SF adjusted) single family residence. It was constructed in 2003. The parcel is located at 1237 Sioux Ct., Spring Hill.

5 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

6 The Petitioners evidence consists of a petition, hearing notice, correspondence, sales analysis, sales map and verbal testimony.

7 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

8 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

9 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

10 The PAO performed their analysis utilizing adjusted SF in their sales analysis report. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

11 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average.

12 The subject property has not had a qualified sale in the 3 years prior to the lien date.

13 The PAO supplied 3 improved sales on their statistical grid. PAO Sale(s) 1 and 2 was/were an outlier or was too dissimilar to be reliable (and was not weighted). The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 10% for COS. After adjustment, these sales indicated a range of $164/SF to $164/SF adjusted before extra features (median $164/SF adjusted). The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($163.50/SF adjusted) $301,330 and that the subject IS NOT over assessed.

14 The PAO and Petitioner have 0 sale(s) in common. Sale(s) in common are analyzed herein among the PAO dataset, unless it/they are the only reliable Petitioner Sale(s).

15 The Petitioner supplied 6 improved sale comparables. Sales 2, 3, 4, and 5 was/were outliers and/or too dissimilar and not weighted. This analysis does not note garages, extra feature values, amenities or the difference between gross, adjusted and heated SF. The sales will be adjusted at 4%/year for market conditions (the Petitioner used 0% adjustment), for age/condition, adjusted for land size/value if warranted, adjusted for differences in heated SF at $115/SF heated, and in this instance a 10% COS factor is warranted. After adjustment, these remaining sales indicated a range of $246,600 to $303,660

(median $275,130). The Petitioner sales indicate a credible and reliable just value for the subject of $275,000 and that the subject IS NOT over assessed.

16 Reviewing all the sales presented by both parties, the evidence credibly and reliably supports a just value of $284,000 for the subject and that the subject IS NOT over assessed.

17 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 8-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 2-3%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

18 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

19 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

20 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

21 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

22 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

***"Factors to consider in deriving just valuation**. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."

The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID (marginally) establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID NOT overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS NOT shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES NOT exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS NOT satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be denied.

PETITION NO. 25-350

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: HOME SFR BORROWER IV LLC
PARCEL KEY NO: 00206271

SUMMARY OF EVIDENCE

1 The Petitioner, NATASHA ELLIOTT of RYAN LLC for HOME SFR BORROWER IV LLC did appear telephonically before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The Property Appraiser shows a just value of $253,380 ($147/SF heated, $128/SF adjusted), an assessed or capped value of $253,380, and a taxable value of $253,380.

3 The Petitioner estimated the just value to be $248,130.

4 *Subject Property Type:* The subject is a 1,721 heated base SF (1,952 SF adjusted) single family residence. It was constructed in 2004. The parcel is located at 5511 Ashland Dr., Spring Hill.

5 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

6 The Petitioners evidence consists of a petition, hearing notice, correspondence, sales analysis, sales map and verbal testimony.

7 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

8 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

9 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

10 The PAO performed their analysis utilizing adjusted SF in their sales analysis report. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

11 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average.

12 The subject property has not had a qualified sale in the 3 years prior to the lien date.

13 The PAO supplied 3 improved sales on their statistical grid. PAO Sale(s) 1 and 2 was/were an outlier or was too dissimilar to be reliable (and was not weighted). The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 10% for COS. After adjustment, these sales indicated a range of $142/SF to $142/SF adjusted before extra features (median $142/SF adjusted). The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($141.75/SF adjusted) $276,696 and that the subject IS NOT over assessed.

14 The PAO and Petitioner have 0 sale(s) in common. Sale(s) in common are analyzed herein among the PAO dataset, unless it/they are the only reliable Petitioner Sale(s).

15 The Petitioner supplied 6 improved sale comparables. Sales 2, 3, 4, 5, and 6 was/were outliers and/or too dissimilar and not weighted. This analysis does not note garages, extra feature values, amenities or the difference between gross, adjusted and heated SF. The sales will be adjusted at 4%/year for market conditions (the Petitioner used 0% adjustment), for age/condition, adjusted for land size/value if warranted, adjusted for differences in heated SF at $105/SF heated, and in this instance a 10% COS factor is warranted. After adjustment, these remaining sales indicated a range of $253,890 to $253,890

(median $253,890). The Petitioner sales indicate a credible and reliable just value for the subject of $254,000 and that the subject IS NOT over assessed.

16 Reviewing all the sales presented by both parties, the evidence credibly and reliably supports a just value of $265,000 for the subject and that the subject IS NOT over assessed.

17 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 8-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 2-3%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

18 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

19 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

20 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

21 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

22 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

***"Factors to consider in deriving just valuation**. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."

The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID (marginally) establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID NOT overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS NOT shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES NOT exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS NOT satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be denied.

PETITION NO. 25-351

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: PROGRESS RESIDENTIAL BORROWER 24 LLC
PARCEL KEY NO: 01693199

SUMMARY OF EVIDENCE

1 The Petitioner, NATASHA ELLIOTT of RYAN LLC for PROGRESS RESIDENTIAL BORROWER 24 LLC did appear telephonically before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The Property Appraiser shows a just value of $257,435 ($167/SF heated, $128/SF adjusted), an assessed or capped value of $257,435, and a taxable value of $257,435.

3 The Petitioner estimated the just value to be $236,629.

4 *Subject Property Type:* The subject is a 1,540 heated base SF (1,830 SF adjusted) single family residence. It was constructed in 2015. The parcel is located at 30873 Satinleaf Run, Spring Hill.

5 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

6 The Petitioners' evidence consists of a petition, hearing notice, correspondence, sales analysis, sales map and verbal testimony.

7 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

8 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

9 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

10 The PAO performed their analysis utilizing adjusted SF in their sales analysis report. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

11 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average.

12 The subject property has not had a qualified sale (excluding multi parcel sales) in the 3 years prior to the lien date.

13 The PAO supplied 3 improved sales on their statistical grid. No PAO Sale(s) was/were an outlier or was too dissimilar to be reliable (and was not weighted). The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 10% for COS. After adjustment, these sales indicated a range of $141/SF to $154/SF adjusted before extra features (median $148/SF adjusted). The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($148/SF adjusted) $270,840 and that the subject IS NOT over assessed.

14 The PAO and Petitioner have 1 sale(s) in common. Sale(s) in common are analyzed herein among the PAO dataset, unless it/they are the only reliable Petitioner Sale(s).

15 The Petitioner supplied 6 improved sale comparables. No sales was/were outliers and/or too dissimilar and not weighted. This analysis does not note garages, extra feature values, amenities or the difference between gross, adjusted and heated SF. The sales will be adjusted at 4%/year for market conditions (the Petitioner used 0% adjustment), for age/condition, adjusted for land size/value if warranted, adjusted for differences in heated SF at $110/SF heated, and in this instance a 10% COS factor is warranted. After adjustment, these remaining sales indicated a range of $246,510 to $297,540 (median

$269,010). The Petitioner sales indicate a credible and reliable just value for the subject of $269,000 and that the subject IS NOT over assessed.

16 Reviewing all the sales presented by both parties, the evidence credibly and reliably supports a just value of $270,000 for the subject and that the subject IS NOT over assessed.

17 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 8-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 2-3%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

18 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

19 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

20 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

21 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

22 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

***"Factors to consider in deriving just valuation**. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."

The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID (marginally) establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID NOT overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS NOT shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES NOT exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS NOT satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be denied.

PETITION NO. 25-352

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: PROGRESS RESIDENTIAL BORROWER 5 LLC
PARCEL KEY NO: 01576878

SUMMARY OF EVIDENCE

1 The Petitioner, NATASHA ELLIOTT of RYAN LLC for PROGRESS RESIDENTIAL BORROWER 5 LLC did appear telephonically before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The Property Appraiser shows a just value of $249,799 ($130/SF heated, $128/SF adjusted), an assessed or capped value of $202,643, and a taxable value of $202,643.

3 The Petitioner estimated the just value to be $240,506.

4 *Subject Property Type:* The subject is a 1,928 heated base SF (2,237 SF adjusted) single family residence. It was constructed in 2006. The parcel is located at 14219 Holly Hammock Ln., Brooksville FL.

5 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

6 The Petitioners' evidence consists of a petition, hearing notice, correspondence, sales analysis, sales map and verbal testimony.

7 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

8 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

9 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

10 The PAO performed their analysis utilizing adjusted SF in their sales analysis report. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

11 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average.

12 The subject property has not had a qualified sale (excluding multi parcel sales) in the 3 years prior to the lien date.

13 The PAO supplied 3 improved sales on their statistical grid. PAO Sale(s) 1 was/were an outlier or was too dissimilar to be reliable (and was not weighted). The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 10% for COS. After adjustment, these sales indicated a range of $115/SF to $140/SF adjusted before extra features (median $127/SF adjusted). The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($120/SF adjusted) $268,440 and that the subject IS NOT over assessed.

14 The PAO and Petitioner have 2 sale(s) in common. Sale(s) in common are analyzed herein among the PAO dataset, unless it/they are the only reliable Petitioner Sale(s).

15 The Petitioner supplied 6 improved sale comparables. Sales 4 and 6 was/were outliers and/or too dissimilar and not weighted. This analysis does not note garages, extra feature values, amenities or the difference between gross, adjusted and heated SF. The sales will be adjusted at 4%/year for market conditions (the Petitioner used 0% adjustment), for age/condition, adjusted for land size/value if warranted, adjusted for differences in heated SF at $105/SF heated, and in this instance a 10% COS factor is warranted. After adjustment, these remaining sales indicated a range of $243,810 to $269,460 (median

$256,635). The Petitioner sales indicate a credible and reliable just value for the subject of $257,000 and that the subject IS NOT over assessed.

16 Reviewing all the sales presented by both parties, the evidence credibly and reliably supports a just value of $262,500 for the subject and that the subject IS NOT over assessed.

17 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 8-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 2-3%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

18 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

19 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

20 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

21 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

22 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

***"Factors to consider in deriving just valuation**. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."

The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID (marginally) establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID NOT overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS NOT shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES NOT exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS NOT satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be denied.

PETITION NO. 25-353

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: PROGRESS RESIDENTIAL BORROWER 24 LLC
PARCEL KEY NO: 01576342

SUMMARY OF EVIDENCE

1 The Petitioner, NATASHA ELLIOTT of RYAN LLC for PROGRESS RESIDENTIAL BORROWER 24 LLC did appear telephonically before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The Property Appraiser shows a just value of $229,577 ($142/SF heated, $128/SF adjusted), an assessed or capped value of $229,577, and a taxable value of $229,577. This is a decrease from the TRIM just value of $241,159, an assessed or capped value of $241,159, and a taxable value of $241,159.

3 The Petitioner estimated the just value to be $218,260.

4 *Subject Property Type:* The subject is a 1,613 heated base SF (1,916 SF adjusted) single family residence. It was constructed in 2006. The parcel is located at 14141 Lemon Yellow Ln., Brooksville FL.

5 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

6 The Petitioners' evidence consists of a petition, hearing notice, correspondence, sales analysis, sales map and verbal testimony.

7 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

8 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

9 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

10 The PAO performed their analysis utilizing adjusted SF in their sales analysis report. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

11 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average.

12 The subject property transferred for $275,000 in October 2024 (qualified).

13 The PAO supplied 3 improved sales on their statistical grid. No Sale(s) was/were an outlier or was too dissimilar to be reliable (and was not weighted). The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 10% for COS. After adjustment, these sales indicated a range of $119/SF to $141/SF adjusted before extra features (median $132/SF adjusted). The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($132/SF adjusted) $252,912 and that the subject IS NOT over assessed.

14 The PAO and Petitioner have 2 sale(s) in common. Sale(s) in common are analyzed herein among the PAO dataset, unless it/they are the only reliable Petitioner Sale(s).

15 The Petitioner supplied 6 improved sale comparables. Sales 3 was/were outliers and/or too dissimilar and not weighted. This analysis does not note garages, extra feature values, amenities or the difference between gross, adjusted and heated SF. The sales will be adjusted at 4%/year for market conditions (the Petitioner used 0% adjustment), for age/condition, adjusted for land size/value if warranted, adjusted for differences in heated SF at $95/SF heated, and in this instance a 10% COS factor is warranted. After adjustment, these remaining sales indicated a range of $239,310 to $276,030 (median $256,635). The Petitioner sales indicate a credible and reliable just value for the subject of $257,670 and that the subject IS NOT over assessed.

16 Reviewing all the sales presented by both parties, the evidence credibly and reliably supports a just value of $255,000 for the subject and that the subject IS NOT over assessed.

17 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 8-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 2-3%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

18 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

19 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

20 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

21 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

22 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

***"Factors to consider in deriving just valuation**. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."

The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID (marginally) establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID NOT overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS NOT shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES NOT exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS NOT satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be denied.

PETITION NO. 25-354

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: TRUE NORTH PROPERTY OWNER B
PARCEL KEY NO: 01572248

SUMMARY OF EVIDENCE

1 The Petitioner, NATASHA ELLIOTT of RYAN LLC for TRUE NORTH PROPERTY OWNER B did appear telephonically before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The Property Appraiser shows a just value of $291,815 ($150/SF heated, $128/SF adjusted), an assessed or capped value of $291,815, and a taxable value of $291,815.

3 The Petitioner estimated the just value to be $245,833.

4 *Subject Property Type:* The subject is a 1,944 heated base SF (2,380 SF adjusted) single family residence. It was constructed in 2006. The parcel is located at 3879 Braemere Dr., Brooksville FL.

5 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

6 The Petitioners' evidence consists of a petition, hearing notice, correspondence, sales analysis, sales map and verbal testimony.

7 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

8 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

9 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

10 The PAO performed their analysis utilizing adjusted SF in their sales analysis report. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

11 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average.

12 The subject property transferred for $250,000 in September of 2021 (qualified).

13 The PAO supplied 3 improved sales on their statistical grid. No Sale(s) was/were an outlier or was too dissimilar to be reliable (and was not weighted). The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 10% for COS. After adjustment, these sales indicated a range of $130/SF to $151/SF adjusted before extra features (median $147/SF adjusted). The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($135/SF adjusted) $321,300 and that the subject IS NOT over assessed.

14 The PAO and Petitioner have 0 sale(s) in common. Sale(s) in common are analyzed herein among the PAO dataset, unless it/they are the only reliable Petitioner Sale(s).

15 The Petitioner supplied 3 improved sale comparables. Sale(s) 3 was/were outliers and/or too dissimilar and not weighted. This analysis does not note garages, extra feature values, amenities or the difference between gross, adjusted and heated SF. The sales will be adjusted at 4%/year for market conditions (the Petitioner used 0% adjustment), for age/condition, adjusted for land size/value if warranted, adjusted for differences in heated SF at $105/SF heated, and in this instance a 10% COS factor is warranted. After adjustment, these remaining sales indicated a range of $254,520 to $281,520 (median

$268,020). The Petitioner sales indicate a credible and reliable just value for the subject of $275,000 and that the subject IS over assessed.

16 Reviewing all the sales presented by both parties, the evidence credibly and reliably supports a just value of $295,000 for the subject and that the subject IS NOT over assessed.

17 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 8-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 2-3%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

18 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

19 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

20 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

21 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

22 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

***"Factors to consider in deriving just valuation**. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."

The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID (marginally) establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID NOT overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS NOT shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES NOT exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS NOT satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be denied.

PETITION NO. 25-355

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: PROGRESS RESIDENTIAL BORROWER 11 LLC
PARCEL KEY NO: 01572159

SUMMARY OF EVIDENCE

1 The Petitioner, NATASHA ELLIOTT of RYAN LLC for PROGRESS RESIDENTIAL BORROWER 11 LLC did appear telephonically before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The Property Appraiser shows a just value of $328,289 ($152/SF heated, $127/SF adjusted), an assessed or capped value of $275,251, and a taxable value of $275,251.

3 The Petitioner estimated the just value to be $281,000.

4 *Subject Property Type:* The subject is a 2,166 heated base SF (2,561 SF adjusted) single family residence. It was constructed in 2005. The parcel is located at 3731 Braemere Dr., Brooksville FL.

5 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

6 The Petitioners' evidence consists of a petition, hearing notice, correspondence, sales analysis, sales map and verbal testimony.

7 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

8 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

9 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

10 The PAO performed their analysis utilizing adjusted SF in their sales analysis report. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

11 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average.

12 The subject property has not had a qualified transfer in the 3 years prior to the lien date.

13 The PAO supplied 4 improved sales on their statistical grid. No Sale(s) was/were an outlier or was too dissimilar to be reliable (and was not weighted). The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 9% for COS. After adjustment, these sales indicated a range of $127/SF to $153/SF adjusted before extra features (median $141/SF adjusted). The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($130/SF adjusted) $332,930 and that the subject IS NOT over assessed.

14 The PAO and Petitioner have 0 sale(s) in common. Sale(s) in common are analyzed herein among the PAO dataset, unless it/they are the only reliable Petitioner Sale(s).

15 The Petitioner supplied 3 improved sale comparables. Sale(s) 3 was/were outliers and/or too dissimilar and not weighted. This analysis does not note garages, extra feature values, amenities or the difference between gross, adjusted and heated SF. The sales will be adjusted at 4%/year for market conditions (the Petitioner used 0% adjustment), for age/condition, adjusted for land size/value if warranted, adjusted for differences in heated SF at $105/SF heated, and in this instance a 9% COS factor is warranted. After adjustment, these remaining sales indicated a range of $286,006 to $348,348 (median

$307,898). The Petitioner sales indicate a credible and reliable just value for the subject of $308,000 and that the subject IS over assessed.

16 Reviewing all the sales presented by both parties, the evidence credibly and reliably supports a just value of $320,000 for the subject and that the subject IS over assessed.

17 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 8-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 2-3%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

18 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

19 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

20 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

21 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

22 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

***"Factors to consider in deriving just valuation**. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."

The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID (marginally) establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS NOT reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be GRANTED in part with a reduction in the just value to $320,000.

PETITION NO. 25-356

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: PROGRESS RESIDENTIAL BORROWER 25 LLC
PARCEL KEY NO: 01571427

SUMMARY OF EVIDENCE

1 The Petitioner, NATASHA ELLIOTT of RYAN LLC for PROGRESS RESIDENTIAL BORROWER 25 LLC did appear telephonically before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The Property Appraiser shows a just value of $328,836 ($152/SF heated, $127/SF adjusted), an assessed or capped value of $328,836, and a taxable value of $328,836.

3 The Petitioner estimated the just value to be $278,375.

4 *Subject Property Type:* The subject is a 2,169 heated base SF (2,564 SF adjusted) single family residence. It was constructed in 2006. The parcel is located at 3696 Braemere Dr., Brooksville FL.

5 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

6 The Petitioners' evidence consists of a petition, hearing notice, correspondence, sales analysis, sales map and verbal testimony.

7 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

8 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

9 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

10 The PAO performed their analysis utilizing adjusted SF in their sales analysis report. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

11 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average.

12 The subject property transferred for $325,000 in March of 2022 (qualified).

13 The PAO supplied 3 improved sales on their statistical grid. No Sale(s) was/were an outlier or was too dissimilar to be reliable (and was not weighted). The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 9% for COS. After adjustment, these sales indicated a range of $127/SF to $153/SF adjusted before extra features (median $141/SF adjusted). The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($130/SF adjusted) $333,320 and that the subject IS NOT over assessed.

14 The PAO and Petitioner have 0 sale(s) in common. Sale(s) in common are analyzed herein among the PAO dataset, unless it/they are the only reliable Petitioner Sale(s).

15 The Petitioner supplied 4 improved sale comparables. Sale(s) 3 was/were outliers and/or too dissimilar and not weighted. This analysis does not note garages, extra feature values, amenities or the difference between gross, adjusted and heated SF. The sales will be adjusted at 4%/year for market conditions (the Petitioner used 0% adjustment), for age/condition, adjusted for land size/value if warranted, adjusted for differences in heated SF at $105/SF heated, and in this instance a 9% COS factor is warranted. After adjustment, these remaining sales indicated a range of $286,321 to $348,663 (median $308,213). The Petitioner sales indicate a credible and reliable just value for the subject of $310,000 and that the subject IS over assessed.

16 Reviewing all the sales presented by both parties, the evidence credibly and reliably supports a just value of $322,000 for the subject and that the subject IS over assessed.

17 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 8-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 2-3%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

18 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

19 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

20 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

21 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

22 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

***"Factors to consider in deriving just valuation**. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."

The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID (marginally) establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS NOT reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be GRANTED in part with a reduction in the just value to $322,000.

PETITION NO. 25-357

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: PROGRESS RESIDENTIAL BORROWER 5 LLC
PARCEL KEY NO: 01568075

SUMMARY OF EVIDENCE

1 The Petitioner, NATASHA ELLIOTT of RYAN LLC for PROGRESS RESIDENTIAL BORROWER 5 LLC did appear telephonically before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The Property Appraiser shows a just value of $309,961 ($145/SF heated, $124/SF adjusted), an assessed or capped value of $260,464, and a taxable value of $260,464.

3 The Petitioner estimated the just value to be $267,200.

4 *Subject Property Type:* The subject is a 2,140 heated base SF (2,473 SF adjusted) single family residence. It was constructed in 2006. The parcel is located at 13210 Haverhill Dr., Brooksville FL.

5 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

6 The Petitioners' evidence consists of a petition, hearing notice, correspondence, sales analysis, sales map and verbal testimony.

7 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

8 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

9 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

10 The PAO performed their analysis utilizing adjusted SF in their sales analysis report. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

11 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average.

12 The subject property did not transfer in the 3 years prior to the lien date.

13 The PAO supplied 3 improved sales on their statistical grid. Sale(s) 2 was/were an outlier or was too dissimilar to be reliable (and was not weighted). The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 9% for COS. After adjustment, these sales indicated a range of $130/SF to $155/SF adjusted before extra features (median $142/SF adjusted). The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($142/SF adjusted) $351,166 and that the subject IS NOT over assessed.

14 The PAO and Petitioner have 0 sale(s) in common. Sale(s) in common are analyzed herein among the PAO dataset, unless it/they are the only reliable Petitioner Sale(s).

15 The Petitioner supplied 6 improved sale comparables. Sale(s) 2 and 3 was/were outliers and/or too dissimilar and not weighted. This analysis does not note garages, extra feature values, amenities or the difference between gross, adjusted and heated SF. The sales will be adjusted at 4%/year for market conditions (the Petitioner used 0% adjustment), for age/condition, adjusted for land size/value if warranted, adjusted for differences in heated SF at $105/SF heated, and in this instance a 9% COS factor is warranted. After adjustment, these remaining sales indicated a range of $268,359 to $298,935 (median $289,607). The Petitioner sales indicate a credible and reliable just value for the subject of $290,000 and that the subject IS over assessed.

16 Reviewing all the sales presented by both parties, the evidence credibly and reliably supports a just value of $300,000 for the subject and that the subject IS over assessed.

17 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 8-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 2-3%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

18 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

19 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

20 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

21 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

22 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

***"Factors to consider in deriving just valuation**. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."

The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID (marginally) establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS NOT reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be GRANTED in part with a reduction in the just value to $300,000.

PETITION NO. 25-358

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: PROGRESS RESIDENTIAL BORROWER 13 LLC
PARCEL KEY NO: 01566790

SUMMARY OF EVIDENCE

1 The Petitioner, NATASHA ELLIOTT of RYAN LLC for PROGRESS RESIDENTIAL BORROWER 13 LLC did appear telephonically before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The Property Appraiser shows a just value of $360,749 ($137/SF heated, $118/SF adjusted), an assessed or capped value of $293,992, and a taxable value of $293,992.

3 The Petitioner estimated the just value to be $323,183.

4 *Subject Property Type:* The subject is a 2,628 heated base SF (3,038 SF adjusted) single family residence. It was constructed in 2007. The parcel is located at 13709 Covey Run Pl., Spring Hill FL.

5 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

6 The Petitioners' evidence consists of a petition, hearing notice, correspondence, sales analysis, sales map and verbal testimony.

7 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

8 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

9 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

10 The PAO performed their analysis utilizing adjusted SF in their sales analysis report. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

11 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average.

12 The subject property did not transfer in the 3 years prior to the lien date.

13 The PAO supplied 3 improved sales on their statistical grid. No Sale(s) was/were an outlier or was too dissimilar to be reliable (and was not weighted). The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 9% for COS. After adjustment, these sales indicated a range of $112/SF to $127/SF adjusted before extra features (median $120/SF adjusted). The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($120/SF adjusted) $364,560 and that the subject IS NOT over assessed.

14 The PAO and Petitioner have 1 sale(s) in common. Sale(s) in common are analyzed herein among the PAO dataset, unless it/they are the only reliable Petitioner Sale(s).

15 The Petitioner supplied 6 improved sale comparables. Sale(s) 2, 5 and 6 was/were outliers and/or too dissimilar and not weighted. This analysis does not note garages, extra feature values, amenities or the difference between gross, adjusted and heated SF. The sales will be adjusted at 4%/year for market conditions (the Petitioner used 0% adjustment), for age/condition, adjusted for land size/value if warranted, adjusted for differences in heated SF at $100/SF heated, and in this instance a 9% COS factor is warranted. After adjustment, these remaining sales indicated a range of $339,430 to $384,839 (median $340,522). The Petitioner sales indicate a credible and reliable just value for the subject of $340,500 and that the subject IS over assessed.

16 Reviewing all the sales presented by both parties, the evidence credibly and reliably supports a just value of $355,000 for the subject and that the subject IS over assessed.

17 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 8-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 2-3%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

18 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

19 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

20 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

21 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

22 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

***"Factors to consider in deriving just valuation**. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."

The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID (marginally) establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS NOT reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be GRATNED in part with a reduction in the just value to $355,000.

PETITION NO. 25-359

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: PROGRESS RESIDENTIAL BORROWER 7 LLC
PARCEL KEY NO: 01535547

SUMMARY OF EVIDENCE

1 The Petitioner, NATASHA ELLIOTT of RYAN LLC for PROGRESS RESIDENTIAL BORROWER 7 LLC did appear telephonically before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The Property Appraiser shows a just value of $334,243 ($140/SF heated, $122/SF adjusted), an assessed or capped value of $280,522, and a taxable value of $280,522.

3 The Petitioner estimated the just value to be $323,183.

4 *Subject Property Type:* The subject is a 2,381 heated base SF (2,715 SF adjusted) single family residence. It was constructed in 2005. The parcel is located at 4341 Larkenheath Dr., Brooksville FL.

5 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

6 The Petitioners' evidence consists of a petition, hearing notice, correspondence, sales analysis, sales map and verbal testimony.

7 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

8 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

9 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

10 The PAO performed their analysis utilizing adjusted SF in their sales analysis report. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

11 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average.

12 The subject property did not transfer in the 3 years prior to the lien date.

13 The PAO supplied 3 improved sales on their statistical grid. No Sale(s) was/were an outlier or was too dissimilar to be reliable (and was not weighted). The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 9% for COS. After adjustment, these sales indicated a range of $117/SF to $132/SF adjusted before extra features (median $124/SF adjusted). The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($124/SF adjusted) $336,660 and that the subject IS NOT over assessed.

14 The PAO and Petitioner have 1 sale(s) in common. Sale(s) in common are analyzed herein among the PAO dataset, unless it/they are the only reliable Petitioner Sale(s).

15 The Petitioner supplied 5 improved sale comparables. Sale(s) 1 was/were outliers and/or too dissimilar and not weighted. This analysis does not note garages, extra feature values, amenities or the difference between gross, adjusted and heated SF. The sales will be adjusted at 4%/year for market conditions (the Petitioner used 0% adjustment), for age/condition, adjusted for land size/value if warranted, adjusted for differences in heated SF at $100/SF heated, and in this instance a 9% COS factor is warranted. After adjustment, these remaining sales indicated a range of $313,768 to $364,182 (median $360,041). The Petitioner sales indicate a credible and reliable just value for the subject of $360,000 and that the subject IS NOT over assessed.

16 Reviewing all the sales presented by both parties, the evidence credibly and reliably supports a just value of $345,000 for the subject and that the subject IS NOT over assessed.

17 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 8-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 2-3%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

18 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

19 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

20 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

21 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

22 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

***"Factors to consider in deriving just valuation**. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."

The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID (marginally) establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID NOT overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS NOT shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES NOT exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS NOT satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be denied.

PETITION NO. 25-360

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: PROGRESS RESIDENTIAL BORROWER 7 LLC
PARCEL KEY NO: 01535501

SUMMARY OF EVIDENCE

1 The Petitioner, NATASHA ELLIOTT of RYAN LLC for PROGRESS RESIDENTIAL BORROWER 7 LLC did appear telephonically before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The Property Appraiser shows a just value of $319,450 ($139/SF heated, $119/SF adjusted), an assessed or capped value of $246,848, and a taxable value of $246,848.

3 The Petitioner estimated the just value to be $296,826.

4 *Subject Property Type:* The subject is a 2,303 heated base SF (2,655 SF adjusted) single family residence. It was constructed in 2005. The parcel is located at 4447 Larkenheath Dr., Brooksville FL.

5 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

6 The Petitioners' evidence consists of a petition, hearing notice, correspondence, sales analysis, sales map and verbal testimony.

7 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

8 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

9 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

10 The PAO performed their analysis utilizing adjusted SF in their sales analysis report. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

11 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average.

12 The subject property did not transfer in the 3 years prior to the lien date.

13 The PAO supplied 3 improved sales on their statistical grid. No Sale(s) was/were an outlier or was too dissimilar to be reliable (and was not weighted). The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 9% for COS. After adjustment, these sales indicated a range of $123/SF to $135/SF adjusted before extra features (median $128/SF adjusted). The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($125/SF adjusted) $331,875 and that the subject IS NOT over assessed.

14 The PAO and Petitioner have 1 sale(s) in common. Sale(s) in common are analyzed herein among the PAO dataset, unless it/they are the only reliable Petitioner Sale(s).

15 The Petitioner supplied 5 improved sale comparables. Sale(s) 1 was/were outliers and/or too dissimilar and not weighted. This analysis does not note garages, extra feature values, amenities or the difference between gross, adjusted and heated SF. The sales will be adjusted at 4%/year for market conditions (the Petitioner used 0% adjustment), for age/condition, adjusted for land size/value if warranted, adjusted for differences in heated SF at $95/SF heated, and in this instance a 9% COS factor is warranted. After adjustment, these remaining sales indicated a range of $310,219 to $350,623 (median $345,072). The Petitioner sales indicate a credible and reliable just value for the subject of $345,000 and that the subject IS NOT over assessed.

16 Reviewing all the sales presented by both parties, the evidence credibly and reliably supports a just value of $337,500 for the subject and that the subject IS NOT over assessed.

17 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 8-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 2-3%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

18 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

19 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

20 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

21 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

22 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

***"Factors to consider in deriving just valuation**. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."

The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID (marginally) establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID NOT overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS NOT shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES NOT exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS NOT satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be denied.

PETITION NO. 25-361

RECOMMENDATION OF SPECIAL MAGISTRATE

VALUE ADJUSTMENT BOARD

HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: Progress Residential Borrower 14 LLC

PARCEL KEY NO: 01530436

SUMMARY OF EVIDENCE

The Petitioner, Stephanie Garcia of Ryan LLC c/o Robert Hole for Progress Residential Borrower 14 LLC, appeared before the Special Magistrate to give testimony. The Property Appraiser was represented by BRANDON JIMENEZ and DOUG MACK. All present parties were put under sworn oath.

The Property Appraiser verified the values accordingly; a just value of $251,706, an assessed or capped value of $227,920, and a taxable value of $227,920. There was no change in values after the process.

The Petitioner estimated just value at $242,985.

Subject Property Type: The subject is an 1,807 SF (heated) single family dwelling with 2,173 adjusted SF and was built in 2005. The subject is located at 13336 Teaberry Ln, Spring Hill, FL.

The PAO evidence consists of an evidence packet with a case synopsis, PRC with photo and an aerial map of the subject property, a sales analysis report with (3) sales, location map of sales, summary of cost of sale adjustment, PRCs for each sale, and verbal testimony.

The Petitioner's evidence consists of a petition, summary of evidence submission, market value analysis grid with (6) sales, location map for subject property, sales location map and verbal testimony.

Per testimony by the PAO, there was a timely evidence exchange. There were no objections, and all the evidence noted above is considered admissible (unless specifically noted as inadmissible).

Overall, the evidence presented meets specific evidence rules (See Rule 12D-9,025(1) and Rule 12D-9.025(2)b, F.A.C) and is considered sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

The PAO relied upon the sales comparison approach to value and considered CAMA analysis at TRIM. The approach utilized is considered an appropriate methodology by the Special Magistrate.

The PAO presented their evidence packet with a sales analysis report utilizing (3) improved sales from the subject market area. The PAO performed their analysis utilizing adjusted SF which is generally considered less reliable than utilizing heated SF however, is often used in mass appraisal.

The Petitioner provided (6) improved sales (including the subject transfer if applicable). Of these sales, (1) was used by the PAO. The Petitioner adjusted for differences in age, heated SF, land size, and bedroom and/or bath count. The Petitioner did not provide any information on extra features (i.e. pool) or garages/carports.

The PAO had a rebuttal to the Petitioner's evidence, noting that the land adjustments were inconsistent as well as the Petitioner's indication of just value indicated on the cover page was $242,985. However, their indicated value on the sales grid shows two indicated values: $242,986 and $241,326. The Petitioner acknowledged the discrepancy and the correct figure is $242,986.

Of the sales provided, (0) Petitioner and (0) PAO sales are not considered reliable (dissimilar in age or size, number of bedrooms or insufficient support for adjustment, and /or no detail or superior/inferior extra features). The median of the most reliable Petitioner sales indicates a just value for the subject of $242,986. The median of the most reliable PAO sales indicates a just value for the subject of $265,520. The median of all the most reliable sales from both parties is $254,253, which is a credible and reliable just value for the subject based on the available data. The PAO just value conclusion is $251,706. This data reliably supports that the subject is NOT over assessed.

The PAO reported that their internal analysis supports a 15% increase in sale prices from 1/1/2024 to the lien date of 1/1/2025. They also reported that the DOR performed a study across this same period, utilizing qualified sales of like property, and concluded a 15% increase over the same period. The Special Magistrate assumes that the PAO utilized a

process of sampling paired sales or some other subset of the available data. The Special Magistrate will equally weigh the DOR study results (15%) utilizing all qualified property sales, and the PAO conclusion (15%) and utilize 15% herein.

The Special Magistrate has applied a qualitative analysis of the data submitted by all parties and has also considered the recent sale of the subject property, if applicable. A COS factor of 15%, market conditions adjustment based on 12% annually, age/condition adjustment, land size/value, a factor for adjusted SF or non-heated area as a % of overall space, extra features differences, a SF adjustment, quality and view adjustments were considered.

The PAO considered the cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 7-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 1-3%, properly considered for the subject). The Special Magistrate will consider this when weighing the appropriateness of each parties' conclusions and the assessment level.

The DOR utilizes 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs, implying that "just value" is in fact equal to "market value net of typical sales costs". Based on current training material for Special Magistrates, this consistently and strongly advises a deduction for the 1st and 8th criteria.

The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered in their development of the assessment in regard to the property at hand. The PAO addressed the requirements of FS 193.011 as follows:

"Factors to consider in deriving just valuation. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:

(1) **The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length**;

The PAO, within the CAMA system, makes an adjustment for cost of sale within their direct application of the sales comparison analysis. An adjustment is made for cost of sale as noted under Criteria 8 in their CAMA analysis and in the reconciliation process.

(2) **The highest and best use...,(shortened)** Land use and building codes were considered along with the character of any existing site improvements, the subject is noted to be residential use and was not disputed by either party. Comparable data was selected based on this information.

(3) **The location of the property**; The subject property is assigned a location or neighborhood code within the PAO database related to its specific location. Comparable data is selected with as similar a location as is possible, while also considering other relevant factors.

(4) **The quantity or size of the property**; The size of the building, the site size and site improvements are based on data contained within the PRC and all comparable sales are selected with attention to similarity of size, while also considering and weighing the other relevant factors.

(5) **The cost of said property and the present replacement value of any improvements thereon**; Within the CAMA system, the PAO uses cost data and when applicable, considers a pure replacement cost new and depreciation factors within a cost approach to value.

(6) **The condition of said property**; The condition of the property, through periodic site inspections, actual age, and information submitted to them by property owners is considered by the PAO. The information is given a % good or % depreciation factor and is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) **The income from said property; and;** When applicable, the PAO prepares an

income capitalization analysis based on market data contained in their files, general market statistics, and when available, actual subject performance is considered.

(8) "**The net proceeds of the sale of the property, as received by the seller, after deduction of all the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or atypical terms or financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."**

The cost of sales is considered by the PAO within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID NOT overcome the presumption of correctness.

The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

The Petitioner HAS NOT shown by a preponderance of evidence that the assessment is excessive. Thus, the assessed value DOES NOT exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, "relevant evidence" is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate has determined that the testimonial and documentary evidence (combined) meet the test of "relevancy and credibility" and WAS sufficient to reach the "preponderance of the evidence" standard of proof required by Rule 12D-9.027(6) FAC.

The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS NOT satisfied the "preponderance of the evidence" standard under the facts as testified to, that the appraiser's assessment is in excess of just value. After weighing all the documentary and testimonial evidence it is concluded that the assessment IS reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be DENIED.

Special Magistrate

Colleen E Millett

PETITION NO. 25-362

RECOMMENDATION OF SPECIAL MAGISTRATE

VALUE ADJUSTMENT BOARD

HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: Progress Residential Borrower 2 LLC

PARCEL KEY NO: 01530347

SUMMARY OF EVIDENCE

The Petitioner, Stephanie Garcia of Ryan LLC c/o Robert Hole for Progress Residential Borrower 2 LLC, appeared before the Special Magistrate to give testimony. The Property Appraiser was represented by BRANDON JIMENEZ and DOUG MACK. All present parties were put under sworn oath.

The Property Appraiser verified the values accordingly; a just value of $289,431, an assessed or capped value of $289,431, and a taxable value of $289,431. There was no change in values after the process.

The Petitioner estimated just value at $273,499.

Subject Property Type: The subject is a 2,346 SF (heated) single family dwelling with 2,590 adjusted SF and was built in 2005. The subject is located at 13542 Teaberry Ln, Spring Hill, FL.

The PAO evidence consists of an evidence packet with a case synopsis, PRC with photo and an aerial map of the subject property, a sales analysis report with (3) sales, location map of sales, summary of cost of sale adjustment, PRCs for each sale, and verbal testimony.

The Petitioner's evidence consists of a petition, summary of evidence submission, market value analysis grid with (6) sales, location map for subject property, sales location map and verbal testimony.

Per testimony by the PAO, there was a timely evidence exchange. There were no objections, and all the evidence noted above is considered admissible (unless specifically noted as inadmissible).

Overall, the evidence presented meets specific evidence rules (See Rule 12D-9,025(1) and Rule 12D-9.025(2)b, F.A.C) and is considered sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

The PAO relied upon the sales comparison approach to value and considered CAMA analysis at TRIM. The approach utilized is considered an appropriate methodology by the Special Magistrate.

The PAO presented their evidence packet with a sales analysis report utilizing (3) improved sales from the subject market area. The PAO performed their analysis utilizing adjusted SF which is generally considered less reliable than utilizing heated SF however, is often used in mass appraisal.

The Petitioner provided (6) improved sales (including the subject transfer if applicable). Of these sales, (0) were used by the PAO. The Petitioner adjusted for differences in age, heated SF, land size, and bedroom and/or bath count. The Petitioner did not provide any information on extra features (i.e. pool) or garages/carports. The Special Magistrate noticed a discrepancy in Opinion of Value by Petitioner; cover page shows $273,499 and the sales grid indicates $277,283, which is the average of the sales provided.

The PAO had no rebuttal to the Petitioner's evidence, and the Petitioner did not have a rebuttal either.

Of the sales provided, (0) Petitioner and (1) PAO sales are not considered reliable (dissimilar in age or size, number of bedrooms or insufficient support for adjustment, and /or no detail or superior/inferior extra features). The median of the most reliable Petitioner sales indicates a just value for the subject of $277,283. The median of the most reliable PAO sales indicates a just value for the subject of $295,375. The median of all the most reliable sales from both parties is $286,329, which is a credible and reliable just value for the subject based on the available data. The PAO just value conclusion is $289,431. This data reliably supports that the subject is over assessed.

The PAO reported that their internal analysis supports a 15% increase in sale prices from 1/1/2024 to the lien date of 1/1/2025. They also reported that the DOR performed a study across this same period, utilizing qualified sales of like property, and concluded a 15% increase over the same period. The Special Magistrate assumes that the PAO utilized a process of sampling paired sales or some other subset of the available data. The Special

Magistrate will equally weigh the DOR study results (15%) utilizing all qualified property sales, and the PAO conclusion (15%) and utilize 15% herein.

The Special Magistrate has applied a qualitative analysis of the data submitted by all parties and has also considered the recent sale of the subject property, if applicable. A COS factor of 15%, market conditions adjustment based on 12% annually, age/condition adjustment, land size/value, a factor for adjusted SF or non-heated area as a % of overall space, extra features differences, a SF adjustment, quality and view adjustments were considered.

The PAO considered the cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 7-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 1-3%, properly considered for the subject). The Special Magistrate will consider this when weighing the appropriateness of each parties' conclusions and the assessment level.

The DOR utilizes 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs, implying that "just value" is in fact equal to "market value net of typical sales costs". Based on current training material for Special Magistrates, this consistently and strongly advises a deduction for the 1st and 8th criteria.

The PAO testified to documentation that pertains to the DOR treatment of the eight criteria

required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered in their development of the assessment in regard to the property at hand. The PAO addressed the requirements of FS 193.011 as follows:

"Factors to consider in deriving just valuation. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:

(1) **The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length**;

The PAO, within the CAMA system, makes an adjustment for cost of sale within their direct application of the sales comparison analysis. An adjustment is made for cost of sale as noted under Criteria 8 in their CAMA analysis and in the reconciliation process.

(2) **The highest and best use...,(shortened)** Land use and building codes were considered along with the character of any existing site improvements, the subject is noted to be residential use and was not disputed by either party. Comparable data was selected based on this information.

(3) **The location of the property**; The subject property is assigned a location or neighborhood code within the PAO database related to its specific location. Comparable data is selected with as similar a location as is possible, while also considering other relevant factors.

(4) **The quantity or size of the property**; The size of the building, the site size and site improvements are based on data contained within the PRC and all comparable sales are selected with attention to similarity of size, while also considering and weighing the other relevant factors.

(5) **The cost of said property and the present replacement value of any improvements thereon**; Within the CAMA system, the PAO uses cost data and when applicable, considers a pure replacement cost new and depreciation factors within a cost approach to value.

(6) **The condition of said property**; The condition of the property, through periodic site inspections, actual age, and information submitted to them by property owners is considered by the PAO. The information is given a % good or % depreciation factor and is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) **The income from said property; and;** When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files, general

market statistics, and when available, actual subject performance is considered.

(8) "**The net proceeds of the sale of the property, as received by the seller, after deduction of all the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or atypical terms or financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."**

The cost of sales is considered by the PAO within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID overcome the presumption of correctness.

The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was

based on an arbitrary appraisal practice different from like property in the same county.

The Petitioner HAS shown by a preponderance of evidence that the assessment is excessive. Thus, the assessed value DOES exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, "relevant evidence" is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate has determined that the testimonial and documentary evidence (combined) meet the test of "relevancy and credibility" and WAS sufficient to reach the "preponderance of the evidence" standard of proof required by Rule 12D-9.027(6) FAC.

The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS satisfied the "preponderance of the evidence" standard under the facts as testified to, that the appraiser's assessment is in excess of just value. After weighing all the documentary and testimonial evidence it is concluded that the assessment IS NOT reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be GRANTED in part with a reduction in the just value to $286,329.

Special Magistrate

PETITION NO. 25-363

RECOMMENDATION OF SPECIAL MAGISTRATE

VALUE ADJUSTMENT BOARD

HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: Progress Residential Borrower 5 LLC

PARCEL KEY NO: 01530347

SUMMARY OF EVIDENCE

The Petitioner, Stephanie Garcia of Ryan LLC c/o Robert Hole for Progress Residential Borrower 5 LLC, appeared before the Special Magistrate to give testimony. The Property Appraiser was represented by BRANDON JIMENEZ and DOUG MACK. All present parties were put under sworn oath.

The Property Appraiser verified the values accordingly; a just value of $276,986, an assessed or capped value of $251,990, and a taxable value of $251,990. There was no change in values after the process.

The Petitioner estimated just value at $267,941.

Subject Property Type: The subject is a 2,185 SF (heated) single family dwelling with 2,467 adjusted SF and was built in 2005. The subject is located at 3938 Beaumont Loop, Spring Hill, FL.

The PAO evidence consists of an evidence packet with a case synopsis, PRC with photo and an aerial map of the subject property, a sales analysis report with (3) sales, location map of sales, summary of cost of sale adjustment, PRCs for each sale, and verbal testimony.

The Petitioner's evidence consists of a petition, summary of evidence submission, market value analysis grid with (6) sales, location map for subject property, sales location map and verbal testimony.

Per testimony by the PAO, there was a timely evidence exchange. There were no objections, and all the evidence noted above is considered admissible (unless specifically noted as inadmissible).

Overall, the evidence presented meets specific evidence rules (See Rule 12D-9,025(1) and Rule 12D-9.025(2)b, F.A.C) and is considered sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

The PAO relied upon the sales comparison approach to value and considered CAMA analysis at TRIM. The approach utilized is considered an appropriate methodology by the Special Magistrate.

The PAO presented their evidence packet with a sales analysis report utilizing (3) improved sales from the subject market area. The PAO performed their analysis utilizing adjusted SF which is generally considered less reliable than utilizing heated SF however, is often used in mass appraisal.

The Petitioner provided (6) improved sales (including the subject transfer if applicable). Of these sales, (1) was used by the PAO. The Petitioner adjusted for differences in age, heated SF, land size, and bedroom and/or bath count. The Petitioner did not provide any information on extra features (i.e. pool) or garages/carports.

The PAO had a rebuttal to the Petitioner's evidence, noting that the top of the Petitioner's grid shows a just value of $257,688 which differs from the indicated just value by the Petitioner's sales of $267,942. The Petitioner acknowledged the discrepancy.

Of the sales provided, (0) Petitioner and (0) PAO sales are not considered reliable (dissimilar in age or size, number of bedrooms or insufficient support for adjustment, and /or no detail or superior/inferior extra features). The median of the most reliable Petitioner sales indicates a just value for the subject of $267,942. The median of the most reliable PAO sales indicates a just value for the subject of $271,298. The median of all the most reliable sales from both parties is $269,620, which is a credible and reliable just value for the subject based on the available data. The PAO just value conclusion is $276,986. This data reliably supports that the subject is over assessed.

The PAO reported that their internal analysis supports a 15% increase in sale prices from 1/1/2024 to the lien date of 1/1/2025. They also reported that the DOR performed a study across this same period, utilizing qualified sales of like property, and concluded a 15% increase over the same period. The Special Magistrate assumes that the PAO utilized a process of sampling paired sales or some other subset of the available data. The Special Magistrate will equally weigh the DOR study results (15%) utilizing all qualified property

sales, and the PAO conclusion (15%) and utilize 15% herein.

The Special Magistrate has applied a qualitative analysis of the data submitted by all parties and has also considered the recent sale of the subject property, if applicable. A COS factor of 15%, market conditions adjustment based on 12% annually, age/condition adjustment, land size/value, a factor for adjusted SF or non-heated area as a % of overall space, extra features differences, a SF adjustment, quality and view adjustments were considered.

The PAO considered the cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 7-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 1-3%, properly considered for the subject). The Special Magistrate will consider this when weighing the appropriateness of each parties' conclusions and the assessment level.

The DOR utilizes 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs, implying that "just value" is in fact equal to "market value net of typical sales costs". Based on current training material for Special Magistrates, this consistently and strongly advises a deduction for the 1st and 8th criteria.

The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the

criteria was considered in their development of the assessment in regard to the property at hand. The PAO addressed the requirements of FS 193.011 as follows:

“Factors to consider in deriving just valuation. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:

(1) **The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length**;

The PAO, within the CAMA system, makes an adjustment for cost of sale within their direct application of the sales comparison analysis. An adjustment is made for cost of sale as noted under Criteria 8 in their CAMA analysis and in the reconciliation process.

(2) **The highest and best use...,(shortened)** Land use and building codes were considered along with the character of any existing site improvements, the subject is noted to be residential use and was not disputed by either party. Comparable data was selected based on this information.

(3) **The location of the property**; The subject property is assigned a location or neighborhood code within the PAO database related to its specific location. Comparable data is selected with as similar a location as is possible, while also considering other relevant factors.

(4) **The quantity or size of the property**; The size of the building, the site size and site improvements are based on data contained within the PRC and all comparable sales are selected with attention to similarity of size, while also considering and weighing the other relevant factors.

(5) **The cost of said property and the present replacement value of any improvements thereon**; Within the CAMA system, the PAO uses cost data and when applicable, considers a pure replacement cost new and depreciation factors within a cost approach to value.

(6) **The condition of said property**; The condition of the property, through periodic site inspections, actual age, and information submitted to them by property owners is considered by the PAO. The information is given a % good or % depreciation factor and is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) **The income from said property; and;** When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files, general market statistics, and when available, actual subject performance is considered.

(8) "**The net proceeds of the sale of the property, as received by the seller, after deduction of all the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or atypical terms or financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."**

The cost of sales is considered by the PAO within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID overcome the presumption of correctness.

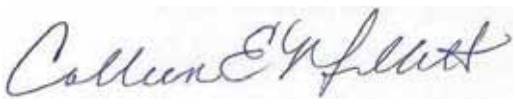
The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

The Petitioner HAS shown by a preponderance of evidence that the assessment is excessive. Thus, the assessed value DOES exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, "relevant evidence" is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.



The Special Magistrate has determined that the testimonial and documentary evidence (combined) meet the test of "relevancy and credibility" and WAS sufficient to reach the "preponderance of the evidence" standard of proof required by Rule 12D-9.027(6) FAC.

The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS satisfied the "preponderance of the evidence" standard under the facts as testified to, that the appraiser's assessment is in excess of just value. After weighing all the documentary and testimonial evidence it is concluded that the assessment IS NOT reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be GRANTED in part with a reduction in the just value to $269,620.

Special Magistrate

Colleen E Millett

PETITION NO. 25-364

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: PROGRESS RESIDENTIAL BORROWER 24 LLC
PARCEL KEY NO: 01528074

SUMMARY OF EVIDENCE

1 The Petitioner, NATASHA ELLIOTT of RYAN LLC for PROGRESS RESIDENTIAL BORROWER 24 LLC did appear telephonically before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The Property Appraiser shows a just value of $312,388 ($142/SF heated, $117/SF adjusted), an assessed or capped value of $312,388, and a taxable value of $312,388.

3 The Petitioner estimated the just value to be $300,150.

4 *Subject Property Type:* The subject is a 2,193 heated base SF (2,652 SF adjusted) single family residence. It was constructed in 2006. The parcel is located at 4194 Beaumont Loop, Brooksville FL.

5 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

6 The Petitioners' evidence consists of a petition, hearing notice, correspondence, sales analysis, sales map and verbal testimony.

7 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

8 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

9 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

10 The PAO performed their analysis utilizing adjusted SF in their sales analysis report. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

11 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average.

12 The subject property did not transfer (excluding portfolio sales) in the 3 years prior to the lien date.

13 The PAO supplied 3 improved sales on their statistical grid. Sale(s) 1 was/were an outlier or was too dissimilar to be reliable (and was not weighted). The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 9% for COS. After adjustment, these sales indicated a range of $123/SF to $124/SF adjusted before extra features (median $124/SF adjusted). The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($123.50/SF adjusted) $327,522 and that the subject IS NOT over assessed.

14 The PAO and Petitioner have 1 sale(s) in common. Sale(s) in common are analyzed herein among the PAO dataset, unless it/they are the only reliable Petitioner Sale(s).

15 The Petitioner supplied 6 improved sale comparables. Sale(s) 2 was/were outliers and/or too dissimilar and not weighted. This analysis does not note garages, extra feature values, amenities or the difference between gross, adjusted and heated SF. The sales will be adjusted at 4%/year for market conditions (the Petitioner used 0% adjustment), for age/condition, adjusted for land size/value if warranted, adjusted for differences in heated SF at $105/SF heated, and in this instance a 9% COS factor is warranted. After adjustment, these remaining sales indicated a range of $294,476 to $337,246 (median

$319,774). The Petitioner sales indicate a credible and reliable just value for the subject of $320,000 and that the subject IS NOT over assessed.

16 Reviewing all the sales presented by both parties, the evidence credibly and reliably supports a just value of $322,500 for the subject and that the subject IS NOT over assessed.

17 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 8-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 2-3%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

18 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

19 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

20 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

21 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

22 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

***"Factors to consider in deriving just valuation**. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."

The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID (marginally) establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID NOT overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS NOT shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES NOT exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS NOT satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be denied.

PETITION NO. 25-365

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: RESIDENTIAL HOME BUYER TAMPA LLC
PARCEL KEY NO: 01772022

SUMMARY OF EVIDENCE

1 The Petitioner, NATASHA ELLIOTT of RYAN LLC for RESIDENTIAL HOME BUYER TAMPA LLC did appear telephonically before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The Property Appraiser shows a just value of $223,840 ($159/SF heated, $117/SF adjusted), an assessed or capped value of $223,840, and a taxable value of $223,840.

3 The Petitioner estimated the just value to be $218,137.

4 *Subject Property Type:* The subject is a 1,404 heated base SF (1,658 SF adjusted) single family residence. It was constructed in 2019. The parcel is located at 6564 Redbay Dr., Brooksville FL.

5 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

6 The Petitioners' evidence consists of a petition, hearing notice, correspondence, sales analysis, sales map and verbal testimony.

7 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

8 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

9 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

10 The PAO performed their analysis utilizing adjusted SF in their sales analysis report. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

11 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average.

12 The subject property transferred for $300,000 in February 2022 (qualified).

13 The PAO supplied 3 improved sales on their statistical grid. No sale(s) was/were an outlier or was too dissimilar to be reliable (and was not weighted). The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 10% for COS. After adjustment, these sales indicated a range of $155/SF to $169/SF adjusted before extra features (median $161/SF adjusted). The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($161/SF adjusted) $266,938 and that the subject IS NOT over assessed.

14 The PAO and Petitioner have 2 sale(s) in common. Sale(s) in common are analyzed herein among the PAO dataset, unless it/they are the only reliable Petitioner Sale(s).

15 The Petitioner supplied 4 improved sale comparables. No sale(s) was/were outliers and/or too dissimilar and not weighted. This analysis does not note garages, extra feature values, amenities or the difference between gross, adjusted and heated SF. The sales will be adjusted at 4%/year for market conditions (the Petitioner used 0% adjustment), for age/condition, adjusted for land size/value if warranted, adjusted for differences in heated SF at $125/SF heated, and in this instance a 10% COS factor is warranted. After adjustment, these remaining sales indicated a range of $220,230 to $252,180 (median $236,205). The Petitioner sales indicate a credible and reliable just value for the subject of $236,000 and that the subject IS NOT over assessed.

16 Reviewing all the sales presented by both parties, the evidence credibly and reliably supports a just value of $250,000 for the subject and that the subject IS NOT over assessed.

17 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 8-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 2-3%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

18 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

19 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

20 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

21 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

22 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

***"Factors to consider in deriving just valuation**. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."

The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID (marginally) establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID NOT overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS NOT shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES NOT exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS NOT satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be denied.

PETITION NO. 25-366

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: Residential Home Buyer E Tampa LLC
PARCEL KEY NO: 01577877

SUMMARY OF EVIDENCE

1 The Petitioner, NATASHA ELLIOTT of RYAN LLC for RESIDENTIAL HOME BUYER E TAMPA LLC did appear telephonically before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The Property Appraiser shows a just value of $221,510 ($151/SF heated, $126/SF adjusted), an assessed or capped value of $221,510, and a taxable value of $221,510.

3 The Petitioner estimated the just value to be $211,888.

4 *Subject Property Type:* The subject is a 1,471 heated base SF (1,764 SF adjusted) single family residence. It was constructed in 2020. The parcel is located at 9414 Southern Charm Circle.

5 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

6 The Petitioners evidence consists of a petition, hearing notice, correspondence, sales analysis, sales map and verbal testimony.

7 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

8 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

9 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

10 The PAO performed their analysis utilizing adjusted SF in their sales analysis report. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

11 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average.

12 The subject property transferred in July of 2022 for $315,000.

13 The PAO supplied 3 improved sales on their statistical grid. Sale 3 seems to be an unreliable outlier. No weight was placed on Sale 3. The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 10% for COS. After adjustment, these sales indicated a range of $125/SF to $133/SF adjusted before extra features (median $129/SF adjusted). The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($130/SF adjusted) $228,500 and that the subject is not over assessed.

14 The PAO and Petitioner have 3 sales in common.

15 The Petitioner supplied 3 improved sale comparables. Sale 3 appears to be an outlier and was not weighted. This analysis does not note garages, extra feature values, amenities or the difference between gross, adjusted and heated SF. The sales will be adjusted at 4%/year for market conditions (the Petitioner used 0% adjustment), for age/condition, adjusted for land size/value if warranted, adjusted for differences in heated SF at $95/SF heated (their analysis tends to understate this factor, and they note adjusted SF but in fact use heated SF), and in this instance a 10% COS factor is warranted. After adjustment, these remaining sales indicated a range of $222,480 to $236,610 (median $229,545). The Petitioner sales indicate a credible and reliable just value for the subject of $228,500 and that the subject is not over assessed.

16 Reviewing all the sales presented by both parties, the evidence credibly and reliably supports a just value of $228,500 for the subject that the subject is not over assessed.

17 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 8-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 2-3%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

18 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

19 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

20 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

21 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

22 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

"Factors to consider in deriving just valuation*. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for

unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."

The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID (marginally) establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID NOT overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS NOT shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES NOT exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS NOT satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be denied.

PETITION NO. 25-370

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: Residential Home Buyer Tampa LLC
PARCEL KEY NO: 01571436

SUMMARY OF EVIDENCE

1 The Petitioner, NATASHA ELLIOTT of RYAN LLC for RESIDENTIAL HOME BUYER TAMPA LLC did appear telephonically before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The Property Appraiser shows a just value of $280,985 ($142/SF heated, $122/SF adjusted), an assessed or capped value of $280,985, and a taxable value of $280,985.

3 The Petitioner estimated the just value to be $233,000.

4 *Subject Property Type:* The subject is a 1,986 heated base SF (2,296 SF adjusted) single family residence. It was constructed in 2006. The parcel is located at 3684 Braemere Dr., Spring Hill.

5 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

6 The Petitioners evidence consists of a petition, hearing notice, correspondence, sales analysis, sales map and verbal testimony.

7 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

8 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

9 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

10 The PAO performed their analysis utilizing adjusted SF in their sales analysis report. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

11 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average.

12 The subject property transferred in May of 2022 for $349,000.

13 The PAO supplied 3 improved sales on their statistical grid. The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 10% for COS. After adjustment, these sales indicated a range of $122/SF to $132/SF adjusted before extra features (median $131/SF adjusted). The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($131/SF adjusted) $300,776 and that the subject is not over assessed.

14 The PAO and Petitioner have 0 sales in common.

15 The Petitioner supplied 3 improved sale comparables. Sale 3 was too large and was not weighted. This analysis does not note garages, extra feature values, amenities or the difference between gross, adjusted and heated SF. The sales will be adjusted at 4%/year for market conditions (the Petitioner used 0% adjustment), for age/condition, adjusted for land size/value if warranted, adjusted for differences in heated SF at $100/SF heated (their analysis tends to understate this factor, and they note adjusted SF but in fact use heated SF), and in this instance a 10% COS factor is warranted. After adjustment, these remaining sales indicated a range of $258,750 to $281,070 (median $269,910). The Petitioner sales indicate a credible and reliable just value for the subject of $270,000 and that the subject is over assessed.

16 Reviewing all the sales presented by both parties, the evidence credibly and reliably supports a just value of $290,000 for the subject that the subject is not over assessed.

17 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 8-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 2-3%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

18 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

19 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

20 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

21 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

22 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

***"Factors to consider in deriving just valuation**. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for

unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."

The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID (marginally) establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID NOT overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS NOT shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES NOT exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS NOT satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be denied.

PETITION NO. 25-371

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: Residential Home Buyer Tampa LLC
PARCEL KEY NO: 01535039

SUMMARY OF EVIDENCE

1 The Petitioner, NATASHA ELLIOTT of RYAN LLC for RESIDENTIAL HOME BUYER TAMPA LLC did appear telephonically before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The Property Appraiser shows a just value of $294,305 ($146/SF heated, $123/SF adjusted), an assessed or capped value of $294,305, and a taxable value of $294,305.

3 The Petitioner estimated the just value to be $253,583.

4 *Subject Property Type:* The subject is a 2,012 heated base SF (2,392 SF adjusted) single family residence. It was constructed in 2005. The parcel is located at 4826 Larkenheath Dr., Spring Hill.

5 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

6 The Petitioners evidence consists of a petition, hearing notice, correspondence, sales analysis, sales map and verbal testimony.

7 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

8 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

9 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

10 The PAO performed their analysis utilizing adjusted SF in their sales analysis report. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

11 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average.

12 The subject property transferred in July of 2022 for $401,000.

13 The PAO supplied 3 improved sales on their statistical grid. Sale 3 is too new and was not weighted. The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 10% for COS. After adjustment, these sales indicated a range of $131/SF to $133/SF adjusted before extra features (median $132/SF adjusted). The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($131/SF adjusted) $313,352 and that the subject is not over assessed.

14 The PAO and Petitioner have 0 sales in common.

15 The Petitioner supplied 6 improved sale comparables. Sale 2 and 5 are too large and were not weighted. This analysis does not note garages, extra feature values, amenities or the difference between gross, adjusted and heated SF. The sales will be adjusted at 4%/year for market conditions (the Petitioner used 0% adjustment), for age/condition, adjusted for land size/value if warranted, adjusted for differences in heated SF at $105/SF heated (their analysis tends to understate this factor, and they note adjusted SF but in fact use heated SF), and in this instance a 10% COS factor is warranted. After adjustment, these remaining sales indicated a range of $258,660 to $322,290 (median $289,890). The Petitioner sales indicate a credible and reliable just value for the subject of $290,000 and that the subject is over assessed.

16 Reviewing all the sales presented by both parties, the evidence credibly and reliably supports a just value of $305,000 for the subject that the subject is not over assessed.

17 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 8-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 2-3%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

18 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

19 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

20 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

21 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

22 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

"Factors to consider in deriving just valuation*. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for

unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."

The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID (marginally) establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID NOT overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS NOT shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES NOT exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS NOT satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be denied.

PETITION NO. 25-372

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: SCHUMAN LLC
PARCEL KEY NO: 00445799

SUMMARY OF EVIDENCE

1 The Petitioner, NATASHA ELLIOTT of RYAN LLC for SCHUMAN LLC did appear telephonically before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The Property Appraiser shows a just value of $318,251 ($186/SF heated, $154/SF adjusted), an assessed or capped value of $310,599, and a taxable value of $310,599.

3 The Petitioner estimated the just value to be $269,923.

4 *Subject Property Type:* The subject is a 1,713 heated base SF (2,063 SF adjusted) single family residence. It was constructed in 2022. The parcel is located at 11279 Redgate St., Spring Hill.

5 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

6 The Petitioners evidence consists of a petition, hearing notice, correspondence, sales analysis, sales map and verbal testimony.

7 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

8 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

9 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

10 The PAO performed their analysis utilizing adjusted SF in their sales analysis report. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

11 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average.

12 The subject property transferred in August of 2022 for $300,000.

13 The PAO supplied 3 improved sales on their statistical grid. Sale 3 is older with more features and was not weighted. The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 9% for COS. After adjustment, these sales indicated a range of $160/SF to $170/SF adjusted before extra features (median $165/SF adjusted). The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($163/SF adjusted) $336,269 and that the subject is not over assessed.

14 The PAO and Petitioner have 1 sale in common.

15 The Petitioner supplied 6 improved sale comparables. Sale 5 is too small and was not weighted. This analysis does not note garages, extra feature values, amenities or the difference between gross, adjusted and heated SF. The sales will be adjusted at 4%/year for market conditions (the Petitioner used 0% adjustment), for age/condition, adjusted for land size/value if warranted, adjusted for differences in heated SF at $120/SF heated (their analysis tends to understate this factor, and they note adjusted SF but in fact use heated SF), and in this instance a 9% COS factor is warranted. After adjustment, these remaining sales indicated a range of $275,002 to $313,040 (median $298,252). The Petitioner sales indicate a credible and reliable just value for the subject of $310,000 and that the subject is over assessed.

16 Reviewing all the sales presented by both parties, the evidence credibly and reliably supports a just value of $315,000 for the subject that the subject is over assessed.

17 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 8-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 2-3%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

18 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

19 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

20 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

21 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

22 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

***"Factors to consider in deriving just valuation**. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for

unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."

The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID (marginally) establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS NOT reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be GRANTED in part with a reduction in the just value to $315,000.

PETITION NO. 25-373

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: HPA II BORROWER 2019 I LLC
PARCEL KEY NO: 01592388

SUMMARY OF EVIDENCE

1 The Petitioner, NATASHA ELLIOTT of RYAN LLC for HPA II BORROWER 2019 I LLC did appear telephonically before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The Property Appraiser shows a just value of $318,262 ($146/SF heated, $123/SF adjusted), an assessed or capped value of $297,793, and a taxable value of $297,793.

3 The Petitioner estimated the just value to be $307,680.

4 *Subject Property Type:* The subject is a 2,180 heated base SF (2,595 SF adjusted) single family residence. It was constructed in 2008. The parcel is located at 13440 Hunters Point St., Spring Hill.

5 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

6 The Petitioners evidence consists of a petition, hearing notice, correspondence, sales analysis, sales map and verbal testimony.

7 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

8 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

9 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

10 The PAO performed their analysis utilizing adjusted SF in their sales analysis report. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

11 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average.

12 The subject property did not transfer in the past 3 years.

13 The PAO supplied 3 improved sales on their statistical grid. Sale 2 is newer and smaller and was not weighted. The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 9% for COS. After adjustment, these sales indicated a range of $145/SF to $146/SF adjusted before extra features (median $145.50/SF adjusted). The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($145.50/SF adjusted) $377,572 and that the subject is not over assessed.

14 The PAO and Petitioner have 0 sales in common.

15 The Petitioner supplied 5 improved sale comparables. Sales 1 and 5 are too small and Sales 2 and 3 are sinkhole repairs and were not weighted. This analysis does not note garages, extra feature values, amenities or the difference between gross, adjusted and heated SF. The sales will be adjusted at 4%/year for market conditions (the Petitioner used 0% adjustment), for age/condition, adjusted for land size/value if warranted, adjusted for differences in heated SF at $115/SF heated (their analysis tends to understate this factor, and they note adjusted SF but in fact use heated SF), and in this instance a 9% COS factor is warranted. After adjustment, these remaining sales indicated a range of $360,360 to $360,360 (median $360,360). The Petitioner sales indicate a credible and reliable just value for the subject of $360,360 and that the subject is not over assessed.

16 Reviewing all the sales presented by both parties, the evidence credibly and reliably supports a just value of $372,500 for the subject that the subject is not over assessed.

17 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 8-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 2-3%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

18 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

19 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

20 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

21 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

22 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

"Factors to consider in deriving just valuation*. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for

unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."

The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID (marginally) establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID NOT overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS NOT shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES NOT exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS NOT satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be denied.

PETITION NO. 25-376

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: US BANK TRUST NA TTEE
PARCEL KEY NO: 00447485

SUMMARY OF EVIDENCE

1 The Petitioner, NATASHA ELLIOTT of RYAN LLC for US BANK TRUST NA TTEE did appear telephonically before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The Property Appraiser shows a just value of $277,535 ($172/SF heated, $134/SF adjusted), an assessed or capped value of $227,523, and a taxable value of $227,523.

3 The Petitioner estimated the just value to be $252,538.

4 *Subject Property Type:* The subject is a 1,613 heated base SF (2,067 SF adjusted) single family residence. It was constructed in 1996. The parcel is located at 2485 Stanton Ave., Spring Hill.

5 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

6 The Petitioners evidence consists of a petition, hearing notice, correspondence, sales analysis, sales map and verbal testimony.

7 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

8 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

9 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

10 The PAO performed their analysis utilizing adjusted SF in their sales analysis report. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

11 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average.

12 The subject property did not transfer in the past 3 years.

13 The PAO supplied 3 improved sales on their statistical grid. Sale 1 & 2 also resold and the newer renovated sale prices will be utilized herein. The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 10% for COS. After adjustment, these sales indicated a range of $158/SF to $165/SF adjusted before extra features (median $160/SF adjusted). The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($160/SF adjusted) $330,720 and that the subject is not over assessed.

14 The PAO and Petitioner have 0 sales in common.

15 The Petitioner supplied 5 improved sale comparables. Sales 4 and 6 are too small, Sale 2 is an outlier, and Sale 3 is a sinkhole repair property and these were not weighted. This analysis does not note garages, extra feature values, amenities or the difference between gross, adjusted and heated SF. The sales will be adjusted at 4%/year for market conditions (the Petitioner used 0% adjustment), for age/condition, adjusted for land size/value if warranted, adjusted for differences in heated SF at $125/SF heated (their analysis tends to understate this factor, and they note adjusted SF but in fact use heated SF), and in this instance a 10% COS factor is warranted. After adjustment, these remaining sales indicated a range of $278,910 to $363,600 (median $321,255). The Petitioner sales indicate a credible and reliable just value for the subject of $325,000 and that the subject is not over assessed.

16 Reviewing all the sales presented by both parties, the evidence credibly and reliably supports a just value of $327,500 for the subject that the subject is not over assessed.

17 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 8-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 2-3%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

18 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

19 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

20 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

21 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

22 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

***"Factors to consider in deriving just valuation**. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."

The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID (marginally) establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID NOT overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS NOT shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES NOT exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS NOT satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be denied.

PETITION NO. 25-377

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: HUDSON SFR PROPERTY HOLDINGS II LLC
PARCEL KEY NO: 01693153

SUMMARY OF EVIDENCE

1 The Petitioner, NATASHA ELLIOTT of RYAN LLC for HUDSON SFR PROPERTY HOLDINGS II LLC did appear telephonically before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The Property Appraiser shows a just value of $255,866 ($166/SF heated, $140/SF adjusted), an assessed or capped value of $255,866, and a taxable value of $255,866.

3 The Petitioner estimated the just value to be $236,212.

4 *Subject Property Type:* The subject is a 1,537 heated base SF (1,833 SF adjusted) single family residence. It was constructed in 2015. The parcel is located at 30911 Satinleaf Run, Brooksville.

5 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

6 The Petitioners evidence consists of a petition, hearing notice, correspondence, sales analysis, sales map and verbal testimony.

7 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

8 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

9 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

10 The PAO performed their analysis utilizing adjusted SF in their sales analysis report. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

11 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average.

12 The subject property did not transfer in the past 3 years.

13 The PAO supplied 3 improved sales on their statistical grid. The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 10% for COS. After adjustment, these sales indicated a range of $148/SF to $156/SF adjusted before extra features (median $154/SF adjusted). The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($152.50/SF adjusted) $279,532 and that the subject is not over assessed.

14 The PAO and Petitioner have 1 sale in common.

15 The Petitioner supplied 6 improved sale comparables. This analysis does not note garages, extra feature values, amenities or the difference between gross, adjusted and heated SF. The sales will be adjusted at 4%/year for market conditions (the Petitioner used 0% adjustment), for age/condition, adjusted for land size/value if warranted, adjusted for differences in heated SF at $125/SF heated (their analysis tends to understate this factor, and they note adjusted SF but in fact use heated SF), and in this instance a 10% COS factor is warranted. After adjustment, these remaining sales indicated a range of $245,880 to $282,600 (median $269,640). The Petitioner sales indicate a credible and reliable just value for the subject of $269,500 and that the subject is not over assessed.

16 Reviewing all the sales presented by both parties, the evidence credibly and reliably supports a just value of $272,500 for the subject that the subject is not over assessed.

17 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 8-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 2-3%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

18 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

19 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

20 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

21 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

22 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

"Factors to consider in deriving just valuation*. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for

unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."

The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID (marginally) establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID NOT overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS NOT shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES NOT exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS NOT satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be denied.

PETITION NO. 25-382

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: SFR ACQUISITIONS LLC
PARCEL KEY NO: 00180672

SUMMARY OF EVIDENCE

1 The Petitioner, NATASHA ELLIOTT of RYAN LLC for SFR ACQUISITIONS LLC did appear telephonically before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The Property Appraiser shows a just value of $343,691 ($180/SF heated, $156/SF adjusted), an assessed or capped value of $343,691, and a taxable value of $343,691. At TRIM, the PAO showed $373,196, an assessed or capped value of $373,196, and a taxable value of $373,196.

3 The Petitioner estimated the just value to be $324,090.

4 *Subject Property Type:* The subject is a 1,911 heated base SF (2,208 SF adjusted) single family residence. It was constructed in 1999. The parcel is located at 7435 Mohawk Trail, Weeki Wachee.

5 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

6 The Petitioners evidence consists of a petition, hearing notice, correspondence, sales analysis, sales map and verbal testimony.

7 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

8 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

9 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

10 The PAO performed their analysis utilizing adjusted SF in their sales analysis report. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

11 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average.

12 The subject property did not transfer in the past 3 years.

13 The PAO supplied 3 improved sales on their statistical grid. PAO Sales 1 & 2 were sinkhole properties and were not weighted. The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 9% for COS. After adjustment, these sales indicated a range of $180/SF to $180/SF adjusted before extra features (median $180/SF adjusted). The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($180/SF adjusted) $397,440 and that the subject is not over assessed.

14 The PAO and Petitioner have 0 sales in common.

15 The Petitioner supplied 6 improved sale comparables. Sales 1 and 3 were sinkhole properties, and Sales 5 and 6 are too small to be reliable and were not weighted. This analysis does not note garages, extra feature values, amenities or the difference between gross, adjusted and heated SF. The sales will be adjusted at 4%/year for market conditions (the Petitioner used 0% adjustment), for age/condition, adjusted for land size/value if warranted, adjusted for differences in heated SF at $120/SF heated (their analysis tends to understate this factor, and they note adjusted SF but in fact use heated SF), and in this instance a 9% COS factor is warranted. After adjustment, these remaining sales indicated a range of $303,121 to $361,816 (median $332,468). The Petitioner sales indicate a credible and reliable just value for the subject of $347,000 and that the subject is not over assessed.

16 Reviewing all the sales presented by both parties, the evidence credibly and reliably supports a just value of $372,000 for the subject that the subject is not over assessed.

17 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 8-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 2-3%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

18 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

19 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

20 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

21 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

22 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

"Factors to consider in deriving just valuation*. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for

unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."

The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID (marginally) establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID NOT overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS NOT shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES NOT exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS NOT satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be denied.

PETITION NO. 25-383

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: SFR BORROWER 2022 A LLC
PARCEL KEY NO: 01104806

SUMMARY OF EVIDENCE

1 The Petitioner, NATASHA ELLIOTT of RYAN LLC for SFR BORROWER 2022 A LLC did appear telephonically before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The Property Appraiser shows a just value of $406,495 ($198/SF heated, $165/SF adjusted), an assessed or capped value of $406,495, and a taxable value of $406,495.

3 The Petitioner estimated the just value to be $358,450.

4 *Subject Property Type:* The subject is a 2,057 heated base SF (2,458 SF adjusted) single family residence. It was constructed in 1988. The parcel is located at 13370 Lawrence St., Brooksville.

5 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

6 The Petitioners evidence consists of a petition, hearing notice, correspondence, sales analysis, sales map and verbal testimony.

7 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

8 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

9 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

10 The PAO performed their analysis utilizing adjusted SF in their sales analysis report. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

11 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average.

12 The subject property transferred in March of 2022 for $420,000.

13 The PAO supplied 3 improved sales on their statistical grid. The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 9% for COS. After adjustment, these sales indicated a range of $162/SF to $175/SF adjusted before extra features (median $164/SF adjusted). The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($164/SF adjusted) $403,112 and that the subject is over assessed.

14 The PAO and Petitioner have 2 sales in common. These sales were included in the Petitioner summary below but not weighted twice in our conclusion.

15 The Petitioner supplied 3 improved sale comparables. Sales 1 and 2 were also used by the PAO. Sale 3 was very large and was not weighted. This analysis does not note garages, extra feature values, amenities or the difference between gross, adjusted and heated SF. The sales will be adjusted at 4%/year for market conditions (the Petitioner used 0% adjustment), for age/condition, adjusted for land size/value if warranted, adjusted for differences in heated SF at $130/SF heated (their analysis tends to understate this factor, and they note adjusted SF but in fact use heated SF), and in this instance a 9% COS factor is warranted. After adjustment, these remaining sales indicated a range of $402,104 to $429,855 (median $415,979). The Petitioner sales indicate a credible and reliable just value for the subject of $410,000 and that the subject is not over assessed.

16 Reviewing all the sales presented by both parties, the evidence credibly and reliably supports a just value of $403,000 for the subject that the subject is over assessed.

17 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 8-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 2-3%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

18 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

19 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

20 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

21 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

22 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

***"Factors to consider in deriving just valuation**. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."

The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID (marginally) establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS NOT reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be GRANTED in part with a reduction in the just value to $403,000.

Special Magistrate

PETITION NO. 25-384

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: RM1 SFR PROPCO B LP
PARCEL KEY NO: 00730846

SUMMARY OF EVIDENCE

1 The Petitioner, NATASHA ELLIOTT of RYAN LLC for RM1 SFR PROPCO B LP did appear telephonically before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The Property Appraiser shows a just value of $323,641 ($171/SF heated, $152/SF adjusted), an assessed or capped value of $323,641, and a taxable value of $323,641.

3 The Petitioner estimated the just value to be $316,420.

4 *Subject Property Type:* The subject is a 1,893 heated base SF (2,132 SF adjusted) single family residence. It was constructed in 2019. The parcel is located at 6177 Kinlock Ave., Spring Hill.

5 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

6 The Petitioners evidence consists of a petition, hearing notice, correspondence, sales analysis, sales map and verbal testimony.

7 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

8 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

9 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

10 The PAO performed their analysis utilizing adjusted SF in their sales analysis report. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

11 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average.

12 The subject property did not transfer in the past 3 years.

13 The PAO supplied 3 improved sales on their statistical grid. Sale 2 was a sinkhole property that is older than the subject, and Sale 3 is an outlier that is also older than the subject and might have a finished garage. Neither will be weighted. The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 9% for COS. After adjustment, these sales indicated a range of $151/SF to $151/SF adjusted before extra features (median $151/SF adjusted). The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($150.74/SF adjusted) $321,378 and that the subject is over assessed.

14 The PAO and Petitioner have 1 sale in common. This sale was included in the Petitioner summary below but not weighted twice in our conclusion.

15 The Petitioner supplied 3 improved sale comparables. Sales 1 was also used by the PAO. Sale 3 was too old and was not weighted. This analysis does not note garages, extra feature values, amenities or the difference between gross, adjusted and heated SF. The sales will be adjusted at 4%/year for market conditions (the Petitioner used 0% adjustment), for age/condition, adjusted for land size/value if warranted, adjusted for differences in heated SF at $125/SF heated (their analysis tends to understate this factor, and they note adjusted SF but in fact use heated SF), and in this instance a 9% COS factor is warranted. After adjustment, these remaining sales indicated a range of $318,318 to $322,595 (median $320,456). The Petitioner sales indicate a credible and

reliable just value for the subject of $320,500 and that the subject is over assessed.

16 Reviewing all the sales presented by both parties, the evidence credibly and reliably supports a just value of $320,750 for the subject that the subject is over assessed.

17 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 8-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 2-3%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

18 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

19 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

20 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

21 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

22 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

***"Factors to consider in deriving just valuation**. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."

The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID (marginally) establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS NOT reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be GRANTED in part with a reduction in the just value to $320,750.

Special Magistrate
Steven L. Nystrom, MAI

FINDINGS OF FACT

ADMISSIBILITY OF EVIDENCE:

The evidence submitted by the Property Appraiser and Petitioner is deemed relevant, credible and admissible with no objections raised by either party. The evidence for both parties was admitted.

Based on the evidence and testimony presented at the hearing, the Property Appraiser lawfully considered the eight criteria enumerated in Section 193.011, Florida Statutes and, therefore did present sufficient evidence to establish a presumption of correctness. Petitioner did not prove by a preponderance of the evidence that the Property Appraiser's just value does not represent just value nor did the Petitioner prove that the Property Appraiser's just valuation is arbitrarily based on appraisal practices that are different from the appraisal practices generally applied by the Property Appraiser to comparable property within the same county. The Petitioner did not present competent, substantial evidence to overcome the presumption of correctness established by the Property Appraiser.

HEARING SUMMARY

The subject property is a motel containing 122 units/ rooms. Average unit size is 410 square feet. The motel was built in 1966. The property operates under a Motel 6 flag.

INCOME

The subject is an income producing property. Therefore, the income approach is a relevant value indicator Both parties provided an income approach, as follows:

PGI - Potential Gross Income
V&C - Vacancy & Collection Loss
EGI - Effective Gross Income
NOI - Net Operating Income
CAP RATE - Capitalization Rate
AR - Administrative Review

INCOME/ EXPENSES/ NOI

The Property Appraiser's income approach was based on a $70.00/Room/Nt ADR, 30% vacancy and 74% expenses, and a 9.25% tax loaded cap rate.

The Petitioner's analysis was based on the subject's actual income and expenses (based on subject operating data), capped at an unloaded 8.5% cap rate.

The Property Appraiser's NOI is **$565,444.** The Property Appraiser indicated that their cap rate is loaded. However, there was no line item for the tax load. Therefore, the Property Appraiser's analysis was reconstructed based on the market-oriented base cap rates within their survey data. However, most of

the survey data pertains to significantly higher quality, newer hotels, in more populated areas. The subject is a two-star, exterior corridor motel, built nearly 60 years ago, which would tend to command a cap rate near the higher end of the range. Based on all of the survey data provided, and considering the subject's position in the market, the base cap rate is adjusted to 8.5%.

The Petitioner's analysis utilizes an unloaded 8.5% cap rate, which appears reasonable (See above). However, the Petitioner's expenses include real estate taxes, as well as Capital Expenditures of $261,029, which should be considered below the NOI line, or in reserves. Therefore, in the Administrative Review, the capital expenditures and taxes were removed, and 3% reserves were added, resulting in NOI of **$632,812.**

Property Appraiser NOI: $565,444

Petitioner Adjusted NOI: $632,812

Concluded NOI: $600,000

MILLAGE CALCULATION

Unfortunately, the subject's millage rate could not be found in the evidence packages. However, the tax expense was $63,224, and the taxable value was $3,796,123, which was utilized to derive the subject's millage, as follows:

TAX EXPENSE / TAXABLE VALUE = MILLAGE

EXHIBIT D

MILLAGE CALCULATION		
ITEM		**VALUES**
TAX EXPENSE		$63,224
TAXABLE VALUE	/	$3,796,183
CALCULATED MILLAGE		**1.66546%**

DOR recently conducted workshops and distributed materials/ instructions/ guidance related to the Property Appraiser's proper consideration of the Cost of Sale.

Method #1 is demonstrated as follows:

EXHIBIT E

DOR COST OF SALE DEDUCTION METHOD 1	
NOI	**$600,000**
UNADJUSTED CAP RATE	8.50%
MILLAGE RATE	1.67%
COST OF SALE ADJUSTMENT	85.00%
EFFECTIVE TAX RATE	1.42%
LOADED CAP RATE	9.92%
VALUE PRIOR TO COS	**$6,051,045**
COST OF SALE ADJUSTMENT	15%
JUST VALUE	**$5,143,388**
OTHER (PERSONAL PROPERTY)	**$0**
ROUNDED	**$5,140,000**

After a 15% adjustment for Cost of Sale (as directed by DOR), the value indication is above the assessment. The assessment is reasonable.

COST

The Property Appraiser provided a cost approach, which appears reasonable, and is supported by MVS cost data. However, the analysis required significant adjustments for depreciation due to the age of the improvements (60 years). The depreciation figures may be accurate. However, the age of the property, and likely several renovations over a 60 year period, reduces the reliability of the analysis.

CONCLUSION

Again, the subject is an income producing property. Therefore, the income approach is likely the best indicator. The income approach supports the assessment. The petition should be Denied.

CONCLUSION OF LAW

The evidence submitted by the Property Appraiser and Petitioner is deemed relevant, credible and admissible with no objections raised by either party. The evidence for both parties was admitted.

Based on the evidence and testimony presented at the hearing, the Property Appraiser lawfully considered the eight criteria enumerated in Section 193.011, Florida Statutes and, therefore did present sufficient evidence to establish a presumption of correctness. Petitioner did not prove by a preponderance of the evidence that the Property Appraiser's just value does not represent just value nor did the Petitioner prove that the Property Appraiser's just valuation is arbitrarily based on appraisal practices that are different from the appraisal practices generally applied by the Property Appraiser to comparable property within the same county. The Petitioner did not present competent, substantial evidence to overcome the presumption of correctness established by the Property Appraiser. Therefore, the petition is **DENIED.**

PETITION NO. 25-391

RECOMMENDATION OF SPECIAL MAGISTRATE

VALUE ADJUSTMENT BOARD

HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: Spring Hill Town Center LLC

PARCEL KEY NO: 01084454

SUMMARY OF EVIDENCE

The Petitioner, Russell Paine of Ryan LLC for Spring Hill Town Center LLC, appeared before the Special Magistrate via telephonic hearing to give testimony. The Property Appraiser was represented by DANIEL SCOTT and KIMBERLY HEBERT. All present parties were put under sworn oath.

The Property Appraiser verified the values accordingly; a just value of $1,721,228, an assessed or capped value of $1,721,228, and a taxable value of $1,721,228. There was no change in values after the process.

The Petitioner did not provide an estimate of just value for this individual parcel.

Subject Property Type: The subject is a 2,880 SF (leasable and gross) commercial shopping center that was built in 2009 and is situated on a 3.68-acre site. The subject is located at 3049 Aerial Way, Brooksville, FL.

The PAO evidence consists of an evidence packet with a subject summary page, PRC with photo and an aerial map of the subject property, additional aerial maps, cost approach valuation, sales comparison approach with (3) land sales with aerial maps for support of land value, and verbal testimony.

The Petitioner's evidence consists of a petition, summary of evidence submission, property summary report, income statement/approach and rent roll report, and verbal testimony.

Per testimony by the PAO, there was a timely evidence exchange. There were no objections, and all the evidence noted above is considered admissible (unless specifically noted as inadmissible).

Overall, the evidence presented meets specific evidence rules (See Rule 12D-9,025(1) and

Rule 12D-9.025(2)b, F.A.C) and is considered sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

The PAO relied upon the cost approach to value and considered CAMA analysis at TRIM. The approach utilized is considered an appropriate methodology by the Special Magistrate.

The PAO presented their evidence packet with a sales comparison approach of (3) land sales from the subject market area to support land value. The PAO performed their cost analysis utilizing Marshall Valuation Service costs and factors in developing a cost for building and site improvements, plus indirect and soft costs, hard and indirect costs, less depreciation and then adding land value which was adjusted for COS (15%). The PAO final value via the cost analysis was $1,907,060 or $662.17 per leasable SF. The PAO did not rely on an income approach in establishing the assessment which is considered the preferred methodology for income producing property.

The Petitioner provided an income approach and rent roll for the entire 7-unit retail center (which consists of 3 parcels) as one economic unit, consistent with how multi-tenant retail investments typically transact in the marketplace. The concluded value via the Petitioner's income approach was $4,000,000, which equates to $301 per SF of leasable space which translates to $866,880 based on the 2,880 leasable SF.

The PAO, did not have a rebuttal to the Petitioner's evidence.

In reviewing all evidence, the Special Magistrate notes that the subject is a retail shopping center and is income-producing property, and investor behavior primarily relies on the income approach for market value determination. The PAO's exclusive reliance on the cost approach, without giving meaningful consideration to income characteristics, may diminish the reliability of the assessment, particularly for an older or stabilized retail center where the cost approach typically reflects higher values due to difficulty in assessing accrued depreciation and any obsolescence.

In reconciliation, the PAO relied primarily on the cost approach and did not develop an income approach to reflect the subject's economic performance as a retail shopping center. The Petitioner presented an income-based valuation for the property; however, the analysis grouped all three parcels into a single economic unit and did not separate the income and expenses attributable to each individual parcel. This created difficulty in isolating a supportable value for any one parcel and limited the precision of the petitioner's

conclusion. Nevertheless, the income approach is generally the most reflective of investor behavior for multi-tenant retail properties and therefore provides meaningful insight into market value.

After reviewing both submissions, the Special Magistrate finds that each contains strengths and limitations. The PAO's cost approach does not fully capture external and economic influences affecting stabilized income potential, while the Petitioner's income approach requires caution due to the combined treatment of three distinct parcels and the lack of parcel-specific analysis other than the rent roll provided. Considering the totality of the evidence, an appropriate value conclusion lies between the two opinions. Accordingly, moderate weight has been given to the Petitioner's income evidence and moderate weight to the PAO's cost analysis to arrive at a balanced and supportable estimate of just value for the subject.

Of the documentation provided, the PAO concluded at $1,907,060 via the cost approach and the Petitioner concluded at $866,880 via the income approach. The median of both valuations is $1,386,970. This data reliably supports that the subject is over assessed.

The PAO reported that their internal analysis supports a 15% increase in sale prices from 1/1/2024 to the lien date of 1/1/2025. They also reported that the DOR performed a study across this same period, utilizing qualified sales of like property, and concluded a 15% increase over the same period. The Special Magistrate assumes that the PAO utilized a process of sampling paired sales or some other subset of the available data. The Special Magistrate will equally weigh the DOR study results (15%) utilizing all qualified property sales, and the PAO conclusion (15%) and utilize 15% herein.

The Special Magistrate has applied a qualitative analysis of the data submitted by all parties and has also considered the recent sale of the subject property, if applicable. A COS factor of 15%, market conditions adjustment based on 12% annually, age/condition adjustment, land size/value, a factor for adjusted SF or non-heated area as a % of overall space, extra features differences, a SF adjustment, quality and view adjustments were considered.

The PAO considered the cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 7-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 1-3%, properly considered for the subject). The Special Magistrate will consider this when weighing the appropriateness of each parties' conclusions and the assessment level.

The DOR utilizes 15% cost of sales in their oversight function for all property in aggregate.

The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs, implying that "just value" is in fact equal to "market value net of typical sales costs". Based on current training material for Special Magistrates, this consistently and strongly advises a deduction for the 1st and 8th criteria.

The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered in their development of the assessment in regard to the property at hand. The PAO addressed the requirements of FS 193.011 as follows:

"Factors to consider in deriving just valuation. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:

(1) **The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length**;

The PAO, within the CAMA system, makes an adjustment for cost of sale within their direct application of the sales comparison analysis. An adjustment is made for cost of sale as noted under Criteria 8 in their CAMA analysis and in the reconciliation process.

(2) **The highest and best use...,(shortened)** Land use and building codes were considered along with the character of any existing site improvements, the subject is noted to be residential use and was not disputed by either party. Comparable data was selected

based on this information.

(3) **The location of the property**; The subject property is assigned a location or neighborhood code within the PAO database related to its specific location. Comparable data is selected with as similar a location as is possible, while also considering other relevant factors.

(4) **The quantity or size of the property**; The size of the building, the site size and site improvements are based on data contained within the PRC and all comparable sales are selected with attention to similarity of size, while also considering and weighing the other relevant factors.

(5) **The cost of said property and the present replacement value of any improvements thereon**; Within the CAMA system, the PAO uses cost data and when applicable, considers a pure replacement cost new and depreciation factors within a cost approach to value.

(6) **The condition of said property**; The condition of the property, through periodic site inspections, actual age, and information submitted to them by property owners is considered by the PAO. The information is given a % good or % depreciation factor and is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) **The income from said property; and;** When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files, general market statistics, and when available, actual subject performance is considered.

(8) "**The net proceeds of the sale of the property, as received by the seller, after deduction of all the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or atypical terms or financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."**

The cost of sales is considered by the PAO within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID overcome the presumption of correctness.

The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

The Petitioner HAS shown by a preponderance of evidence that the assessment is excessive. Thus, the assessed value DOES exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, "relevant evidence" is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with

DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate has determined that the testimonial and documentary evidence (combined) meet the test of "relevancy and credibility" and WAS sufficient to reach the "preponderance of the evidence" standard of proof required by Rule 12D-9.027(6) FAC.

The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS satisfied the "preponderance of the evidence" standard under the facts as testified to, that the appraiser's assessment is in excess of just value. After weighing all the documentary and testimonial evidence it is concluded that the assessment IS NOT reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be GRANTED in part with a reduction in the just value to $1,386,970.

Special Magistrate

Colleen E Millett

PETITION NO. 25-392

RECOMMENDATION OF SPECIAL MAGISTRATE

VALUE ADJUSTMENT BOARD

HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: Spring Hill Town Center LLC

PARCEL KEY NO: 01084490

SUMMARY OF EVIDENCE

The Petitioner, Russell Paine of Ryan LLC for Spring Hill Town Center LLC, appeared before the Special Magistrate via telephonic hearing to give testimony. The Property Appraiser was represented by DANIEL SCOTT and KIMBERLY HEBERT. All present parties were put under sworn oath.

The Property Appraiser verified the values accordingly; a just value of $1,110,316, an assessed or capped value of $1,110,316, and a taxable value of $1,110,316. There was no change in values after the process.

The Petitioner did not provide an estimate of just value for this individual parcel.

Subject Property Type: The subject is a 6,650 SF (leasable area with 6,730 SF gross) commercial shopping center that was built in 2009 and is situated on a 10.60-acre site. The subject is located at 3163 Aerial Way, Brooksville, FL.

The PAO evidence consists of an evidence packet with a subject summary page, PRC with photo and an aerial map of the subject property, additional aerial maps, cost approach valuation, sales comparison approach with (3) land sales with aerial maps for support of land value, and verbal testimony.

The Petitioner's evidence consists of a petition, summary of evidence submission, property summary report, income statement and rent roll report, and verbal testimony.

Per testimony by the PAO, there was a timely evidence exchange. There were no objections, and all the evidence noted above is considered admissible (unless specifically noted as inadmissible).

Overall, the evidence presented meets specific evidence rules (See Rule 12D-9,025(1) and

Rule 12D-9.025(2)b, F.A.C) and is considered sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

The PAO relied upon the cost approach to value and considered CAMA analysis at TRIM. The approach utilized is considered an appropriate methodology by the Special Magistrate.

The PAO presented their evidence packet with a sales comparison approach of (3) land sales from the subject market area to support land value utilized in cost analysis. It should be noted that the PAO packet indicates that (1) listing and (5) comparable sales were utilized; however, there were in fact only (3) sales. The PAO performed their cost analysis utilizing Marshall Valuation Service costs and factors in developing a cost for building and site improvements, plus indirect and soft costs, hard and indirect costs, less depreciation and then adding land value which was adjusted for COS. The PAO final value via the cost analysis was $3,302,847 or $496.67 per leasable SF. The PAO did not rely on an income approach in establishing the assessment which is considered the preferred methodology for income producing property.

The Petitioner provided an income approach and rent roll for the entire 7-unit retail center (which consists of 3 parcels) as one economic unit, consistent with how multi-tenant retail investments typically transact in the marketplace. The concluded value via the Petitioner's income approach was $4,000,000, which equates to $301 per SF of leasable space which translates to $2,001,650 based on the 6,650 leasable SF.

The PAO, did not have a rebuttal to the Petitioner's evidence.

In reviewing all evidence, the Special Magistrate notes that the subject is a retail shopping center and is income-producing property, and investor behavior primarily relies on the income approach for market value determination. The PAO's exclusive reliance on the cost approach, without giving meaningful consideration to income characteristics, may diminish the reliability of the assessment, particularly for an older or stabilized retail center where the cost approach typically reflects higher values due to difficulty in assessing accrued depreciation and any obsolescence.

In reconciliation, the PAO relied primarily on the cost approach and did not develop an income approach to reflect the subject's economic performance as a retail shopping center. The Petitioner presented an income-based valuation for the property; however, the analysis grouped all three parcels into a single economic unit and did not separate the

income and expenses attributable to each individual parcel. This created difficulty in isolating a supportable value for any one parcel and limited the precision of the petitioner's conclusion. Nevertheless, the income approach is generally the most reflective of investor behavior for multi-tenant retail properties and therefore provides meaningful insight into market value.

After reviewing both submissions, the Special Magistrate finds that each contains strengths and limitations. The PAO's cost approach does not fully capture external and economic influences affecting stabilized income potential, while the Petitioner's income approach requires caution due to the combined treatment of three distinct parcels and the lack of parcel-specific analysis other than the rent roll provided. Considering the totality of the evidence, an appropriate value conclusion lies between the two opinions. Accordingly, moderate weight has been given to the Petitioner's income evidence and moderate weight to the PAO's cost analysis to arrive at a balanced and supportable estimate of just value for the subject.

Of the documentation provided, the PAO concluded at $3,302,847 via the cost approach and the Petitioner concluded at $2,001,650 via the income approach. The median of both valuations is $2,652,249. This data reliably supports that the subject is NOT over assessed.

The PAO reported that their internal analysis supports a 15% increase in sale prices from 1/1/2024 to the lien date of 1/1/2025. They also reported that the DOR performed a study across this same period, utilizing qualified sales of like property, and concluded a 15% increase over the same period. The Special Magistrate assumes that the PAO utilized a process of sampling paired sales or some other subset of the available data. The Special Magistrate will equally weigh the DOR study results (15%) utilizing all qualified property sales, and the PAO conclusion (15%) and utilize 15% herein.

The Special Magistrate has applied a qualitative analysis of the data submitted by all parties and has also considered the recent sale of the subject property, if applicable. A COS factor of 15%, market conditions adjustment based on 12% annually, age/condition adjustment, land size/value, a factor for adjusted SF or non-heated area as a % of overall space, extra features differences, a SF adjustment, quality and view adjustments were considered.

The PAO considered the cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 7-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 1-3%, properly considered for the subject). The Special Magistrate will consider this when weighing the appropriateness of each parties' conclusions and the assessment level.

The DOR utilizes 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous.

The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs, implying that "just value" is in fact equal to "market value net of typical sales costs". Based on current training material for Special Magistrates, this consistently and strongly advises a deduction for the 1st and 8th criteria.

The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered in their development of the assessment in regard to the property at hand. The PAO addressed the requirements of FS 193.011 as follows:

"Factors to consider in deriving just valuation. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:

(1) **The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length**;

The PAO, within the CAMA system, makes an adjustment for cost of sale within their direct application of the sales comparison analysis. An adjustment is made for cost of sale as noted under Criteria 8 in their CAMA analysis and in the reconciliation process.

(2) **The highest and best use...,(shortened)** Land use and building codes were considered along with the character of any existing site improvements, the subject is noted

to be residential use and was not disputed by either party. Comparable data was selected based on this information.

(3) **The location of the property**; The subject property is assigned a location or neighborhood code within the PAO database related to its specific location. Comparable data is selected with as similar a location as is possible, while also considering other relevant factors.

(4) **The quantity or size of the property**; The size of the building, the site size and site improvements are based on data contained within the PRC and all comparable sales are selected with attention to similarity of size, while also considering and weighing the other relevant factors.

(5) **The cost of said property and the present replacement value of any improvements thereon**; Within the CAMA system, the PAO uses cost data and when applicable, considers a pure replacement cost new and depreciation factors within a cost approach to value.

(6) **The condition of said property**; The condition of the property, through periodic site inspections, actual age, and information submitted to them by property owners is considered by the PAO. The information is given a % good or % depreciation factor and is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) **The income from said property; and;** When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files, general market statistics, and when available, actual subject performance is considered.

(8) "**The net proceeds of the sale of the property, as received by the seller, after deduction of all the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or atypical terms or financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."**

The cost of sales is considered by the PAO within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID NOT overcome the presumption of correctness.

The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

The Petitioner HAS NOT shown by a preponderance of evidence that the assessment is excessive. Thus, the assessed value DOES NOT exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, "relevant evidence" is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate has determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC.

The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS NOT satisfied the "preponderance of the evidence" standard under the facts as testified to, that the appraiser's assessment is in excess of just value. After weighing all the documentary and testimonial evidence it is concluded that the assessment IS reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be DENIED.

Special Magistrate

Colleen E Millett

PETITION NO. 25-393

RECOMMENDATION OF SPECIAL MAGISTRATE

VALUE ADJUSTMENT BOARD

HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: Spring Hill Town Center LLC

PARCEL KEY NO: 01724986

SUMMARY OF EVIDENCE

The Petitioner, Russell Paine of Ryan LLC for Spring Hill Town Center LLC, appeared before the Special Magistrate via telephonic hearing to give testimony. The Property Appraiser was represented by DANIEL SCOTT and KIMBERLY HEBERT. All present parties were put under sworn oath.

The Property Appraiser verified the values accordingly; a just value of $2,321,207, an assessed or capped value of $1,884,318, and a taxable value of $1,884,318. There was no change in values after the process.

The Petitioner did not provide an estimate of just value for this individual parcel.

Subject Property Type: The subject is a 3,838 SF (leasable area with 4,201 SF gross) drive-in restaurant that was built in 2010 and is situated on a 1.32-acre site. The subject is located at 15050 Spring Hill Drive, Brooksville, FL.

The PAO evidence consists of an evidence packet with a subject summary page, PRC with photo and an aerial map of the subject property, additional aerial maps, sales comparison approach with (3) improved sales with aerial maps and property record cards for each sale, and verbal testimony.

The Petitioner's evidence consists of a petition, summary of evidence submission, property summary report, income statement/approach and rent roll report, and verbal testimony.

Per testimony by the PAO, there was a timely evidence exchange. There were no objections, and all the evidence noted above is considered admissible (unless specifically noted as inadmissible).

Overall, the evidence presented meets specific evidence rules (See Rule 12D-9,025(1) and

Rule 12D-9.025(2)b, F.A.C) and is considered sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

The PAO relied upon the sales comparison approach to value and considered CAMA analysis at TRIM. The approach utilized is considered an appropriate methodology by the Special Magistrate.

The PAO presented their evidence packet with a sales comparison approach of (3) improved sales of drive-in restaurants from the subject market area. The PAO adjusted the sales for differences in market conditions (date of sale ranged from 2022 to 2024), location, age/condition, quality/design, size and land to building ratio. The PAO's final value via the sales comparison approach was $3,360,246 and after COS (15%) adjustment, the just value was indicated at $2,856,209.

The Petitioner provided an income approach and rent roll for the entire 7-unit retail center (which consists of 3 parcels) as one economic unit, consistent with how multi-tenant retail investments typically transact in the marketplace. The concluded value via the Petitioner's income approach was $4,000,000, which equates to $301 per SF of leasable space which translates to $1,155,238 based on the 3 ,838 leasable SF.

The PAO, did not have a rebuttal to the Petitioner's evidence.

In reviewing all evidence, the Special Magistrate notes that the subject is a drive-in restaurant and is income-producing property, and investor behavior primarily relies on the income approach for market value determination. The PAO's exclusive reliance on the sales comparison approach, without giving meaningful consideration to income characteristics, may diminish the reliability of the assessment.

After reviewing both submissions, the Special Magistrate finds that each contains strengths and limitations. In reconciling the valuations presented, the Special Magistrate considered that the PAO relied solely on the sales comparison approach for an income-producing drive-in restaurant, while the Petitioner developed an income approach supported by actual rent, operating characteristics, and market-derived capitalization factors. Given that the subject's economic value is determined primarily by its ability to generate income, the Petitioner's income approach provides a meaningful indication of market value and must be weighed alongside the PAO's sales analysis. The Special Magistrate also considered that the subject consists of (3) legally separate parcels

operating as a single economic unit, and as such, the Petitioner analyzed all parcels collectively in one income approach. This grouping is reasonable for income valuation purposes, though it does introduce difficulty in isolating parcel-specific values. After reviewing both approaches, their respective strengths and limitations, and the statutory factors under s. 193.011, the Special Magistrate finds that a value between the two opinions is most reflective of market-derived indications for this type of income-producing property.

Of the documentation provided, the PAO concluded at $2,856,209 via the sales comparison approach and the Petitioner concluded at $1,155,238 via the income approach. The median of both valuations is $2,005,724. This data reliably supports that the subject is over assessed.

The PAO reported that their internal analysis supports a 15% increase in sale prices from 1/1/2024 to the lien date of 1/1/2025. They also reported that the DOR performed a study across this same period, utilizing qualified sales of like property, and concluded a 15% increase over the same period. The Special Magistrate assumes that the PAO utilized a process of sampling paired sales or some other subset of the available data. The Special Magistrate will equally weigh the DOR study results (15%) utilizing all qualified property sales, and the PAO conclusion (15%) and utilize 15% herein.

The Special Magistrate has applied a qualitative analysis of the data submitted by all parties and has also considered the recent sale of the subject property, if applicable. A COS factor of 15%, market conditions adjustment based on 12% annually, age/condition adjustment, land size/value, a factor for adjusted SF or non-heated area as a % of overall space, extra features differences, a SF adjustment, quality and view adjustments were considered.

The PAO considered the cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 7-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 1-3%, properly considered for the subject). The Special Magistrate will consider this when weighing the appropriateness of each parties' conclusions and the assessment level.

The DOR utilizes 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale,"

regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous.

The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs, implying that “just value” is in fact equal to “market value net of typical sales costs”. Based on current training material for Special Magistrates, this consistently and strongly advises a deduction for the 1st and 8th criteria.

The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered in their development of the assessment in regard to the property at hand. The PAO addressed the requirements of FS 193.011 as follows:

“Factors to consider in deriving just valuation. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:

(1) **The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length**;

The PAO, within the CAMA system, makes an adjustment for cost of sale within their direct application of the sales comparison analysis. An adjustment is made for cost of sale as noted under Criteria 8 in their CAMA analysis and in the reconciliation process.

(2) **The highest and best use...,(shortened)** Land use and building codes were considered along with the character of any existing site improvements, the subject is noted to be residential use and was not disputed by either party. Comparable data was selected based on this information.

(3) **The location of the property**; The subject property is assigned a location or neighborhood code within the PAO database related to its specific location. Comparable data is selected with as similar a location as is possible, while also considering other

relevant factors.

(4) **The quantity or size of the property**; The size of the building, the site size and site improvements are based on data contained within the PRC and all comparable sales are selected with attention to similarity of size, while also considering and weighing the other relevant factors.

(5) **The cost of said property and the present replacement value of any improvements thereon**; Within the CAMA system, the PAO uses cost data and when applicable, considers a pure replacement cost new and depreciation factors within a cost approach to value.

(6) **The condition of said property**; The condition of the property, through periodic site inspections, actual age, and information submitted to them by property owners is considered by the PAO. The information is given a % good or % depreciation factor and is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) **The income from said property; and;** When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files, general market statistics, and when available, actual subject performance is considered.

(8) "**The net proceeds of the sale of the property, as received by the seller, after deduction of all the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or atypical terms or financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."**

The cost of sales is considered by the PAO within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as

follows:

Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID overcome the presumption of correctness.

The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

The Petitioner HAS shown by a preponderance of evidence that the assessment is excessive. Thus, the assessed value DOES exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, "relevant evidence" is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate has determined that the testimonial and documentary evidence (combined) meet the test of "relevancy and credibility" and WAS sufficient to reach the "preponderance of the evidence" standard of proof required by Rule 12D-9.027(6) FAC.

The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS satisfied the "preponderance of the evidence" standard under the facts as testified to, that the appraiser's assessment is in excess of just value. After weighing all the documentary and testimonial evidence it is concluded that the assessment IS NOT reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be GRANTED in part with a reduction in the just value to $2,005,724.

Special Magistrate

Colleen E Millett

PETITION NO. 25-402

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: Jody D Damron & Carla B Damron
PARCEL KEY NO: 00355378

SUMMARY OF EVIDENCE

1 The Petitioner, JEFFERY EWING of ITAX PROPERTY TAX APPEALS for JODY D DAMRON & CARLA B DAMRON, did appear before the Special Magistrate to give testimony. The Property Appraiser was represented by DANIEL SCOTT. All parties present were put under sworn oath.

2 The Property Appraiser shows a just value of $1,009,763 ($172.55/SF), an assessed or capped value of $915,545, and a taxable value of $915,545. This is a decrease from the TRIM values of $1,156,777, an assessed or capped value of $915,545, and a taxable value of $915,545.

3 The Petitioner estimated just value to be $601,116.

4 *Subject Property Type:* The subject is a 5,852 heated SF office constructed in 1986. The petitioned property is located at 242 Howell Ave., Brooksville FL.

5 The PAO evidence consists of hearing notices and correspondence, valuation package, PRC, photographs, maps, cost approach, sales comparison approach, legal support, cost service data support, and verbal testimony.

6 The Petitioners' evidence consists of a petition, correspondence, subject data, PRC, pictures, maps, sales comparison approach, rebuttal data (no objections) and verbal testimony.

7 Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

8 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

9 The PAO relied primarily upon the sales comparison approach, placed no weight on the income approach and secondary weight on the cost approach to value. This is considered appropriate methodology for mass appraisal by the Special Magistrate.

10 The subject property transferred in January of 2023 for $1,000,000 as a qualified sale transaction.

11 The PAO performed a cost approach but supplied no land sales. The CAMA estimated just land value for this generally downtown Brooksville was $201,916 ($3.62/SF). The Petitioner supplied 6 land sales ranging from $1.50/SF to $3.83/SF. Sales 1, 2, 3, and 4 are dissimilar in zoning or highest and best use, or very inferior and are not reliable. Sales 5 & 6 are fairly comparable and transferred for $3.27/SF and $3.83/SF. Both are wooded (the subject is cleared), and they generally support the PAO just land value conclusion via CAMA.

12 The PAO cost approach utilized an office, Class D, good quality, 30-year effective age (39-year actual age), 50-year economic life, 15% total entrepreneurial profit & soft/indirect costs (on the building improvements, excluding land) and 34% depreciation as the base factors. Cost service support pages were supplied. All the PAO applied factors appear reasonable. The Special Magistrate applied a $237,548 land value ($201,916 / 0.85), the PAO depreciated cost value of $934,871, and a subject specific and appropriate COS factor of 7%. This credibly and reliably supports a just value of $1,090,350 ($237,548, plus $934,871 = $1,172,419, less 7% COS = $1,090,350). The PAO cost approach credibly and reliably supports that the subject is not over assessed.

13 The PAO supplied 3 improved sales from 2022 to 2023. The PAO performed a quantitative analysis, and the Special Magistrate will similarly perform quantitative analysis. The subject sale was adjusted upwards 6% for improved market conditions and a 7% subject specific and appropriate COS factor was applied by the Special Magistrate. The subject sale best supports a just value of $985,800 for the subject, and that the subject is over assessed. Sale 2 is a multi-tenant retail/office that is much newer than the subject. It is fairly dissimilar and will not be weighted. Sale 3 was relatively similar to the subject and the Special Magistrate adjusted it upwards 9% for improving market conditions, downwards 5% for location, 7% for age/condition, 5% for quality/design, and 7% for COS = $173.44/SF ($1,014,973). Overall, the PAO sales comparison approach credibly and reliably supports a just value of $1,000,000 for the subject and that it is slightly over assessed.

14 The Petitioner supplied 9 improved sales. Sales 1, 2, 4, 5, 6 and 8, are inferior, dissimilar and/or too small to be reliable. Sale 9 appears to be an outlier and is not considered reliable (selling well below its just value). The remaining sales were adjusted for improving market conditions, location, 2nd floor space, quality, age condition, and COS. After adjustment the remaining sales indicate a value range of $199.77/SF (Sale 3) and $124.44/SF (Sale 7) (median $162.10/SF). Sale 3 is more similar to the subject than Sale 7 (Sale 3 weighted 60%, Sale 7 40% = $169.64/SF = $992,721). The Petitioner sales data marginally supports that the subject is over assessed.

15 The Special Magistrate has weighted the PAO cost approach 30% ($1,090,350), the PAO Sales approach 50% ($1,000,000), and the Petitioner Sales approach 20% ($992,721). This credibly and reliably supports a just value of $1,025,649 and that the subject is not over assessed.

16 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 5-8% (cost of sales adjustment; estimated to be brokerage cost of 4-5%, personal property 0-1%, and financing costs of 1-2%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, long term leases, user specific improvements, etc.).

17 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

18 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

19 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

20 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical

sales costs. This implies that “just value” is in fact equal to “market value net of typical sales costs”. The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

21 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

“Factors to consider in deriving just valuation*. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;

The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."
The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID NOT overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS NOT shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES NOT exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS NOT satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be denied.

Findings Of Fact

Petitioner Jaden Randall with Delta Property Tax Advisors appeared telephonically on behalf of Circle K Stores, Inc. on November 14, 2025 to provide testimonial and documentary evidence pertaining to the 2025 property assessment for real property located in Hernando County, Florida. The Hernando County Property Appraiser's Office was represented at the hearing by Deputy Appraiser Daniel Scott, Commercial Supervisor. An opening statement regarding the hearing process and rules of procedure was read and all parties were placed under oath. This petition is one of six presented by the petitioner on this hearing date. The specific case numbers are 25-408, 25-410, 25-411, 25-412, 25-413 and 25-414. Any relevant testimony presented during these individual hearings will be incorporated by reference to all hearings to avoid redundancy and expedite the hearing process.

The subject of this petition is listed on the Hernando County tax roll as Parcel ID R10-223-18-3499-0010-0000. This property is described as Circle-K Store, a retail store with fuel and a carwash. The subject property is located at 14187-14195 Elgin Boulevard, Spring Hill, Hernando County, Florida. The property consists of 4,690 square feet of net leasable building area on a 2.35-acre commercial site. The improvements were constructed in 2008 and are described as average quality in average condition. Based on an inspection of the property, the property appraiser has determined that the building improvements have an effective age of 17 years, considering construction quality and condition. It appears that the subject of this petition has not sold within the 12-month period preceding the January 1 valuation date.

The property appraiser has confirmed the 2025 just value at $3,396,523, with an assessed value of $2,246,577 and a taxable value of $2,246,577. There have been no changes to the values since the Notice of Proposed Property Taxes (TRIM) was issued. The petitioner is requesting a revision to the 2025 just value, proposing a revision in just value to $2,000,000. No hearing evidence has been submitted to the Clerk of Court in support of this request, rather the request is supported by a verbal discussion of cost and income analysis.

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence, see Florida Administrative Code 12D-9.025(1). Generally, relevant evidence is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. The evidence meets or exceeds a minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. Documentary evidence presented by the property appraiser during the hearing is described and labeled as follows:

- PAO-A (27 pages) - Cover page, table of contents, subject summary page, subject property record card with aerial map, building sketch and photograph, subject aerial photographs, sales comparison approach, comparable sales location map, photographs if the comparable sales, comparable sales adjustment grid, property record cards for each sale

Documentary evidence presented by the petitioner during the hearing is described and labeled as follows:

- PET-1 (4 pages) - Petition list of other locations being petitioned

The property appraiser has not raised any objections to the evidence presented by the petitioner during the hearing.

The Florida Legislature has enacted eight criteria that the property appraiser must consider when determining just value. In any administrative or judicial action where a taxpayer challenges an ad valorem tax assessment, the property appraiser's estimate of just value is presumed correct if it is proven that the assessment was made in compliance with the eight criteria outlined in Section 193.011, Florida Statutes and in accordance with professionally accepted appraisal practices, including mass appraisal standards, if appropriate. The only standard of proof in this administrative review is a preponderance of the evidence, meaning the greater weight of evidence, or "more likely than not."

Florida courts have consistently held that the property appraiser is only required to consider the eight criteria, and that applying each factor is not mandatory. The courts have further found that if any one criterion does not reflect just value, it should be disregarded by the property appraiser. The special magistrate finds and summarizes the extent to which the property appraiser has considered each of these criteria in the following paragraphs.

(1) Present cash value of the property - The amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arms-length. This relates to the sales comparison approach and requires the property appraiser to consider the sale price exclusive of reasonable fees and costs of sale. In short, the price without transaction costs. The buyer typically pays more, and the seller typically receives less than the price indicated by the documentary stamps due to these transaction costs. In mass appraising, the property appraiser considers this criterion by applying or considering the comparable market sales using the Computer Aided Mass Appraisal System. In an assessment review hearing, the property appraiser supports just value through comparable sales analysis similar to that found in a fee appraisal. The property appraiser has presented sales evidence in support of the present cash value. Following are brief descriptions of the sales determined by the property appraiser to be most comparable to the subject and representative of value:

- PA Sale 1 - 15310 Cortez Blvd, Brooksville is described as a 2,940 square foot retail store with fuel. These improvements were constructed in

2000 and are represented as being in similar condition to the subject. The property appraiser has estimated the effective age to be 25 years. The improvements are situated on a 1.63-acre commercial site. This property sold in November 2024 for $3,365,000. Price adjustments have been made to account for differences in location, quality and design. This sale indicates a price of $1,145 per square foot for comparison with the subject.

• PA Sale 2 - 4707 Commercial Way, Spring Hill is described as a 3,850 square foot retail store with fuel. These improvements were constructed in 1996 and are represented as being in similar condition to the subject. The property appraiser has estimated the effective age to be 20 years. The improvements are situated on a 1.82-acre commercial site. This property sold in March 2024 for $3,575,000. Price adjustments have been made to account for differences in location, quality and design. This sale indicates a price of $928 per square foot for comparison with the subject.

• PA Sale 3 - 4159 Mariner Blvd, Spring Hill is described as a 3,726 square foot retail store with fuel. These improvements were constructed in 1986 and are represented as being in similar condition to the subject. The property appraiser has estimated the effective age to be 20 years. The improvements are situated on a 0.68-acre commercial site. This property sold in August 2023 for $6,210,600. Price adjustments have been made to account for differences in location, quality, design and land area. This sale indicates a price of $1,750 per square foot for comparison with the subject.

In considering these sales, the property appraiser has compared them based on per square foot price. Three qualified sales judged to be most comparable to the subject have been presented in support of value. These sales range in price from $928 to $1,750 per square foot. The sales were selected based on similar location, age, size and utility. Relevant sale transactions occurred within the 17 months preceding the January 1, 2025 value date. After deducting 15% for costs of sales, this sales evidence supports a value of $4,504,745 equivalent to $961 per square foot, within the indicated range. These sales are presented by the property appraiser as market evidence that the property is not over-assessed and $3,396,523 represents just value for the subject property. The petitioner has testified that comparable sales are not representative of just value because of the potential that the sale prices include equipment and business interest components although had no specific knowledge of such for these particular sales. The special magistrate finds that the just value is 75% of the value supported by the comparable sales which would more than account for any potential of non-real estate components that may be included in the sale. It is the opinion of the special magistrate that this sales analysis complies with Criterion 1, Chapter 193.011 of the Florida Statutes and generally accepted appraisal principles.

(2) Highest & Best Use – This relates to the consideration of the fundamental appraisal concept of highest and best use or best use to which the property can be expected to be put in the immediate future. For improved properties, the highest and best use of the property as if vacant should be considered as well. The four steps establishing highest and best use are consideration of what is physically possible, legally permissible, financially feasible, and maximally productive. The highest and best use as vacant is identified through land use codes which, in part, are based on zoning. The highest and best use as improved is assumed to be the current use unless evidence shows otherwise. The property appraiser's office considers highest and best use by identifying and recording land size, zoning, building size, location and other characteristics. Once all coding is in place, comparable sales and rentals that have similar characteristics are used to value the property. The highest and best use of this property is for retail use. This determination is undisputed by the petitioner and appears to have been appropriately considered by the property appraiser.

(3) Location of the property – The property appraiser assigns a neighborhood code to every property in the county. Sales of properties in the same or similar neighborhoods are typically used to determine locational adjustments. Often, site-specific location adjustments are made to reflect either an enhanced location (such as a water front site or in a golf course community) or an inferior location (such as adjacent to an industrial use or dumpsite). All of the comparable properties presented in support of value are located in the same overall market area as the subject and price adjustments have been made for significant differences in location. The location of the property appears to have been appropriately considered in the determination of just value.

(4) Quantity or size of the property – The property appraiser must consider the quantity or size of the property by determining and recording the correct land size, building size, and extra features sizes and quantities. Land size is based on legal descriptions from recorded plats or metes and bounds. Building sizes and extra features are determined by inspection and measured by deputy property appraisers. From the evidence presented there do not appear to be any notable discrepancies in size or quantity.

(5) The cost of the property and present replacement value of any improvements thereon - An analysis of cost is made in the Computer Aided Mass Appraisal System is found on the property record card. The property appraiser considers replacement cost through the use of Marshall & Swift Valuation Service data. These rates are adjusted annually to reflect the costs relevant to January 1 of the given tax year. Marshall & Swift Valuation Cost Service is also used to determine the replacement costs of extra features or site improvements. No separate analysis of cost has been presented during the hearing. Buyers in this sector of the real estate market do not typically consider the costs associated with development when valuing properties of this age and type. Cost calculations found on the property record card appear to be supportive of the value indicated by the more relevant valuation methods. It is the opinion of the magistrate that this cost analysis complies with Criterion 5, Chapter 193.011 of the Florida Statutes and generally accepted appraisal principles.

(6) Condition of the property – The property appraiser considers the condition of properties through periodic property inspections, no less than once every five years as required by Statute. Other events can trigger more frequent site inspections, including the sale of a property, issuance of a building permit, assessment appeal, or at the taxpayer's request. Condition is considered as a factor applied to the Computer Aided Mass Appraisal System value calculation for value losses from all sources based upon an age/life depreciation method. Photographs of the subject

property have been presented as evidence of condition. Evidence of building permits for renovations and/or significant building repairs has been presented. An effective age of 17 years has been estimated by the property appraiser based on an analysis of chronological age, condition and construction quality. It appears that the property appraiser has appropriately considered this factor.

(7) The income from the property – No analysis of income has been presented during the hearing due to a lack of market data pertaining to rental income, expenses and capitalization rates for this type of property. The subject property is owner occupied and there is a relative lack of market data and buyers in this sector of the real estate market typically do not consider income generating ability when valuing this type of property. It is the opinion of the magistrate that this income analysis complies with Criterion 7, Chapter 193.011 of the Florida statutes and generally accepted appraisal practices.

(8) Cost of Sale Adjustment - This criterion deals with the net proceeds from the sale of a property as received by the seller after deduction of all of the usual and reasonable fees and costs and expenses of financing and allowance for unconventional or atypical terms of financing arrangements. A few examples of the applicability of this criterion include: • unconventional or atypical financing arrangements, such as seller financing at favorable terms, which inflated the price, relative to what would have been achieved with a cash or case-equivalent arrangement, • the inclusion of tangible personal property, which may serve to increase the price above pure real property consideration, • atypically motivated buyers, who may pay a premium relative to that paid by the general market, • atypical closing costs arrangements, such as a seller paying the buyer's closing costs in exchange for a higher sales price. Because these situations may not be discoverable by the mass appraiser relying on raw gross price data, a deduction from the raw gross price is made with the goal being to arrive at 100% of the market value of the real property by eliminating any possible impact of non-real property consideration. This mass appraisal method is found to be acceptable by the Florida Department of Revenue and the Florida Courts. The special magistrate finds that applying a specific cost-of-sale adjustment consistent with the DR-493 form constitutes appropriate consideration of this criterion and complies with the requirements of Chapter 193.011, Florida Statutes.

It is implicit in mass appraisal that, even when properly specified and calibrated models are employed, some individual value conclusions may not meet standards of reasonableness, consistency, and accuracy. The purpose of this value review is to determine whether the just value reported on the current tax roll represents the just value of the property after consideration of the criteria set forth in Florida Statute §193.011 and generally accepted appraisal principles, including those applicable to mass appraisal. Based on the relevant, competent, and substantial evidence presented at the hearing, it appears that the property appraiser appropriately considered all eight factors set forth in Florida Statute §193.011, indicating that the just value is not overstated and is entitled to the presumption of correctness.

By filing this petition, the petitioner alleges that the property appraiser has assessed the property in excess of just value. According to 12D-9.025(3)(a) of the Florida Administrative Code, the petitioner is responsible for presenting relevant and credible evidence in support of his or her belief that the property appraiser's determination is incorrect. If the property appraiser establishes the presumption of correctness, it is the petitioner's burden to prove the assessment does not represent just value. Such evidence should be based on criteria similar to those established by the Legislature for the property appraiser to follow. To prevail in an assessment challenge, the taxpayer must prove more than a mere difference of opinion regarding an assessment. The following paragraphs describe how the petitioner has addressed each of the eight criteria of Section 193.011, as determined by the special magistrate.

(1) Present cash value of the property - No analysis of comparable sales has been presented by the petitioner in support of a change in just value. The petitioner contends that sales of these types of properties often include non-real estate components including equipment, personnel, inventory, and business enterprise value.

(2) Highest and Best Use - The petitioner does not dispute that the highest and best use of the subject property is retail.

(3) Location of the property - The petitioner appears familiar with the location characteristics of the subject property and has not claimed the presence of any atypical or adverse location factors that would materially affect its use or value.

(4) Quantity or size of the property - The petitioner does not dispute the size or quantity of the land or improvements reported by the property appraiser during the hearing, nor was any allegation made that these factors were miscalculated or improperly considered in the valuation.

(5) The cost of the property and present replacement value of any improvements thereon – The petitioner has prepared an analysis of cost using the Marshall & Swift cost manual. Per square foot direct development costs were applied to the size of the building components. Land value is based on the land value component found on the property record card with no market support for current land value. A 10% deduction to the land value assessment was made by the petitioner to account for alleged stigma from underground fuel storage tanks, however, no market evidence quantifying such stigma has been presented. This analysis results in a value of $1,255,607 as reported by the petitioner. Soft costs have not been accounted for by the petitioner, thereby understating total costs. No entrepreneurial incentive was presented in the petitioner's analysis. The petitioner responded that profit is included in the direct cost estimates found in Marshall & Swift, however the included profit in Marshall & Swift is builder and subcontractor profit and not the incentive to entice an entrepreneur to put together a specific development project. The omission of entrepreneurial incentive also has the effect of understating the building cost, resulting in an understated property value. The special magistrate finds that this analysis is not sufficient to overcome the presumption of correctness established by the property appraiser.

(6) Condition - The petitioner has not presented any credible evidence or asserted that the condition of the property differs from the description

provided by the property appraiser during the hearing. Furthermore, no claim was made regarding any significant physical deficiencies that would affect the property's use or value.

(7) The income from the property - The petitioner has developed an income analysis in support of a revision to just value. Market rental rates are supported in the petitioner's analysis by actual lease rate. The petitioner reconciled the subject's leasable building space to a rental rate of $40 per square foot on a triple net basis. This rate is based on other Circle K Properties included in this group that are reportedly paying between $31 and $70 per square foot. No stabilized vacancy was deducted. From an effective gross income of $208,444, an expense ratio of 10% was deducted but no market evidence is presented in support of the market expenses used by the petitioner. Support for the petitioner's selection of 6.5% base capitalization rate is based on reported rates used by other property appraisers in other tax hearings. The capitalized value indicated by this income analysis is $2,886,154. Although the petitioner has characterized these leases as representing market rates, a review of the property record cards for petitions 25-410, -411, -412 and -413 indicate that these leased properties were all purchased by the same landlord (DBNCH Circle, LLC) from Circle K Stores, Inc. (now the tenant) on March 17, 2004. This raises concerns regarding the arm's-length nature of the landlord-tenant relationship and whether leases originating in 2004 provides a reliable indicator of current market rent for the property.

(8) Cost of Sale Adjustment - The petitioner has not included a cost of sale adjustment.

In a tax hearing, oral testimony that is not supported by documentary evidence is given lesser credibility because it cannot be independently verified by the property appraiser prior to the hearing. It does not provide the same level of reliability as written materials. Documentary evidence, such as leases, income statements, cost data, photographs, or closing documents, allows the hearing officer to corroborate the statements made by the petitioner and to evaluate the information using objective standards. Unsubstantiated oral testimony relies solely on the petitioner's recollection or interpretation, which may be incomplete, inconsistent, or influenced by the outcome they are seeking. For valuation matters, where factual accuracy is essential, the absence of supporting documentation limits the weight that can reasonably be assigned to the testimony presented. After careful consideration of all evidence presented at the hearing, the special magistrate finds that the property appraiser has established the presumption of correctness by appropriately considering all eight criteria set forth in Florida Statute §193.011 and generally accepted appraisal principles. It is the opinion of this special magistrate that insufficient evidence has been presented to overcome this presumption by a preponderance of the evidence.

Conclusions of Law

According to §194.301, Florida Statutes, in any administrative action in which a taxpayer challenges an ad valorem tax assessment of value, the property appraiser's assessment is presumed correct if the appraiser proves by a preponderance of the evidence that the assessment was arrived at by complying with §193.011, any other applicable statutory requirements relating to classified use values or assessment caps, and professionally accepted appraisal practices, including mass appraisal standards, if appropriate. However, a taxpayer who challenges an assessment is entitled to a determination by the value adjustment board or court of the appropriateness of the appraisal methodology used in making the assessment. The value of property must be determined by an appraisal methodology that complies with the criteria of §193.011 and professionally accepted appraisal practices.

The burden of proof is on the party initiating the challenge as specified in paragraph §194.301(2). If the challenge is to the assessed value of the property, the party initiating the challenge has the burden of proving by a preponderance of the evidence that the assessed value:

1. Does not represent the just value of the property after taking into account any applicable limits on annual increases in the value of the property;
2. Does not represent the classified use value or fractional value of the property if the property is required to be assessed based on its character or use; or
3. Is arbitrarily based on appraisal practices that are different from the appraisal practices generally applied by the property appraiser to comparable property within the same county.

If the party challenging the assessment satisfies these requirements, the presumption of correctness is overcome, and the value adjustment board shall establish the assessment if there is competent, substantial evidence of value in the record which cumulatively meets the criteria of §193.011 and professionally accepted appraisal practices. Otherwise, the assessment stands.

In consideration of this specific petition, Florida Administrative Code section 12D-9.027 lays out a sequence of general procedural steps that the special magistrate has followed in the preparation of this recommendation to the Value Adjustment Board:

1. Determine whether the property appraiser has established a presumption of correctness for the assessment and determine whether the property appraiser's just value methodology is appropriate. The presumption of correctness is not established unless the property appraiser proves by a preponderance of the evidence that the methodology used to support just value for the subject property complies with Florida Statute §193.011 and professionally accepted appraisal practices, including mass appraisal standards, if appropriate. Based upon the evidence presented on the record during this hearing, this special magistrate finds that the presumption of correctness has been established by the property appraiser.

2. In administrative reviews of just valuation, if the property appraiser establishes a presumption of correctness, the special magistrate must determine whether the admitted evidence proves by a preponderance of the evidence that:

a) The property appraiser's just valuation does not represent just value; or
b) The property appraiser's just valuation is arbitrarily based on appraisal practices that are different from the appraisal practices generally applied by the property appraiser to comparable property within the same county.
Since neither of these conditions have been proven by a preponderance of evidence, the special magistrate finds that the petitioner has failed to overcome the presumption of correctness established by the property appraiser.

3. If the property appraiser establishes a presumption of correctness and that presumption of correctness is not overcome, the assessment stands. In view of the findings of fact and conclusions of law as they relate to this petition before the Value Adjustment Board, the special magistrate recommends the request to overturn the property appraiser's determination of the 2025 just value of the property be DENIED.

Findings Of Fact

Petitioner Jaden Randall with Delta Property Tax Advisors appeared telephonically on behalf of DBNCH CIRCLE, LLC on November 14, 2025 to provide testimonial and documentary evidence pertaining to the 2025 property assessment for real property located in Hernando County, Florida. The Hernando County Property Appraiser's Office was represented at the hearing by Deputy Appraiser Daniel Scott, Commercial Supervisor. An opening statement regarding the hearing process and rules of procedure was read and all parties were placed under oath. This petition is one of six presented by the petitioner on this hearing date. The specific case numbers are 25-408, 25-410, 25-411, 25-412, 25-413 and 25-414. Any relevant testimony presented during these individual hearings will be incorporated by reference to all hearings to avoid redundancy and expedite the hearing process.

The subject of this petition is listed on the Hernando County tax roll as Parcel ID R17-223-19-1780-0450-0010. This property is described as Circle-K Store, a retail store with fuel. The subject property is located at 3275 Broad Street, Brooksville, Hernando County, Florida. The property consists of 2,600 square feet of net leasable building area on a 1.29-acre commercial site. The improvements were constructed in 1985 and are described as average quality in poor condition. Based on an inspection of the property, the property appraiser has determined that the building improvements have an effective age of 40 years, considering construction quality and condition. It appears that the subject of this petition has not sold within the 12-month period preceding the January 1 valuation date.

The property appraiser has confirmed the 2025 just value at $1,405,758, with an assessed value of $976,636 and a taxable value of $976,636. There have been no changes to the values since the Notice of Proposed Property Taxes (TRIM) was issued. The petitioner is requesting a revision to the 2025 just value, proposing a revision in just value to $900,000. No hearing evidence has been submitted to the Clerk of Court in support of this request, rather the request is supported by a verbal discussion of cost and income analysis.

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence, see Florida Administrative Code 12D-9.025(1). Generally, relevant evidence is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. The evidence meets or exceeds a minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. Documentary evidence presented by the property appraiser during the hearing is described and labeled as follows:

- PAO-A (26 pages) - Cover page, table of contents, subject summary page, subject property record card with aerial map, building sketch and photograph, subject aerial photographs, sales comparison approach, comparable sales location map, photographs if the comparable sales, comparable sales adjustment grid, property record cards for each sale

Documentary evidence presented by the petitioner during the hearing is described and labeled as follows:

- PET-1 (4 pages) - Petition list of other locations being petitioned

The Florida Legislature has enacted eight criteria that the property appraiser must consider when determining just value. In any administrative or judicial action where a taxpayer challenges an ad valorem tax assessment, the property appraiser's estimate of just value is presumed correct if it is proven that the assessment was made in compliance with the eight criteria outlined in Section 193.011, Florida Statutes and in accordance with professionally accepted appraisal practices, including mass appraisal standards, if appropriate. The only standard of proof in this administrative review is a preponderance of the evidence, meaning the greater weight of evidence, or "more likely than not."

Florida courts have consistently held that the property appraiser is only required to consider the eight criteria, and that applying each factor is not mandatory. The courts have further found that if any one criterion does not reflect just value, it should be disregarded by the property appraiser. The special magistrate finds and summarizes the extent to which the property appraiser has considered each of these criteria in the following paragraphs.

(1) Present cash value of the property - The amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arms-length. This relates to the sales comparison approach and requires the property appraiser to consider the sale price exclusive of reasonable fees and costs of sale. In short, the price without transaction costs. The buyer typically pays more, and the seller typically receives less than the price indicated by the documentary stamps due to these transaction costs. In mass appraising, the property appraiser considers this criterion by applying or considering the comparable market sales using the Computer Aided Mass Appraisal System. In an assessment review hearing, the property appraiser supports just value through comparable sales analysis similar to that found in a fee appraisal. The property appraiser has presented sales evidence in support of the present cash value. Following are brief descriptions of the sales determined by the property appraiser to be most comparable to the subject and representative of value:

- PA Sale 1 - 15310 Cortez Blvd, Brooksville is described as a 2,940 square foot retail store with fuel. These improvements were constructed in 2000 and are represented as being in superior condition to the subject. The property appraiser has estimated the effective age to be 25 years. The improvements are situated on a 1.63-acre commercial site. This property sold in November 2024 for $3,365,000. Various price adjustments

have been made to account for differences in quality and design. This sale indicates a price of $1,030 per square foot for comparison with the subject.

• PA Sale 2 - 16135 Us Highway 301, Dade City is described as a 2,400 square foot retail store with fuel. These improvements were constructed in 1977 and are represented as being in similar condition to the subject. The improvements are situated on a 1.37-acre commercial site. This property sold in July 2023 for $3,750,000. Price adjustments have been made to account for differences in location. This sale indicates a price of $1,406 per square foot for comparison with the subject.

• PA Sale 3 - 4159 Mariner Blvd, Spring Hill is described as a 3,726 square foot retail store with fuel. These improvements were constructed in 1986 and are represented as being in superior condition to the subject. The property appraiser has estimated the effective age to be 20 years. The improvements are situated on a 0.68-acre commercial site. This property sold in August 2023 for $6,210,600. Various price adjustments have been made to account for differences in location, age, condition, building size and land area. This sale indicates a price of $1,417 per square foot for comparison with the subject.

In considering these sales, the property appraiser has compared them based on per square foot price. Three qualified sales judged to be most comparable to the subject have been presented in support of value. These sales range in price from $1,030 to $1,417 per square foot. The sales were selected based on similar location, age, size and utility. Relevant sale transactions occurred within the 18 months preceding the January 1, 2025 value date. After deducting 15% for costs of sales, this sales evidence supports a just value of $2,838,502 equivalent to $1,092 per square foot, within the indicated range. These sales are presented by the property appraiser as market evidence that the property is not over-assessed and $1,405,758 represents just value for the subject property. The petitioner has testified that comparable sales are not representative of just value because of the potential that the sale prices include equipment and business interest components although had no specific knowledge of such for these particular sales. The special magistrate finds that the just value is 50% of the value supported by the comparable sales which would more than account for any potential of non-real estate components that may be included in the sale. It is the opinion of the special magistrate that this sales analysis complies with Criterion 1, Chapter 193.011 of the Florida Statutes and generally accepted appraisal principles.

(2) Highest & Best Use – This relates to the consideration of the fundamental appraisal concept of highest and best use or best use to which the property can be expected to be put in the immediate future. For improved properties, the highest and best use of the property as if vacant should be considered as well. The four steps establishing highest and best use are consideration of what is physically possible, legally permissible, financially feasible, and maximally productive. The highest and best use as vacant is identified through land use codes which, in part, are based on zoning. The highest and best use as improved is assumed to be the current use unless evidence shows otherwise. The property appraiser's office considers highest and best use by identifying and recording land size, zoning, building size, location and other characteristics. Once all coding is in place, comparable sales and rentals that have similar characteristics are used to value the property. The highest and best use of this property is for retail use. This determination is undisputed by the petitioner and appears to have been appropriately considered by the property appraiser.

(3) Location of the property – The property appraiser assigns a neighborhood code to every property in the county. Sales of properties in the same or similar neighborhoods are typically used to determine locational adjustments. Often, site-specific location adjustments are made to reflect either an enhanced location (such as a water front site or in a golf course community) or an inferior location (such as adjacent to an industrial use or dumpsite). All of the comparable properties presented in support of value are located in the same overall market area as the subject and price adjustments have been made for significant differences in location. The location of the property appears to have been appropriately considered in the determination of just value.

(4) Quantity or size of the property – The property appraiser must consider the quantity or size of the property by determining and recording the correct land size, building size, and extra features sizes and quantities. Land size is based on legal descriptions from recorded plats or metes and bounds. Building sizes and extra features are determined by inspection and measured by deputy property appraisers. From the evidence presented there do not appear to be any notable discrepancies in size or quantity.

(5) The cost of the property and present replacement value of any improvements thereon - An analysis of cost is made in the Computer Aided Mass Appraisal System is found on the property record card. The property appraiser considers replacement cost through the use of Marshall & Swift Valuation Service data. These rates are adjusted annually to reflect the costs relevant to January 1 of the given tax year. Marshall & Swift Valuation Cost Service is also used to determine the replacement costs of extra features or site improvements. No separate analysis of cost has been presented during the hearing. Buyers in this sector of the real estate market do not typically consider the costs associated with development when valuing properties of this age and type. Cost calculations found on the property record card appear to be supportive of the value indicated by the more relevant valuation methods. It is the opinion of the magistrate that this cost analysis complies with Criterion 5, Chapter 193.011 of the Florida Statutes and generally accepted appraisal principles.

(6) Condition of the property – The property appraiser considers the condition of properties through periodic property inspections, no less than once every five years as required by Statute. Other events can trigger more frequent site inspections, including the sale of a property, issuance of a building permit, assessment appeal, or at the taxpayer's request. Condition is considered as a factor applied to the Computer Aided Mass Appraisal System value calculation for value losses from all sources based upon an age/life depreciation method. Photographs of the subject property have been presented as evidence of condition. Evidence of building permits for renovations and/or significant building repairs has been presented. An effective age of 40 years has been estimated by the property appraiser based on an analysis of chronological age, condition and

construction quality. It appears that the property appraiser has appropriately considered this factor.

(7) The income from the property - No analysis of income has been presented during the hearing due to a lack of market data pertaining to rental income, expenses and capitalization rates for this type of property. There is a relative lack of market data and buyers in this sector of the real estate market typically do not consider income generating ability when valuing this type of property. Although the subject of this petition is leased, no income or expense information was provided to the property appraiser for review. It is the opinion of the magistrate that this consideration of income complies with Criterion 7, Chapter 193.011 of the Florida statutes and generally accepted appraisal practices.

(8) Cost of Sale Adjustment - This criterion deals with the net proceeds from the sale of a property as received by the seller after deduction of all of the usual and reasonable fees and costs and expenses of financing and allowance for unconventional or atypical terms of financing arrangements. A few examples of the applicability of this criterion include: • unconventional or atypical financing arrangements, such as seller financing at favorable terms, which inflated the price, relative to what would have been achieved with a cash or case-equivalent arrangement, • the inclusion of tangible personal property, which may serve to increase the price above pure real property consideration, • atypically motivated buyers, who may pay a premium relative to that paid by the general market, • atypical closing costs arrangements, such as a seller paying the buyer's closing costs in exchange for a higher sales price. Because these situations may not be discoverable by the mass appraiser relying on raw gross price data, a deduction from the raw gross price is made with the goal being to arrive at 100% of the market value of the real property by eliminating any possible impact of non-real property consideration. This mass appraisal method is found to be acceptable by the Florida Department of Revenue and the Florida Courts. The special magistrate finds that applying a specific cost-of-sale adjustment consistent with the DR-493 form constitutes appropriate consideration of this criterion and complies with the requirements of Chapter 193.011, Florida Statutes.

It is implicit in mass appraisal that, even when properly specified and calibrated models are employed, some individual value conclusions may not meet standards of reasonableness, consistency, and accuracy. The purpose of this value review is to determine whether the just value reported on the current tax roll represents the just value of the property after consideration of the criteria set forth in Florida Statute §193.011 and generally accepted appraisal principles, including those applicable to mass appraisal. Based on the relevant, competent, and substantial evidence presented at the hearing, it appears that the property appraiser appropriately considered all eight factors set forth in Florida Statute §193.011, indicating that the just value is not overstated and is entitled to the presumption of correctness.

By filing this petition, the petitioner alleges that the property appraiser has assessed the property in excess of just value. According to 12D-9.025(3)(a) of the Florida Administrative Code, the petitioner is responsible for presenting relevant and credible evidence in support of his or her belief that the property appraiser's determination is incorrect. If the property appraiser establishes the presumption of correctness, it is the petitioner's burden to prove the assessment does not represent just value. Such evidence should be based on criteria similar to those established by the Legislature for the property appraiser to follow. To prevail in an assessment challenge, the taxpayer must prove more than a mere difference of opinion regarding an assessment. The following paragraphs describe how the petitioner has addressed each of the eight criteria of Section 193.011, as determined by the special magistrate.

(1) Present cash value of the property - No analysis of comparable sales has been presented by the petitioner in support of a change in just value. The petitioner contends that sales of these types of properties often include non-real estate components including equipment, personnel, inventory, and business enterprise value.

(2) Highest and Best Use - The petitioner does not dispute that the highest and best use of the subject property is retail.

(3) Location of the property - The petitioner appears familiar with the location characteristics of the subject property and has not claimed the presence of any atypical or adverse location factors that would materially affect its use or value.

(4) Quantity or size of the property - The petitioner does not dispute the size or quantity of the land or improvements reported by the property appraiser during the hearing, nor was any allegation made that these factors were miscalculated or improperly considered in the valuation.

(5) The cost of the property and present replacement value of any improvements thereon – The petitioner has prepared an analysis of cost using the Marshall & Swift cost manual. Per square foot direct development costs were applied to the size of the building components. Land value is based on the land value component found on the property record card with no market support for current land value. This analysis results in a value of $600,000 as reported by the petitioner. Soft costs have not been accounted for by the petitioner, thereby understating total costs. No entrepreneurial incentive was presented in the petitioner's analysis. The petitioner responded that profit is included in the direct cost estimates found in Marshall & Swift, however the included profit in Marshall & Swift is builder and subcontractor profit and not the incentive to entice an entrepreneur to put together a specific development project. The omission of entrepreneurial incentive also has the effect of understating the building cost, resulting in an understated property value. The special magistrate finds that this analysis is not sufficient to overcome the presumption of correctness established by the property appraiser.

(6) Condition - The petitioner has not presented any credible evidence or asserted that the condition of the property differs from the description provided by the property appraiser during the hearing. Furthermore, no claim was made regarding any significant physical deficiencies, other than age, that would affect the property's use or value.

(7) The income from the property - The petitioner has developed an income analysis in support of a revision to just value. Market rental rates

are supported in the petitioner's analysis by actual lease rate. The petitioner reconciled the subject's 2,600 square feet of leasable building space to a rental rate of $33 per square foot on a triple net basis. No stabilized vacancy was deducted. From an effective gross income of $85,969, an expense ratio of 10% was deducted but no market evidence is presented in support of the market expenses used by the petitioner. Support for the petitioner's selection of 6.5% base capitalization rate is based on reported rates used by other property appraisers in other tax hearings. The capitalized value indicated by this income analysis is $1,190,000. Although the petitioner has characterized the lease rate as a market rent, a review of the property record card in PAO-A indicates that this property—and the other three leased properties in this group of petitions—was purchased by DBNCH Circle, LLC (the landlord) from Circle K Stores, Inc. (the tenant) on March 17, 2004. This raises concerns regarding the arm's-length nature of the landlord-tenant relationship and whether a lease originating in 2004 provides a reliable indicator of current market rent for the property.

Furthermore, the Florida Real Property Appraisal Guidelines from the Florida Department of Revenue Property Tax Administration Program and the Appraisal Institute's The Appraisal of Real Estate defines market rent, which is distinct from contract rent, as the most likely rent that an income-producing property would command if offered for lease on the open market, as of the date of appraisal. Unless specified otherwise, fee simple estate is the interest in real property to be appraised for ad valorem tax purposes in the State of Florida. Market rent corresponds to the fee simple estate. Contract rent is the rent due under the terms of an existing lease agreement for real property, and contract rent corresponds to the leased fee estate. Contract rent at the subject property from the prior year bears little relevance to real property appraisal for ad valorem tax purposes in the State of Florida, unless independent support is available indicating that contract rent is equal to market rent Market rent may be less than, equal to, or greater than contract rent. An investor purchasing income producing real estate is essentially trading present dollars for the expectation of receiving future dollars. Leased fee value will reflect current leases and the associated expense structure, while fee simple value starts with an income projection based on market rent. Direct Capitalization typically uses one-year cash flow estimate, usually 12 months from the date of value. Although an appraiser may consider the actual income of the subject property at the time of the appraisal, valuation is based on a projection of future income. A property appraiser should consider the future outlook both in estimating income and expenses and in selecting the appropriate capitalization methodology to use. The consideration of future income is consistent with the principle of anticipation, which holds that value is the present worth of future benefits. Historical income and current income may be representative of market value, but the ultimate concern is the future. The special magistrate finds that the petitioner has presented insufficient evidence of market rent, market vacancy, and market expense ratios to overcome the property appraiser's evidence by a preponderance of evidence.

The petitioner did not provide a copy of the lease or any income and expense information to the property appraiser during the normal data-collection phase, then relied on that same information as the basis of valuation at the hearing. This approach is not appropriate because Florida case law, including *Higgs v. Good, 813 So. 2d 178 (Fla. 3d DCA 2002)*, establishes that a taxpayer may not withhold income-related data when requested or when reasonably necessary for the preparation of the tax roll and then later introduce that information only after the assessment has been issued. Allowing such selective disclosure would undermine the property appraiser's ability to develop an accurate and uniform assessment and would create an unfair advantage for the petitioner by enabling them to present data only when it is favorable to their position. When information that is critical to the valuation of an income-producing property is withheld until the hearing, the property appraiser has no opportunity to analyze or verify that data in advance, and the trier of fact cannot rely on it with the same level of confidence as information produced through the standard statutory process.

(8) Cost of Sale Adjustment - The petitioner has not included a cost of sale adjustment.

In a tax hearing, oral testimony that is not supported by documentary evidence is given lesser credibility because it cannot be independently verified by the property appraiser prior to the hearing. It does not provide the same level of reliability as written materials. Documentary evidence, such as leases, income statements, cost data, photographs, or closing documents, allows the hearing officer to corroborate the statements made by the petitioner and to evaluate the information using objective standards. Unsubstantiated oral testimony relies solely on the petitioner's recollection or interpretation, which may be incomplete, inconsistent, or influenced by the outcome they are seeking. For valuation matters, where factual accuracy is essential, the absence of supporting documentation limits the weight that can reasonably be assigned to the testimony presented. After careful consideration of all evidence presented at the hearing, the special magistrate finds that the property appraiser has established the presumption of correctness by appropriately considering all eight criteria set forth in Florida Statute §193.011 and generally accepted appraisal principles. It is the opinion of this special magistrate that insufficient evidence has been presented to overcome this presumption by a preponderance of the evidence.

Conclusions of Law

According to §194.301, Florida Statutes, in any administrative action in which a taxpayer challenges an ad valorem tax assessment of value, the property appraiser's assessment is presumed correct if the appraiser proves by a preponderance of the evidence that the assessment was arrived at by complying with §193.011, any other applicable statutory requirements relating to classified use values or assessment caps, and professionally accepted appraisal practices, including mass appraisal standards, if appropriate. However, a taxpayer who challenges an assessment is entitled to a determination by the value adjustment board or court of the appropriateness of the appraisal methodology used in making the assessment. The value of property must be determined by an appraisal methodology that complies with the criteria of §193.011 and professionally accepted appraisal practices.

The burden of proof is on the party initiating the challenge as specified in paragraph §194.301(2). If the challenge is to the assessed value of the property, the party initiating the challenge has the burden of proving by a preponderance of the evidence that the assessed value:

1. Does not represent the just value of the property after taking into account any applicable limits on annual increases in the value of the property;

2. Does not represent the classified use value or fractional value of the property if the property is required to be assessed based on its character or use; or

3. Is arbitrarily based on appraisal practices that are different from the appraisal practices generally applied by the property appraiser to comparable property within the same county.

If the party challenging the assessment satisfies these requirements, the presumption of correctness is overcome, and the value adjustment board shall establish the assessment if there is competent, substantial evidence of value in the record which cumulatively meets the criteria of §193.011 and professionally accepted appraisal practices. Otherwise, the assessment stands.

In consideration of this specific petition, Florida Administrative Code section 12D-9.027 lays out a sequence of general procedural steps that the special magistrate has followed in the preparation of this recommendation to the Value Adjustment Board:

1. Determine whether the property appraiser has established a presumption of correctness for the assessment and determine whether the property appraiser's just value methodology is appropriate. The presumption of correctness is not established unless the property appraiser proves by a preponderance of the evidence that the methodology used to support just value for the subject property complies with Florida Statute §193.011 and professionally accepted appraisal practices, including mass appraisal standards, if appropriate. Based upon the evidence presented on the record during this hearing, this special magistrate finds that the presumption of correctness has been established by the property appraiser.

2. In administrative reviews of just valuation, if the property appraiser establishes a presumption of correctness, the special magistrate must determine whether the admitted evidence proves by a preponderance of the evidence that:
a) The property appraiser's just valuation does not represent just value; or
b) The property appraiser's just valuation is arbitrarily based on appraisal practices that are different from the appraisal practices generally applied by the property appraiser to comparable property within the same county.
Since neither of these conditions have been proven by a preponderance of evidence, the special magistrate finds that the petitioner has failed to overcome the presumption of correctness established by the property appraiser.

3. If the property appraiser establishes a presumption of correctness and that presumption of correctness is not overcome, the assessment stands. In view of the findings of fact and conclusions of law as they relate to this petition before the Value Adjustment Board, the special magistrate recommends the request to overturn the property appraiser's determination of the 2025 just value of the property be DENIED.

Findings Of Fact

Petitioner Jaden Randall with Delta Property Tax Advisors appeared telephonically on behalf of DBNCH CIRCLE, LLC on November 14, 2025 to provide testimonial and documentary evidence pertaining to the 2025 property assessment for real property located in Hernando County, Florida. The Hernando County Property Appraiser's Office was represented at the hearing by Deputy Appraiser Daniel Scott, Commercial Supervisor. An opening statement regarding the hearing process and rules of procedure was read and all parties were placed under oath. This petition is one of six presented by the petitioner on this hearing date. The specific case numbers are 25-408, 25-410, 25-411, 25-412, 25-413 and 25-414. Any relevant testimony presented during these individual hearings will be incorporated by reference to all hearings to avoid redundancy and expedite the hearing process.

The subject of this petition is listed on the Hernando County tax roll as Parcel ID R28-222-18-3040-00B0-0261. This property is described as Circle-K Store, a retail store with fuel. The subject property is located at 13077 Cortez Boulevard, Brooksville, Hernando County, Florida. The property consists of 2,600 square feet of net leasable building area on a 0.86-acre commercial site. The improvements were constructed in 1984 and are described as average quality in poor condition. Based on an inspection of the property, the property appraiser has determined that the building improvements have an effective age of 41 years, considering construction quality and condition. It appears that the subject of this petition has not sold within the 12-month period preceding the January 1 valuation date.

The property appraiser has confirmed the 2025 just value at $1,429,860, with an assessed value of $1,238,764 and a taxable value of $1,238,764. There have been no changes to the values since the Notice of Proposed Property Taxes (TRIM) was issued. The petitioner is requesting a revision to the 2025 just value, proposing a revision in just value to $900,000. No hearing evidence has been submitted to the Clerk of Court in support of this request, rather the request is supported by a verbal discussion of cost and income analysis.

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence, see Florida Administrative Code 12D-9.025(1). Generally, relevant evidence is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. The evidence meets or exceeds a minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. Documentary evidence presented by the property appraiser during the hearing is described and labeled as follows:

- PAO-A (26 pages) - Cover page, table of contents, subject summary page, subject property record card with aerial map, building sketch and photograph, subject aerial photographs, sales comparison approach, comparable sales location map, photographs if the comparable sales, comparable sales adjustment grid, property record cards for each sale

Documentary evidence presented by the petitioner during the hearing is described and labeled as follows:

- PET-1 (4 pages) - Petition list of other locations being petitioned

The Florida Legislature has enacted eight criteria that the property appraiser must consider when determining just value. In any administrative or judicial action where a taxpayer challenges an ad valorem tax assessment, the property appraiser's estimate of just value is presumed correct if it is proven that the assessment was made in compliance with the eight criteria outlined in Section 193.011, Florida Statutes and in accordance with professionally accepted appraisal practices, including mass appraisal standards, if appropriate. The only standard of proof in this administrative review is a preponderance of the evidence, meaning the greater weight of evidence, or "more likely than not."

Florida courts have consistently held that the property appraiser is only required to consider the eight criteria, and that applying each factor is not mandatory. The courts have further found that if any one criterion does not reflect just value, it should be disregarded by the property appraiser. The special magistrate finds and summarizes the extent to which the property appraiser has considered each of these criteria in the following paragraphs.

(1) Present cash value of the property - The amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arms-length. This relates to the sales comparison approach and requires the property appraiser to consider the sale price exclusive of reasonable fees and costs of sale. In short, the price without transaction costs. The buyer typically pays more, and the seller typically receives less than the price indicated by the documentary stamps due to these transaction costs. In mass appraising, the property appraiser considers this criterion by applying or considering the comparable market sales using the Computer Aided Mass Appraisal System. In an assessment review hearing, the property appraiser supports just value through comparable sales analysis similar to that found in a fee appraisal. The property appraiser has presented sales evidence in support of the present cash value. Following are brief descriptions of the sales determined by the property appraiser to be most comparable to the subject and representative of value:

- PA Sale 1 - 15310 Cortez Blvd, Brooksville is described as a 2,940 square foot retail store with fuel. These improvements were constructed in 2000 and are represented as being in superior condition to the subject. The property appraiser has estimated the effective age to be 25 years. The improvements are situated on a 1.63-acre commercial site. This property sold in November 2024 for $3,365,000. Various price adjustments

have been made to account for differences in location, age, condition, quality, design and land area. This sale indicates a price of $1,030 per square foot for comparison with the subject.

• PA Sale 2 - 16135 Us Highway 301, Dade City is described as a 2,400 square foot retail store with fuel. These improvements were constructed in 1977 and are represented as being in similar condition to the subject. The improvements are situated on a 1.37-acre commercial site. This property sold in July 2023 for $3,750,000. Price adjustments have been made to account for differences in location and land area. This sale indicates a price of $1,406 per square foot for comparison with the subject.

• PA Sale 3 - 4159 Mariner Blvd, Spring Hill is described as a 3,726 square foot retail store with fuel. These improvements were constructed in 1986 and are represented as being in superior condition to the subject. The property appraiser has estimated the effective age to be 20 years. The improvements are situated on a 0.68-acre commercial site. This property sold in August 2023 for $6,210,600. Various price adjustments have been made to account for differences in location, age, condition, building size and land area. This sale indicates a price of $1,583 per square foot for comparison with the subject.

In considering these sales, the property appraiser has compared them based on per square foot price. Three qualified sales judged to be most comparable to the subject have been presented in support of value. These sales range in price from $1,030 to $1,417 per square foot. The sales were selected based on similar location, age, size and utility. Relevant sale transactions occurred within the 18 months preceding the January 1, 2025 value date. After deducting 15% for costs of sales, this sales evidence supports a just value of $2,961,290 equivalent to $1,139 per square foot, within the indicated range. These sales are presented by the property appraiser as market evidence that the property is not over-assessed and $1,429,860 represents just value for the subject property. The petitioner has testified that comparable sales are not representative of just value because of the potential that the sale prices include equipment and business interest components although had no specific knowledge of such for these particular sales. The special magistrate finds that the just value is 48% of the value supported by the comparable sales which would more than account for any potential of non-real estate components that may be included in the sale. It is the opinion of the special magistrate that this sales analysis complies with Criterion 1, Chapter 193.011 of the Florida Statutes and generally accepted appraisal principles.

(2) Highest & Best Use – This relates to the consideration of the fundamental appraisal concept of highest and best use or best use to which the property can be expected to be put in the immediate future. For improved properties, the highest and best use of the property as if vacant should be considered as well. The four steps establishing highest and best use are consideration of what is physically possible, legally permissible, financially feasible, and maximally productive. The highest and best use as vacant is identified through land use codes which, in part, are based on zoning. The highest and best use as improved is assumed to be the current use unless evidence shows otherwise. The property appraiser's office considers highest and best use by identifying and recording land size, zoning, building size, location and other characteristics. Once all coding is in place, comparable sales and rentals that have similar characteristics are used to value the property. The highest and best use of this property is for retail use. This determination is undisputed by the petitioner and appears to have been appropriately considered by the property appraiser.

(3) Location of the property – The property appraiser assigns a neighborhood code to every property in the county. Sales of properties in the same or similar neighborhoods are typically used to determine locational adjustments. Often, site-specific location adjustments are made to reflect either an enhanced location (such as a water front site or in a golf course community) or an inferior location (such as adjacent to an industrial use or dumpsite). All of the comparable properties presented in support of value are located in the same overall market area as the subject and price adjustments have been made for significant differences in location. The location of the property appears to have been appropriately considered in the determination of just value.

(4) Quantity or size of the property – The property appraiser must consider the quantity or size of the property by determining and recording the correct land size, building size, and extra features sizes and quantities. Land size is based on legal descriptions from recorded plats or metes and bounds. Building sizes and extra features are determined by inspection and measured by deputy property appraisers. From the evidence presented there do not appear to be any notable discrepancies in size or quantity.

(5) The cost of the property and present replacement value of any improvements thereon - An analysis of cost is made in the Computer Aided Mass Appraisal System is found on the property record card. The property appraiser considers replacement cost through the use of Marshall & Swift Valuation Service data. These rates are adjusted annually to reflect the costs relevant to January 1 of the given tax year. Marshall & Swift Valuation Cost Service is also used to determine the replacement costs of extra features or site improvements. No separate analysis of cost has been presented during the hearing. Buyers in this sector of the real estate market do not typically consider the costs associated with development when valuing properties of this age and type. Cost calculations found on the property record card appear to be supportive of the value indicated by the more relevant valuation methods. It is the opinion of the magistrate that this cost analysis complies with Criterion 5, Chapter 193.011 of the Florida Statutes and generally accepted appraisal principles.

(6) Condition of the property – The property appraiser considers the condition of properties through periodic property inspections, no less than once every five years as required by Statute. Other events can trigger more frequent site inspections, including the sale of a property, issuance of a building permit, assessment appeal, or at the taxpayer's request. Condition is considered as a factor applied to the Computer Aided Mass Appraisal System value calculation for value losses from all sources based upon an age/life depreciation method. Photographs of the subject property have been presented as evidence of condition. Evidence of building permits for renovations and/or significant building repairs has been presented. An effective age of 40 years has been estimated by the property appraiser based on an analysis of chronological age, condition and

construction quality. It appears that the property appraiser has appropriately considered this factor.

(7) The income from the property - No analysis of income has been presented during the hearing due to a lack of market data pertaining to rental income, expenses and capitalization rates for this type of property. There is a relative lack of market data and buyers in this sector of the real estate market typically do not consider income generating ability when valuing this type of property. Although the subject of this petition is leased, no income or expense information was provided to the property appraiser for review. It is the opinion of the magistrate that this consideration of income complies with Criterion 7, Chapter 193.011 of the Florida statutes and generally accepted appraisal practices.

(8) Cost of Sale Adjustment - This criterion deals with the net proceeds from the sale of a property as received by the seller after deduction of all of the usual and reasonable fees and costs and expenses of financing and allowance for unconventional or atypical terms of financing arrangements. A few examples of the applicability of this criterion include: • unconventional or atypical financing arrangements, such as seller financing at favorable terms, which inflated the price, relative to what would have been achieved with a cash or case-equivalent arrangement, • the inclusion of tangible personal property, which may serve to increase the price above pure real property consideration, • atypically motivated buyers, who may pay a premium relative to that paid by the general market, • atypical closing costs arrangements, such as a seller paying the buyer's closing costs in exchange for a higher sales price. Because these situations may not be discoverable by the mass appraiser relying on raw gross price data, a deduction from the raw gross price is made with the goal being to arrive at 100% of the market value of the real property by eliminating any possible impact of non-real property consideration. This mass appraisal method is found to be acceptable by the Florida Department of Revenue and the Florida Courts. The special magistrate finds that applying a specific cost-of-sale adjustment consistent with the DR-493 form constitutes appropriate consideration of this criterion and complies with the requirements of Chapter 193.011, Florida Statutes.

It is implicit in mass appraisal that, even when properly specified and calibrated models are employed, some individual value conclusions may not meet standards of reasonableness, consistency, and accuracy. The purpose of this value review is to determine whether the just value reported on the current tax roll represents the just value of the property after consideration of the criteria set forth in Florida Statute §193.011 and generally accepted appraisal principles, including those applicable to mass appraisal. Based on the relevant, competent, and substantial evidence presented at the hearing, it appears that the property appraiser appropriately considered all eight factors set forth in Florida Statute §193.011, indicating that the just value is not overstated and is entitled to the presumption of correctness.

By filing this petition, the petitioner alleges that the property appraiser has assessed the property in excess of just value. According to 12D-9.025(3)(a) of the Florida Administrative Code, the petitioner is responsible for presenting relevant and credible evidence in support of his or her belief that the property appraiser's determination is incorrect. If the property appraiser establishes the presumption of correctness, it is the petitioner's burden to prove the assessment does not represent just value. Such evidence should be based on criteria similar to those established by the Legislature for the property appraiser to follow. To prevail in an assessment challenge, the taxpayer must prove more than a mere difference of opinion regarding an assessment. The following paragraphs describe how the petitioner has addressed each of the eight criteria of Section 193.011, as determined by the special magistrate.

(1) Present cash value of the property - No analysis of comparable sales has been presented by the petitioner in support of a change in just value. The petitioner contends that sales of these types of properties often include non-real estate components including equipment, personnel, inventory, and business enterprise value.

(2) Highest and Best Use - The petitioner does not dispute that the highest and best use of the subject property is retail.

(3) Location of the property - The petitioner appears familiar with the location characteristics of the subject property and has not claimed the presence of any atypical or adverse location factors that would materially affect its use or value.

(4) Quantity or size of the property - The petitioner does not dispute the size or quantity of the land or improvements reported by the property appraiser during the hearing, nor was any allegation made that these factors were miscalculated or improperly considered in the valuation.

(5) The cost of the property and present replacement value of any improvements thereon – The petitioner has prepared an analysis of cost using the Marshall & Swift cost manual. Per square foot direct development costs were applied to the size of the building components. Land value is based on the land value component found on the property record card with no market support for current land value. This analysis results in a value of $700,000 as reported by the petitioner. Soft costs have not been accounted for by the petitioner, thereby understating total costs. No entrepreneurial incentive was presented in the petitioner's analysis. The petitioner responded that profit is included in the direct cost estimates found in Marshall & Swift, however the included profit in Marshall & Swift is builder and subcontractor profit and not the incentive to entice an entrepreneur to put together a specific development project. The omission of entrepreneurial incentive also has the effect of understating the building cost, resulting in an understated property value. The special magistrate finds that this analysis is not sufficient to overcome the presumption of correctness established by the property appraiser.

(6) Condition - The petitioner has not presented any credible evidence or asserted that the condition of the property differs from the description provided by the property appraiser during the hearing. Furthermore, no claim was made regarding any significant physical deficiencies, other than age, that would affect the property's use or value.

(7) The income from the property - The petitioner has developed an income analysis in support of a revision to just value. Market rental rates

are supported in the petitioner's analysis by actual lease rate. The petitioner reconciled the subject's 2,600 square feet of leasable building space to a rental rate of $32 per square foot on a triple net basis. No stabilized vacancy was deducted. From an effective gross income of $83,240, an expense ratio of 10% was deducted but no market evidence is presented in support of the market expenses used by the petitioner. Support for the petitioner's selection of 6.5% base capitalization rate is based on reported rates used by other property appraisers in other tax hearings. The capitalized value indicated by this income analysis is $1,152,000. Although the petitioner has characterized the lease rate as a market rent, a review of the property record card in PAO-A indicates that this property—and the other three leased properties in this group of petitions—was purchased by DBNCH Circle, LLC (the landlord) from Circle K Stores, Inc. (the tenant) on March 17, 2004. This raises concerns regarding the arm's-length nature of the landlord-tenant relationship and whether a lease originating in 2004 provides a reliable indicator of current market rent for the property.

Furthermore, the Florida Real Property Appraisal Guidelines from the Florida Department of Revenue Property Tax Administration Program and the Appraisal Institute's The Appraisal of Real Estate defines market rent, which is distinct from contract rent, as the most likely rent that an income-producing property would command if offered for lease on the open market, as of the date of appraisal. Unless specified otherwise, fee simple estate is the interest in real property to be appraised for ad valorem tax purposes in the State of Florida. Market rent corresponds to the fee simple estate. Contract rent is the rent due under the terms of an existing lease agreement for real property, and contract rent corresponds to the leased fee estate. Contract rent at the subject property from the prior year bears little relevance to real property appraisal for ad valorem tax purposes in the State of Florida, unless independent support is available indicating that contract rent is equal to market rent Market rent may be less than, equal to, or greater than contract rent. An investor purchasing income producing real estate is essentially trading present dollars for the expectation of receiving future dollars. Leased fee value will reflect current leases and the associated expense structure, while fee simple value starts with an income projection based on market rent. Direct Capitalization typically uses one-year cash flow estimate, usually 12 months from the date of value. Although an appraiser may consider the actual income of the subject property at the time of the appraisal, valuation is based on a projection of future income. A property appraiser should consider the future outlook both in estimating income and expenses and in selecting the appropriate capitalization methodology to use. The consideration of future income is consistent with the principle of anticipation, which holds that value is the present worth of future benefits. Historical income and current income may be representative of market value, but the ultimate concern is the future. The special magistrate finds that the petitioner has presented insufficient evidence of market rent, market vacancy, and market expense ratios to overcome the property appraiser's evidence by a preponderance of evidence.

The petitioner did not provide a copy of the lease or any income and expense information to the property appraiser during the normal data-collection phase, then relied on that same information as the basis of valuation at the hearing. This approach is not appropriate because Florida case law, including *Higgs v. Good, 813 So. 2d 178 (Fla. 3d DCA 2002)*, establishes that a taxpayer may not withhold income-related data when requested or when reasonably necessary for the preparation of the tax roll and then later introduce that information only after the assessment has been issued. Allowing such selective disclosure would undermine the property appraiser's ability to develop an accurate and uniform assessment and would create an unfair advantage for the petitioner by enabling them to present data only when it is favorable to their position. When information that is critical to the valuation of an income-producing property is withheld until the hearing, the property appraiser has no opportunity to analyze or verify that data in advance, and the trier of fact cannot rely on it with the same level of confidence as information produced through the standard statutory process.

(8) Cost of Sale Adjustment - The petitioner has not included a cost of sale adjustment.

In a tax hearing, oral testimony that is not supported by documentary evidence is given lesser credibility because it cannot be independently verified by the property appraiser prior to the hearing. It does not provide the same level of reliability as written materials. Documentary evidence, such as leases, income statements, cost data, photographs, or closing documents, allows the hearing officer to corroborate the statements made by the petitioner and to evaluate the information using objective standards. Unsubstantiated oral testimony relies solely on the petitioner's recollection or interpretation, which may be incomplete, inconsistent, or influenced by the outcome they are seeking. For valuation matters, where factual accuracy is essential, the absence of supporting documentation limits the weight that can reasonably be assigned to the testimony presented. After careful consideration of all evidence presented at the hearing, the special magistrate finds that the property appraiser has established the presumption of correctness by appropriately considering all eight criteria set forth in Florida Statute §193.011 and generally accepted appraisal principles. It is the opinion of this special magistrate that insufficient evidence has been presented to overcome this presumption by a preponderance of the evidence.

Conclusions of Law

According to §194.301, Florida Statutes, in any administrative action in which a taxpayer challenges an ad valorem tax assessment of value, the property appraiser's assessment is presumed correct if the appraiser proves by a preponderance of the evidence that the assessment was arrived at by complying with §193.011, any other applicable statutory requirements relating to classified use values or assessment caps, and professionally accepted appraisal practices, including mass appraisal standards, if appropriate. However, a taxpayer who challenges an assessment is entitled to a determination by the value adjustment board or court of the appropriateness of the appraisal methodology used in making the assessment. The value of property must be determined by an appraisal methodology that complies with the criteria of §193.011 and professionally accepted appraisal practices.

The burden of proof is on the party initiating the challenge as specified in paragraph §194.301(2). If the challenge is to the assessed value of the property, the party initiating the challenge has the burden of proving by a preponderance of the evidence that the assessed value:

1. Does not represent the just value of the property after taking into account any applicable limits on annual increases in the value of the property;

2. Does not represent the classified use value or fractional value of the property if the property is required to be assessed based on its character or use; or

3. Is arbitrarily based on appraisal practices that are different from the appraisal practices generally applied by the property appraiser to comparable property within the same county.

If the party challenging the assessment satisfies these requirements, the presumption of correctness is overcome, and the value adjustment board shall establish the assessment if there is competent, substantial evidence of value in the record which cumulatively meets the criteria of §193.011 and professionally accepted appraisal practices. Otherwise, the assessment stands.

In consideration of this specific petition, Florida Administrative Code section 12D-9.027 lays out a sequence of general procedural steps that the special magistrate has followed in the preparation of this recommendation to the Value Adjustment Board:

1. Determine whether the property appraiser has established a presumption of correctness for the assessment and determine whether the property appraiser's just value methodology is appropriate. The presumption of correctness is not established unless the property appraiser proves by a preponderance of the evidence that the methodology used to support just value for the subject property complies with Florida Statute §193.011 and professionally accepted appraisal practices, including mass appraisal standards, if appropriate. Based upon the evidence presented on the record during this hearing, this special magistrate finds that the presumption of correctness has been established by the property appraiser.

2. In administrative reviews of just valuation, if the property appraiser establishes a presumption of correctness, the special magistrate must determine whether the admitted evidence proves by a preponderance of the evidence that:
a) The property appraiser's just valuation does not represent just value; or
b) The property appraiser's just valuation is arbitrarily based on appraisal practices that are different from the appraisal practices generally applied by the property appraiser to comparable property within the same county.
Since neither of these conditions have been proven by a preponderance of evidence, the special magistrate finds that the petitioner has failed to overcome the presumption of correctness established by the property appraiser.

3. If the property appraiser establishes a presumption of correctness and that presumption of correctness is not overcome, the assessment stands. In view of the findings of fact and conclusions of law as they relate to this petition before the Value Adjustment Board, the special magistrate recommends the request to overturn the property appraiser's determination of the 2025 just value of the property be DENIED.

DECISION OF THE VALUE ADJUSTMENT BOARD
VALUE PETITION

Hernando County

DR-485V
R. 11/23
Rule 12D-16.002 F.A.C.
Eff.11/23

Findings Of Fact

Petitioner Jaden Randall with Delta Property Tax Advisors appeared telephonically on behalf of DBNCH CIRCLE, LLC on November 14, 2025 to provide testimonial and documentary evidence pertaining to the 2025 property assessment for real property located in Hernando County, Florida. The Hernando County Property Appraiser's Office was represented at the hearing by Deputy Appraiser Daniel Scott, Commercial Supervisor. An opening statement regarding the hearing process and rules of procedure was read and all parties were placed under oath. This petition is one of six presented by the petitioner on this hearing date. The specific case numbers are 25-408, 25-410, 25-411, 25-412, 25-413 and 25-414. Any relevant testimony presented during these individual hearings will be incorporated by reference to all hearings to avoid redundancy and expedite the hearing process.

The subject of this petition is listed on the Hernando County tax roll as Parcel ID R2-323-17-5090-00B0-0000. This property is described as Circle-K Store, a retail store with fuel. The subject property is located at 11091 Spring Hill Drive, Spring Hill, Hernando County, Florida. The property consists of 2,600 square feet of net leasable building area on a 0.91-acre commercial site. The improvements were constructed in 1984 and are described as average quality in poor condition. Based on an inspection of the property, the property appraiser has determined that the building improvements have an effective age of 41 years, considering construction quality and condition. It appears that the subject of this petition has not sold within the 12-month period preceding the January 1 valuation date.

The property appraiser has confirmed the 2025 just value at $1,474,889, with an assessed value of $826,427 and a taxable value of $826,427. There have been no changes to the values since the Notice of Proposed Property Taxes (TRIM) was issued. The petitioner is requesting a revision to the 2025 just value, proposing a revision in just value to $800,000. No hearing evidence has been submitted to the Clerk of Court in support of this request, rather the request is supported by a verbal discussion of cost and income analysis.

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence, see Florida Administrative Code 12D-9.025(1). Generally, relevant evidence is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. The evidence meets or exceeds a minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. Documentary evidence presented by the property appraiser during the hearing is described and labeled as follows:

- PAO-A (26 pages) - Cover page, table of contents, subject summary page, subject property record card with aerial map, building sketch and photograph, subject aerial photographs, sales comparison approach, comparable sales location map, photographs if the comparable sales, comparable sales adjustment grid, property record cards for each sale

Documentary evidence presented by the petitioner during the hearing is described and labeled as follows:

- PET-1 (4 pages) - Petition list of other locations being petitioned

The Florida Legislature has enacted eight criteria that the property appraiser must consider when determining just value. In any administrative or judicial action where a taxpayer challenges an ad valorem tax assessment, the property appraiser's estimate of just value is presumed correct if it is proven that the assessment was made in compliance with the eight criteria outlined in Section 193.011, Florida Statutes and in accordance with professionally accepted appraisal practices, including mass appraisal standards, if appropriate. The only standard of proof in this administrative review is a preponderance of the evidence, meaning the greater weight of evidence, or "more likely than not."

Florida courts have consistently held that the property appraiser is only required to consider the eight criteria, and that applying each factor is not mandatory. The courts have further found that if any one criterion does not reflect just value, it should be disregarded by the property appraiser. The special magistrate finds and summarizes the extent to which the property appraiser has considered each of these criteria in the following paragraphs.

(1) Present cash value of the property - The amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arms-length. This relates to the sales comparison approach and requires the property appraiser to consider the sale price exclusive of reasonable fees and costs of sale. In short, the price without transaction costs. The buyer typically pays more, and the seller typically receives less than the price indicated by the documentary stamps due to these transaction costs. In mass appraising, the property appraiser considers this criterion by applying or considering the comparable market sales using the Computer Aided Mass Appraisal System. In an assessment review hearing, the property appraiser supports just value through comparable sales analysis similar to that found in a fee appraisal. The property appraiser has presented sales evidence in support of the present cash value. Following are brief descriptions of the sales determined by the property appraiser to be most comparable to the subject and representative of value:

- PA Sale 1 - 15310 Cortez Blvd, Brooksville is described as a 2,940 square foot retail store with fuel. These improvements were constructed in 2000 and are represented as being in similar condition to the subject. The property appraiser has estimated the effective age to be 25 years. The improvements are situated on a 1.63-acre commercial site. This property sold in November 2024 for $3,365,000. Various price adjustments have

been made to account for differences in location, quality, design and land area. This sale indicates a price of $1,087 per square foot for comparison with the subject.

• PA Sale 2 - 16135 Us Highway 301, Dade City is described as a 2,400 square foot retail store with fuel. These improvements were constructed in 1977 and are represented as being in inferior condition to the subject. The improvements are situated on a 1.37-acre commercial site. This property sold in July 2023 for $3,750,000. Price adjustments have been made to account for differences in location, age, condition, and land area. This sale indicates a price of $1,484 per square foot for comparison with the subject.

• PA Sale 3 - 4159 Mariner Blvd, Spring Hill is described as a 3,726 square foot retail store with fuel. These improvements were constructed in 1986 and are represented as being in similar condition to the subject. The property appraiser has estimated the effective age to be 20 years. The improvements are situated on a 0.68-acre commercial site. This property sold in August 2023 for $6,210,600. Various price adjustments have been made to account for differences in location, building size and land area. This sale indicates a price of $1,667 per square foot for comparison with the subject.

In considering these sales, the property appraiser has compared them based on per square foot price. Three qualified sales judged to be most comparable to the subject have been presented in support of value. These sales range in price from $1,087 to $1,667 per square foot. The sales were selected based on similar location, age, size and utility. Relevant sale transactions occurred within the 18 months preceding the January 1, 2025 value date. After deducting 15% for costs of sales, this sales evidence supports a just value of $3,122,376 equivalent to $1,201 per square foot, within the indicated range. These sales are presented by the property appraiser as market evidence that the property is not over-assessed and $1,474,889 represents just value for the subject property. The petitioner has testified that comparable sales are not representative of just value because of the potential that the sale prices include equipment and business interest components although had no specific knowledge of such for these particular sales. The special magistrate finds that the just value is 47% of the value supported by the comparable sales which would more than account for any potential of non-real estate components that may be included in the sale. The petitioner also contends that the adjustments to the sale prices are inconsistent between the sales and between the subject properties. The property appraiser responded that the various differences were considered and adjustments representing the relative degree of difference was assigned to each where necessary. It is the opinion of the special magistrate that this sales analysis complies with Criterion 1, Chapter 193.011 of the Florida Statutes and generally accepted appraisal principles.

(2) Highest & Best Use – This relates to the consideration of the fundamental appraisal concept of highest and best use or best use to which the property can be expected to be put in the immediate future. For improved properties, the highest and best use of the property as if vacant should be considered as well. The four steps establishing highest and best use are consideration of what is physically possible, legally permissible, financially feasible, and maximally productive. The highest and best use as vacant is identified through land use codes which, in part, are based on zoning. The highest and best use as improved is assumed to be the current use unless evidence shows otherwise. The property appraiser's office considers highest and best use by identifying and recording land size, zoning, building size, location and other characteristics. Once all coding is in place, comparable sales and rentals that have similar characteristics are used to value the property. The highest and best use of this property is for retail use. This determination is undisputed by the petitioner and appears to have been appropriately considered by the property appraiser.

(3) Location of the property – The property appraiser assigns a neighborhood code to every property in the county. Sales of properties in the same or similar neighborhoods are typically used to determine locational adjustments. Often, site-specific location adjustments are made to reflect either an enhanced location (such as a water front site or in a golf course community) or an inferior location (such as adjacent to an industrial use or dumpsite). All of the comparable properties presented in support of value are located in the same overall market area as the subject and price adjustments have been made for significant differences in location. The location of the property appears to have been appropriately considered in the determination of just value.

(4) Quantity or size of the property – The property appraiser must consider the quantity or size of the property by determining and recording the correct land size, building size, and extra features sizes and quantities. Land size is based on legal descriptions from recorded plats or metes and bounds. Building sizes and extra features are determined by inspection and measured by deputy property appraisers. From the evidence presented there do not appear to be any notable discrepancies in size or quantity.

(5) The cost of the property and present replacement value of any improvements thereon - An analysis of cost is made in the Computer Aided Mass Appraisal System is found on the property record card. The property appraiser considers replacement cost through the use of Marshall & Swift Valuation Service data. These rates are adjusted annually to reflect the costs relevant to January 1 of the given tax year. Marshall & Swift Valuation Cost Service is also used to determine the replacement costs of extra features or site improvements. No separate analysis of cost has been presented during the hearing. Buyers in this sector of the real estate market do not typically consider the costs associated with development when valuing properties of this age and type. Cost calculations found on the property record card appear to be supportive of the value indicated by the more relevant valuation methods. It is the opinion of the magistrate that this cost analysis complies with Criterion 5, Chapter 193.011 of the Florida Statutes and generally accepted appraisal principles.

(6) Condition of the property – The property appraiser considers the condition of properties through periodic property inspections, no less than once every five years as required by Statute. Other events can trigger more frequent site inspections, including the sale of a property, issuance of a building permit, assessment appeal, or at the taxpayer's request. Condition is considered as a factor applied to the Computer Aided Mass

Appraisal System value calculation for value losses from all sources based upon an age/life depreciation method. Photographs of the subject property have been presented as evidence of condition. Evidence of building permits for renovations and/or significant building repairs has been presented. An effective age of 40 years has been estimated by the property appraiser based on an analysis of chronological age, condition and construction quality. It appears that the property appraiser has appropriately considered this factor.

(7) The income from the property - No analysis of income has been presented during the hearing due to a lack of market data pertaining to rental income, expenses and capitalization rates for this type of property. There is a relative lack of market data and buyers in this sector of the real estate market typically do not consider income generating ability when valuing this type of property. Although the subject of this petition is leased, no income or expense information was provided to the property appraiser for review. It is the opinion of the magistrate that this consideration of income complies with Criterion 7, Chapter 193.011 of the Florida statutes and generally accepted appraisal practices.

(8) Cost of Sale Adjustment - This criterion deals with the net proceeds from the sale of a property as received by the seller after deduction of all of the usual and reasonable fees and costs and expenses of financing and allowance for unconventional or atypical terms of financing arrangements. A few examples of the applicability of this criterion include: • unconventional or atypical financing arrangements, such as seller financing at favorable terms, which inflated the price, relative to what would have been achieved with a cash or case-equivalent arrangement, • the inclusion of tangible personal property, which may serve to increase the price above pure real property consideration, • atypically motivated buyers, who may pay a premium relative to that paid by the general market, • atypical closing costs arrangements, such as a seller paying the buyer's closing costs in exchange for a higher sales price. Because these situations may not be discoverable by the mass appraiser relying on raw gross price data, a deduction from the raw gross price is made with the goal being to arrive at 100% of the market value of the real property by eliminating any possible impact of non-real property consideration. This mass appraisal method is found to be acceptable by the Florida Department of Revenue and the Florida Courts. The special magistrate finds that applying a specific cost-of-sale adjustment consistent with the DR-493 form constitutes appropriate consideration of this criterion and complies with the requirements of Chapter 193.011, Florida Statutes.

It is implicit in mass appraisal that, even when properly specified and calibrated models are employed, some individual value conclusions may not meet standards of reasonableness, consistency, and accuracy. The purpose of this value review is to determine whether the just value reported on the current tax roll represents the just value of the property after consideration of the criteria set forth in Florida Statute §193.011 and generally accepted appraisal principles, including those applicable to mass appraisal. Based on the relevant, competent, and substantial evidence presented at the hearing, it appears that the property appraiser appropriately considered all eight factors set forth in Florida Statute §193.011, indicating that the just value is not overstated and is entitled to the presumption of correctness.

By filing this petition, the petitioner alleges that the property appraiser has assessed the property in excess of just value. According to 12D-9.025(3)(a) of the Florida Administrative Code, the petitioner is responsible for presenting relevant and credible evidence in support of his or her belief that the property appraiser's determination is incorrect. If the property appraiser establishes the presumption of correctness, it is the petitioner's burden to prove the assessment does not represent just value. Such evidence should be based on criteria similar to those established by the Legislature for the property appraiser to follow. To prevail in an assessment challenge, the taxpayer must prove more than a mere difference of opinion regarding an assessment. The following paragraphs describe how the petitioner has addressed each of the eight criteria of Section 193.011, as determined by the special magistrate.

(1) Present cash value of the property - No analysis of comparable sales has been presented by the petitioner in support of a change in just value. The petitioner contends that sales of these types of properties often include non-real estate components including equipment, personnel, inventory, and business enterprise value.

(2) Highest and Best Use - The petitioner does not dispute that the highest and best use of the subject property is retail.

(3) Location of the property - The petitioner appears familiar with the location characteristics of the subject property and has not claimed the presence of any atypical or adverse location factors that would materially affect its use or value.

(4) Quantity or size of the property - The petitioner does not dispute the size or quantity of the land or improvements reported by the property appraiser during the hearing, nor was any allegation made that these factors were miscalculated or improperly considered in the valuation.

(5) The cost of the property and present replacement value of any improvements thereon – The petitioner has prepared an analysis of cost using the Marshall & Swift cost manual. Per square foot direct development costs were applied to the size of the building components. Land value is based on the land value component found on the property record card with no market support for current land value. This analysis results in a value of $500,000 as reported by the petitioner. Soft costs have not been accounted for by the petitioner, thereby understating total costs. No entrepreneurial incentive was presented in the petitioner's analysis. The petitioner responded that profit is included in the direct cost estimates found in Marshall & Swift, however the included profit in Marshall & Swift is builder and subcontractor profit and not the incentive to entice an entrepreneur to put together a specific development project. The omission of entrepreneurial incentive also has the effect of understating the building cost, resulting in an understated property value. The special magistrate finds that this analysis is not sufficient to overcome the presumption of correctness established by the property appraiser.

(6) Condition - The petitioner has not presented any credible evidence or asserted that the condition of the property differs from the description provided by the property appraiser during the hearing. Furthermore, no claim was made regarding any significant physical deficiencies, other

than age, that would affect the property's use or value.

(7) The income from the property - The petitioner has developed an income analysis in support of a revision to just value. Market rental rates are supported in the petitioner's analysis by actual lease rate. The petitioner reconciled the subject's 2,600 square feet of leasable building space to a rental rate of $31 per square foot on a triple net basis. No stabilized vacancy was deducted. From an effective gross income of $80,551, an expense ratio of 10% was deducted but no market evidence is presented in support of the market expenses used by the petitioner. Support for the petitioner's selection of 6.5% base capitalization rate is based on reported rates used by other property appraisers in other tax hearings. The capitalized value indicated by this income analysis is $1,115,000. Although the petitioner has characterized the lease rate as a market rent, a review of the property record card in PAO-A indicates that this property—and the other three leased properties in this group of petitions—was purchased by DBNCH Circle, LLC (the landlord) from Circle K Stores, Inc. (the tenant) on March 17, 2004. This raises concerns regarding the arm's-length nature of the landlord-tenant relationship and whether a lease originating in 2004 provides a reliable indicator of current market rent for the property.

Furthermore, the Florida Real Property Appraisal Guidelines from the Florida Department of Revenue Property Tax Administration Program and the Appraisal Institute's The Appraisal of Real Estate defines market rent, which is distinct from contract rent, as the most likely rent that an income-producing property would command if offered for lease on the open market, as of the date of appraisal. Unless specified otherwise, fee simple estate is the interest in real property to be appraised for ad valorem tax purposes in the State of Florida. Market rent corresponds to the fee simple estate. Contract rent is the rent due under the terms of an existing lease agreement for real property, and contract rent corresponds to the leased fee estate. Contract rent at the subject property from the prior year bears little relevance to real property appraisal for ad valorem tax purposes in the State of Florida, unless independent support is available indicating that contract rent is equal to market rent Market rent may be less than, equal to, or greater than contract rent. An investor purchasing income producing real estate is essentially trading present dollars for the expectation of receiving future dollars. Leased fee value will reflect current leases and the associated expense structure, while fee simple value starts with an income projection based on market rent. Direct Capitalization typically uses one-year cash flow estimate, usually 12 months from the date of value. Although an appraiser may consider the actual income of the subject property at the time of the appraisal, valuation is based on a projection of future income. A property appraiser should consider the future outlook both in estimating income and expenses and in selecting the appropriate capitalization methodology to use. The consideration of future income is consistent with the principle of anticipation, which holds that value is the present worth of future benefits. Historical income and current income may be representative of market value, but the ultimate concern is the future. The special magistrate finds that the petitioner has presented insufficient evidence of market rent, market vacancy, and market expense ratios to overcome the property appraiser's evidence by a preponderance of evidence.

The petitioner did not provide a copy of the lease or any income and expense information to the property appraiser during the normal data-collection phase, then relied on that same information as the basis of valuation at the hearing. This approach is not appropriate because Florida case law, including *Higgs v. Good, 813 So. 2d 178 (Fla. 3d DCA 2002)*, establishes that a taxpayer may not withhold income-related data when requested or when reasonably necessary for the preparation of the tax roll and then later introduce that information only after the assessment has been issued. Allowing such selective disclosure would undermine the property appraiser's ability to develop an accurate and uniform assessment and would create an unfair advantage for the petitioner by enabling them to present data only when it is favorable to their position. When information that is critical to the valuation of an income-producing property is withheld until the hearing, the property appraiser has no opportunity to analyze or verify that data in advance, and the trier of fact cannot rely on it with the same level of confidence as information produced through the standard statutory process.

(8) Cost of Sale Adjustment - The petitioner has not included a cost of sale adjustment.

In a tax hearing, oral testimony that is not supported by documentary evidence is given lesser credibility because it cannot be independently verified by the property appraiser prior to the hearing. It does not provide the same level of reliability as written materials. Documentary evidence, such as leases, income statements, cost data, photographs, or closing documents, allows the hearing officer to corroborate the statements made by the petitioner and to evaluate the information using objective standards. Unsubstantiated oral testimony relies solely on the petitioner's recollection or interpretation, which may be incomplete, inconsistent, or influenced by the outcome they are seeking. For valuation matters, where factual accuracy is essential, the absence of supporting documentation limits the weight that can reasonably be assigned to the testimony presented. After careful consideration of all evidence presented at the hearing, the special magistrate finds that the property appraiser has established the presumption of correctness by appropriately considering all eight criteria set forth in Florida Statute §193.011 and generally accepted appraisal principles. It is the opinion of this special magistrate that insufficient evidence has been presented to overcome this presumption by a preponderance of the evidence.

Conclusions of Law

According to §194.301, Florida Statutes, in any administrative action in which a taxpayer challenges an ad valorem tax assessment of value, the property appraiser's assessment is presumed correct if the appraiser proves by a preponderance of the evidence that the assessment was arrived at by complying with §193.011, any other applicable statutory requirements relating to classified use values or assessment caps, and professionally accepted appraisal practices, including mass appraisal standards, if appropriate. However, a taxpayer who challenges an assessment is entitled to a determination by the value adjustment board or court of the appropriateness of the appraisal methodology used in making the assessment. The value of property must be determined by an appraisal methodology that complies with the criteria of §193.011 and professionally accepted appraisal practices.

The burden of proof is on the party initiating the challenge as specified in paragraph §194.301(2). If the challenge is to the assessed value of the property, the party initiating the challenge has the burden of proving by a preponderance of the evidence that the assessed value:

1. Does not represent the just value of the property after taking into account any applicable limits on annual increases in the value of the property;
2. Does not represent the classified use value or fractional value of the property if the property is required to be assessed based on its character or use; or
3. Is arbitrarily based on appraisal practices that are different from the appraisal practices generally applied by the property appraiser to comparable property within the same county.

If the party challenging the assessment satisfies these requirements, the presumption of correctness is overcome, and the value adjustment board shall establish the assessment if there is competent, substantial evidence of value in the record which cumulatively meets the criteria of §193.011 and professionally accepted appraisal practices. Otherwise, the assessment stands.

In consideration of this specific petition, Florida Administrative Code section 12D-9.027 lays out a sequence of general procedural steps that the special magistrate has followed in the preparation of this recommendation to the Value Adjustment Board:

1. Determine whether the property appraiser has established a presumption of correctness for the assessment and determine whether the property appraiser's just value methodology is appropriate. The presumption of correctness is not established unless the property appraiser proves by a preponderance of the evidence that the methodology used to support just value for the subject property complies with Florida Statute §193.011 and professionally accepted appraisal practices, including mass appraisal standards, if appropriate. Based upon the evidence presented on the record during this hearing, this special magistrate finds that the presumption of correctness has been established by the property appraiser.

2. In administrative reviews of just valuation, if the property appraiser establishes a presumption of correctness, the special magistrate must determine whether the admitted evidence proves by a preponderance of the evidence that:
a) The property appraiser's just valuation does not represent just value; or
b) The property appraiser's just valuation is arbitrarily based on appraisal practices that are different from the appraisal practices generally applied by the property appraiser to comparable property within the same county.
Since neither of these conditions have been proven by a preponderance of evidence, the special magistrate finds that the petitioner has failed to overcome the presumption of correctness established by the property appraiser.

3. If the property appraiser establishes a presumption of correctness and that presumption of correctness is not overcome, the assessment stands. In view of the findings of fact and conclusions of law as they relate to this petition before the Value Adjustment Board, the special magistrate recommends the request to overturn the property appraiser's determination of the 2025 just value of the property be DENIED.

Findings Of Fact

Petitioner Jaden Randall with Delta Property Tax Advisors appeared telephonically on behalf of DBNCH CIRCLE, LLC on November 14, 2025 to provide testimonial and documentary evidence pertaining to the 2025 property assessment for real property located in Hernando County, Florida. The Hernando County Property Appraiser's Office was represented at the hearing by Deputy Appraiser Daniel Scott, Commercial Supervisor. An opening statement regarding the hearing process and rules of procedure was read and all parties were placed under oath. This petition is one of six presented by the petitioner on this hearing date. The specific case numbers are 25-408, 25-410, 25-411, 25-412, 25-413 and 25-414. Any relevant testimony presented during these individual hearings will be incorporated by reference to all hearings to avoid redundancy and expedite the hearing process.

The subject of this petition is listed on the Hernando County tax roll as Parcel ID R32-323-17-5220-1519-0010. This property is described as Circle-K Store, a retail store with fuel. The subject property is located at 6227 Deltona Boulevard, Spring Hill, Hernando County, Florida. The property consists of 2,640 square feet of net leasable building area on a 0.81-acre commercial site. The improvements were constructed in 1985 and are described as average quality in poor condition. Based on an inspection of the property, the property appraiser has determined that the building improvements have an effective age of 40 years, considering construction quality and condition. It appears that the subject of this petition has not sold within the 12-month period preceding the January 1 valuation date.

The property appraiser has confirmed the 2025 just value at $1,326,486, with an assessed value of $870,066 and a taxable value of $870,066. There have been no changes to the values since the Notice of Proposed Property Taxes (TRIM) was issued. The petitioner is requesting a revision to the 2025 just value, proposing a revision in just value to $800,000. No hearing evidence has been submitted to the Clerk of Court in support of this request, rather the request is supported by a verbal discussion of cost and income analysis.

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence, see Florida Administrative Code 12D-9.025(1). Generally, relevant evidence is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. The evidence meets or exceeds a minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. Documentary evidence presented by the property appraiser during the hearing is described and labeled as follows:

- PAO-A (26 pages) - Cover page, table of contents, subject summary page, subject property record card with aerial map, building sketch and photograph, subject aerial photographs, sales comparison approach, comparable sales location map, photographs if the comparable sales, comparable sales adjustment grid, property record cards for each sale

Documentary evidence presented by the petitioner during the hearing is described and labeled as follows:

- PET-1 (4 pages) - Petition list of other locations being petitioned

The Florida Legislature has enacted eight criteria that the property appraiser must consider when determining just value. In any administrative or judicial action where a taxpayer challenges an ad valorem tax assessment, the property appraiser's estimate of just value is presumed correct if it is proven that the assessment was made in compliance with the eight criteria outlined in Section 193.011, Florida Statutes and in accordance with professionally accepted appraisal practices, including mass appraisal standards, if appropriate. The only standard of proof in this administrative review is a preponderance of the evidence, meaning the greater weight of evidence, or "more likely than not."

Florida courts have consistently held that the property appraiser is only required to consider the eight criteria, and that applying each factor is not mandatory. The courts have further found that if any one criterion does not reflect just value, it should be disregarded by the property appraiser. The special magistrate finds and summarizes the extent to which the property appraiser has considered each of these criteria in the following paragraphs.

(1) Present cash value of the property - The amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arms-length. This relates to the sales comparison approach and requires the property appraiser to consider the sale price exclusive of reasonable fees and costs of sale. In short, the price without transaction costs. The buyer typically pays more, and the seller typically receives less than the price indicated by the documentary stamps due to these transaction costs. In mass appraising, the property appraiser considers this criterion by applying or considering the comparable market sales using the Computer Aided Mass Appraisal System. In an assessment review hearing, the property appraiser supports just value through comparable sales analysis similar to that found in a fee appraisal. The property appraiser has presented sales evidence in support of the present cash value. Following are brief descriptions of the sales determined by the property appraiser to be most comparable to the subject and representative of value:

- PA Sale 1 – 7-Eleven at 15310 Cortez Blvd, Brooksville is described as a 2,940 square foot retail store with fuel. These improvements were constructed in 2000 and are represented as being in superior condition to the subject. The property appraiser has estimated the effective age to be 25 years. The improvements are situated on a 1.63-acre commercial site. This property sold in November 2024 for $3,365,000. Various price

adjustments have been made to account for differences in age, condition, quality, design and land area. This sale indicates a price of $973 per square foot for comparison with the subject.

• PA Sale 2 – Harry's Food Mart at 16135 US Highway 301, Dade City is described as a 2,400 square foot retail store with fuel. These improvements were constructed in 1977 and are represented as being in similar condition to the subject. The improvements are situated on a 1.37-acre commercial site. This property sold in July 2023 for $3,750,000. Price adjustments have been made to account for differences in location and land area. This sale indicates a price of $1,406 per square foot for comparison with the subject.

• PA Sale 3 – Speedway at4159 Mariner Blvd, Spring Hill is described as a 3,726 square foot retail store with fuel. These improvements were constructed in 1986 and are represented as being in superior condition to the subject. The property appraiser has estimated the effective age to be 20 years. The improvements are situated on a 0.68-acre commercial site. This property sold in August 2023 for $6,210,600. Various price adjustments have been made to account for differences in age, condition, building size and land area. This sale indicates a price of $1,500 per square foot for comparison with the subject.

In considering these sales, the property appraiser has compared them based on per square foot price. Three qualified sales judged to be most comparable to the subject have been presented in support of value. These sales range in price from $973 to $1,500 per square foot. The sales were selected based on similar location, age, size and utility. Relevant sale transactions occurred within the 18 months preceding the January 1, 2025 value date. After deducting 15% for costs of sales, this sales evidence supports a just value of $2,901,684 equivalent to $1,099 per square foot, within the indicated range. These sales are presented by the property appraiser as market evidence that the property is not over-assessed and $1,326,486 represents just value for the subject property. The petitioner has testified that comparable sales are not representative of just value because of the potential that the sale prices include equipment and business interest components although had no specific knowledge of such for these particular sales. The special magistrate finds that the just value is 46% of the value supported by the comparable sales which would more than account for any potential of non-real estate components that may be included in the sale. It is the opinion of the special magistrate that this sales analysis complies with Criterion 1, Chapter 193.011 of the Florida Statutes and generally accepted appraisal principles.

(2) Highest & Best Use – This relates to the consideration of the fundamental appraisal concept of highest and best use or best use to which the property can be expected to be put in the immediate future. For improved properties, the highest and best use of the property as if vacant should be considered as well. The four steps establishing highest and best use are consideration of what is physically possible, legally permissible, financially feasible, and maximally productive. The highest and best use as vacant is identified through land use codes which, in part, are based on zoning. The highest and best use as improved is assumed to be the current use unless evidence shows otherwise. The property appraiser's office considers highest and best use by identifying and recording land size, zoning, building size, location and other characteristics. Once all coding is in place, comparable sales and rentals that have similar characteristics are used to value the property. The highest and best use of this property is for retail use. This determination is undisputed by the petitioner and appears to have been appropriately considered by the property appraiser.

(3) Location of the property – The property appraiser assigns a neighborhood code to every property in the county. Sales of properties in the same or similar neighborhoods are typically used to determine locational adjustments. Often, site-specific location adjustments are made to reflect either an enhanced location (such as a water front site or in a golf course community) or an inferior location (such as adjacent to an industrial use or dumpsite). All of the comparable properties presented in support of value are located in the same overall market area as the subject and price adjustments have been made for significant differences in location. The location of the property appears to have been appropriately considered in the determination of just value.

(4) Quantity or size of the property – The property appraiser must consider the quantity or size of the property by determining and recording the correct land size, building size, and extra features sizes and quantities. Land size is based on legal descriptions from recorded plats or metes and bounds. Building sizes and extra features are determined by inspection and measured by deputy property appraisers. From the evidence presented there do not appear to be any notable discrepancies in size or quantity.

(5) The cost of the property and present replacement value of any improvements thereon - An analysis of cost is made in the Computer Aided Mass Appraisal System is found on the property record card. The property appraiser considers replacement cost through the use of Marshall & Swift Valuation Service data. These rates are adjusted annually to reflect the costs relevant to January 1 of the given tax year. Marshall & Swift Valuation Cost Service is also used to determine the replacement costs of extra features or site improvements. No separate analysis of cost has been presented during the hearing. Buyers in this sector of the real estate market do not typically consider the costs associated with development when valuing properties of this age and type. Cost calculations found on the property record card appear to be supportive of the value indicated by the more relevant valuation methods. It is the opinion of the magistrate that this cost analysis complies with Criterion 5, Chapter 193.011 of the Florida Statutes and generally accepted appraisal principles.

(6) Condition of the property – The property appraiser considers the condition of properties through periodic property inspections, no less than once every five years as required by Statute. Other events can trigger more frequent site inspections, including the sale of a property, issuance of a building permit, assessment appeal, or at the taxpayer's request. Condition is considered as a factor applied to the Computer Aided Mass Appraisal System value calculation for value losses from all sources based upon an age/life depreciation method. Photographs of the subject property have been presented as evidence of condition. Evidence of building permits for renovations and/or significant building repairs has been presented. An effective age of 40 years has been estimated by the property appraiser based on an analysis of chronological age, condition and

construction quality. It appears that the property appraiser has appropriately considered this factor.

(7) The income from the property - No analysis of income has been presented during the hearing due to a lack of market data pertaining to rental income, expenses and capitalization rates for this type of property. There is a relative lack of market data and buyers in this sector of the real estate market typically do not consider income generating ability when valuing this type of property. Although the subject of this petition is leased, no income or expense information was provided to the property appraiser for review. It is the opinion of the magistrate that this consideration of income complies with Criterion 7, Chapter 193.011 of the Florida statutes and generally accepted appraisal practices.

(8) Cost of Sale Adjustment - This criterion deals with the net proceeds from the sale of a property as received by the seller after deduction of all of the usual and reasonable fees and costs and expenses of financing and allowance for unconventional or atypical terms of financing arrangements. A few examples of the applicability of this criterion include: • unconventional or atypical financing arrangements, such as seller financing at favorable terms, which inflated the price, relative to what would have been achieved with a cash or case-equivalent arrangement, • the inclusion of tangible personal property, which may serve to increase the price above pure real property consideration, • atypically motivated buyers, who may pay a premium relative to that paid by the general market, • atypical closing costs arrangements, such as a seller paying the buyer's closing costs in exchange for a higher sales price. Because these situations may not be discoverable by the mass appraiser relying on raw gross price data, a deduction from the raw gross price is made with the goal being to arrive at 100% of the market value of the real property by eliminating any possible impact of non-real property consideration. This mass appraisal method is found to be acceptable by the Florida Department of Revenue and the Florida Courts. The special magistrate finds that applying a specific cost-of-sale adjustment consistent with the DR-493 form constitutes appropriate consideration of this criterion and complies with the requirements of Chapter 193.011, Florida Statutes.

It is implicit in mass appraisal that, even when properly specified and calibrated models are employed, some individual value conclusions may not meet standards of reasonableness, consistency, and accuracy. The purpose of this value review is to determine whether the just value reported on the current tax roll represents the just value of the property after consideration of the criteria set forth in Florida Statute §193.011 and generally accepted appraisal principles, including those applicable to mass appraisal. Based on the relevant, competent, and substantial evidence presented at the hearing, it appears that the property appraiser appropriately considered all eight factors set forth in Florida Statute §193.011, indicating that the just value is not overstated and is entitled to the presumption of correctness.

By filing this petition, the petitioner alleges that the property appraiser has assessed the property in excess of just value. According to 12D-9.025(3)(a) of the Florida Administrative Code, the petitioner is responsible for presenting relevant and credible evidence in support of his or her belief that the property appraiser's determination is incorrect. If the property appraiser establishes the presumption of correctness, it is the petitioner's burden to prove the assessment does not represent just value. Such evidence should be based on criteria similar to those established by the Legislature for the property appraiser to follow. To prevail in an assessment challenge, the taxpayer must prove more than a mere difference of opinion regarding an assessment. The following paragraphs describe how the petitioner has addressed each of the eight criteria of Section 193.011, as determined by the special magistrate.

(1) Present cash value of the property - No analysis of comparable sales has been presented by the petitioner in support of a change in just value. The petitioner contends that sales of these types of properties often include non-real estate components including equipment, personnel, inventory, and business enterprise value.

(2) Highest and Best Use - The petitioner does not dispute that the highest and best use of the subject property is retail.

(3) Location of the property - The petitioner appears familiar with the location characteristics of the subject property and claims that the ingress and egress for this location is difficult. From the aerial map found in PAO-A the subject property appears to have access from both Cortez Boulevard and Deltona Boulevard. The property is located at a signalized intersection. No alleged access issues appear to exist and no evidence of specific diminution in dollar value have been presented by the petitioner.

(4) Quantity or size of the property - The petitioner does not dispute the size or quantity of the land or improvements reported by the property appraiser during the hearing, nor was any allegation made that these factors were miscalculated or improperly considered in the valuation.

(5) The cost of the property and present replacement value of any improvements thereon – The petitioner has prepared an analysis of cost using the Marshall & Swift cost manual. Per square foot direct development costs were applied to the size of the building components. Land value is based on the land value component found on the property record card with no market support for current land value. This analysis results in a value of $550,000 as reported by the petitioner. Soft costs have not been accounted for by the petitioner, thereby understating total costs. No entrepreneurial incentive was presented in the petitioner's analysis. The petitioner responded that profit is included in the direct cost estimates found in Marshall & Swift, however the included profit in Marshall & Swift is builder and subcontractor profit and not the incentive to entice an entrepreneur to put together a specific development project. The omission of entrepreneurial incentive also has the effect of understating the building cost, resulting in an understated property value. The special magistrate finds that this analysis is not sufficient to overcome the presumption of correctness established by the property appraiser.

(6) Condition - The petitioner has not presented any credible evidence or asserted that the condition of the property differs from the description provided by the property appraiser during the hearing. Furthermore, no claim was made regarding any significant physical deficiencies, other than age, that would affect the property's use or value.

(7) The income from the property - The petitioner has developed an income analysis in support of a revision to just value. Market rental rates are supported in the petitioner's analysis by actual lease rate. The petitioner reconciled the subject's 2,640 square feet of leasable building space to a rental rate of $31 per square foot on a triple net basis. No stabilized vacancy was deducted. From an effective gross income of $81,875, an expense ratio of 10% was deducted but no market evidence is presented in support of the market expenses used by the petitioner. Support for the petitioner's selection of 6.5% base capitalization rate is based on reported rates used by other property appraisers in other tax hearings. The capitalized value indicated by this income analysis is $1,134,000. Although the petitioner has characterized the lease rate as a market rent, a review of the property record card in PAO-A indicates that this property—and the other three leased properties in this group of petitions—was purchased by DBNCH Circle, LLC (the landlord) from Circle K Stores, Inc. (the tenant) on March 17, 2004. This raises concerns regarding the arm's-length nature of the landlord-tenant relationship and whether a lease originating in 2004 provides a reliable indicator of current market rent for the property.

Furthermore, the Florida Real Property Appraisal Guidelines from the Florida Department of Revenue Property Tax Administration Program and the Appraisal Institute's The Appraisal of Real Estate defines market rent, which is distinct from contract rent, as the most likely rent that an income-producing property would command if offered for lease on the open market, as of the date of appraisal. Unless specified otherwise, fee simple estate is the interest in real property to be appraised for ad valorem tax purposes in the State of Florida. Market rent corresponds to the fee simple estate. Contract rent is the rent due under the terms of an existing lease agreement for real property, and contract rent corresponds to the leased fee estate. Contract rent at the subject property from the prior year bears little relevance to real property appraisal for ad valorem tax purposes in the State of Florida, unless independent support is available indicating that contract rent is equal to market rent Market rent may be less than, equal to, or greater than contract rent. An investor purchasing income producing real estate is essentially trading present dollars for the expectation of receiving future dollars. Leased fee value will reflect current leases and the associated expense structure, while fee simple value starts with an income projection based on market rent. Direct Capitalization typically uses one-year cash flow estimate, usually 12 months from the date of value. Although an appraiser may consider the actual income of the subject property at the time of the appraisal, valuation is based on a projection of future income. A property appraiser should consider the future outlook both in estimating income and expenses and in selecting the appropriate capitalization methodology to use. The consideration of future income is consistent with the principle of anticipation, which holds that value is the present worth of future benefits. Historical income and current income may be representative of market value, but the ultimate concern is the future. The special magistrate finds that the petitioner has presented insufficient evidence of market rent, market vacancy, and market expense ratios to overcome the property appraiser's evidence by a preponderance of evidence.

The petitioner did not provide a copy of the lease or any income and expense information to the property appraiser during the normal data-collection phase, then relied on that same information as the basis of valuation at the hearing. This approach is not appropriate because Florida case law, including *Higgs v. Good, 813 So. 2d 178 (Fla. 3d DCA 2002)*, establishes that a taxpayer may not withhold income-related data when requested or when reasonably necessary for the preparation of the tax roll and then later introduce that information only after the assessment has been issued. Allowing such selective disclosure would undermine the property appraiser's ability to develop an accurate and uniform assessment and would create an unfair advantage for the petitioner by enabling them to present data only when it is favorable to their position. When information that is critical to the valuation of an income-producing property is withheld until the hearing, the property appraiser has no opportunity to analyze or verify that data in advance, and the trier of fact cannot rely on it with the same level of confidence as information produced through the standard statutory process.

(8) Cost of Sale Adjustment - The petitioner has not included a cost of sale adjustment.

In a tax hearing, oral testimony that is not supported by documentary evidence is given lesser credibility because it cannot be independently verified by the property appraiser prior to the hearing. It does not provide the same level of reliability as written materials. Documentary evidence, such as leases, income statements, cost data, photographs, or closing documents, allows the hearing officer to corroborate the statements made by the petitioner and to evaluate the information using objective standards. Unsubstantiated oral testimony relies solely on the petitioner's recollection or interpretation, which may be incomplete, inconsistent, or influenced by the outcome they are seeking. For valuation matters, where factual accuracy is essential, the absence of supporting documentation limits the weight that can reasonably be assigned to the testimony presented. After careful consideration of all evidence presented at the hearing, the special magistrate finds that the property appraiser has established the presumption of correctness by appropriately considering all eight criteria set forth in Florida Statute §193.011 and generally accepted appraisal principles. It is the opinion of this special magistrate that insufficient evidence has been presented to overcome this presumption by a preponderance of the evidence.

Conclusions of Law

According to §194.301, Florida Statutes, in any administrative action in which a taxpayer challenges an ad valorem tax assessment of value, the property appraiser's assessment is presumed correct if the appraiser proves by a preponderance of the evidence that the assessment was arrived at by complying with §193.011, any other applicable statutory requirements relating to classified use values or assessment caps, and professionally accepted appraisal practices, including mass appraisal standards, if appropriate. However, a taxpayer who challenges an assessment is entitled to a determination by the value adjustment board or court of the appropriateness of the appraisal methodology used in making the assessment. The value of property must be determined by an appraisal methodology that complies with the criteria of §193.011 and professionally accepted appraisal practices.

The burden of proof is on the party initiating the challenge as specified in paragraph §194.301(2). If the challenge is to the assessed value of the

property, the party initiating the challenge has the burden of proving by a preponderance of the evidence that the assessed value:

1. Does not represent the just value of the property after taking into account any applicable limits on annual increases in the value of the property;
2. Does not represent the classified use value or fractional value of the property if the property is required to be assessed based on its character or use; or
3. Is arbitrarily based on appraisal practices that are different from the appraisal practices generally applied by the property appraiser to comparable property within the same county.

If the party challenging the assessment satisfies these requirements, the presumption of correctness is overcome, and the value adjustment board shall establish the assessment if there is competent, substantial evidence of value in the record which cumulatively meets the criteria of §193.011 and professionally accepted appraisal practices. Otherwise, the assessment stands.

In consideration of this specific petition, Florida Administrative Code section 12D-9.027 lays out a sequence of general procedural steps that the special magistrate has followed in the preparation of this recommendation to the Value Adjustment Board:

1. Determine whether the property appraiser has established a presumption of correctness for the assessment and determine whether the property appraiser's just value methodology is appropriate. The presumption of correctness is not established unless the property appraiser proves by a preponderance of the evidence that the methodology used to support just value for the subject property complies with Florida Statute §193.011 and professionally accepted appraisal practices, including mass appraisal standards, if appropriate. Based upon the evidence presented on the record during this hearing, this special magistrate finds that the presumption of correctness has been established by the property appraiser.

2. In administrative reviews of just valuation, if the property appraiser establishes a presumption of correctness, the special magistrate must determine whether the admitted evidence proves by a preponderance of the evidence that:
a) The property appraiser's just valuation does not represent just value; or
b) The property appraiser's just valuation is arbitrarily based on appraisal practices that are different from the appraisal practices generally applied by the property appraiser to comparable property within the same county.
Since neither of these conditions have been proven by a preponderance of evidence, the special magistrate finds that the petitioner has failed to overcome the presumption of correctness established by the property appraiser.

3. If the property appraiser establishes a presumption of correctness and that presumption of correctness is not overcome, the assessment stands. In view of the findings of fact and conclusions of law as they relate to this petition before the Value Adjustment Board, the special magistrate recommends the request to overturn the property appraiser's determination of the 2025 just value of the property be DENIED.

Findings Of Fact

Petitioner Jaden Randall with Delta Property Tax Advisors appeared telephonically on behalf of Circle K Stores, Inc. on November 14, 2025 to provide testimonial and documentary evidence pertaining to the 2025 property assessment for real property located in Hernando County, Florida. The Hernando County Property Appraiser's Office was represented at the hearing by Deputy Appraiser Daniel Scott, Commercial Supervisor. An opening statement regarding the hearing process and rules of procedure was read and all parties were placed under oath. This petition is one of six presented by the petitioner on this hearing date. The specific case numbers are 25-408, 25-410, 25-411, 25-412, 25-413 and 25-414. Any relevant testimony presented during these individual hearings will be incorporated by reference to all hearings to avoid redundancy and expedite the hearing process.

The subject of this petition is listed on the Hernando County tax roll as Parcel ID R16-223-17-3810-0070-0160. This property is described as Circle-K Store, a retail store with fuel and a carwash. The subject property is located at 3380 Commercial Way, Spring Hill, Hernando County, Florida. The property consists of 6,446 square feet of net leasable building area on a 3.47-acre commercial site. The improvements were constructed in 2022 and are described as good quality in good condition. Based on an inspection of the property, the property appraiser has determined that the building improvements have an effective age of 3 years, considering construction quality and condition. It appears that the subject of this petition has not sold within the 12-month period preceding the January 1 valuation date.

The property appraiser has confirmed the 2025 just value at $4,744,001, with an assessed value of $4,744,001 and a taxable value of $4,744,001. The record indicates that the just value has been revised due to an error in building size since the Notice of Proposed Property Taxes (TRIM) was issued. The just, assessed, and taxable values reported on the TRIM Notice were $6,006,666, $6,006,666, and $6,006,666, respectively. The petitioner is requesting a revision to the 2025 just value, proposing a revision in just value to $3,750,000. This request is supported by cost and income analysis.

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence, see Florida Administrative Code 12D-9.025(1). Generally, relevant evidence is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. The evidence meets or exceeds a minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. Documentary evidence presented by the property appraiser during the hearing is described and labeled as follows:

- PAO-A (25 pages) – Cover page, table of contents, subject summary page, subject property record card with aerial map, building sketch and photograph, subject aerial photographs, sales comparison approach, comparable sales location map, photographs if the comparable sales, comparable sales adjustment grid, property record cards for each sale

Documentary evidence presented by the petitioner during the hearing is described and labeled as follows:

- PET-1 (4 pages) – Petition, list of other locations being petitioned

The Florida Legislature has enacted eight criteria that the property appraiser must consider when determining just value. In any administrative or judicial action where a taxpayer challenges an ad valorem tax assessment, the property appraiser's estimate of just value is presumed correct if it is proven that the assessment was made in compliance with the eight criteria outlined in Section 193.011, Florida Statutes and in accordance with professionally accepted appraisal practices, including mass appraisal standards, if appropriate. The only standard of proof in this administrative review is a preponderance of the evidence, meaning the greater weight of evidence, or "more likely than not."

Florida courts have consistently held that the property appraiser is only required to consider the eight criteria, and that applying each factor is not mandatory. The courts have further found that if any one criterion does not reflect just value, it should be disregarded by the property appraiser. The special magistrate finds and summarizes the extent to which the property appraiser has considered each of these criteria in the following paragraphs.

(1) Present cash value of the property - The amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arms-length. This relates to the sales comparison approach and requires the property appraiser to consider the sale price exclusive of reasonable fees and costs of sale. In short, the price without transaction costs. The buyer typically pays more, and the seller typically receives less than the price indicated by the documentary stamps due to these transaction costs. In mass appraising, the property appraiser considers this criterion by applying or considering the comparable market sales using the Computer Aided Mass Appraisal System. In an assessment review hearing, the property appraiser supports just value through comparable sales analysis similar to that found in a fee appraisal. The property appraiser has presented sales evidence in support of the present cash value. Following are brief descriptions of the sales determined by the property appraiser to be most comparable to the subject and representative of value:

- PA Sale 1 - 4018 S Suncoast Blvd, Homosassa is described as a 4,845 square foot retail store with fuel and carwash. These improvements were constructed in 2024 and are represented as being in similar condition to the subject. The property appraiser has estimated the effective age to

be new. The improvements are situated on a 1.84-acre commercial site. This property sold in December 2024 for $8,893,100. This sale indicates a price of $2,019 per square foot for comparison with the subject.

• PA Sale 2 - 31571 McCabe Rd, San Antonio is described as a 6,024 square foot retail store with fuel and carwash. These improvements were constructed in 2023 and are represented as being in similar condition to the subject. The improvements are situated on a 1.54-acre commercial site. This property sold in March 2024 for $8,895,500. This sale indicates a price of $1,577 per square foot for comparison with the subject.

• PA Sale 3 - 19123 Wingshooter Way, Lutz is described as a 5,853 square foot retail store with fuel and carwash. These improvements were constructed in 2023 and are represented as being in similar condition to the subject. The improvements are situated on a 2.24-acre commercial site. This property sold in December 2023 for $8,878,600. This sale indicates a price of $1,441 per square foot for comparison with the subject.

In considering these sales, the property appraiser has compared them based on per square foot price. Three qualified sales judged to be most comparable to the subject have been presented in support of value. These sales range in price from $1,441 to $2,019 per square foot. The sales were selected based on similar location, age, size and utility. Relevant sale transactions occurred within the 13 months preceding the January 1, 2025 value date. Most weight was given to Sales 2 and 3 by the property appraiser. After deducting 15% for costs of sales, this sales evidence supports a value of $8,607,228 equivalent to $1,335 per square foot, below the indicated range. These sales are presented by the property appraiser as market evidence that the property is not over-assessed and $4,744,001 represents just value for the subject property. The petitioner has testified that comparable sales are not representative of just value because of the potential that the sale prices include equipment and business interest components although had no specific knowledge of such for these particular sales. The special magistrate finds that the just value is 45% of the value supported by the comparable sales which would more than account for any potential of non-real estate components that may be included in the sale. It is the opinion of the special magistrate that this sales analysis complies with Criterion 1, Chapter 193.011 of the Florida Statutes and generally accepted appraisal principles.

(2) Highest & Best Use – This relates to the consideration of the fundamental appraisal concept of highest and best use or best use to which the property can be expected to be put in the immediate future. For improved properties, the highest and best use of the property as if vacant should be considered as well. The four steps establishing highest and best use are consideration of what is physically possible, legally permissible, financially feasible, and maximally productive. The highest and best use as vacant is identified through land use codes which, in part, are based on zoning. The highest and best use as improved is assumed to be the current use unless evidence shows otherwise. The property appraiser's office considers highest and best use by identifying and recording land size, zoning, building size, location and other characteristics. Once all coding is in place, comparable sales and rentals that have similar characteristics are used to value the property. The highest and best use of this property is for retail use. This determination is undisputed by the petitioner and appears to have been appropriately considered by the property appraiser.

(3) Location of the property – The property appraiser assigns a neighborhood code to every property in the county. Sales of properties in the same or similar neighborhoods are typically used to determine locational adjustments. Often, site-specific location adjustments are made to reflect either an enhanced location (such as a water front site or in a golf course community) or an inferior location (such as adjacent to an industrial use or dumpsite). All of the comparable properties presented in support of value are located in the same overall market area as the subject and price adjustments have been made for significant differences in location. The location of the property appears to have been appropriately considered in the determination of just value.

(4) Quantity or size of the property – The property appraiser must consider the quantity or size of the property by determining and recording the correct land size, building size, and extra features sizes and quantities. Land size is based on legal descriptions from recorded plats or metes and bounds. Building sizes and extra features are determined by inspection and measured by deputy property appraisers. From the evidence presented there do not appear to be any notable discrepancies in size or quantity.

(5) The cost of the property and present replacement value of any improvements thereon - An analysis of cost is made in the Computer Aided Mass Appraisal System is found on the property record card. The property appraiser considers replacement cost through the use of Marshall & Swift Valuation Service data. These rates are adjusted annually to reflect the costs relevant to January 1 of the given tax year. Marshall & Swift Valuation Cost Service is also used to determine the replacement costs of extra features or site improvements. No separate analysis of cost has been presented during the hearing. Cost calculations found on the property record card appear to be supportive of the value indicated by the more relevant valuation methods. It is the opinion of the magistrate that this cost analysis complies with Criterion 5, Chapter 193.011 of the Florida Statutes and generally accepted appraisal principles.

(6) Condition of the property – The property appraiser considers the condition of properties through periodic property inspections, no less than once every five years as required by Statute. Other events can trigger more frequent site inspections, including the sale of a property, issuance of a building permit, assessment appeal, or at the taxpayer's request. Condition is considered as a factor applied to the Computer Aided Mass Appraisal System value calculation for value losses from all sources based upon an age/life depreciation method. Photographs of the subject property have been presented as evidence of condition. Evidence of building permits for renovations and/or significant building repairs has been presented. An effective age of 3 years has been estimated by the property appraiser based on an analysis of chronological age, condition and construction quality. It appears that the property appraiser has appropriately considered this factor.

(7) The income from the property – No analysis of income has been presented during the hearing due to a lack of market data pertaining to rental

income, expenses and capitalization rates for this type of property. The subject property is owner occupied and there is a relative lack of market data and buyers in this sector of the real estate market typically do not consider income generating ability when valuing this type of property. It is the opinion of the magistrate that this income analysis complies with Criterion 7, Chapter 193.011 of the Florida statutes and generally accepted appraisal practices.

(8) Cost of Sale Adjustment - This criterion deals with the net proceeds from the sale of a property as received by the seller after deduction of all of the usual and reasonable fees and costs and expenses of financing and allowance for unconventional or atypical terms of financing arrangements. A few examples of the applicability of this criterion include: • unconventional or atypical financing arrangements, such as seller financing at favorable terms, which inflated the price, relative to what would have been achieved with a cash or case-equivalent arrangement, • the inclusion of tangible personal property, which may serve to increase the price above pure real property consideration, • atypically motivated buyers, who may pay a premium relative to that paid by the general market, • atypical closing costs arrangements, such as a seller paying the buyer's closing costs in exchange for a higher sales price. Because these situations may not be discoverable by the mass appraiser relying on raw gross price data, a deduction from the raw gross price is made with the goal being to arrive at 100% of the market value of the real property by eliminating any possible impact of non-real property consideration. This mass appraisal method is found to be acceptable by the Florida Department of Revenue and the Florida Courts. The special magistrate finds that applying a specific cost-of-sale adjustment consistent with the DR-493 form constitutes appropriate consideration of this criterion and complies with the requirements of Chapter 193.011, Florida Statutes.

It is implicit in mass appraisal that, even when properly specified and calibrated models are employed, some individual value conclusions may not meet standards of reasonableness, consistency, and accuracy. The purpose of this value review is to determine whether the just value reported on the current tax roll represents the just value of the property after consideration of the criteria set forth in Florida Statute §193.011 and generally accepted appraisal principles, including those applicable to mass appraisal. Based on the relevant, competent, and substantial evidence presented at the hearing, it appears that the property appraiser appropriately considered all eight factors set forth in Florida Statute §193.011, indicating that the just value is not overstated and is entitled to the presumption of correctness.

By filing this petition, the petitioner alleges that the property appraiser has assessed the property in excess of just value. According to 12D-9.025(3)(a) of the Florida Administrative Code, the petitioner is responsible for presenting relevant and credible evidence in support of his or her belief that the property appraiser's determination is incorrect. If the property appraiser establishes the presumption of correctness, it is the petitioner's burden to prove the assessment does not represent just value. Such evidence should be based on criteria similar to those established by the Legislature for the property appraiser to follow. To prevail in an assessment challenge, the taxpayer must prove more than a mere difference of opinion regarding an assessment. The following paragraphs describe how the petitioner has addressed each of the eight criteria of Section 193.011, as determined by the special magistrate.

(1) Present cash value of the property - No analysis of comparable sales has been presented by the petitioner in support of a change in just value. The petitioner contends that sales of these types of properties often include non-real estate components including equipment, personnel, inventory, and business enterprise value.

(2) Highest and Best Use - The petitioner does not dispute that the highest and best use of the subject property is retail.

(3) Location of the property - The petitioner appears familiar with the location characteristics of the subject property and has not claimed the presence of any atypical or adverse location factors that would materially affect its use or value.

(4) Quantity or size of the property - The petitioner does not dispute the size or quantity of the land or improvements reported by the property appraiser during the hearing, nor was any allegation made that these factors were miscalculated or improperly considered in the valuation.

(5) The cost of the property and present replacement value of any improvements thereon – The petitioner has prepared an analysis of cost using the Marshall & Swift cost manual. Per square foot direct development costs were applied to the size of the building components. Land value is based on the land value component found on the property record card with no market support for current land value. A 10% deduction to the land value assessment was made by the petitioner to account for alleged stigma from underground fuel storage tanks, however, no market evidence quantifying such stigma has been presented. This analysis results in a value of $3,000,000, as reported by the petitioner. Soft costs have not been accounted for by the petitioner, thereby understating total costs. No entrepreneurial incentive was presented in the petitioner's analysis. The petitioner responded that profit is included in the direct cost estimates found in Marshall & Swift, however the included profit in Marshall & Swift is builder and subcontractor profit and not the incentive to entice an entrepreneur to put together a specific development project. The omission of entrepreneurial incentive also has the effect of understating the building cost, resulting in an understated property value. The special magistrate finds that this analysis is not sufficient to overcome the presumption of correctness established by the property appraiser.

(6) Condition - The petitioner has not presented any credible evidence or asserted that the condition of the property differs from the description provided by the property appraiser during the hearing. Furthermore, no claim was made regarding any significant physical deficiencies that would affect the property's use or value.

(7) The income from the property - The petitioner has developed an income analysis in support of a revision to just value. Market rental rates are supported in the petitioner's analysis by actual lease rate. The petitioner reconciled the subject's leasable building space to a rental rate of

$40 per square foot on a triple net basis. This rate is based on other Circle K Properties included in this group that are reportedly paying between $31 and $70 per square foot. No stabilized vacancy was deducted. From an effective gross income of $309,120, an expense ratio of 10% was deducted but no market evidence is presented in support of the market expenses used by the petitioner. Support for the petitioner's selection of 6.5% base capitalization rate is based on reported rates used by other property appraisers in other tax hearings. The capitalized value indicated by this income analysis is $4,300,000. Although the petitioner has characterized these leases as representing market rates, a review of the property record cards for petitions 25-410, -411, -412 and -413 indicate that these leased properties were all purchased by the same landlord (DBNCH Circle, LLC) from Circle K Stores, Inc. (now the tenant) on March 17, 2004. This raises concerns regarding the arm's-length nature of the landlord-tenant relationship and whether leases originating in 2004 provides a reliable indicator of current market rent for the property.

(8) Cost of Sale Adjustment - The petitioner has not included a cost of sale adjustment.

In a tax hearing, oral testimony that is not supported by documentary evidence is given lesser credibility because it cannot be independently verified by the property appraiser prior to the hearing. It does not provide the same level of reliability as written materials. Documentary evidence, such as leases, income statements, cost data, photographs, or closing documents, allows the hearing officer to corroborate the statements made by the petitioner and to evaluate the information using objective standards. Unsubstantiated oral testimony relies solely on the petitioner's recollection or interpretation, which may be incomplete, inconsistent, or influenced by the outcome they are seeking. For valuation matters, where factual accuracy is essential, the absence of supporting documentation limits the weight that can reasonably be assigned to the testimony presented. After careful consideration of all evidence presented at the hearing, the special magistrate finds that the property appraiser has established the presumption of correctness by appropriately considering all eight criteria set forth in Florida Statute §193.011 and generally accepted appraisal principles. It is the opinion of this special magistrate that insufficient evidence has been presented to overcome this presumption by a preponderance of the evidence.

Conclusions of Law

According to §194.301, Florida Statutes, in any administrative action in which a taxpayer challenges an ad valorem tax assessment of value, the property appraiser's assessment is presumed correct if the appraiser proves by a preponderance of the evidence that the assessment was arrived at by complying with §193.011, any other applicable statutory requirements relating to classified use values or assessment caps, and professionally accepted appraisal practices, including mass appraisal standards, if appropriate. However, a taxpayer who challenges an assessment is entitled to a determination by the value adjustment board or court of the appropriateness of the appraisal methodology used in making the assessment. The value of property must be determined by an appraisal methodology that complies with the criteria of §193.011 and professionally accepted appraisal practices.

The burden of proof is on the party initiating the challenge as specified in paragraph §194.301(2). If the challenge is to the assessed value of the property, the party initiating the challenge has the burden of proving by a preponderance of the evidence that the assessed value:

1. Does not represent the just value of the property after taking into account any applicable limits on annual increases in the value of the property;
2. Does not represent the classified use value or fractional value of the property if the property is required to be assessed based on its character or use; or
3. Is arbitrarily based on appraisal practices that are different from the appraisal practices generally applied by the property appraiser to comparable property within the same county.

If the party challenging the assessment satisfies these requirements, the presumption of correctness is overcome, and the value adjustment board shall establish the assessment if there is competent, substantial evidence of value in the record which cumulatively meets the criteria of §193.011 and professionally accepted appraisal practices. Otherwise, the assessment stands.

In consideration of this specific petition, Florida Administrative Code section 12D-9.027 lays out a sequence of general procedural steps that the special magistrate has followed in the preparation of this recommendation to the Value Adjustment Board:

1. Determine whether the property appraiser has established a presumption of correctness for the assessment and determine whether the property appraiser's just value methodology is appropriate. The presumption of correctness is not established unless the property appraiser proves by a preponderance of the evidence that the methodology used to support just value for the subject property complies with Florida Statute §193.011 and professionally accepted appraisal practices, including mass appraisal standards, if appropriate. Based upon the evidence presented on the record during this hearing, this special magistrate finds that the presumption of correctness has been established by the property appraiser.

2. In administrative reviews of just valuation, if the property appraiser establishes a presumption of correctness, the special magistrate must determine whether the admitted evidence proves by a preponderance of the evidence that:
a) The property appraiser's just valuation does not represent just value; or
b) The property appraiser's just valuation is arbitrarily based on appraisal practices that are different from the appraisal practices generally applied by the property appraiser to comparable property within the same county.
Since neither of these conditions have been proven by a preponderance of evidence, the special magistrate finds that the petitioner has failed to overcome the presumption of correctness established by the property appraiser.

3. If the property appraiser establishes a presumption of correctness and that presumption of correctness is not overcome, the assessment stands. In view of the findings of fact and conclusions of law as they relate to this petition before the Value Adjustment Board, the special magistrate recommends the request to overturn the property appraiser's determination of the 2025 just value of the property be DENIED.

SUMMARY OF EVIDENCE

1 The Petitioner, JAMES E TALLEY for ADVANTA IRA SERVICES LLC did appear before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The subject of this hearing is a group of 7 petitioned adjacent land parcels (2 of which have older single-family residences) totaling approximately 50.58 acres. Approximately 13.6 to 17.5 acres are wet and unusable (estimated via the PAO and GIS systems). The Petitioner purchased this group of parcels for an investment and later development of the land. The Petitioner contended that this is one greater economic unit and produced one valuation package for all 7 parcels combined. The PAO produced separate valuation packages for each Petitioned parcel, some of which are interior parcels. The Special Magistrate does concur that the subject is one economic unit. All of the parcels will be discussed herein and separate value recommendations for each will be provided.

3 For Key Number 01857066 the Property Appraiser shows a just value of $184,371 ($54,227/dry usable acre, (3.40 acres dry, 1.4 acres wet)), an assessed or capped value of $184,371, and a taxable value of $184,371. This parcel is located on Osowaw Blvd., Spring Hill FL (specific address not yet determined).

4 For Key Number 01857075 the Property Appraiser shows a just value of $162,630 ($54,210/dry usable acre, (3.0 acres dry, 0.9 acres wet)), an assessed or capped value of $162,630, and a taxable value of $162,630. This parcel is

located on Osowaw Blvd., Spring Hill FL (specific address not yet determined).

5 For Key Number 00374552 the Property Appraiser shows a just value of $853,586 ($40,074/dry usable acre, (21.3 acres dry, 5.6 acres wet)), an assessed or capped value of $853,586, and a taxable value of $853,586. This parcel is located on Osowaw Blvd., Spring Hill FL (specific address not yet determined).

6 For Key Number 00374543 the Property Appraiser shows a just value of $178,745 ($54,165/dry usable acre, (3.3 acres dry, 0.0 acres wet)), an assessed or capped value of $178,745, and a taxable value of $178,745. This parcel is located on Osowaw Blvd., Spring Hill FL (specific address not yet determined).

7 For Key Number 00374393 the Property Appraiser shows a just value of $164,411 ($38,235/dry usable acre, (4.3 acres dry, 5.7 acres wet)), an assessed or capped value of $164,411, and a taxable value of $164,411. This parcel is located on Indian Bay Rd., Spring Hill FL (specific address not yet determined).

8 For Key Number 00374482 the Property Appraiser shows a just value of $120,428 ($138/SF, or $90/SF adjusted, (0.6 acres dry, 0.0 acres wet, includes an old 872 SF home, 1,337 SF adjusted)), an assessed or capped value of $120,428, and a taxable value of $120,428. 1535 Osowaw Blvd., Spring Hill FL.

9 For Key Number 00374525 the Property Appraiser shows a just value of $91,419 ($110/SF, or $93/SF adjusted, (1.0 acres dry, 0.0 acres wet, includes an old 832 SF home, 983 SF adjusted)), an assessed or capped value of $91,419, and a taxable value of $91,419. The parcel is located at 1551 Osowaw Blvd., Spring Hill FL.

10 The Petitioner estimated value for all 7 parcels combined to be $520,000.

11 *Subject Property Type:* The subject includes 7 adjacent land parcels, 2 of which have older single-family homes (in generally poor condition). The individual parcel and building sizes were noted previously. The PAO notes the total of all 7 parcels at 36.90 acres dry and 13.60 acres wet (total 50.5 acres). The Petitioner notes a total of 50.58 acres and has, in writing, estimated the wet areas to be 16.50 acres (GIS system used) (verbally he stated 17.5 wet acres). No wetlands study was prepared by either party but a wetlands map and survey were provided.

12 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

13 The Petitioners' evidence consists of a petition, hearing notice, correspondence, sales data, settlement statement, wetlands map, survey, pictures maps, and verbal testimony.

14 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

15 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

16 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

17 The PAO performed their analysis utilizing adjusted SF in their sales analysis report for single-family homes. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

18 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average. A similar trend is expected for the underlying land.

19 The subject land and building improvements (all 7 parcels combined) transferred for $500,000 in March 2025. The facility was exposed to the market for 79 days. The settlement statement for this was not provided. This was a listing on the lien date and soon became a pending sale.

20 The Petitioner is a very experienced commercial appraiser (MAI) and a broker. He stated clearly that he is acting as a broker in his capacity at the hearing (meaning he can be an advocate for himself, and not an unbiased appraiser performing an appraisal assignment, which changes/clarifies his role at this hearing). He did not supply an appraisal related to this personal purchase.

21 For Key Number 00374482 the Property Appraiser shows a just value of $120,428 ($138/SF, or $90/SF adjusted, (0.6 acres dry, 0.0 acres wet, includes an old 872 SF home, 1,337 SF adjusted)). The Petitioner sold this property for $100,000 in December of 2025.

22 All parties agreed to incorporate by reference all evidence presented at hearing in the consideration of value for all of the parcels (i.e. sales data provided for any parcel can be used to consider value at any other of the petitioned parcels also, if applicable).

23 The Petitioner supplied a Wetlands Map and land/property survey. He personally estimated wetlands to total 16.5 acres (in writing) and 17.5 acres

(verbally) at hearing. The PAO did not disagree with the Petitioner, although their CAMA system used less wetlands areas in total (13.60). The Special Magistrate will utilize the per parcel PAO wetlands figures but will also employ a negative wetlands/shape factor applied by parcel. Effectively, the parcels development is negatively impacted by both the total amount of the wetlands, and their shape and location within an individual parcel, as well as how they are placed across the greater economic unit. As such, a "usable land area shape" factor needs to be estimated for each parcel.

24 For Key 01857066 negative shape factor 15% (1.4 or 2.75 acres wet), for Key 01857075 negative shape factor 20% (0.9 or 1.5 acres wet) (some likely fully lost dry land due to narrow dry frontage land that is probably not buildable), for Key 00374552 negative shape factor 15% (5.6 acres wet), for Key 00374543 negative shape factor 0% (0.0 acres wet), and for Key 00374393 negative shape factor 17.5% (5.7 or 7.1 acres wet). The first wetland figure is that used by the PAO, and the 2nd figure is that proposed by the Petitioner for reference purposes.

25 The PAO stated that they "had" to value all of the parcels separately and could not consider the 7 parcels a greater economic unit. The Special Magistrate disagrees. Criteria 2 (highest and best use) requires the PAO to consider these aspects, and the PAO can allocate value among the parcels after proper consideration of all 8 Criteria. This can be difficult at times during mass appraisal but proper consideration of HBU is certainly part of the 8 Criteria and proper appraisal practices.

26 The Petitioner contended that this is one greater economic unit (i.e. the highest and best use off all (or most) of the parcels as a whole is greater than their value separately). The Special Magistrate concurs. Part of this assumption is that land values are more uniform, consider the size of the overall greater parcel, and all parcels would benefit from the access / visibility, and other factors of the "whole" property (less focused on some of these factors for an individual parcel value). For instance, the greater property has access to 2 roads (Osowaw Rd, & Indian Bay Rd), the land locked parcel(s) have access across the other parcels, size/scale is approximately 50 acres, and the overall shape of the wetlands across the entire parcel needs to be considered as a whole. The Special Magistrate concurs with the Petitioner that the highest and best use (and value) is greater as a whole than as separate parcels. The Special Magistrate will make separate value recommendation for each parcel based on a logical allocation for each parcel individually.

27 The PAO supplied 4 improved sales on two statistical grids for the parcels improved with older single-family homes. Each of these homes could be sold off separately. One of them was sold off in December of 2025 for $100,000. Two sale(s) was/were an outlier or were too dissimilar to be reliable (and was not weighted). These each showed $/SF prices greater than most fairly new

average quality homes (the subjects are old and in poor condition). The remaining two sales includes one sale with generally similar location, but greatly superior in condition, and another from fairly far away and in average condition. The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 12%-13% for COS. The Special Magistrate notes that these two parcels are the least likely to be part of the greater economic unit. These two parcels can be sold off separately as single-family residences, creating minimal (or no) negative impact on the highest and best use of the remaining parcels in the greater economic unit. The Petitioner sold one in December of 2025, and the other he is using as a shed during his development process. He contended that this second parcel has no improvement value but has not conclusively proven that with his provided evidence.

28 After adjustment, these sales indicated a range of $78/SF to $94/SF adjusted including features (median $86/SF adjusted) for Key 00374482. The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($80/SF adjusted) $106,960 and that the subject IS over assessed.

29 After adjustment, these sales indicated a range of $100/SF to $109/SF adjusted including features (median $105/SF adjusted) for Key 00374525. The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($102/SF adjusted) $100,260 and that the subject IS NOT over assessed.

30 For the vacant parcels, the PAO supplied 11 land sales in 7 statistical grids. None of the sales presented had wetlands, none are located near the subject, 6 of the sites are cleared (most of the subject is fully wooded and would require clearing and grading), and only 1 is irregular in shape (these factors necessitating the negative shape factors already discussed).

31 Five of the subject parcels are far away, dry, cleared, rectangular and are smaller than 4 acres. These are not considered reliable and will not be weighted. The PAO supplied 3 wooded and larger sales (9.1 acres @ $67,582/acre, 20 acres @ $26,650/acre, & 40.3 acres @ $49,627/acre). The one 40.3-acre sale appears was purchased as part of a mining operation, the 20-acre sale has commercial road frontage, and the 9.1-acre sale appears to be an outlier on the high end.

32 The PAO also supplied some smaller wooded land sales (2.5 acres @ $56,000/acre, and 3.5 acres @ $48,571/acre), and one cleared sale (5.3 acres @ $53,733/acre).

33 The greater parent property includes approximately 36.9 acres of dry usable land (likely a bit less), that is oddly shaped, and any development would

require clearing grading and development around irregularly shaped wetlands. The above noted land sales tend to support a $50,000/dry acre land value, less 9% subject specific COS (the rate applied to the larger land parcel is less than what is appropriate (12%-13%) for the 2 smaller homes, that include appliances and can easily be sold separately), less a 15% size/scale adjustment or $38,675/dry acre. This still excludes the negative shape/utility factor from the meandering wetlands across the property, which are discussed on a per parcel basis.

34 The PAO sales data (marginally) credibly and reliably supports a just value for Key 01857066 of $111,770 and that the subject is over assessed (negative shape factor 15% (3.4 acres dry, and about 1.4 acres wet) ($38,675, less 15%, = $32,873 x 3.4 = $111,770).

35 The PAO sales data (marginally) credibly and reliably supports a just value for Key 01857075 of $92,820 and that the subject is over assessed (negative shape factor 20% (3.0 acres dry, and about 0.9 acres wet) ($38,675, less 20%, = $30,940 x 3.0 = $92,820).

36 The PAO sales data (marginally) credibly and reliably supports a just value for Key 00374552 of $700,194 and that the subject is over assessed (negative shape factor 15% (21.3 acres dry, and about 5.6 acres wet) ($38,675, less 15%, = $32,873 x 21.3 = $700,194).

37 The PAO sales data (marginally) credibly and reliably supports a just value for Key 00374543 of $127,627 and that the subject is over assessed (negative shape factor 0% (3.3 acres dry, and about 0.0 acres wet) ($38,675, less 0%, = $38,675 x 3.3 = $127,627).

38 The PAO sales data (marginally) credibly and reliably supports a just value for Key 00374393 of $137,200 and that the subject is over assessed (negative shape factor 17.5% (4.3 acres dry, and about 5.7 acres wet) ($38,675, less 17.5%, = $31,907 x 4.3 = $137,200).

39 The Petitioner contended that many parcels in the area are also wildly over assessed.

40 The Petitioner placed strong consideration on his $500,000 recent purchase for all parcels combined.

41 For Key 00374525, the Petitioner does not consider the building component to have any value. The Special Magistrate considers this frame home to be in likely better condition than the one that he recently sold, and that it does have contributory value.

42 The Petitioner supplied 4 land sales. Three of these transferred late in 2025 and no significant weight can be placed on these sale transactions. The Petitioner notes the assessment $/acre and the sale prices $/acre. These 2025 sales have not yet been qualified (decreasing the weight of this assessment comparison) but show a sale price / assessment ratio of 32%, 25%, 27%, and 156%. This suggests that several of these (including the subject, which was 32%) sale transactions might be considerably over assessed. No PRC's were supplied.

43 The Petitioner believes that it is appropriate to weight sales far past the lien date for ad valorem taxation. The Special Magistrate disagrees and considers this inappropriate in the vast majority of situations for ad valorem taxation in Florida.

44 The Petitioner supplied and stated that land sales are bought and sold on a "gross" basis, implying that the amount of wetlands and otherwise unbuildable land is "unimportant" in the purchase process. The Special Magistrate disagrees, and there certainly was not data to support this contention at hearing.

45 The Petitioner also supplied one relatively nearby 2022 land sale. No PRC, adjustment grid or map was supplied. This parcel transferred for $10,750/acre for 40 acres. Adjusting this sale upwards 18% for improving market conditions since 2022 this sale suggests a time adjusted equivalent $12,685/acre. The specifics of this parcel are unknown, greatly decreasing the reliability of this sale.

46 One of the Petitioner's 2025 land sales was a listing at $200,000 (12.53 acres dry, 15.37 acres wet) or $15,961/dry usable acre on the lien date. This parcel is adjacent to the subject.

47 The Petitioner has supported that the PAO is "probably" inconsistent in assessments of land in the area (likely overstated). However, this was insufficient to prove a specific value for the subject parcels. The Petitioner 2022 land sale and the land listing very marginally supports a range of $14,500 to $18,000/dry usable acre.

48 The Special Magistrate has weighted and considered the Petitioner and PAO data. The Petitioner has shown that the PAO values in the area are probably commonly overstated (overcoming the presumption of correctness) but has failed to supply sufficient credible and reliable data to support a specific value as of the lien date. The Special Magistrate will weight the recalculated Petitioner data 20% ($17,000/dry usable acre for the parcels not improved with a home). The recalculated PAO sales data will be weighted 80%. This also takes into account that some road and development costs would be required for the rear portions of the site to have adequate access and utilities

extended (compared to the smaller comparables that had much easier access to roads and utilities). The costs for that are not included, just the recognition of the development problem, relative to the sales data.

49 The PAO and Petitioner sales data (marginally) credibly and reliably supports a just value for Key 01857066 of $100,976 and that the subject IS over assessed.

50 The PAO and Petitioner sales data (marginally) credibly and reliably supports a just value for Key 01857075 of $84,456 and that the subject IS over assessed.

51 The PAO and Petitioner sales data (marginally) credibly and reliably supports a just value for Key 00374552 of $632,575 and that the subject IS over assessed.

52 The PAO and Petitioner sales data (marginally) credibly and reliably supports a just value for Key 00374543 of $113,321 and that the subject IS over assessed.

53 37 The PAO and Petitioner sales data (marginally) credibly and reliably supports a just value for Key 00374393 of $124,380 and that the subject IS over assessed.

54 For Key 00374482 the PAO sales indicate a credible and reliable just value for the subject of ($80/SF adjusted) $106,960 and that the subject IS over assessed.

55 For Key 00374525 the PAO sales indicate a credible and reliable just value for the subject of ($102/SF adjusted) $100,260 and that the subject IS NOT over assessed.

56 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 7-14% (cost of sales adjustment; estimated to be brokerage cost of 5-9%, personal property 0%, and financing costs of 2-5%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

57 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

58 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

59 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

60 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

61 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

"Factors to consider in deriving just valuation*. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;

The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."
The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID NOT establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Specifically, numerous small errors in analysis cumulatively made the analysis unreliable (numerous Criteria affected). Further, it is concluded that the methodology used by the PAO IS NOT appropriate and DOES NOT comply with professionally accepted appraisal practices for the subject property type.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS NOT reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be GRANTED in part with a reduction in the just value to $100,976 (Key 01857066).

Special Magistrate

	F	00374482
	G	00374525

SUMMARY OF EVIDENCE

1 The Petitioner, JAMES E TALLEY for ADVANTA IRA SERVICES LLC did appear before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The subject of this hearing is a group of 7 petitioned adjacent land parcels (2 of which have older single-family residences) totaling approximately 50.58 acres. Approximately 13.6 to 17.5 acres are wet and unusable (estimated via the PAO and GIS systems). The Petitioner purchased this group of parcels for an investment and later development of the land. The Petitioner contended that this is one greater economic unit and produced one valuation package for all 7 parcels combined. The PAO produced separate valuation packages for each Petitioned parcel, some of which are interior parcels. The Special Magistrate does concur that the subject is one economic unit. All of the parcels will be discussed herein and separate value recommendations for each will be provided.

3 For Key Number 01857066 the Property Appraiser shows a just value of $184,371 ($54,227/dry usable acre, (3.40 acres dry, 1.4 acres wet)), an assessed or capped value of $184,371, and a taxable value of $184,371. This parcel is located on Osowaw Blvd., Spring Hill FL (specific address not yet determined).

4 For Key Number 01857075 the Property Appraiser shows a just value of $162,630 ($54,210/dry usable acre, (3.0 acres dry, 0.9 acres wet)), an assessed or capped value of $162,630, and a taxable value of $162,630. This parcel is

located on Osowaw Blvd., Spring Hill FL (specific address not yet determined).

5 For Key Number 00374552 the Property Appraiser shows a just value of $853,586 ($40,074/dry usable acre, (21.3 acres dry, 5.6 acres wet)), an assessed or capped value of $853,586, and a taxable value of $853,586. This parcel is located on Osowaw Blvd., Spring Hill FL (specific address not yet determined).

6 For Key Number 00374543 the Property Appraiser shows a just value of $178,745 ($54,165/dry usable acre, (3.3 acres dry, 0.0 acres wet)), an assessed or capped value of $178,745, and a taxable value of $178,745. This parcel is located on Osowaw Blvd., Spring Hill FL (specific address not yet determined).

7 For Key Number 00374393 the Property Appraiser shows a just value of $164,411 ($38,235/dry usable acre, (4.3 acres dry, 5.7 acres wet)), an assessed or capped value of $164,411, and a taxable value of $164,411. This parcel is located on Indian Bay Rd., Spring Hill FL (specific address not yet determined).

8 For Key Number 00374482 the Property Appraiser shows a just value of $120,428 ($138/SF, or $90/SF adjusted, (0.6 acres dry, 0.0 acres wet, includes an old 872 SF home, 1,337 SF adjusted)), an assessed or capped value of $120,428, and a taxable value of $120,428. 1535 Osowaw Blvd., Spring Hill FL.

9 For Key Number 00374525 the Property Appraiser shows a just value of $91,419 ($110/SF, or $93/SF adjusted, (1.0 acres dry, 0.0 acres wet, includes an old 832 SF home, 983 SF adjusted)), an assessed or capped value of $91,419, and a taxable value of $91,419. The parcel is located at 1551 Osowaw Blvd., Spring Hill FL.

10 The Petitioner estimated value for all 7 parcels combined to be $520,000.

11 *Subject Property Type:* The subject includes 7 adjacent land parcels, 2 of which have older single-family homes (in generally poor condition). The individual parcel and building sizes were noted previously. The PAO notes the total of all 7 parcels at 36.90 acres dry and 13.60 acres wet (total 50.5 acres). The Petitioner notes a total of 50.58 acres and has, in writing, estimated the wet areas to be 16.50 acres (GIS system used) (verbally he stated 17.5 wet acres). No wetlands study was prepared by either party but a wetlands map and survey were provided.

12 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

13 The Petitioners' evidence consists of a petition, hearing notice, correspondence, sales data, settlement statement, wetlands map, survey, pictures maps, and verbal testimony.

14 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

15 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

16 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

17 The PAO performed their analysis utilizing adjusted SF in their sales analysis report for single-family homes. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

18 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average. A similar trend is expected for the underlying land.

19 The subject land and building improvements (all 7 parcels combined) transferred for $500,000 in March 2025. The facility was exposed to the market for 79 days. The settlement statement for this was not provided. This was a listing on the lien date and soon became a pending sale.

20 The Petitioner is a very experienced commercial appraiser (MAI) and a broker. He stated clearly that he is acting as a broker in his capacity at the hearing (meaning he can be an advocate for himself, and not an unbiased appraiser performing an appraisal assignment, which changes/clarifies his role at this hearing). He did not supply an appraisal related to this personal purchase.

21 For Key Number 00374482 the Property Appraiser shows a just value of $120,428 ($138/SF, or $90/SF adjusted, (0.6 acres dry, 0.0 acres wet, includes an old 872 SF home, 1,337 SF adjusted)). The Petitioner sold this property for $100,000 in December of 2025.

22 All parties agreed to incorporate by reference all evidence presented at hearing in the consideration of value for all of the parcels (i.e. sales data provided for any parcel can be used to consider value at any other of the petitioned parcels also, if applicable).

23 The Petitioner supplied a Wetlands Map and land/property survey. He personally estimated wetlands to total 16.5 acres (in writing) and 17.5 acres

(verbally) at hearing. The PAO did not disagree with the Petitioner, although their CAMA system used less wetlands areas in total (13.60). The Special Magistrate will utilize the per parcel PAO wetlands figures but will also employ a negative wetlands/shape factor applied by parcel. Effectively, the parcels development is negatively impacted by both the total amount of the wetlands, and their shape and location within an individual parcel, as well as how they are placed across the greater economic unit. As such, a "usable land area shape" factor needs to be estimated for each parcel.

24 For Key 01857066 negative shape factor 15% (1.4 or 2.75 acres wet), for Key 01857075 negative shape factor 20% (0.9 or 1.5 acres wet) (some likely fully lost dry land due to narrow dry frontage land that is probably not buildable), for Key 00374552 negative shape factor 15% (5.6 acres wet), for Key 00374543 negative shape factor 0% (0.0 acres wet), and for Key 00374393 negative shape factor 17.5% (5.7 or 7.1 acres wet). The first wetland figure is that used by the PAO, and the 2nd figure is that proposed by the Petitioner for reference purposes.

25 The PAO stated that they "had" to value all of the parcels separately and could not consider the 7 parcels a greater economic unit. The Special Magistrate disagrees. Criteria 2 (highest and best use) requires the PAO to consider these aspects, and the PAO can allocate value among the parcels after proper consideration of all 8 Criteria. This can be difficult at times during mass appraisal but proper consideration of HBU is certainly part of the 8 Criteria and proper appraisal practices.

26 The Petitioner contended that this is one greater economic unit (i.e. the highest and best use off all (or most) of the parcels as a whole is greater than their value separately). The Special Magistrate concurs. Part of this assumption is that land values are more uniform, consider the size of the overall greater parcel, and all parcels would benefit from the access / visibility, and other factors of the "whole" property (less focused on some of these factors for an individual parcel value). For instance, the greater property has access to 2 roads (Osowaw Rd, & Indian Bay Rd), the land locked parcel(s) have access across the other parcels, size/scale is approximately 50 acres, and the overall shape of the wetlands across the entire parcel needs to be considered as a whole. The Special Magistrate concurs with the Petitioner that the highest and best use (and value) is greater as a whole than as separate parcels. The Special Magistrate will make separate value recommendation for each parcel based on a logical allocation for each parcel individually.

27 The PAO supplied 4 improved sales on two statistical grids for the parcels improved with older single-family homes. Each of these homes could be sold off separately. One of them was sold off in December of 2025 for $100,000. Two sale(s) was/were an outlier or were too dissimilar to be reliable (and was not weighted). These each showed $/SF prices greater than most fairly new

average quality homes (the subjects are old and in poor condition). The remaining two sales includes one sale with generally similar location, but greatly superior in condition, and another from fairly far away and in average condition. The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 12%-13% for COS. The Special Magistrate notes that these two parcels are the least likely to be part of the greater economic unit. These two parcels can be sold off separately as single-family residences, creating minimal (or no) negative impact on the highest and best use of the remaining parcels in the greater economic unit. The Petitioner sold one in December of 2025, and the other he is using as a shed during his development process. He contended that this second parcel has no improvement value but has not conclusively proven that with his provided evidence.

28 After adjustment, these sales indicated a range of $78/SF to $94/SF adjusted including features (median $86/SF adjusted) for Key 00374482. The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($80/SF adjusted) $106,960 and that the subject IS over assessed.

29 After adjustment, these sales indicated a range of $100/SF to $109/SF adjusted including features (median $105/SF adjusted) for Key 00374525. The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($102/SF adjusted) $100,260 and that the subject IS NOT over assessed.

30 For the vacant parcels, the PAO supplied 11 land sales in 7 statistical grids. None of the sales presented had wetlands, none are located near the subject, 6 of the sites are cleared (most of the subject is fully wooded and would require clearing and grading), and only 1 is irregular in shape (these factors necessitating the negative shape factors already discussed).

31 Five of the subject parcels are far away, dry, cleared, rectangular and are smaller than 4 acres. These are not considered reliable and will not be weighted. The PAO supplied 3 wooded and larger sales (9.1 acres @ $67,582/acre, 20 acres @ $26,650/acre, & 40.3 acres @ $49,627/acre). The one 40.3-acre sale appears was purchased as part of a mining operation, the 20-acre sale has commercial road frontage, and the 9.1-acre sale appears to be an outlier on the high end.

32 The PAO also supplied some smaller wooded land sales (2.5 acres @ $56,000/acre, and 3.5 acres @ $48,571/acre), and one cleared sale (5.3 acres @ $53,733/acre).

33 The greater parent property includes approximately 36.9 acres of dry usable land (likely a bit less), that is oddly shaped, and any development would

require clearing grading and development around irregularly shaped wetlands. The above noted land sales tend to support a $50,000/dry acre land value, less 9% subject specific COS (the rate applied to the larger land parcel is less than what is appropriate (12%-13%) for the 2 smaller homes, that include appliances and can easily be sold separately), less a 15% size/scale adjustment or $38,675/dry acre. This still excludes the negative shape/utility factor from the meandering wetlands across the property, which are discussed on a per parcel basis.

34 The PAO sales data (marginally) credibly and reliably supports a just value for Key 01857066 of $111,770 and that the subject is over assessed (negative shape factor 15% (3.4 acres dry, and about 1.4 acres wet) ($38,675, less 15%, = $32,873 x 3.4 = $111,770).

35 The PAO sales data (marginally) credibly and reliably supports a just value for Key 01857075 of $92,820 and that the subject is over assessed (negative shape factor 20% (3.0 acres dry, and about 0.9 acres wet) ($38,675, less 20%, = $30,940 x 3.0 = $92,820).

36 The PAO sales data (marginally) credibly and reliably supports a just value for Key 00374552 of $700,194 and that the subject is over assessed (negative shape factor 15% (21.3 acres dry, and about 5.6 acres wet) ($38,675, less 15%, = $32,873 x 21.3 = $700,194).

37 The PAO sales data (marginally) credibly and reliably supports a just value for Key 00374543 of $127,627 and that the subject is over assessed (negative shape factor 0% (3.3 acres dry, and about 0.0 acres wet) ($38,675, less 0%, = $38,675 x 3.3 = $127,627).

38 The PAO sales data (marginally) credibly and reliably supports a just value for Key 00374393 of $137,200 and that the subject is over assessed (negative shape factor 17.5% (4.3 acres dry, and about 5.7 acres wet) ($38,675, less 17.5%, = $31,907 x 4.3 = $137,200).

39 The Petitioner contended that many parcels in the area are also wildly over assessed.

40 The Petitioner placed strong consideration on his $500,000 recent purchase for all parcels combined.

41 For Key 00374525, the Petitioner does not consider the building component to have any value. The Special Magistrate considers this frame home to be in likely better condition than the one that he recently sold, and that it does have contributory value.

42 The Petitioner supplied 4 land sales. Three of these transferred late in 2025 and no significant weight can be placed on these sale transactions. The Petitioner notes the assessment $/acre and the sale prices $/acre. These 2025 sales have not yet been qualified (decreasing the weight of this assessment comparison) but show a sale price / assessment ratio of 32%, 25%, 27%, and 156%. This suggests that several of these (including the subject, which was 32%) sale transactions might be considerably over assessed. No PRC's were supplied.

43 The Petitioner believes that it is appropriate to weight sales far past the lien date for ad valorem taxation. The Special Magistrate disagrees and considers this inappropriate in the vast majority of situations for ad valorem taxation in Florida.

44 The Petitioner supplied and stated that land sales are bought and sold on a "gross" basis, implying that the amount of wetlands and otherwise unbuildable land is "unimportant" in the purchase process. The Special Magistrate disagrees, and there certainly was not data to support this contention at hearing.

45 The Petitioner also supplied one relatively nearby 2022 land sale. No PRC, adjustment grid or map was supplied. This parcel transferred for $10,750/acre for 40 acres. Adjusting this sale upwards 18% for improving market conditions since 2022 this sale suggests a time adjusted equivalent $12,685/acre. The specifics of this parcel are unknown, greatly decreasing the reliability of this sale.

46 One of the Petitioner's 2025 land sales was a listing at $200,000 (12.53 acres dry, 15.37 acres wet) or $15,961/dry usable acre on the lien date. This parcel is adjacent to the subject.

47 The Petitioner has supported that the PAO is "probably" inconsistent in assessments of land in the area (likely overstated). However, this was insufficient to prove a specific value for the subject parcels. The Petitioner 2022 land sale and the land listing very marginally supports a range of $14,500 to $18,000/dry usable acre.

48 The Special Magistrate has weighted and considered the Petitioner and PAO data. The Petitioner has shown that the PAO values in the area are probably commonly overstated (overcoming the presumption of correctness) but has failed to supply sufficient credible and reliable data to support a specific value as of the lien date. The Special Magistrate will weight the recalculated Petitioner data 20% ($17,000/dry usable acre for the parcels not improved with a home). The recalculated PAO sales data will be weighted 80%. This also takes into account that some road and development costs would be required for the rear portions of the site to have adequate access and utilities

extended (compared to the smaller comparables that had much easier access to roads and utilities). The costs for that are not included, just the recognition of the development problem, relative to the sales data.

49 The PAO and Petitioner sales data (marginally) credibly and reliably supports a just value for Key 01857066 of $100,976 and that the subject IS over assessed.

50 The PAO and Petitioner sales data (marginally) credibly and reliably supports a just value for Key 01857075 of $84,456 and that the subject IS over assessed.

51 The PAO and Petitioner sales data (marginally) credibly and reliably supports a just value for Key 00374552 of $632,575 and that the subject IS over assessed.

52 The PAO and Petitioner sales data (marginally) credibly and reliably supports a just value for Key 00374543 of $113,321 and that the subject IS over assessed.

53 37 The PAO and Petitioner sales data (marginally) credibly and reliably supports a just value for Key 00374393 of $124,380 and that the subject IS over assessed.

54 For Key 00374482 the PAO sales indicate a credible and reliable just value for the subject of ($80/SF adjusted) $106,960 and that the subject IS over assessed.

55 For Key 00374525 the PAO sales indicate a credible and reliable just value for the subject of ($102/SF adjusted) $100,260 and that the subject IS NOT over assessed.

56 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 7-14% (cost of sales adjustment; estimated to be brokerage cost of 5-9%, personal property 0%, and financing costs of 2-5%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

57 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

58 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

59 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

60 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

61 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

"Factors to consider in deriving just valuation*. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;

The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."
The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID NOT establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Specifically, numerous small errors in analysis cumulatively made the analysis unreliable (numerous Criteria affected). Further, it is concluded that the methodology used by the PAO IS NOT appropriate and DOES NOT comply with professionally accepted appraisal practices for the subject property type.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS NOT reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be GRANTED in part with a reduction in the just value to $84,456 (Key 01857075).

Special Magistrate

	F	00374482
	G	00374525

SUMMARY OF EVIDENCE

1 The Petitioner, JAMES E TALLEY for ADVANTA IRA SERVICES LLC did appear before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The subject of this hearing is a group of 7 petitioned adjacent land parcels (2 of which have older single-family residences) totaling approximately 50.58 acres. Approximately 13.6 to 17.5 acres are wet and unusable (estimated via the PAO and GIS systems). The Petitioner purchased this group of parcels for an investment and later development of the land. The Petitioner contended that this is one greater economic unit and produced one valuation package for all 7 parcels combined. The PAO produced separate valuation packages for each Petitioned parcel, some of which are interior parcels. The Special Magistrate does concur that the subject is one economic unit. All of the parcels will be discussed herein and separate value recommendations for each will be provided.

3 For Key Number 01857066 the Property Appraiser shows a just value of $184,371 ($54,227/dry usable acre, (3.40 acres dry, 1.4 acres wet)), an assessed or capped value of $184,371, and a taxable value of $184,371. This parcel is located on Osowaw Blvd., Spring Hill FL (specific address not yet determined).

4 For Key Number 01857075 the Property Appraiser shows a just value of $162,630 ($54,210/dry usable acre, (3.0 acres dry, 0.9 acres wet)), an assessed or capped value of $162,630, and a taxable value of $162,630. This parcel is

located on Osowaw Blvd., Spring Hill FL (specific address not yet determined).

5 For Key Number 00374552 the Property Appraiser shows a just value of $853,586 ($40,074/dry usable acre, (21.3 acres dry, 5.6 acres wet)), an assessed or capped value of $853,586, and a taxable value of $853,586. This parcel is located on Osowaw Blvd., Spring Hill FL (specific address not yet determined).

6 For Key Number 00374543 the Property Appraiser shows a just value of $178,745 ($54,165/dry usable acre, (3.3 acres dry, 0.0 acres wet)), an assessed or capped value of $178,745, and a taxable value of $178,745. This parcel is located on Osowaw Blvd., Spring Hill FL (specific address not yet determined).

7 For Key Number 00374393 the Property Appraiser shows a just value of $164,411 ($38,235/dry usable acre, (4.3 acres dry, 5.7 acres wet)), an assessed or capped value of $164,411, and a taxable value of $164,411. This parcel is located on Indian Bay Rd., Spring Hill FL (specific address not yet determined).

8 For Key Number 00374482 the Property Appraiser shows a just value of $120,428 ($138/SF, or $90/SF adjusted, (0.6 acres dry, 0.0 acres wet, includes an old 872 SF home, 1,337 SF adjusted)), an assessed or capped value of $120,428, and a taxable value of $120,428. 1535 Osowaw Blvd., Spring Hill FL.

9 For Key Number 00374525 the Property Appraiser shows a just value of $91,419 ($110/SF, or $93/SF adjusted, (1.0 acres dry, 0.0 acres wet, includes an old 832 SF home, 983 SF adjusted)), an assessed or capped value of $91,419, and a taxable value of $91,419. The parcel is located at 1551 Osowaw Blvd., Spring Hill FL.

10 The Petitioner estimated value for all 7 parcels combined to be $520,000.

11 *Subject Property Type:* The subject includes 7 adjacent land parcels, 2 of which have older single-family homes (in generally poor condition). The individual parcel and building sizes were noted previously. The PAO notes the total of all 7 parcels at 36.90 acres dry and 13.60 acres wet (total 50.5 acres). The Petitioner notes a total of 50.58 acres and has, in writing, estimated the wet areas to be 16.50 acres (GIS system used) (verbally he stated 17.5 wet acres). No wetlands study was prepared by either party but a wetlands map and survey were provided.

12 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

13 The Petitioners' evidence consists of a petition, hearing notice, correspondence, sales data, settlement statement, wetlands map, survey, pictures maps, and verbal testimony.

14 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

15 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

16 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

17 The PAO performed their analysis utilizing adjusted SF in their sales analysis report for single-family homes. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

18 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average. A similar trend is expected for the underlying land.

19 The subject land and building improvements (all 7 parcels combined) transferred for $500,000 in March 2025. The facility was exposed to the market for 79 days. The settlement statement for this was not provided. This was a listing on the lien date and soon became a pending sale.

20 The Petitioner is a very experienced commercial appraiser (MAI) and a broker. He stated clearly that he is acting as a broker in his capacity at the hearing (meaning he can be an advocate for himself, and not an unbiased appraiser performing an appraisal assignment, which changes/clarifies his role at this hearing). He did not supply an appraisal related to this personal purchase.

21 For Key Number 00374482 the Property Appraiser shows a just value of $120,428 ($138/SF, or $90/SF adjusted, (0.6 acres dry, 0.0 acres wet, includes an old 872 SF home, 1,337 SF adjusted)). The Petitioner sold this property for $100,000 in December of 2025.

22 All parties agreed to incorporate by reference all evidence presented at hearing in the consideration of value for all of the parcels (i.e. sales data provided for any parcel can be used to consider value at any other of the petitioned parcels also, if applicable).

23 The Petitioner supplied a Wetlands Map and land/property survey. He personally estimated wetlands to total 16.5 acres (in writing) and 17.5 acres

(verbally) at hearing. The PAO did not disagree with the Petitioner, although their CAMA system used less wetlands areas in total (13.60). The Special Magistrate will utilize the per parcel PAO wetlands figures but will also employ a negative wetlands/shape factor applied by parcel. Effectively, the parcels development is negatively impacted by both the total amount of the wetlands, and their shape and location within an individual parcel, as well as how they are placed across the greater economic unit. As such, a "usable land area shape" factor needs to be estimated for each parcel.

24 For Key 01857066 negative shape factor 15% (1.4 or 2.75 acres wet), for Key 01857075 negative shape factor 20% (0.9 or 1.5 acres wet) (some likely fully lost dry land due to narrow dry frontage land that is probably not buildable), for Key 00374552 negative shape factor 15% (5.6 acres wet), for Key 00374543 negative shape factor 0% (0.0 acres wet), and for Key 00374393 negative shape factor 17.5% (5.7 or 7.1 acres wet). The first wetland figure is that used by the PAO, and the 2nd figure is that proposed by the Petitioner for reference purposes.

25 The PAO stated that they "had" to value all of the parcels separately and could not consider the 7 parcels a greater economic unit. The Special Magistrate disagrees. Criteria 2 (highest and best use) requires the PAO to consider these aspects, and the PAO can allocate value among the parcels after proper consideration of all 8 Criteria. This can be difficult at times during mass appraisal but proper consideration of HBU is certainly part of the 8 Criteria and proper appraisal practices.

26 The Petitioner contended that this is one greater economic unit (i.e. the highest and best use off all (or most) of the parcels as a whole is greater than their value separately). The Special Magistrate concurs. Part of this assumption is that land values are more uniform, consider the size of the overall greater parcel, and all parcels would benefit from the access / visibility, and other factors of the "whole" property (less focused on some of these factors for an individual parcel value). For instance, the greater property has access to 2 roads (Osowaw Rd, & Indian Bay Rd), the land locked parcel(s) have access across the other parcels, size/scale is approximately 50 acres, and the overall shape of the wetlands across the entire parcel needs to be considered as a whole. The Special Magistrate concurs with the Petitioner that the highest and best use (and value) is greater as a whole than as separate parcels. The Special Magistrate will make separate value recommendation for each parcel based on a logical allocation for each parcel individually.

27 The PAO supplied 4 improved sales on two statistical grids for the parcels improved with older single-family homes. Each of these homes could be sold off separately. One of them was sold off in December of 2025 for $100,000. Two sale(s) was/were an outlier or were too dissimilar to be reliable (and was not weighted). These each showed $/SF prices greater than most fairly new

average quality homes (the subjects are old and in poor condition). The remaining two sales includes one sale with generally similar location, but greatly superior in condition, and another from fairly far away and in average condition. The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 12%-13% for COS. The Special Magistrate notes that these two parcels are the least likely to be part of the greater economic unit. These two parcels can be sold off separately as single-family residences, creating minimal (or no) negative impact on the highest and best use of the remaining parcels in the greater economic unit. The Petitioner sold one in December of 2025, and the other he is using as a shed during his development process. He contended that this second parcel has no improvement value but has not conclusively proven that with his provided evidence.

28 After adjustment, these sales indicated a range of $78/SF to $94/SF adjusted including features (median $86/SF adjusted) for Key 00374482. The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($80/SF adjusted) $106,960 and that the subject IS over assessed.

29 After adjustment, these sales indicated a range of $100/SF to $109/SF adjusted including features (median $105/SF adjusted) for Key 00374525. The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($102/SF adjusted) $100,260 and that the subject IS NOT over assessed.

30 For the vacant parcels, the PAO supplied 11 land sales in 7 statistical grids. None of the sales presented had wetlands, none are located near the subject, 6 of the sites are cleared (most of the subject is fully wooded and would require clearing and grading), and only 1 is irregular in shape (these factors necessitating the negative shape factors already discussed).

31 Five of the subject parcels are far away, dry, cleared, rectangular and are smaller than 4 acres. These are not considered reliable and will not be weighted. The PAO supplied 3 wooded and larger sales (9.1 acres @ $67,582/acre, 20 acres @ $26,650/acre, & 40.3 acres @ $49,627/acre). The one 40.3-acre sale appears was purchased as part of a mining operation, the 20-acre sale has commercial road frontage, and the 9.1-acre sale appears to be an outlier on the high end.

32 The PAO also supplied some smaller wooded land sales (2.5 acres @ $56,000/acre, and 3.5 acres @ $48,571/acre), and one cleared sale (5.3 acres @ $53,733/acre).

33 The greater parent property includes approximately 36.9 acres of dry usable land (likely a bit less), that is oddly shaped, and any development would

require clearing grading and development around irregularly shaped wetlands. The above noted land sales tend to support a $50,000/dry acre land value, less 9% subject specific COS (the rate applied to the larger land parcel is less than what is appropriate (12%-13%) for the 2 smaller homes, that include appliances and can easily be sold separately), less a 15% size/scale adjustment or $38,675/dry acre. This still excludes the negative shape/utility factor from the meandering wetlands across the property, which are discussed on a per parcel basis.

34 The PAO sales data (marginally) credibly and reliably supports a just value for Key 01857066 of $111,770 and that the subject is over assessed (negative shape factor 15% (3.4 acres dry, and about 1.4 acres wet) ($38,675, less 15%, = $32,873 x 3.4 = $111,770).

35 The PAO sales data (marginally) credibly and reliably supports a just value for Key 01857075 of $92,820 and that the subject is over assessed (negative shape factor 20% (3.0 acres dry, and about 0.9 acres wet) ($38,675, less 20%, = $30,940 x 3.0 = $92,820).

36 The PAO sales data (marginally) credibly and reliably supports a just value for Key 00374552 of $700,194 and that the subject is over assessed (negative shape factor 15% (21.3 acres dry, and about 5.6 acres wet) ($38,675, less 15%, = $32,873 x 21.3 = $700,194).

37 The PAO sales data (marginally) credibly and reliably supports a just value for Key 00374543 of $127,627 and that the subject is over assessed (negative shape factor 0% (3.3 acres dry, and about 0.0 acres wet) ($38,675, less 0%, = $38,675 x 3.3 = $127,627).

38 The PAO sales data (marginally) credibly and reliably supports a just value for Key 00374393 of $137,200 and that the subject is over assessed (negative shape factor 17.5% (4.3 acres dry, and about 5.7 acres wet) ($38,675, less 17.5%, = $31,907 x 4.3 = $137,200).

39 The Petitioner contended that many parcels in the area are also wildly over assessed.

40 The Petitioner placed strong consideration on his $500,000 recent purchase for all parcels combined.

41 For Key 00374525, the Petitioner does not consider the building component to have any value. The Special Magistrate considers this frame home to be in likely better condition than the one that he recently sold, and that it does have contributory value.

42 The Petitioner supplied 4 land sales. Three of these transferred late in 2025 and no significant weight can be placed on these sale transactions. The Petitioner notes the assessment $/acre and the sale prices $/acre. These 2025 sales have not yet been qualified (decreasing the weight of this assessment comparison) but show a sale price / assessment ratio of 32%, 25%, 27%, and 156%. This suggests that several of these (including the subject, which was 32%) sale transactions might be considerably over assessed. No PRC's were supplied.

43 The Petitioner believes that it is appropriate to weight sales far past the lien date for ad valorem taxation. The Special Magistrate disagrees and considers this inappropriate in the vast majority of situations for ad valorem taxation in Florida.

44 The Petitioner supplied and stated that land sales are bought and sold on a "gross" basis, implying that the amount of wetlands and otherwise unbuildable land is "unimportant" in the purchase process. The Special Magistrate disagrees, and there certainly was not data to support this contention at hearing.

45 The Petitioner also supplied one relatively nearby 2022 land sale. No PRC, adjustment grid or map was supplied. This parcel transferred for $10,750/acre for 40 acres. Adjusting this sale upwards 18% for improving market conditions since 2022 this sale suggests a time adjusted equivalent $12,685/acre. The specifics of this parcel are unknown, greatly decreasing the reliability of this sale.

46 One of the Petitioner's 2025 land sales was a listing at $200,000 (12.53 acres dry, 15.37 acres wet) or $15,961/dry usable acre on the lien date. This parcel is adjacent to the subject.

47 The Petitioner has supported that the PAO is "probably" inconsistent in assessments of land in the area (likely overstated). However, this was insufficient to prove a specific value for the subject parcels. The Petitioner 2022 land sale and the land listing very marginally supports a range of $14,500 to $18,000/dry usable acre.

48 The Special Magistrate has weighted and considered the Petitioner and PAO data. The Petitioner has shown that the PAO values in the area are probably commonly overstated (overcoming the presumption of correctness) but has failed to supply sufficient credible and reliable data to support a specific value as of the lien date. The Special Magistrate will weight the recalculated Petitioner data 20% ($17,000/dry usable acre for the parcels not improved with a home). The recalculated PAO sales data will be weighted 80%. This also takes into account that some road and development costs would be required for the rear portions of the site to have adequate access and utilities

extended (compared to the smaller comparables that had much easier access to roads and utilities). The costs for that are not included, just the recognition of the development problem, relative to the sales data.

49 The PAO and Petitioner sales data (marginally) credibly and reliably supports a just value for Key 01857066 of $100,976 and that the subject IS over assessed.

50 The PAO and Petitioner sales data (marginally) credibly and reliably supports a just value for Key 01857075 of $84,456 and that the subject IS over assessed.

51 The PAO and Petitioner sales data (marginally) credibly and reliably supports a just value for Key 00374552 of $632,575 and that the subject IS over assessed.

52 The PAO and Petitioner sales data (marginally) credibly and reliably supports a just value for Key 00374543 of $113,321 and that the subject IS over assessed.

53 37 The PAO and Petitioner sales data (marginally) credibly and reliably supports a just value for Key 00374393 of $124,380 and that the subject IS over assessed.

54 For Key 00374482 the PAO sales indicate a credible and reliable just value for the subject of ($80/SF adjusted) $106,960 and that the subject IS over assessed.

55 For Key 00374525 the PAO sales indicate a credible and reliable just value for the subject of ($102/SF adjusted) $100,260 and that the subject IS NOT over assessed.

56 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 7-14% (cost of sales adjustment; estimated to be brokerage cost of 5-9%, personal property 0%, and financing costs of 2-5%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

57 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

58 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

59 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

60 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

61 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

"Factors to consider in deriving just valuation*. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;

The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."
The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID NOT establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Specifically, numerous small errors in analysis cumulatively made the analysis unreliable (numerous Criteria affected). Further, it is concluded that the methodology used by the PAO IS NOT appropriate and DOES NOT comply with professionally accepted appraisal practices for the subject property type.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS NOT reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be GRANTED in part with a reduction in the just value to $632,575 (Key 00374552).

	F	00374482
	G	00374525

SUMMARY OF EVIDENCE

1 The Petitioner, JAMES E TALLEY for ADVANTA IRA SERVICES LLC did appear before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The subject of this hearing is a group of 7 petitioned adjacent land parcels (2 of which have older single-family residences) totaling approximately 50.58 acres. Approximately 13.6 to 17.5 acres are wet and unusable (estimated via the PAO and GIS systems). The Petitioner purchased this group of parcels for an investment and later development of the land. The Petitioner contended that this is one greater economic unit and produced one valuation package for all 7 parcels combined. The PAO produced separate valuation packages for each Petitioned parcel, some of which are interior parcels. The Special Magistrate does concur that the subject is one economic unit. All of the parcels will be discussed herein and separate value recommendations for each will be provided.

3 For Key Number 01857066 the Property Appraiser shows a just value of $184,371 ($54,227/dry usable acre, (3.40 acres dry, 1.4 acres wet)), an assessed or capped value of $184,371, and a taxable value of $184,371. This parcel is located on Osowaw Blvd., Spring Hill FL (specific address not yet determined).

4 For Key Number 01857075 the Property Appraiser shows a just value of $162,630 ($54,210/dry usable acre, (3.0 acres dry, 0.9 acres wet)), an assessed or capped value of $162,630, and a taxable value of $162,630. This parcel is

located on Osowaw Blvd., Spring Hill FL (specific address not yet determined).

5 For Key Number 00374552 the Property Appraiser shows a just value of $853,586 ($40,074/dry usable acre, (21.3 acres dry, 5.6 acres wet)), an assessed or capped value of $853,586, and a taxable value of $853,586. This parcel is located on Osowaw Blvd., Spring Hill FL (specific address not yet determined).

6 For Key Number 00374543 the Property Appraiser shows a just value of $178,745 ($54,165/dry usable acre, (3.3 acres dry, 0.0 acres wet)), an assessed or capped value of $178,745, and a taxable value of $178,745. This parcel is located on Osowaw Blvd., Spring Hill FL (specific address not yet determined).

7 For Key Number 00374393 the Property Appraiser shows a just value of $164,411 ($38,235/dry usable acre, (4.3 acres dry, 5.7 acres wet)), an assessed or capped value of $164,411, and a taxable value of $164,411. This parcel is located on Indian Bay Rd., Spring Hill FL (specific address not yet determined).

8 For Key Number 00374482 the Property Appraiser shows a just value of $120,428 ($138/SF, or $90/SF adjusted, (0.6 acres dry, 0.0 acres wet, includes an old 872 SF home, 1,337 SF adjusted)), an assessed or capped value of $120,428, and a taxable value of $120,428. 1535 Osowaw Blvd., Spring Hill FL.

9 For Key Number 00374525 the Property Appraiser shows a just value of $91,419 ($110/SF, or $93/SF adjusted, (1.0 acres dry, 0.0 acres wet, includes an old 832 SF home, 983 SF adjusted)), an assessed or capped value of $91,419, and a taxable value of $91,419. The parcel is located at 1551 Osowaw Blvd., Spring Hill FL.

10 The Petitioner estimated value for all 7 parcels combined to be $520,000.

11 *Subject Property Type:* The subject includes 7 adjacent land parcels, 2 of which have older single-family homes (in generally poor condition). The individual parcel and building sizes were noted previously. The PAO notes the total of all 7 parcels at 36.90 acres dry and 13.60 acres wet (total 50.5 acres). The Petitioner notes a total of 50.58 acres and has, in writing, estimated the wet areas to be 16.50 acres (GIS system used) (verbally he stated 17.5 wet acres). No wetlands study was prepared by either party but a wetlands map and survey were provided.

12 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

13 The Petitioners' evidence consists of a petition, hearing notice, correspondence, sales data, settlement statement, wetlands map, survey, pictures maps, and verbal testimony.

14 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

15 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

16 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

17 The PAO performed their analysis utilizing adjusted SF in their sales analysis report for single-family homes. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

18 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average. A similar trend is expected for the underlying land.

19 The subject land and building improvements (all 7 parcels combined) transferred for $500,000 in March 2025. The facility was exposed to the market for 79 days. The settlement statement for this was not provided. This was a listing on the lien date and soon became a pending sale.

20 The Petitioner is a very experienced commercial appraiser (MAI) and a broker. He stated clearly that he is acting as a broker in his capacity at the hearing (meaning he can be an advocate for himself, and not an unbiased appraiser performing an appraisal assignment, which changes/clarifies his role at this hearing). He did not supply an appraisal related to this personal purchase.

21 For Key Number 00374482 the Property Appraiser shows a just value of $120,428 ($138/SF, or $90/SF adjusted, (0.6 acres dry, 0.0 acres wet, includes an old 872 SF home, 1,337 SF adjusted)). The Petitioner sold this property for $100,000 in December of 2025.

22 All parties agreed to incorporate by reference all evidence presented at hearing in the consideration of value for all of the parcels (i.e. sales data provided for any parcel can be used to consider value at any other of the petitioned parcels also, if applicable).

23 The Petitioner supplied a Wetlands Map and land/property survey. He personally estimated wetlands to total 16.5 acres (in writing) and 17.5 acres

(verbally) at hearing. The PAO did not disagree with the Petitioner, although their CAMA system used less wetlands areas in total (13.60). The Special Magistrate will utilize the per parcel PAO wetlands figures but will also employ a negative wetlands/shape factor applied by parcel. Effectively, the parcels development is negatively impacted by both the total amount of the wetlands, and their shape and location within an individual parcel, as well as how they are placed across the greater economic unit. As such, a "usable land area shape" factor needs to be estimated for each parcel.

24 For Key 01857066 negative shape factor 15% (1.4 or 2.75 acres wet), for Key 01857075 negative shape factor 20% (0.9 or 1.5 acres wet) (some likely fully lost dry land due to narrow dry frontage land that is probably not buildable), for Key 00374552 negative shape factor 15% (5.6 acres wet), for Key 00374543 negative shape factor 0% (0.0 acres wet), and for Key 00374393 negative shape factor 17.5% (5.7 or 7.1 acres wet). The first wetland figure is that used by the PAO, and the 2nd figure is that proposed by the Petitioner for reference purposes.

25 The PAO stated that they "had" to value all of the parcels separately and could not consider the 7 parcels a greater economic unit. The Special Magistrate disagrees. Criteria 2 (highest and best use) requires the PAO to consider these aspects, and the PAO can allocate value among the parcels after proper consideration of all 8 Criteria. This can be difficult at times during mass appraisal but proper consideration of HBU is certainly part of the 8 Criteria and proper appraisal practices.

26 The Petitioner contended that this is one greater economic unit (i.e. the highest and best use off all (or most) of the parcels as a whole is greater than their value separately). The Special Magistrate concurs. Part of this assumption is that land values are more uniform, consider the size of the overall greater parcel, and all parcels would benefit from the access / visibility, and other factors of the "whole" property (less focused on some of these factors for an individual parcel value). For instance, the greater property has access to 2 roads (Osowaw Rd, & Indian Bay Rd), the land locked parcel(s) have access across the other parcels, size/scale is approximately 50 acres, and the overall shape of the wetlands across the entire parcel needs to be considered as a whole. The Special Magistrate concurs with the Petitioner that the highest and best use (and value) is greater as a whole than as separate parcels. The Special Magistrate will make separate value recommendation for each parcel based on a logical allocation for each parcel individually.

27 The PAO supplied 4 improved sales on two statistical grids for the parcels improved with older single-family homes. Each of these homes could be sold off separately. One of them was sold off in December of 2025 for $100,000. Two sale(s) was/were an outlier or were too dissimilar to be reliable (and was not weighted). These each showed $/SF prices greater than most fairly new

average quality homes (the subjects are old and in poor condition). The remaining two sales includes one sale with generally similar location, but greatly superior in condition, and another from fairly far away and in average condition. The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 12%-13% for COS. The Special Magistrate notes that these two parcels are the least likely to be part of the greater economic unit. These two parcels can be sold off separately as single-family residences, creating minimal (or no) negative impact on the highest and best use of the remaining parcels in the greater economic unit. The Petitioner sold one in December of 2025, and the other he is using as a shed during his development process. He contended that this second parcel has no improvement value but has not conclusively proven that with his provided evidence.

28 After adjustment, these sales indicated a range of $78/SF to $94/SF adjusted including features (median $86/SF adjusted) for Key 00374482. The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($80/SF adjusted) $106,960 and that the subject IS over assessed.

29 After adjustment, these sales indicated a range of $100/SF to $109/SF adjusted including features (median $105/SF adjusted) for Key 00374525. The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($102/SF adjusted) $100,260 and that the subject IS NOT over assessed.

30 For the vacant parcels, the PAO supplied 11 land sales in 7 statistical grids. None of the sales presented had wetlands, none are located near the subject, 6 of the sites are cleared (most of the subject is fully wooded and would require clearing and grading), and only 1 is irregular in shape (these factors necessitating the negative shape factors already discussed).

31 Five of the subject parcels are far away, dry, cleared, rectangular and are smaller than 4 acres. These are not considered reliable and will not be weighted. The PAO supplied 3 wooded and larger sales (9.1 acres @ $67,582/acre, 20 acres @ $26,650/acre, & 40.3 acres @ $49,627/acre). The one 40.3-acre sale appears was purchased as part of a mining operation, the 20-acre sale has commercial road frontage, and the 9.1-acre sale appears to be an outlier on the high end.

32 The PAO also supplied some smaller wooded land sales (2.5 acres @ $56,000/acre, and 3.5 acres @ $48,571/acre), and one cleared sale (5.3 acres @ $53,733/acre).

33 The greater parent property includes approximately 36.9 acres of dry usable land (likely a bit less), that is oddly shaped, and any development would

require clearing grading and development around irregularly shaped wetlands. The above noted land sales tend to support a $50,000/dry acre land value, less 9% subject specific COS (the rate applied to the larger land parcel is less than what is appropriate (12%-13%) for the 2 smaller homes, that include appliances and can easily be sold separately), less a 15% size/scale adjustment or $38,675/dry acre. This still excludes the negative shape/utility factor from the meandering wetlands across the property, which are discussed on a per parcel basis.

34 The PAO sales data (marginally) credibly and reliably supports a just value for Key 01857066 of $111,770 and that the subject is over assessed (negative shape factor 15% (3.4 acres dry, and about 1.4 acres wet) ($38,675, less 15%, = $32,873 x 3.4 = $111,770).

35 The PAO sales data (marginally) credibly and reliably supports a just value for Key 01857075 of $92,820 and that the subject is over assessed (negative shape factor 20% (3.0 acres dry, and about 0.9 acres wet) ($38,675, less 20%, = $30,940 x 3.0 = $92,820).

36 The PAO sales data (marginally) credibly and reliably supports a just value for Key 00374552 of $700,194 and that the subject is over assessed (negative shape factor 15% (21.3 acres dry, and about 5.6 acres wet) ($38,675, less 15%, = $32,873 x 21.3 = $700,194).

37 The PAO sales data (marginally) credibly and reliably supports a just value for Key 00374543 of $127,627 and that the subject is over assessed (negative shape factor 0% (3.3 acres dry, and about 0.0 acres wet) ($38,675, less 0%, = $38,675 x 3.3 = $127,627).

38 The PAO sales data (marginally) credibly and reliably supports a just value for Key 00374393 of $137,200 and that the subject is over assessed (negative shape factor 17.5% (4.3 acres dry, and about 5.7 acres wet) ($38,675, less 17.5%, = $31,907 x 4.3 = $137,200).

39 The Petitioner contended that many parcels in the area are also wildly over assessed.

40 The Petitioner placed strong consideration on his $500,000 recent purchase for all parcels combined.

41 For Key 00374525, the Petitioner does not consider the building component to have any value. The Special Magistrate considers this frame home to be in likely better condition than the one that he recently sold, and that it does have contributory value.

42 The Petitioner supplied 4 land sales. Three of these transferred late in 2025 and no significant weight can be placed on these sale transactions. The Petitioner notes the assessment $/acre and the sale prices $/acre. These 2025 sales have not yet been qualified (decreasing the weight of this assessment comparison) but show a sale price / assessment ratio of 32%, 25%, 27%, and 156%. This suggests that several of these (including the subject, which was 32%) sale transactions might be considerably over assessed. No PRC's were supplied.

43 The Petitioner believes that it is appropriate to weight sales far past the lien date for ad valorem taxation. The Special Magistrate disagrees and considers this inappropriate in the vast majority of situations for ad valorem taxation in Florida.

44 The Petitioner supplied and stated that land sales are bought and sold on a "gross" basis, implying that the amount of wetlands and otherwise unbuildable land is "unimportant" in the purchase process. The Special Magistrate disagrees, and there certainly was not data to support this contention at hearing.

45 The Petitioner also supplied one relatively nearby 2022 land sale. No PRC, adjustment grid or map was supplied. This parcel transferred for $10,750/acre for 40 acres. Adjusting this sale upwards 18% for improving market conditions since 2022 this sale suggests a time adjusted equivalent $12,685/acre. The specifics of this parcel are unknown, greatly decreasing the reliability of this sale.

46 One of the Petitioner's 2025 land sales was a listing at $200,000 (12.53 acres dry, 15.37 acres wet) or $15,961/dry usable acre on the lien date. This parcel is adjacent to the subject.

47 The Petitioner has supported that the PAO is "probably" inconsistent in assessments of land in the area (likely overstated). However, this was insufficient to prove a specific value for the subject parcels. The Petitioner 2022 land sale and the land listing very marginally supports a range of $14,500 to $18,000/dry usable acre.

48 The Special Magistrate has weighted and considered the Petitioner and PAO data. The Petitioner has shown that the PAO values in the area are probably commonly overstated (overcoming the presumption of correctness) but has failed to supply sufficient credible and reliable data to support a specific value as of the lien date. The Special Magistrate will weight the recalculated Petitioner data 20% ($17,000/dry usable acre for the parcels not improved with a home). The recalculated PAO sales data will be weighted 80%. This also takes into account that some road and development costs would be required for the rear portions of the site to have adequate access and utilities

extended (compared to the smaller comparables that had much easier access to roads and utilities). The costs for that are not included, just the recognition of the development problem, relative to the sales data.

49 The PAO and Petitioner sales data (marginally) credibly and reliably supports a just value for Key 01857066 of $100,976 and that the subject IS over assessed.

50 The PAO and Petitioner sales data (marginally) credibly and reliably supports a just value for Key 01857075 of $84,456 and that the subject IS over assessed.

51 The PAO and Petitioner sales data (marginally) credibly and reliably supports a just value for Key 00374552 of $632,575 and that the subject IS over assessed.

52 The PAO and Petitioner sales data (marginally) credibly and reliably supports a just value for Key 00374543 of $113,321 and that the subject IS over assessed.

53 37 The PAO and Petitioner sales data (marginally) credibly and reliably supports a just value for Key 00374393 of $124,380 and that the subject IS over assessed.

54 For Key 00374482 the PAO sales indicate a credible and reliable just value for the subject of ($80/SF adjusted) $106,960 and that the subject IS over assessed.

55 For Key 00374525 the PAO sales indicate a credible and reliable just value for the subject of ($102/SF adjusted) $100,260 and that the subject IS NOT over assessed.

56 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 7-14% (cost of sales adjustment; estimated to be brokerage cost of 5-9%, personal property 0%, and financing costs of 2-5%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

57 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

58 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

59 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

60 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

61 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

"Factors to consider in deriving just valuation*. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;

The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."
The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID NOT establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Specifically, numerous small errors in analysis cumulatively made the analysis unreliable (numerous Criteria affected). Further, it is concluded that the methodology used by the PAO IS NOT appropriate and DOES NOT comply with professionally accepted appraisal practices for the subject property type.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS NOT reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be GRANTED in part with a reduction in the just value to $113,321 (Key 00374543).

Special Magistrate

	G	00374525

SUMMARY OF EVIDENCE

1 The Petitioner, JAMES E TALLEY for ADVANTA IRA SERVICES LLC did appear before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The subject of this hearing is a group of 7 petitioned adjacent land parcels (2 of which have older single-family residences) totaling approximately 50.58 acres. Approximately 13.6 to 17.5 acres are wet and unusable (estimated via the PAO and GIS systems). The Petitioner purchased this group of parcels for an investment and later development of the land. The Petitioner contended that this is one greater economic unit and produced one valuation package for all 7 parcels combined. The PAO produced separate valuation packages for each Petitioned parcel, some of which are interior parcels. The Special Magistrate does concur that the subject is one economic unit. All of the parcels will be discussed herein and separate value recommendations for each will be provided.

3 For Key Number 01857066 the Property Appraiser shows a just value of $184,371 ($54,227/dry usable acre, (3.40 acres dry, 1.4 acres wet)), an assessed or capped value of $184,371, and a taxable value of $184,371. This parcel is located on Osowaw Blvd., Spring Hill FL (specific address not yet determined).

4 For Key Number 01857075 the Property Appraiser shows a just value of $162,630 ($54,210/dry usable acre, (3.0 acres dry, 0.9 acres wet)), an assessed or capped value of $162,630, and a taxable value of $162,630. This parcel is

located on Osowaw Blvd., Spring Hill FL (specific address not yet determined).

5 For Key Number 00374552 the Property Appraiser shows a just value of $853,586 ($40,074/dry usable acre, (21.3 acres dry, 5.6 acres wet)), an assessed or capped value of $853,586, and a taxable value of $853,586. This parcel is located on Osowaw Blvd., Spring Hill FL (specific address not yet determined).

6 For Key Number 00374543 the Property Appraiser shows a just value of $178,745 ($54,165/dry usable acre, (3.3 acres dry, 0.0 acres wet)), an assessed or capped value of $178,745, and a taxable value of $178,745. This parcel is located on Osowaw Blvd., Spring Hill FL (specific address not yet determined).

7 For Key Number 00374393 the Property Appraiser shows a just value of $164,411 ($38,235/dry usable acre, (4.3 acres dry, 5.7 acres wet)), an assessed or capped value of $164,411, and a taxable value of $164,411. This parcel is located on Indian Bay Rd., Spring Hill FL (specific address not yet determined).

8 For Key Number 00374482 the Property Appraiser shows a just value of $120,428 ($138/SF, or $90/SF adjusted, (0.6 acres dry, 0.0 acres wet, includes an old 872 SF home, 1,337 SF adjusted)), an assessed or capped value of $120,428, and a taxable value of $120,428. 1535 Osowaw Blvd., Spring Hill FL.

9 For Key Number 00374525 the Property Appraiser shows a just value of $91,419 ($110/SF, or $93/SF adjusted, (1.0 acres dry, 0.0 acres wet, includes an old 832 SF home, 983 SF adjusted)), an assessed or capped value of $91,419, and a taxable value of $91,419. The parcel is located at 1551 Osowaw Blvd., Spring Hill FL.

10 The Petitioner estimated value for all 7 parcels combined to be $520,000.

11 *Subject Property Type:* The subject includes 7 adjacent land parcels, 2 of which have older single-family homes (in generally poor condition). The individual parcel and building sizes were noted previously. The PAO notes the total of all 7 parcels at 36.90 acres dry and 13.60 acres wet (total 50.5 acres). The Petitioner notes a total of 50.58 acres and has, in writing, estimated the wet areas to be 16.50 acres (GIS system used) (verbally he stated 17.5 wet acres). No wetlands study was prepared by either party but a wetlands map and survey were provided.

12 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

13 The Petitioners' evidence consists of a petition, hearing notice, correspondence, sales data, settlement statement, wetlands map, survey, pictures maps, and verbal testimony.

14 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

15 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

16 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

17 The PAO performed their analysis utilizing adjusted SF in their sales analysis report for single-family homes. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

18 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average. A similar trend is expected for the underlying land.

19 The subject land and building improvements (all 7 parcels combined) transferred for $500,000 in March 2025. The facility was exposed to the market for 79 days. The settlement statement for this was not provided. This was a listing on the lien date and soon became a pending sale.

20 The Petitioner is a very experienced commercial appraiser (MAI) and a broker. He stated clearly that he is acting as a broker in his capacity at the hearing (meaning he can be an advocate for himself, and not an unbiased appraiser performing an appraisal assignment, which changes/clarifies his role at this hearing). He did not supply an appraisal related to this personal purchase.

21 For Key Number 00374482 the Property Appraiser shows a just value of $120,428 ($138/SF, or $90/SF adjusted, (0.6 acres dry, 0.0 acres wet, includes an old 872 SF home, 1,337 SF adjusted)). The Petitioner sold this property for $100,000 in December of 2025.

22 All parties agreed to incorporate by reference all evidence presented at hearing in the consideration of value for all of the parcels (i.e. sales data provided for any parcel can be used to consider value at any other of the petitioned parcels also, if applicable).

23 The Petitioner supplied a Wetlands Map and land/property survey. He personally estimated wetlands to total 16.5 acres (in writing) and 17.5 acres

(verbally) at hearing. The PAO did not disagree with the Petitioner, although their CAMA system used less wetlands areas in total (13.60). The Special Magistrate will utilize the per parcel PAO wetlands figures but will also employ a negative wetlands/shape factor applied by parcel. Effectively, the parcels development is negatively impacted by both the total amount of the wetlands, and their shape and location within an individual parcel, as well as how they are placed across the greater economic unit. As such, a "usable land area shape" factor needs to be estimated for each parcel.

24 For Key 01857066 negative shape factor 15% (1.4 or 2.75 acres wet), for Key 01857075 negative shape factor 20% (0.9 or 1.5 acres wet) (some likely fully lost dry land due to narrow dry frontage land that is probably not buildable), for Key 00374552 negative shape factor 15% (5.6 acres wet), for Key 00374543 negative shape factor 0% (0.0 acres wet), and for Key 00374393 negative shape factor 17.5% (5.7 or 7.1 acres wet). The first wetland figure is that used by the PAO, and the 2nd figure is that proposed by the Petitioner for reference purposes.

25 The PAO stated that they "had" to value all of the parcels separately and could not consider the 7 parcels a greater economic unit. The Special Magistrate disagrees. Criteria 2 (highest and best use) requires the PAO to consider these aspects, and the PAO can allocate value among the parcels after proper consideration of all 8 Criteria. This can be difficult at times during mass appraisal but proper consideration of HBU is certainly part of the 8 Criteria and proper appraisal practices.

26 The Petitioner contended that this is one greater economic unit (i.e. the highest and best use off all (or most) of the parcels as a whole is greater than their value separately). The Special Magistrate concurs. Part of this assumption is that land values are more uniform, consider the size of the overall greater parcel, and all parcels would benefit from the access / visibility, and other factors of the "whole" property (less focused on some of these factors for an individual parcel value). For instance, the greater property has access to 2 roads (Osowaw Rd, & Indian Bay Rd), the land locked parcel(s) have access across the other parcels, size/scale is approximately 50 acres, and the overall shape of the wetlands across the entire parcel needs to be considered as a whole. The Special Magistrate concurs with the Petitioner that the highest and best use (and value) is greater as a whole than as separate parcels. The Special Magistrate will make separate value recommendation for each parcel based on a logical allocation for each parcel individually.

27 The PAO supplied 4 improved sales on two statistical grids for the parcels improved with older single-family homes. Each of these homes could be sold off separately. One of them was sold off in December of 2025 for $100,000. Two sale(s) was/were an outlier or were too dissimilar to be reliable (and was not weighted). These each showed $/SF prices greater than most fairly new

average quality homes (the subjects are old and in poor condition). The remaining two sales includes one sale with generally similar location, but greatly superior in condition, and another from fairly far away and in average condition. The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 12%-13% for COS. The Special Magistrate notes that these two parcels are the least likely to be part of the greater economic unit. These two parcels can be sold off separately as single-family residences, creating minimal (or no) negative impact on the highest and best use of the remaining parcels in the greater economic unit. The Petitioner sold one in December of 2025, and the other he is using as a shed during his development process. He contended that this second parcel has no improvement value but has not conclusively proven that with his provided evidence.

28 After adjustment, these sales indicated a range of $78/SF to $94/SF adjusted including features (median $86/SF adjusted) for Key 00374482. The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($80/SF adjusted) $106,960 and that the subject IS over assessed.

29 After adjustment, these sales indicated a range of $100/SF to $109/SF adjusted including features (median $105/SF adjusted) for Key 00374525. The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($102/SF adjusted) $100,260 and that the subject IS NOT over assessed.

30 For the vacant parcels, the PAO supplied 11 land sales in 7 statistical grids. None of the sales presented had wetlands, none are located near the subject, 6 of the sites are cleared (most of the subject is fully wooded and would require clearing and grading), and only 1 is irregular in shape (these factors necessitating the negative shape factors already discussed).

31 Five of the subject parcels are far away, dry, cleared, rectangular and are smaller than 4 acres. These are not considered reliable and will not be weighted. The PAO supplied 3 wooded and larger sales (9.1 acres @ $67,582/acre, 20 acres @ $26,650/acre, & 40.3 acres @ $49,627/acre). The one 40.3-acre sale appears was purchased as part of a mining operation, the 20-acre sale has commercial road frontage, and the 9.1-acre sale appears to be an outlier on the high end.

32 The PAO also supplied some smaller wooded land sales (2.5 acres @ $56,000/acre, and 3.5 acres @ $48,571/acre), and one cleared sale (5.3 acres @ $53,733/acre).

33 The greater parent property includes approximately 36.9 acres of dry usable land (likely a bit less), that is oddly shaped, and any development would

require clearing grading and development around irregularly shaped wetlands. The above noted land sales tend to support a $50,000/dry acre land value, less 9% subject specific COS (the rate applied to the larger land parcel is less than what is appropriate (12%-13%) for the 2 smaller homes, that include appliances and can easily be sold separately), less a 15% size/scale adjustment or $38,675/dry acre. This still excludes the negative shape/utility factor from the meandering wetlands across the property, which are discussed on a per parcel basis.

34 The PAO sales data (marginally) credibly and reliably supports a just value for Key 01857066 of $111,770 and that the subject is over assessed (negative shape factor 15% (3.4 acres dry, and about 1.4 acres wet) ($38,675, less 15%, = $32,873 x 3.4 = $111,770).

35 The PAO sales data (marginally) credibly and reliably supports a just value for Key 01857075 of $92,820 and that the subject is over assessed (negative shape factor 20% (3.0 acres dry, and about 0.9 acres wet) ($38,675, less 20%, = $30,940 x 3.0 = $92,820).

36 The PAO sales data (marginally) credibly and reliably supports a just value for Key 00374552 of $700,194 and that the subject is over assessed (negative shape factor 15% (21.3 acres dry, and about 5.6 acres wet) ($38,675, less 15%, = $32,873 x 21.3 = $700,194).

37 The PAO sales data (marginally) credibly and reliably supports a just value for Key 00374543 of $127,627 and that the subject is over assessed (negative shape factor 0% (3.3 acres dry, and about 0.0 acres wet) ($38,675, less 0%, = $38,675 x 3.3 = $127,627).

38 The PAO sales data (marginally) credibly and reliably supports a just value for Key 00374393 of $137,200 and that the subject is over assessed (negative shape factor 17.5% (4.3 acres dry, and about 5.7 acres wet) ($38,675, less 17.5%, = $31,907 x 4.3 = $137,200).

39 The Petitioner contended that many parcels in the area are also wildly over assessed.

40 The Petitioner placed strong consideration on his $500,000 recent purchase for all parcels combined.

41 For Key 00374525, the Petitioner does not consider the building component to have any value. The Special Magistrate considers this frame home to be in likely better condition than the one that he recently sold, and that it does have contributory value.

42 The Petitioner supplied 4 land sales. Three of these transferred late in 2025 and no significant weight can be placed on these sale transactions. The Petitioner notes the assessment $/acre and the sale prices $/acre. These 2025 sales have not yet been qualified (decreasing the weight of this assessment comparison) but show a sale price / assessment ratio of 32%, 25%, 27%, and 156%. This suggests that several of these (including the subject, which was 32%) sale transactions might be considerably over assessed. No PRC's were supplied.

43 The Petitioner believes that it is appropriate to weight sales far past the lien date for ad valorem taxation. The Special Magistrate disagrees and considers this inappropriate in the vast majority of situations for ad valorem taxation in Florida.

44 The Petitioner supplied and stated that land sales are bought and sold on a "gross" basis, implying that the amount of wetlands and otherwise unbuildable land is "unimportant" in the purchase process. The Special Magistrate disagrees, and there certainly was not data to support this contention at hearing.

45 The Petitioner also supplied one relatively nearby 2022 land sale. No PRC, adjustment grid or map was supplied. This parcel transferred for $10,750/acre for 40 acres. Adjusting this sale upwards 18% for improving market conditions since 2022 this sale suggests a time adjusted equivalent $12,685/acre. The specifics of this parcel are unknown, greatly decreasing the reliability of this sale.

46 One of the Petitioner's 2025 land sales was a listing at $200,000 (12.53 acres dry, 15.37 acres wet) or $15,961/dry usable acre on the lien date. This parcel is adjacent to the subject.

47 The Petitioner has supported that the PAO is "probably" inconsistent in assessments of land in the area (likely overstated). However, this was insufficient to prove a specific value for the subject parcels. The Petitioner 2022 land sale and the land listing very marginally supports a range of $14,500 to $18,000/dry usable acre.

48 The Special Magistrate has weighted and considered the Petitioner and PAO data. The Petitioner has shown that the PAO values in the area are probably commonly overstated (overcoming the presumption of correctness) but has failed to supply sufficient credible and reliable data to support a specific value as of the lien date. The Special Magistrate will weight the recalculated Petitioner data 20% ($17,000/dry usable acre for the parcels not improved with a home). The recalculated PAO sales data will be weighted 80%. This also takes into account that some road and development costs would be required for the rear portions of the site to have adequate access and utilities

extended (compared to the smaller comparables that had much easier access to roads and utilities). The costs for that are not included, just the recognition of the development problem, relative to the sales data.

49 The PAO and Petitioner sales data (marginally) credibly and reliably supports a just value for Key 01857066 of $100,976 and that the subject IS over assessed.

50 The PAO and Petitioner sales data (marginally) credibly and reliably supports a just value for Key 01857075 of $84,456 and that the subject IS over assessed.

51 The PAO and Petitioner sales data (marginally) credibly and reliably supports a just value for Key 00374552 of $632,575 and that the subject IS over assessed.

52 The PAO and Petitioner sales data (marginally) credibly and reliably supports a just value for Key 00374543 of $113,321 and that the subject IS over assessed.

53 37 The PAO and Petitioner sales data (marginally) credibly and reliably supports a just value for Key 00374393 of $124,380 and that the subject IS over assessed.

54 For Key 00374482 the PAO sales indicate a credible and reliable just value for the subject of ($80/SF adjusted) $106,960 and that the subject IS over assessed.

55 For Key 00374525 the PAO sales indicate a credible and reliable just value for the subject of ($102/SF adjusted) $100,260 and that the subject IS NOT over assessed.

56 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 7-14% (cost of sales adjustment; estimated to be brokerage cost of 5-9%, personal property 0%, and financing costs of 2-5%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

57 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

58 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

59 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

60 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

61 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

"Factors to consider in deriving just valuation*. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;

The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."
The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID NOT establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Specifically, numerous small errors in analysis cumulatively made the analysis unreliable (numerous Criteria affected). Further, it is concluded that the methodology used by the PAO IS NOT appropriate and DOES NOT comply with professionally accepted appraisal practices for the subject property type.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS NOT reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be GRANTED in part with a reduction in the just value to $124,380 (Key 00374393).

	F	00374482
	G	00374525

SUMMARY OF EVIDENCE

1 The Petitioner, JAMES E TALLEY for ADVANTA IRA SERVICES LLC did appear before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The subject of this hearing is a group of 7 petitioned adjacent land parcels (2 of which have older single-family residences) totaling approximately 50.58 acres. Approximately 13.6 to 17.5 acres are wet and unusable (estimated via the PAO and GIS systems). The Petitioner purchased this group of parcels for an investment and later development of the land. The Petitioner contended that this is one greater economic unit and produced one valuation package for all 7 parcels combined. The PAO produced separate valuation packages for each Petitioned parcel, some of which are interior parcels. The Special Magistrate does concur that the subject is one economic unit. All of the parcels will be discussed herein and separate value recommendations for each will be provided.

3 For Key Number 01857066 the Property Appraiser shows a just value of $184,371 ($54,227/dry usable acre, (3.40 acres dry, 1.4 acres wet)), an assessed or capped value of $184,371, and a taxable value of $184,371. This parcel is located on Osowaw Blvd., Spring Hill FL (specific address not yet determined).

4 For Key Number 01857075 the Property Appraiser shows a just value of $162,630 ($54,210/dry usable acre, (3.0 acres dry, 0.9 acres wet)), an assessed or capped value of $162,630, and a taxable value of $162,630. This parcel is

located on Osowaw Blvd., Spring Hill FL (specific address not yet determined).

5 For Key Number 00374552 the Property Appraiser shows a just value of $853,586 ($40,074/dry usable acre, (21.3 acres dry, 5.6 acres wet)), an assessed or capped value of $853,586, and a taxable value of $853,586. This parcel is located on Osowaw Blvd., Spring Hill FL (specific address not yet determined).

6 For Key Number 00374543 the Property Appraiser shows a just value of $178,745 ($54,165/dry usable acre, (3.3 acres dry, 0.0 acres wet)), an assessed or capped value of $178,745, and a taxable value of $178,745. This parcel is located on Osowaw Blvd., Spring Hill FL (specific address not yet determined).

7 For Key Number 00374393 the Property Appraiser shows a just value of $164,411 ($38,235/dry usable acre, (4.3 acres dry, 5.7 acres wet)), an assessed or capped value of $164,411, and a taxable value of $164,411. This parcel is located on Indian Bay Rd., Spring Hill FL (specific address not yet determined).

8 For Key Number 00374482 the Property Appraiser shows a just value of $120,428 ($138/SF, or $90/SF adjusted, (0.6 acres dry, 0.0 acres wet, includes an old 872 SF home, 1,337 SF adjusted)), an assessed or capped value of $120,428, and a taxable value of $120,428. 1535 Osowaw Blvd., Spring Hill FL.

9 For Key Number 00374525 the Property Appraiser shows a just value of $91,419 ($110/SF, or $93/SF adjusted, (1.0 acres dry, 0.0 acres wet, includes an old 832 SF home, 983 SF adjusted)), an assessed or capped value of $91,419, and a taxable value of $91,419. The parcel is located at 1551 Osowaw Blvd., Spring Hill FL.

10 The Petitioner estimated value for all 7 parcels combined to be $520,000.

11 *Subject Property Type:* The subject includes 7 adjacent land parcels, 2 of which have older single-family homes (in generally poor condition). The individual parcel and building sizes were noted previously. The PAO notes the total of all 7 parcels at 36.90 acres dry and 13.60 acres wet (total 50.5 acres). The Petitioner notes a total of 50.58 acres and has, in writing, estimated the wet areas to be 16.50 acres (GIS system used) (verbally he stated 17.5 wet acres). No wetlands study was prepared by either party but a wetlands map and survey were provided.

12 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

13 The Petitioners' evidence consists of a petition, hearing notice, correspondence, sales data, settlement statement, wetlands map, survey, pictures maps, and verbal testimony.

14 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

15 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

16 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

17 The PAO performed their analysis utilizing adjusted SF in their sales analysis report for single-family homes. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

18 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average. A similar trend is expected for the underlying land.

19 The subject land and building improvements (all 7 parcels combined) transferred for $500,000 in March 2025. The facility was exposed to the market for 79 days. The settlement statement for this was not provided. This was a listing on the lien date and soon became a pending sale.

20 The Petitioner is a very experienced commercial appraiser (MAI) and a broker. He stated clearly that he is acting as a broker in his capacity at the hearing (meaning he can be an advocate for himself, and not an unbiased appraiser performing an appraisal assignment, which changes/clarifies his role at this hearing). He did not supply an appraisal related to this personal purchase.

21 For Key Number 00374482 the Property Appraiser shows a just value of $120,428 ($138/SF, or $90/SF adjusted, (0.6 acres dry, 0.0 acres wet, includes an old 872 SF home, 1,337 SF adjusted)). The Petitioner sold this property for $100,000 in December of 2025.

22 All parties agreed to incorporate by reference all evidence presented at hearing in the consideration of value for all of the parcels (i.e. sales data provided for any parcel can be used to consider value at any other of the petitioned parcels also, if applicable).

23 The Petitioner supplied a Wetlands Map and land/property survey. He personally estimated wetlands to total 16.5 acres (in writing) and 17.5 acres

(verbally) at hearing. The PAO did not disagree with the Petitioner, although their CAMA system used less wetlands areas in total (13.60). The Special Magistrate will utilize the per parcel PAO wetlands figures but will also employ a negative wetlands/shape factor applied by parcel. Effectively, the parcels development is negatively impacted by both the total amount of the wetlands, and their shape and location within an individual parcel, as well as how they are placed across the greater economic unit. As such, a "usable land area shape" factor needs to be estimated for each parcel.

24 For Key 01857066 negative shape factor 15% (1.4 or 2.75 acres wet), for Key 01857075 negative shape factor 20% (0.9 or 1.5 acres wet) (some likely fully lost dry land due to narrow dry frontage land that is probably not buildable), for Key 00374552 negative shape factor 15% (5.6 acres wet), for Key 00374543 negative shape factor 0% (0.0 acres wet), and for Key 00374393 negative shape factor 17.5% (5.7 or 7.1 acres wet). The first wetland figure is that used by the PAO, and the 2nd figure is that proposed by the Petitioner for reference purposes.

25 The PAO stated that they "had" to value all of the parcels separately and could not consider the 7 parcels a greater economic unit. The Special Magistrate disagrees. Criteria 2 (highest and best use) requires the PAO to consider these aspects, and the PAO can allocate value among the parcels after proper consideration of all 8 Criteria. This can be difficult at times during mass appraisal but proper consideration of HBU is certainly part of the 8 Criteria and proper appraisal practices.

26 The Petitioner contended that this is one greater economic unit (i.e. the highest and best use off all (or most) of the parcels as a whole is greater than their value separately). The Special Magistrate concurs. Part of this assumption is that land values are more uniform, consider the size of the overall greater parcel, and all parcels would benefit from the access / visibility, and other factors of the "whole" property (less focused on some of these factors for an individual parcel value). For instance, the greater property has access to 2 roads (Osowaw Rd, & Indian Bay Rd), the land locked parcel(s) have access across the other parcels, size/scale is approximately 50 acres, and the overall shape of the wetlands across the entire parcel needs to be considered as a whole. The Special Magistrate concurs with the Petitioner that the highest and best use (and value) is greater as a whole than as separate parcels. The Special Magistrate will make separate value recommendation for each parcel based on a logical allocation for each parcel individually.

27 The PAO supplied 4 improved sales on two statistical grids for the parcels improved with older single-family homes. Each of these homes could be sold off separately. One of them was sold off in December of 2025 for $100,000. Two sale(s) was/were an outlier or were too dissimilar to be reliable (and was not weighted). These each showed $/SF prices greater than most fairly new

average quality homes (the subjects are old and in poor condition). The remaining two sales includes one sale with generally similar location, but greatly superior in condition, and another from fairly far away and in average condition. The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 12%-13% for COS. The Special Magistrate notes that these two parcels are the least likely to be part of the greater economic unit. These two parcels can be sold off separately as single-family residences, creating minimal (or no) negative impact on the highest and best use of the remaining parcels in the greater economic unit. The Petitioner sold one in December of 2025, and the other he is using as a shed during his development process. He contended that this second parcel has no improvement value but has not conclusively proven that with his provided evidence.

28 After adjustment, these sales indicated a range of $78/SF to $94/SF adjusted including features (median $86/SF adjusted) for Key 00374482. The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($80/SF adjusted) $106,960 and that the subject IS over assessed.

29 After adjustment, these sales indicated a range of $100/SF to $109/SF adjusted including features (median $105/SF adjusted) for Key 00374525. The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($102/SF adjusted) $100,260 and that the subject IS NOT over assessed.

30 For the vacant parcels, the PAO supplied 11 land sales in 7 statistical grids. None of the sales presented had wetlands, none are located near the subject, 6 of the sites are cleared (most of the subject is fully wooded and would require clearing and grading), and only 1 is irregular in shape (these factors necessitating the negative shape factors already discussed).

31 Five of the subject parcels are far away, dry, cleared, rectangular and are smaller than 4 acres. These are not considered reliable and will not be weighted. The PAO supplied 3 wooded and larger sales (9.1 acres @ $67,582/acre, 20 acres @ $26,650/acre, & 40.3 acres @ $49,627/acre). The one 40.3-acre sale appears was purchased as part of a mining operation, the 20-acre sale has commercial road frontage, and the 9.1-acre sale appears to be an outlier on the high end.

32 The PAO also supplied some smaller wooded land sales (2.5 acres @ $56,000/acre, and 3.5 acres @ $48,571/acre), and one cleared sale (5.3 acres @ $53,733/acre).

33 The greater parent property includes approximately 36.9 acres of dry usable land (likely a bit less), that is oddly shaped, and any development would

require clearing grading and development around irregularly shaped wetlands. The above noted land sales tend to support a $50,000/dry acre land value, less 9% subject specific COS (the rate applied to the larger land parcel is less than what is appropriate (12%-13%) for the 2 smaller homes, that include appliances and can easily be sold separately), less a 15% size/scale adjustment or $38,675/dry acre. This still excludes the negative shape/utility factor from the meandering wetlands across the property, which are discussed on a per parcel basis.

34 The PAO sales data (marginally) credibly and reliably supports a just value for Key 01857066 of $111,770 and that the subject is over assessed (negative shape factor 15% (3.4 acres dry, and about 1.4 acres wet) ($38,675, less 15%, = $32,873 x 3.4 = $111,770).

35 The PAO sales data (marginally) credibly and reliably supports a just value for Key 01857075 of $92,820 and that the subject is over assessed (negative shape factor 20% (3.0 acres dry, and about 0.9 acres wet) ($38,675, less 20%, = $30,940 x 3.0 = $92,820).

36 The PAO sales data (marginally) credibly and reliably supports a just value for Key 00374552 of $700,194 and that the subject is over assessed (negative shape factor 15% (21.3 acres dry, and about 5.6 acres wet) ($38,675, less 15%, = $32,873 x 21.3 = $700,194).

37 The PAO sales data (marginally) credibly and reliably supports a just value for Key 00374543 of $127,627 and that the subject is over assessed (negative shape factor 0% (3.3 acres dry, and about 0.0 acres wet) ($38,675, less 0%, = $38,675 x 3.3 = $127,627).

38 The PAO sales data (marginally) credibly and reliably supports a just value for Key 00374393 of $137,200 and that the subject is over assessed (negative shape factor 17.5% (4.3 acres dry, and about 5.7 acres wet) ($38,675, less 17.5%, = $31,907 x 4.3 = $137,200).

39 The Petitioner contended that many parcels in the area are also wildly over assessed.

40 The Petitioner placed strong consideration on his $500,000 recent purchase for all parcels combined.

41 For Key 00374525, the Petitioner does not consider the building component to have any value. The Special Magistrate considers this frame home to be in likely better condition than the one that he recently sold, and that it does have contributory value.

42 The Petitioner supplied 4 land sales. Three of these transferred late in 2025 and no significant weight can be placed on these sale transactions. The Petitioner notes the assessment $/acre and the sale prices $/acre. These 2025 sales have not yet been qualified (decreasing the weight of this assessment comparison) but show a sale price / assessment ratio of 32%, 25%, 27%, and 156%. This suggests that several of these (including the subject, which was 32%) sale transactions might be considerably over assessed. No PRC's were supplied.

43 The Petitioner believes that it is appropriate to weight sales far past the lien date for ad valorem taxation. The Special Magistrate disagrees and considers this inappropriate in the vast majority of situations for ad valorem taxation in Florida.

44 The Petitioner supplied and stated that land sales are bought and sold on a "gross" basis, implying that the amount of wetlands and otherwise unbuildable land is "unimportant" in the purchase process. The Special Magistrate disagrees, and there certainly was not data to support this contention at hearing.

45 The Petitioner also supplied one relatively nearby 2022 land sale. No PRC, adjustment grid or map was supplied. This parcel transferred for $10,750/acre for 40 acres. Adjusting this sale upwards 18% for improving market conditions since 2022 this sale suggests a time adjusted equivalent $12,685/acre. The specifics of this parcel are unknown, greatly decreasing the reliability of this sale.

46 One of the Petitioner's 2025 land sales was a listing at $200,000 (12.53 acres dry, 15.37 acres wet) or $15,961/dry usable acre on the lien date. This parcel is adjacent to the subject.

47 The Petitioner has supported that the PAO is "probably" inconsistent in assessments of land in the area (likely overstated). However, this was insufficient to prove a specific value for the subject parcels. The Petitioner 2022 land sale and the land listing very marginally supports a range of $14,500 to $18,000/dry usable acre.

48 The Special Magistrate has weighted and considered the Petitioner and PAO data. The Petitioner has shown that the PAO values in the area are probably commonly overstated (overcoming the presumption of correctness) but has failed to supply sufficient credible and reliable data to support a specific value as of the lien date. The Special Magistrate will weight the recalculated Petitioner data 20% ($17,000/dry usable acre for the parcels not improved with a home). The recalculated PAO sales data will be weighted 80%. This also takes into account that some road and development costs would be required for the rear portions of the site to have adequate access and utilities

extended (compared to the smaller comparables that had much easier access to roads and utilities). The costs for that are not included, just the recognition of the development problem, relative to the sales data.

49 The PAO and Petitioner sales data (marginally) credibly and reliably supports a just value for Key 01857066 of $100,976 and that the subject IS over assessed.

50 The PAO and Petitioner sales data (marginally) credibly and reliably supports a just value for Key 01857075 of $84,456 and that the subject IS over assessed.

51 The PAO and Petitioner sales data (marginally) credibly and reliably supports a just value for Key 00374552 of $632,575 and that the subject IS over assessed.

52 The PAO and Petitioner sales data (marginally) credibly and reliably supports a just value for Key 00374543 of $113,321 and that the subject IS over assessed.

53 37 The PAO and Petitioner sales data (marginally) credibly and reliably supports a just value for Key 00374393 of $124,380 and that the subject IS over assessed.

54 For Key 00374482 the PAO sales indicate a credible and reliable just value for the subject of ($80/SF adjusted) $106,960 and that the subject IS over assessed.

55 For Key 00374525 the PAO sales indicate a credible and reliable just value for the subject of ($102/SF adjusted) $100,260 and that the subject IS NOT over assessed.

56 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 7-14% (cost of sales adjustment; estimated to be brokerage cost of 5-9%, personal property 0%, and financing costs of 2-5%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

57 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

58 Subsection 193.011(8), F.S., requires proper consideration of the “net proceeds of sale,” regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

59 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

60 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that “just value” is in fact equal to “market value net of typical sales costs”. The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

61 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

“Factors to consider in deriving just valuation*. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;

The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."
The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID NOT establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Specifically, numerous small errors in analysis cumulatively made the analysis unreliable (numerous Criteria affected). Further, it is concluded that the methodology used by the PAO IS NOT appropriate and DOES NOT comply with professionally accepted appraisal practices for the subject property type.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS NOT reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be GRANTED in part with a reduction in the just value to $106,960 (Key 00374482).

	F	00374482
	G	00374525

SUMMARY OF EVIDENCE

1 The Petitioner, JAMES E TALLEY for ADVANTA IRA SERVICES LLC did appear before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 The subject of this hearing is a group of 7 petitioned adjacent land parcels (2 of which have older single-family residences) totaling approximately 50.58 acres. Approximately 13.6 to 17.5 acres are wet and unusable (estimated via the PAO and GIS systems). The Petitioner purchased this group of parcels for an investment and later development of the land. The Petitioner contended that this is one greater economic unit and produced one valuation package for all 7 parcels combined. The PAO produced separate valuation packages for each Petitioned parcel, some of which are interior parcels. The Special Magistrate does concur that the subject is one economic unit. All of the parcels will be discussed herein and separate value recommendations for each will be provided.

3 For Key Number 01857066 the Property Appraiser shows a just value of $184,371 ($54,227/dry usable acre, (3.40 acres dry, 1.4 acres wet)), an assessed or capped value of $184,371, and a taxable value of $184,371. This parcel is located on Osowaw Blvd., Spring Hill FL (specific address not yet determined).

4 For Key Number 01857075 the Property Appraiser shows a just value of $162,630 ($54,210/dry usable acre, (3.0 acres dry, 0.9 acres wet)), an assessed or capped value of $162,630, and a taxable value of $162,630. This parcel is

located on Osowaw Blvd., Spring Hill FL (specific address not yet determined).

5 For Key Number 00374552 the Property Appraiser shows a just value of $853,586 ($40,074/dry usable acre, (21.3 acres dry, 5.6 acres wet)), an assessed or capped value of $853,586, and a taxable value of $853,586. This parcel is located on Osowaw Blvd., Spring Hill FL (specific address not yet determined).

6 For Key Number 00374543 the Property Appraiser shows a just value of $178,745 ($54,165/dry usable acre, (3.3 acres dry, 0.0 acres wet)), an assessed or capped value of $178,745, and a taxable value of $178,745. This parcel is located on Osowaw Blvd., Spring Hill FL (specific address not yet determined).

7 For Key Number 00374393 the Property Appraiser shows a just value of $164,411 ($38,235/dry usable acre, (4.3 acres dry, 5.7 acres wet)), an assessed or capped value of $164,411, and a taxable value of $164,411. This parcel is located on Indian Bay Rd., Spring Hill FL (specific address not yet determined).

8 For Key Number 00374482 the Property Appraiser shows a just value of $120,428 ($138/SF, or $90/SF adjusted, (0.6 acres dry, 0.0 acres wet, includes an old 872 SF home, 1,337 SF adjusted)), an assessed or capped value of $120,428, and a taxable value of $120,428. 1535 Osowaw Blvd., Spring Hill FL.

9 For Key Number 00374525 the Property Appraiser shows a just value of $91,419 ($110/SF, or $93/SF adjusted, (1.0 acres dry, 0.0 acres wet, includes an old 832 SF home, 983 SF adjusted)), an assessed or capped value of $91,419, and a taxable value of $91,419. The parcel is located at 1551 Osowaw Blvd., Spring Hill FL.

10 The Petitioner estimated value for all 7 parcels combined to be $520,000.

11 *Subject Property Type:* The subject includes 7 adjacent land parcels, 2 of which have older single-family homes (in generally poor condition). The individual parcel and building sizes were noted previously. The PAO notes the total of all 7 parcels at 36.90 acres dry and 13.60 acres wet (total 50.5 acres). The Petitioner notes a total of 50.58 acres and has, in writing, estimated the wet areas to be 16.50 acres (GIS system used) (verbally he stated 17.5 wet acres). No wetlands study was prepared by either party but a wetlands map and survey were provided.

12 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

13 The Petitioners' evidence consists of a petition, hearing notice, correspondence, sales data, settlement statement, wetlands map, survey, pictures maps, and verbal testimony.

14 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

15 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

16 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

17 The PAO performed their analysis utilizing adjusted SF in their sales analysis report for single-family homes. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

18 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average. A similar trend is expected for the underlying land.

19 The subject land and building improvements (all 7 parcels combined) transferred for $500,000 in March 2025. The facility was exposed to the market for 79 days. The settlement statement for this was not provided. This was a listing on the lien date and soon became a pending sale.

20 The Petitioner is a very experienced commercial appraiser (MAI) and a broker. He stated clearly that he is acting as a broker in his capacity at the hearing (meaning he can be an advocate for himself, and not an unbiased appraiser performing an appraisal assignment, which changes/clarifies his role at this hearing). He did not supply an appraisal related to this personal purchase.

21 For Key Number 00374482 the Property Appraiser shows a just value of $120,428 ($138/SF, or $90/SF adjusted, (0.6 acres dry, 0.0 acres wet, includes an old 872 SF home, 1,337 SF adjusted)). The Petitioner sold this property for $100,000 in December of 2025.

22 All parties agreed to incorporate by reference all evidence presented at hearing in the consideration of value for all of the parcels (i.e. sales data provided for any parcel can be used to consider value at any other of the petitioned parcels also, if applicable).

23 The Petitioner supplied a Wetlands Map and land/property survey. He personally estimated wetlands to total 16.5 acres (in writing) and 17.5 acres

(verbally) at hearing. The PAO did not disagree with the Petitioner, although their CAMA system used less wetlands areas in total (13.60). The Special Magistrate will utilize the per parcel PAO wetlands figures but will also employ a negative wetlands/shape factor applied by parcel. Effectively, the parcels development is negatively impacted by both the total amount of the wetlands, and their shape and location within an individual parcel, as well as how they are placed across the greater economic unit. As such, a "usable land area shape" factor needs to be estimated for each parcel.

24 For Key 01857066 negative shape factor 15% (1.4 or 2.75 acres wet), for Key 01857075 negative shape factor 20% (0.9 or 1.5 acres wet) (some likely fully lost dry land due to narrow dry frontage land that is probably not buildable), for Key 00374552 negative shape factor 15% (5.6 acres wet), for Key 00374543 negative shape factor 0% (0.0 acres wet), and for Key 00374393 negative shape factor 17.5% (5.7 or 7.1 acres wet). The first wetland figure is that used by the PAO, and the 2nd figure is that proposed by the Petitioner for reference purposes.

25 The PAO stated that they "had" to value all of the parcels separately and could not consider the 7 parcels a greater economic unit. The Special Magistrate disagrees. Criteria 2 (highest and best use) requires the PAO to consider these aspects, and the PAO can allocate value among the parcels after proper consideration of all 8 Criteria. This can be difficult at times during mass appraisal but proper consideration of HBU is certainly part of the 8 Criteria and proper appraisal practices.

26 The Petitioner contended that this is one greater economic unit (i.e. the highest and best use off all (or most) of the parcels as a whole is greater than their value separately). The Special Magistrate concurs. Part of this assumption is that land values are more uniform, consider the size of the overall greater parcel, and all parcels would benefit from the access / visibility, and other factors of the "whole" property (less focused on some of these factors for an individual parcel value). For instance, the greater property has access to 2 roads (Osowaw Rd, & Indian Bay Rd), the land locked parcel(s) have access across the other parcels, size/scale is approximately 50 acres, and the overall shape of the wetlands across the entire parcel needs to be considered as a whole. The Special Magistrate concurs with the Petitioner that the highest and best use (and value) is greater as a whole than as separate parcels. The Special Magistrate will make separate value recommendation for each parcel based on a logical allocation for each parcel individually.

27 The PAO supplied 4 improved sales on two statistical grids for the parcels improved with older single-family homes. Each of these homes could be sold off separately. One of them was sold off in December of 2025 for $100,000. Two sale(s) was/were an outlier or were too dissimilar to be reliable (and was not weighted). These each showed $/SF prices greater than most fairly new

average quality homes (the subjects are old and in poor condition). The remaining two sales includes one sale with generally similar location, but greatly superior in condition, and another from fairly far away and in average condition. The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 12%-13% for COS. The Special Magistrate notes that these two parcels are the least likely to be part of the greater economic unit. These two parcels can be sold off separately as single-family residences, creating minimal (or no) negative impact on the highest and best use of the remaining parcels in the greater economic unit. The Petitioner sold one in December of 2025, and the other he is using as a shed during his development process. He contended that this second parcel has no improvement value but has not conclusively proven that with his provided evidence.

28 After adjustment, these sales indicated a range of $78/SF to $94/SF adjusted including features (median $86/SF adjusted) for Key 00374482. The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($80/SF adjusted) $106,960 and that the subject IS over assessed.

29 After adjustment, these sales indicated a range of $100/SF to $109/SF adjusted including features (median $105/SF adjusted) for Key 00374525. The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($102/SF adjusted) $100,260 and that the subject IS NOT over assessed.

30 For the vacant parcels, the PAO supplied 11 land sales in 7 statistical grids. None of the sales presented had wetlands, none are located near the subject, 6 of the sites are cleared (most of the subject is fully wooded and would require clearing and grading), and only 1 is irregular in shape (these factors necessitating the negative shape factors already discussed).

31 Five of the subject parcels are far away, dry, cleared, rectangular and are smaller than 4 acres. These are not considered reliable and will not be weighted. The PAO supplied 3 wooded and larger sales (9.1 acres @ $67,582/acre, 20 acres @ $26,650/acre, & 40.3 acres @ $49,627/acre). The one 40.3-acre sale appears was purchased as part of a mining operation, the 20-acre sale has commercial road frontage, and the 9.1-acre sale appears to be an outlier on the high end.

32 The PAO also supplied some smaller wooded land sales (2.5 acres @ $56,000/acre, and 3.5 acres @ $48,571/acre), and one cleared sale (5.3 acres @ $53,733/acre).

33 The greater parent property includes approximately 36.9 acres of dry usable land (likely a bit less), that is oddly shaped, and any development would

require clearing grading and development around irregularly shaped wetlands. The above noted land sales tend to support a $50,000/dry acre land value, less 9% subject specific COS (the rate applied to the larger land parcel is less than what is appropriate (12%-13%) for the 2 smaller homes, that include appliances and can easily be sold separately), less a 15% size/scale adjustment or $38,675/dry acre. This still excludes the negative shape/utility factor from the meandering wetlands across the property, which are discussed on a per parcel basis.

34 The PAO sales data (marginally) credibly and reliably supports a just value for Key 01857066 of $111,770 and that the subject is over assessed (negative shape factor 15% (3.4 acres dry, and about 1.4 acres wet) ($38,675, less 15%, = $32,873 x 3.4 = $111,770).

35 The PAO sales data (marginally) credibly and reliably supports a just value for Key 01857075 of $92,820 and that the subject is over assessed (negative shape factor 20% (3.0 acres dry, and about 0.9 acres wet) ($38,675, less 20%, = $30,940 x 3.0 = $92,820).

36 The PAO sales data (marginally) credibly and reliably supports a just value for Key 00374552 of $700,194 and that the subject is over assessed (negative shape factor 15% (21.3 acres dry, and about 5.6 acres wet) ($38,675, less 15%, = $32,873 x 21.3 = $700,194).

37 The PAO sales data (marginally) credibly and reliably supports a just value for Key 00374543 of $127,627 and that the subject is over assessed (negative shape factor 0% (3.3 acres dry, and about 0.0 acres wet) ($38,675, less 0%, = $38,675 x 3.3 = $127,627).

38 The PAO sales data (marginally) credibly and reliably supports a just value for Key 00374393 of $137,200 and that the subject is over assessed (negative shape factor 17.5% (4.3 acres dry, and about 5.7 acres wet) ($38,675, less 17.5%, = $31,907 x 4.3 = $137,200).

39 The Petitioner contended that many parcels in the area are also wildly over assessed.

40 The Petitioner placed strong consideration on his $500,000 recent purchase for all parcels combined.

41 For Key 00374525, the Petitioner does not consider the building component to have any value. The Special Magistrate considers this frame home to be in likely better condition than the one that he recently sold, and that it does have contributory value.

42 The Petitioner supplied 4 land sales. Three of these transferred late in 2025 and no significant weight can be placed on these sale transactions. The Petitioner notes the assessment $/acre and the sale prices $/acre. These 2025 sales have not yet been qualified (decreasing the weight of this assessment comparison) but show a sale price / assessment ratio of 32%, 25%, 27%, and 156%. This suggests that several of these (including the subject, which was 32%) sale transactions might be considerably over assessed. No PRC's were supplied.

43 The Petitioner believes that it is appropriate to weight sales far past the lien date for ad valorem taxation. The Special Magistrate disagrees and considers this inappropriate in the vast majority of situations for ad valorem taxation in Florida.

44 The Petitioner supplied and stated that land sales are bought and sold on a "gross" basis, implying that the amount of wetlands and otherwise unbuildable land is "unimportant" in the purchase process. The Special Magistrate disagrees, and there certainly was not data to support this contention at hearing.

45 The Petitioner also supplied one relatively nearby 2022 land sale. No PRC, adjustment grid or map was supplied. This parcel transferred for $10,750/acre for 40 acres. Adjusting this sale upwards 18% for improving market conditions since 2022 this sale suggests a time adjusted equivalent $12,685/acre. The specifics of this parcel are unknown, greatly decreasing the reliability of this sale.

46 One of the Petitioner's 2025 land sales was a listing at $200,000 (12.53 acres dry, 15.37 acres wet) or $15,961/dry usable acre on the lien date. This parcel is adjacent to the subject.

47 The Petitioner has supported that the PAO is "probably" inconsistent in assessments of land in the area (likely overstated). However, this was insufficient to prove a specific value for the subject parcels. The Petitioner 2022 land sale and the land listing very marginally supports a range of $14,500 to $18,000/dry usable acre.

48 The Special Magistrate has weighted and considered the Petitioner and PAO data. The Petitioner has shown that the PAO values in the area are probably commonly overstated (overcoming the presumption of correctness) but has failed to supply sufficient credible and reliable data to support a specific value as of the lien date. The Special Magistrate will weight the recalculated Petitioner data 20% ($17,000/dry usable acre for the parcels not improved with a home). The recalculated PAO sales data will be weighted 80%. This also takes into account that some road and development costs would be required for the rear portions of the site to have adequate access and utilities

extended (compared to the smaller comparables that had much easier access to roads and utilities). The costs for that are not included, just the recognition of the development problem, relative to the sales data.

49 The PAO and Petitioner sales data (marginally) credibly and reliably supports a just value for Key 01857066 of $100,976 and that the subject IS over assessed.

50 The PAO and Petitioner sales data (marginally) credibly and reliably supports a just value for Key 01857075 of $84,456 and that the subject IS over assessed.

51 The PAO and Petitioner sales data (marginally) credibly and reliably supports a just value for Key 00374552 of $632,575 and that the subject IS over assessed.

52 The PAO and Petitioner sales data (marginally) credibly and reliably supports a just value for Key 00374543 of $113,321 and that the subject IS over assessed.

53 37 The PAO and Petitioner sales data (marginally) credibly and reliably supports a just value for Key 00374393 of $124,380 and that the subject IS over assessed.

54 For Key 00374482 the PAO sales indicate a credible and reliable just value for the subject of ($80/SF adjusted) $106,960 and that the subject IS over assessed.

55 For Key 00374525 the PAO sales indicate a credible and reliable just value for the subject of ($102/SF adjusted) $100,260 and that the subject IS NOT over assessed.

56 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 7-14% (cost of sales adjustment; estimated to be brokerage cost of 5-9%, personal property 0%, and financing costs of 2-5%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

57 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

58 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

59 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

60 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

61 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

"Factors to consider in deriving just valuation*. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;

The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."
The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID NOT overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS NOT shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES NOT exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS NOT satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be denied (Key 00374525).

PETITION NO. 25-426

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: CHRISTOPHER GRAHAM
PARCEL KEY NO: Petition 426 00357508
Petition 427 00357946
Petition 428 00361539
Petition 429 00362093

SUMMARY OF EVIDENCE

1 The Petitioner, CHRISTOPHER GRAHAM for CONE & GRAHAM INC did appear before the Special Magistrate and gave testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 Petitions 426, 427, 428 and 429 are all adjacent vacant land parcels owned by the same entity and planned to be developed together as part of a single large mixed use development project. They have a related highest and best use. Both parties presented evidence for the greater property (all parcels combined) together and the PAO supplied separate values and packages for each petitioned parcel. This recommendation will include all evidence and testimony for all the parcels, and the Special Magistrate will make separate recommendations for each petitioned parcel.

3 For Petition 426, the Property Appraiser shows a just value of $758,618 ($53,499/usable acre), an assessed or capped value of $758,618, and a taxable value of $758,618. This is a decrease from the values noted at TRIM ($1,149,710 just, $1,149,710 assessed, and $1,149,710 taxable).

4 For Petition 427, the Property Appraiser shows a just value of $923,919 ($48,271/usable acre), an assessed or capped value of $923,919, and a taxable value of $923,919. This is a decrease from the values noted at TRIM ($1,228,695 just, $1,228,695 assessed, and $1,228,695 taxable).

5 For Petition 428, the Property Appraiser shows a just value of $110,055 ($37,950/usable acre), an assessed or capped value of $110,055, and a taxable value of $110,055. No change from TRIM.

6 For Petition 429, the Property Appraiser shows a just value of $224,400 ($32,941/usable acre), an assessed or capped value of $224,400, and a taxable value of $224,400. No change from TRIM.

7 The Petitioner stated that the fair market value of all 4 parcels combined should be $1,000,000 (based on the subject assemblage sale in 2024).

8 *Subject Property Type:* Petition 426 is a 20.50 acre wooded vacant commercial parcel (14.18 acres usable (commercial 3.16 acres, multi-family 2.82 acres & residential 8.20), 6.32 acres unusable; address noted as Oxley Rd.). Petition 427 is a 24.50 acre wooded vacant commercial parcel (19.14 acres usable (commercial 3.22 acres, multi-family 2.99 acres & residential 12.90), 5.36 acres unusable; address noted as Cortez Blvd.). Petition 428 is a 2.90 acre wooded vacant residential parcel (fully usable; address noted as Cortez Blvd.). Petition 429 is a 6.80 acre wooded vacant residential parcel (fully usable; address noted as Oxley Rd.).

9 The PAO evidence consists of verbal testimony, petition, PRC, summary pages, land sales, sales map and a statistical sales analysis report. The PAO supplied moratorium data, emails, and a business impact report as rebuttal.

10 The Petitioners evidence consists of a petition, hearing notice, correspondence, verbal testimony, purchase contract, master plan, PRC, critique of the PAO sales analysis and a greenbelt exemption request. The Petitioner also supplied his written statements as well (which he also stated verbally).

11 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

12 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

13 The PAO relied completely upon the sales comparison approach via a submitted sales analysis report. No weight was placed on the cost approach, noted in the PRC. No weight was placed on the income approach to value. The Special Magistrate considered this an appropriate mass appraisal methodology for this property type.

14 The Petitioner plan is to develop the "greater parent property" (all 4 parcels combined) with a multi-family development and allow for a commercial node in the northwest corner on Petitioned parcel 427. He stated that he has no plans to develop a commercial node on Petitioned parcel 426 (where such development is reportedly also allowed by zoning). He expects 300 townhomes and 2 acres of land used for commercial space. The Special Magistrate notes that highest and best use and allowable uses form the foundation of value for this parcel, and not necessarily ownership's plans for how it will or should be developed (if the two are in conflict).

15 For Petitioned parcels 426 and 427 the PAO supplied 4 land sales. 1 was commercial land near the airport, 1 was multi-family land (no known density information), and 2 are larger residential parcels (8.6 and 9.3 acres). The PAO concluded to a value for each component of the subject parcels (commercial, multi-family, and residential) and then added them together. The Special Magistrate does not see where the PAO supplied their conclusions for each portion of the parcel or how the totals were compiled. This analysis is very opaque and also may not take into account "scale" factors (a larger mixed-use property likely has a discount applied relative to single use smaller sites). Additionally, with only 1 commercial land sale and only 1 multifamily land sales (and very little specifics known about these parcels or their planned developments), the PAO conclusions do not appear reliable for Petition 426 and 427, as currently analyzed.

16 For Petitioned parcels 428 and 429 the PAO supplied a total of 6 land parcel sales. The sales appear to be adequate to perform a credible and reliable valuation analysis for this portion of the grater subject parcel. The Special Magistrate applied some adjustments for topography, location, COS at 8%, scale, and an additional downwards 20% adjustment for the risks and cost associated with the limited moratorium. This data credibly and reliably supports a just value of $115,000 for Petition 428 and $240,000 for Petition 429, and that they are not over assessed.

17 The Petitioner noted that he purchased the assemblage of the 4 parcels in February of 2024 for $1,000,000. The property was not openly marketed. This

weakens the reliability of this transaction but does not prove that it was or was not at market level.

18 The Petitioner believes that the PAO choose poor sale comparables. The Special Magistrate concurs with the Petitioner that the data is relatively weak regarding the larger parcels (Petitions 426 and 427).

19 The Petitioner stated that there are more portions of the subject that are unusable than those noted by the PAO. The Petitioner did not supply a wetlands or other engineering study to support that, and the potential development master plan to leave a greater percentage of green space is not evidence that those portions of the land are in fact unusable. It is evidence of what the developer is planning.

20 However, a review of the Master Plan submitted by the Petitioner shows the existing wetlands and shows the additional areas they plan to keep as open greenspace. The Special Magistrate does generally concur with the Petitioner. The additional areas they are considering unusable, while not technically unusable, however, the shape of the existing wet areas, access roadways needed, and the shape constraints that this necessitates does support an additional downwards value adjustment (a shape adjustment effectively). There is a portion of the westerly side of the greater development that could be an additional commercial space. The Petitioner plan to utilize this as multi-family space instead of as commercial/retail is also reasonable (based on where the wetlands are on this parcel, and how it would most likely be developed). Effectively, the Special Magistrate concurs with the Petitioner regarding the shape and usability constraints.

21 The Petitioner stated that because the greater purchase was for a parcel over 50 acres, smaller site sales should not be relied upon. The Special Magistrate notes that the subject is currently 4 parcels and could be sold again as 4 parcels. It is not inappropriate for the PAO to consider and possibly utilize smaller parcel sales (if access, utilities, development costs, assemblage benefits/problems are properly taken into account), nor is it inappropriate to consider and possibly utilize larger tract sales.

22 The Petitioner stated that the City of Brooksville has a limited moratorium on new water and sewer connections. He stated that approximately a $1.6 million payment would be required to enter the wait list for approval (all parcels combined), and that this adds high risk and cost to any development of the greater property ($4,666 per home if the development is 300 townhomes, plus $200,000 extra for the commercial site more or less; as calculated by the Special Magistrate). This fee may or may not be refundable, and no timetable for approval is known.

23 The Special Magistrate will perform an analysis of the subject transfer at $1,000,000 in February of 2024, as it relates to the values for Petitions 426 and 427 (the largest and central components of the purchase). This sale will be adjusted upwards 4% for improving market conditions, upwards 5% for scale (buying all four parcels in one transaction did allow for some economies of scale), and downwards for 10% for the risk (essentially, half the moratorium risk was accounted for in the purchase presumably), and less 8% COS, time.

This concludes to $904,176 for the greater parcel after these are applied. Deducting the estimated just value of the two residential rear parcels ($115,000 & $240,000) leaves a just value component of $549,176 for Petitioned parcels 426 & 427, based on this transaction. Reviewing the PAO conclusions, 45.9% of the value is placed on Petitioned parcel 426, which equates to $252,071 implied from this transaction for Petition 426 and $297,104 for Petitioned parcel 427. The subject sale does not appear to be at market levels (lacks reliability) and will not be weighted.

24 The Special Magistrate reviewed the PAO land sale comparables for the two larger subject sites (Petitions 426 & 427). Adjustments were made for topography, shape (downward 20% for limited utility issues around and between wet areas), location, COS 8%, scale, and zoning as it applies to the 2 smaller sales. Additionally, a 20% downward adjustment was applied due to the limited moratorium. Commercial and multifamily values were grouped together and a separate additional value for the acreage residential land was applied. After adjustment, the limited land sales data supports a $623,120 just value for Petition 426 and $762,840 just value for Petition 427. This (marginally) credibly and reliably supports that they are each over assessed.

25 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 5-8% (cost of sales adjustment; estimated to be brokerage cost of 4-6%, personal property 0%, and financing costs of 1-2%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

26 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

27 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

28 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

29 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

30 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

***"Factors to consider in deriving just valuation**. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."
The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID NOT establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Specifically, Criteria 2 and 5 were not properly considered (highest and best use and condition). Further, it is concluded that the methodology used by the PAO IS NOT appropriate and DOES NOT comply with professionally accepted appraisal practices for the subject property type.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS NOT reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be GRANTED in part with a reduction in the just value to $623,120.

PETITION NO. 25-427

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: CHRISTOPHER GRAHAM

PARCEL KEY NO:	Petition 426	00357508
	Petition 427	00357946
	Petition 428	00361539
	Petition 429	00362093

SUMMARY OF EVIDENCE

1 The Petitioner, CHRISTOPHER GRAHAM for CONE & GRAHAM INC did appear before the Special Magistrate and gave testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 Petitions 426, 427, 428 and 429 are all adjacent vacant land parcels owned by the same entity and planned to be developed together as part of a single large mixed use development project. They have a related highest and best use. Both parties presented evidence for the greater property (all parcels combined) together and the PAO supplied separate values and packages for each petitioned parcel. This recommendation will include all evidence and testimony for all the parcels, and the Special Magistrate will make separate recommendations for each petitioned parcel.

3 For Petition 426, the Property Appraiser shows a just value of $758,618 ($53,499/usable acre), an assessed or capped value of $758,618, and a taxable value of $758,618. This is a decrease from the values noted at TRIM ($1,149,710 just, $1,149,710 assessed, and $1,149,710 taxable).

4 For Petition 427, the Property Appraiser shows a just value of $923,919 ($48,271/usable acre), an assessed or capped value of $923,919, and a taxable value of $923,919. This is a decrease from the values noted at TRIM ($1,228,695 just, $1,228,695 assessed, and $1,228,695 taxable).

5 For Petition 428, the Property Appraiser shows a just value of $110,055 ($37,950/usable acre), an assessed or capped value of $110,055, and a taxable value of $110,055. No change from TRIM.

6 For Petition 429, the Property Appraiser shows a just value of $224,400 ($32,941/usable acre), an assessed or capped value of $224,400, and a taxable value of $224,400. No change from TRIM.

7 The Petitioner stated that the fair market value of all 4 parcels combined should be $1,000,000 (based on the subject assemblage sale in 2024).

8 *Subject Property Type:* Petition 426 is a 20.50 acre wooded vacant commercial parcel (14.18 acres usable (commercial 3.16 acres, multi-family 2.82 acres & residential 8.20), 6.32 acres unusable; address noted as Oxley Rd.). Petition 427 is a 24.50 acre wooded vacant commercial parcel (19.14 acres usable (commercial 3.22 acres, multi-family 2.99 acres & residential 12.90), 5.36 acres unusable; address noted as Cortez Blvd.). Petition 428 is a 2.90 acre wooded vacant residential parcel (fully usable; address noted as Cortez Blvd.). Petition 429 is a 6.80 acre wooded vacant residential parcel (fully usable; address noted as Oxley Rd.).

9 The PAO evidence consists of verbal testimony, petition, PRC, summary pages, land sales, sales map and a statistical sales analysis report. The PAO supplied moratorium data, emails, and a business impact report as rebuttal.

10 The Petitioners evidence consists of a petition, hearing notice, correspondence, verbal testimony, purchase contract, master plan, PRC, critique of the PAO sales analysis and a greenbelt exemption request. The Petitioner also supplied his written statements as well (which he also stated verbally).

11 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

12 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

13 The PAO relied completely upon the sales comparison approach via a submitted sales analysis report. No weight was placed on the cost approach, noted in the PRC. No weight was placed on the income approach to value. The Special Magistrate considered this an appropriate mass appraisal methodology for this property type.

14 The Petitioner plan is to develop the "greater parent property" (all 4 parcels combined) with a multi-family development and allow for a commercial node in the northwest corner on Petitioned parcel 427. He stated that he has no plans to develop a commercial node on Petitioned parcel 426 (where such development is reportedly also allowed by zoning). He expects 300 townhomes and 2 acres of land used for commercial space. The Special Magistrate notes that highest and best use and allowable uses form the foundation of value for this parcel, and not necessarily ownership's plans for how it will or should be developed (if the two are in conflict).

15 For Petitioned parcels 426 and 427 the PAO supplied 4 land sales. 1 was commercial land near the airport, 1 was multi-family land (no known density information), and 2 are larger residential parcels (8.6 and 9.3 acres). The PAO concluded to a value for each component of the subject parcels (commercial, multi-family, and residential) and then added them together. The Special Magistrate does not see where the PAO supplied their conclusions for each portion of the parcel or how the totals were compiled. This analysis is very opaque and also may not take into account "scale" factors (a larger mixed-use property likely has a discount applied relative to single use smaller sites). Additionally, with only 1 commercial land sale and only 1 multifamily land sales (and very little specifics known about these parcels or their planned developments), the PAO conclusions do not appear reliable for Petition 426 and 427, as currently analyzed.

16 For Petitioned parcels 428 and 429 the PAO supplied a total of 6 land parcel sales. The sales appear to be adequate to perform a credible and reliable valuation analysis for this portion of the grater subject parcel. The Special Magistrate applied some adjustments for topography, location, COS at 8%, scale, and an additional downwards 20% adjustment for the risks and cost associated with the limited moratorium. This data credibly and reliably supports a just value of $115,000 for Petition 428 and $240,000 for Petition 429, and that they are not over assessed.

17 The Petitioner noted that he purchased the assemblage of the 4 parcels in February of 2024 for $1,000,000. The property was not openly marketed. This

weakens the reliability of this transaction but does not prove that it was or was not at market level.

18 The Petitioner believes that the PAO choose poor sale comparables. The Special Magistrate concurs with the Petitioner that the data is relatively weak regarding the larger parcels (Petitions 426 and 427).

19 The Petitioner stated that there are more portions of the subject that are unusable than those noted by the PAO. The Petitioner did not supply a wetlands or other engineering study to support that, and the potential development master plan to leave a greater percentage of green space is not evidence that those portions of the land are in fact unusable. It is evidence of what the developer is planning.

20 However, a review of the Master Plan submitted by the Petitioner shows the existing wetlands and shows the additional areas they plan to keep as open greenspace. The Special Magistrate does generally concur with the Petitioner. The additional areas they are considering unusable, while not technically unusable, however, the shape of the existing wet areas, access roadways needed, and the shape constraints that this necessitates does support an additional downwards value adjustment (a shape adjustment effectively). There is a portion of the westerly side of the greater development that could be an additional commercial space. The Petitioner plan to utilize this as multi-family space instead of as commercial/retail is also reasonable (based on where the wetlands are on this parcel, and how it would most likely be developed). Effectively, the Special Magistrate concurs with the Petitioner regarding the shape and usability constraints.

21 The Petitioner stated that because the greater purchase was for a parcel over 50 acres, smaller site sales should not be relied upon. The Special Magistrate notes that the subject is currently 4 parcels and could be sold again as 4 parcels. It is not inappropriate for the PAO to consider and possibly utilize smaller parcel sales (if access, utilities, development costs, assemblage benefits/problems are properly taken into account), nor is it inappropriate to consider and possibly utilize larger tract sales.

22 The Petitioner stated that the City of Brooksville has a limited moratorium on new water and sewer connections. He stated that approximately a $1.6 million payment would be required to enter the wait list for approval (all parcels combined), and that this adds high risk and cost to any development of the greater property ($4,666 per home if the development is 300 townhomes, plus $200,000 extra for the commercial site more or less; as calculated by the Special Magistrate). This fee may or may not be refundable, and no timetable for approval is known.

23 The Special Magistrate will perform an analysis of the subject transfer at $1,000,000 in February of 2024, as it relates to the values for Petitions 426 and 427 (the largest and central components of the purchase). This sale will be adjusted upwards 4% for improving market conditions, upwards 5% for scale (buying all four parcels in one transaction did allow for some economies of scale), and downwards for 10% for the risk (essentially, half the moratorium risk was accounted for in the purchase presumably), and less 8% COS, time.

This concludes to $904,176 for the greater parcel after these are applied. Deducting the estimated just value of the two residential rear parcels ($115,000 & $240,000) leaves a just value component of $549,176 for Petitioned parcels 426 & 427, based on this transaction. Reviewing the PAO conclusions, 45.9% of the value is placed on Petitioned parcel 426, which equates to $252,071 implied from this transaction for Petition 426 and $297,104 for Petitioned parcel 427. The subject sale does not appear to be at market levels (lacks reliability) and will not be weighted.

24 The Special Magistrate reviewed the PAO land sale comparables for the two larger subject sites (Petitions 426 & 427). Adjustments were made for topography, shape (downward 20% for limited utility issues around and between wet areas), location, COS 8%, scale, and zoning as it applies to the 2 smaller sales. Additionally, a 20% downward adjustment was applied due to the limited moratorium. Commercial and multifamily values were grouped together and a separate additional value for the acreage residential land was applied. After adjustment, the limited land sales data supports a $623,120 just value for Petition 426 and $762,840 just value for Petition 427. This (marginally) credibly and reliably supports that they are each over assessed.

25 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 5-8% (cost of sales adjustment; estimated to be brokerage cost of 4-6%, personal property 0%, and financing costs of 1-2%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

26 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

27 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

28 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

29 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

30 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

***"Factors to consider in deriving just valuation**. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."
The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID NOT establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Specifically, Criteria 2 and 5 were not properly considered (highest and best use and condition). Further, it is concluded that the methodology used by the PAO IS NOT appropriate and DOES NOT comply with professionally accepted appraisal practices for the subject property type.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS NOT reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be GRANTED in part with a reduction in the just value to $762,840.

PETITION NO. 25-428

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: CHRISTOPHER GRAHAM
PARCEL KEY NO: Petition 426 00357508
Petition 427 00357946
Petition 428 00361539
Petition 429 00362093

SUMMARY OF EVIDENCE

1 The Petitioner, CHRISTOPHER GRAHAM for CONE & GRAHAM INC did appear before the Special Magistrate and gave testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 Petitions 426, 427, 428 and 429 are all adjacent vacant land parcels owned by the same entity and planned to be developed together as part of a single large mixed use development project. They have a related highest and best use. Both parties presented evidence for the greater property (all parcels combined) together and the PAO supplied separate values and packages for each petitioned parcel. This recommendation will include all evidence and testimony for all the parcels, and the Special Magistrate will make separate recommendations for each petitioned parcel.

3 For Petition 426, the Property Appraiser shows a just value of $758,618 ($53,499/usable acre), an assessed or capped value of $758,618, and a taxable value of $758,618. This is a decrease from the values noted at TRIM ($1,149,710 just, $1,149,710 assessed, and $1,149,710 taxable).

4 For Petition 427, the Property Appraiser shows a just value of $923,919 ($48,271/usable acre), an assessed or capped value of $923,919, and a taxable value of $923,919. This is a decrease from the values noted at TRIM ($1,228,695 just, $1,228,695 assessed, and $1,228,695 taxable).

5 For Petition 428, the Property Appraiser shows a just value of $110,055 ($37,950/usable acre), an assessed or capped value of $110,055, and a taxable value of $110,055. No change from TRIM.

6 For Petition 429, the Property Appraiser shows a just value of $224,400 ($32,941/usable acre), an assessed or capped value of $224,400, and a taxable value of $224,400. No change from TRIM.

7 The Petitioner stated that the fair market value of all 4 parcels combined should be $1,000,000 (based on the subject assemblage sale in 2024).

8 *Subject Property Type:* Petition 426 is a 20.50 acre wooded vacant commercial parcel (14.18 acres usable (commercial 3.16 acres, multi-family 2.82 acres & residential 8.20), 6.32 acres unusable; address noted as Oxley Rd.). Petition 427 is a 24.50 acre wooded vacant commercial parcel (19.14 acres usable (commercial 3.22 acres, multi-family 2.99 acres & residential 12.90), 5.36 acres unusable; address noted as Cortez Blvd.). Petition 428 is a 2.90 acre wooded vacant residential parcel (fully usable; address noted as Cortez Blvd.). Petition 429 is a 6.80 acre wooded vacant residential parcel (fully usable; address noted as Oxley Rd.).

9 The PAO evidence consists of verbal testimony, petition, PRC, summary pages, land sales, sales map and a statistical sales analysis report. The PAO supplied moratorium data, emails, and a business impact report as rebuttal.

10 The Petitioners evidence consists of a petition, hearing notice, correspondence, verbal testimony, purchase contract, master plan, PRC, critique of the PAO sales analysis and a greenbelt exemption request. The Petitioner also supplied his written statements as well (which he also stated verbally).

11 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

12 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

13 The PAO relied completely upon the sales comparison approach via a submitted sales analysis report. No weight was placed on the cost approach, noted in the PRC. No weight was placed on the income approach to value. The Special Magistrate considered this an appropriate mass appraisal methodology for this property type.

14 The Petitioner plan is to develop the "greater parent property" (all 4 parcels combined) with a multi-family development and allow for a commercial node in the northwest corner on Petitioned parcel 427. He stated that he has no plans to develop a commercial node on Petitioned parcel 426 (where such development is reportedly also allowed by zoning). He expects 300 townhomes and 2 acres of land used for commercial space. The Special Magistrate notes that highest and best use and allowable uses form the foundation of value for this parcel, and not necessarily ownership's plans for how it will or should be developed (if the two are in conflict).

15 For Petitioned parcels 426 and 427 the PAO supplied 4 land sales. 1 was commercial land near the airport, 1 was multi-family land (no known density information), and 2 are larger residential parcels (8.6 and 9.3 acres). The PAO concluded to a value for each component of the subject parcels (commercial, multi-family, and residential) and then added them together. The Special Magistrate does not see where the PAO supplied their conclusions for each portion of the parcel or how the totals were compiled. This analysis is very opaque and also may not take into account "scale" factors (a larger mixed-use property likely has a discount applied relative to single use smaller sites). Additionally, with only 1 commercial land sale and only 1 multifamily land sales (and very little specifics known about these parcels or their planned developments), the PAO conclusions do not appear reliable for Petition 426 and 427, as currently analyzed.

16 For Petitioned parcels 428 and 429 the PAO supplied a total of 6 land parcel sales. The sales appear to be adequate to perform a credible and reliable valuation analysis for this portion of the grater subject parcel. The Special Magistrate applied some adjustments for topography, location, COS at 8%, scale, and an additional downwards 20% adjustment for the risks and cost associated with the limited moratorium. This data credibly and reliably supports a just value of $115,000 for Petition 428 and $240,000 for Petition 429, and that they are not over assessed.

17 The Petitioner noted that he purchased the assemblage of the 4 parcels in February of 2024 for $1,000,000. The property was not openly marketed. This

weakens the reliability of this transaction but does not prove that it was or was not at market level.

18 The Petitioner believes that the PAO choose poor sale comparables. The Special Magistrate concurs with the Petitioner that the data is relatively weak regarding the larger parcels (Petitions 426 and 427).

19 The Petitioner stated that there are more portions of the subject that are unusable than those noted by the PAO. The Petitioner did not supply a wetlands or other engineering study to support that, and the potential development master plan to leave a greater percentage of green space is not evidence that those portions of the land are in fact unusable. It is evidence of what the developer is planning.

20 However, a review of the Master Plan submitted by the Petitioner shows the existing wetlands and shows the additional areas they plan to keep as open greenspace. The Special Magistrate does generally concur with the Petitioner. The additional areas they are considering unusable, while not technically unusable, however, the shape of the existing wet areas, access roadways needed, and the shape constraints that this necessitates does support an additional downwards value adjustment (a shape adjustment effectively). There is a portion of the westerly side of the greater development that could be an additional commercial space. The Petitioner plan to utilize this as multi-family space instead of as commercial/retail is also reasonable (based on where the wetlands are on this parcel, and how it would most likely be developed). Effectively, the Special Magistrate concurs with the Petitioner regarding the shape and usability constraints.

21 The Petitioner stated that because the greater purchase was for a parcel over 50 acres, smaller site sales should not be relied upon. The Special Magistrate notes that the subject is currently 4 parcels and could be sold again as 4 parcels. It is not inappropriate for the PAO to consider and possibly utilize smaller parcel sales (if access, utilities, development costs, assemblage benefits/problems are properly taken into account), nor is it inappropriate to consider and possibly utilize larger tract sales.

22 The Petitioner stated that the City of Brooksville has a limited moratorium on new water and sewer connections. He stated that approximately a $1.6 million payment would be required to enter the wait list for approval (all parcels combined), and that this adds high risk and cost to any development of the greater property ($4,666 per home if the development is 300 townhomes, plus $200,000 extra for the commercial site more or less; as calculated by the Special Magistrate). This fee may or may not be refundable, and no timetable for approval is known.

23 The Special Magistrate will perform an analysis of the subject transfer at $1,000,000 in February of 2024, as it relates to the values for Petitions 426 and 427 (the largest and central components of the purchase). This sale will be adjusted upwards 4% for improving market conditions, upwards 5% for scale (buying all four parcels in one transaction did allow for some economies of scale), and downwards for 10% for the risk (essentially, half the moratorium risk was accounted for in the purchase presumably), and less 8% COS, time.

This concludes to $904,176 for the greater parcel after these are applied. Deducting the estimated just value of the two residential rear parcels ($115,000 & $240,000) leaves a just value component of $549,176 for Petitioned parcels 426 & 427, based on this transaction. Reviewing the PAO conclusions, 45.9% of the value is placed on Petitioned parcel 426, which equates to $252,071 implied from this transaction for Petition 426 and $297,104 for Petitioned parcel 427. The subject sale does not appear to be at market levels (lacks reliability) and will not be weighted.

24 The Special Magistrate reviewed the PAO land sale comparables for the two larger subject sites (Petitions 426 & 427). Adjustments were made for topography, shape (downward 20% for limited utility issues around and between wet areas), location, COS 8%, scale, and zoning as it applies to the 2 smaller sales. Additionally, a 20% downward adjustment was applied due to the limited moratorium. Commercial and multifamily values were grouped together and a separate additional value for the acreage residential land was applied. After adjustment, the limited land sales data supports a $623,120 just value for Petition 426 and $762,840 just value for Petition 427. This (marginally) credibly and reliably supports that they are each over assessed.

25 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 5-8% (cost of sales adjustment; estimated to be brokerage cost of 4-6%, personal property 0%, and financing costs of 1-2%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

26 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

27 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

28 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

29 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

30 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

***"Factors to consider in deriving just valuation**. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."
The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID NOT overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS NOT shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES NOT exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS NOT satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be denied.

PETITION NO. 25-429

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: CHRISTOPHER GRAHAM
PARCEL KEY NO: Petition 426 00357508
Petition 427 00357946
Petition 428 00361539
Petition 429 00362093

SUMMARY OF EVIDENCE

1 The Petitioner, CHRISTOPHER GRAHAM for CONE & GRAHAM INC did appear before the Special Magistrate and gave testimony. The Property Appraiser was represented by DOUG MACK and BRANDON JIMENEZ. All parties present were put under sworn oath.

2 Petitions 426, 427, 428 and 429 are all adjacent vacant land parcels owned by the same entity and planned to be developed together as part of a single large mixed use development project. They have a related highest and best use. Both parties presented evidence for the greater property (all parcels combined) together and the PAO supplied separate values and packages for each petitioned parcel. This recommendation will include all evidence and testimony for all the parcels, and the Special Magistrate will make separate recommendations for each petitioned parcel.

3 For Petition 426, the Property Appraiser shows a just value of $758,618 ($53,499/usable acre), an assessed or capped value of $758,618, and a taxable value of $758,618. This is a decrease from the values noted at TRIM ($1,149,710 just, $1,149,710 assessed, and $1,149,710 taxable).

4 For Petition 427, the Property Appraiser shows a just value of $923,919 ($48,271/usable acre), an assessed or capped value of $923,919, and a taxable value of $923,919. This is a decrease from the values noted at TRIM ($1,228,695 just, $1,228,695 assessed, and $1,228,695 taxable).

5 For Petition 428, the Property Appraiser shows a just value of $110,055 ($37,950/usable acre), an assessed or capped value of $110,055, and a taxable value of $110,055. No change from TRIM.

6 For Petition 429, the Property Appraiser shows a just value of $224,400 ($32,941/usable acre), an assessed or capped value of $224,400, and a taxable value of $224,400. No change from TRIM.

7 The Petitioner stated that the fair market value of all 4 parcels combined should be $1,000,000 (based on the subject assemblage sale in 2024).

8 *Subject Property Type:* Petition 426 is a 20.50 acre wooded vacant commercial parcel (14.18 acres usable (commercial 3.16 acres, multi-family 2.82 acres & residential 8.20), 6.32 acres unusable; address noted as Oxley Rd.). Petition 427 is a 24.50 acre wooded vacant commercial parcel (19.14 acres usable (commercial 3.22 acres, multi-family 2.99 acres & residential 12.90), 5.36 acres unusable; address noted as Cortez Blvd.). Petition 428 is a 2.90 acre wooded vacant residential parcel (fully usable; address noted as Cortez Blvd.). Petition 429 is a 6.80 acre wooded vacant residential parcel (fully usable; address noted as Oxley Rd.).

9 The PAO evidence consists of verbal testimony, petition, PRC, summary pages, land sales, sales map and a statistical sales analysis report. The PAO supplied moratorium data, emails, and a business impact report as rebuttal.

10 The Petitioners evidence consists of a petition, hearing notice, correspondence, verbal testimony, purchase contract, master plan, PRC, critique of the PAO sales analysis and a greenbelt exemption request. The Petitioner also supplied his written statements as well (which he also stated verbally).

11 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

12 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

13 The PAO relied completely upon the sales comparison approach via a submitted sales analysis report. No weight was placed on the cost approach, noted in the PRC. No weight was placed on the income approach to value. The Special Magistrate considered this an appropriate mass appraisal methodology for this property type.

14 The Petitioner plan is to develop the "greater parent property" (all 4 parcels combined) with a multi-family development and allow for a commercial node in the northwest corner on Petitioned parcel 427. He stated that he has no plans to develop a commercial node on Petitioned parcel 426 (where such development is reportedly also allowed by zoning). He expects 300 townhomes and 2 acres of land used for commercial space. The Special Magistrate notes that highest and best use and allowable uses form the foundation of value for this parcel, and not necessarily ownership's plans for how it will or should be developed (if the two are in conflict).

15 For Petitioned parcels 426 and 427 the PAO supplied 4 land sales. 1 was commercial land near the airport, 1 was multi-family land (no known density information), and 2 are larger residential parcels (8.6 and 9.3 acres). The PAO concluded to a value for each component of the subject parcels (commercial, multi-family, and residential) and then added them together. The Special Magistrate does not see where the PAO supplied their conclusions for each portion of the parcel or how the totals were compiled. This analysis is very opaque and also may not take into account "scale" factors (a larger mixed-use property likely has a discount applied relative to single use smaller sites). Additionally, with only 1 commercial land sale and only 1 multifamily land sales (and very little specifics known about these parcels or their planned developments), the PAO conclusions do not appear reliable for Petition 426 and 427, as currently analyzed.

16 For Petitioned parcels 428 and 429 the PAO supplied a total of 6 land parcel sales. The sales appear to be adequate to perform a credible and reliable valuation analysis for this portion of the grater subject parcel. The Special Magistrate applied some adjustments for topography, location, COS at 8%, scale, and an additional downwards 20% adjustment for the risks and cost associated with the limited moratorium. This data credibly and reliably supports a just value of $115,000 for Petition 428 and $240,000 for Petition 429, and that they are not over assessed.

17 The Petitioner noted that he purchased the assemblage of the 4 parcels in February of 2024 for $1,000,000. The property was not openly marketed. This

weakens the reliability of this transaction but does not prove that it was or was not at market level.

18 The Petitioner believes that the PAO choose poor sale comparables. The Special Magistrate concurs with the Petitioner that the data is relatively weak regarding the larger parcels (Petitions 426 and 427).

19 The Petitioner stated that there are more portions of the subject that are unusable than those noted by the PAO. The Petitioner did not supply a wetlands or other engineering study to support that, and the potential development master plan to leave a greater percentage of green space is not evidence that those portions of the land are in fact unusable. It is evidence of what the developer is planning.

20 However, a review of the Master Plan submitted by the Petitioner shows the existing wetlands and shows the additional areas they plan to keep as open greenspace. The Special Magistrate does generally concur with the Petitioner. The additional areas they are considering unusable, while not technically unusable, however, the shape of the existing wet areas, access roadways needed, and the shape constraints that this necessitates does support an additional downwards value adjustment (a shape adjustment effectively). There is a portion of the westerly side of the greater development that could be an additional commercial space. The Petitioner plan to utilize this as multi-family space instead of as commercial/retail is also reasonable (based on where the wetlands are on this parcel, and how it would most likely be developed). Effectively, the Special Magistrate concurs with the Petitioner regarding the shape and usability constraints.

21 The Petitioner stated that because the greater purchase was for a parcel over 50 acres, smaller site sales should not be relied upon. The Special Magistrate notes that the subject is currently 4 parcels and could be sold again as 4 parcels. It is not inappropriate for the PAO to consider and possibly utilize smaller parcel sales (if access, utilities, development costs, assemblage benefits/problems are properly taken into account), nor is it inappropriate to consider and possibly utilize larger tract sales.

22 The Petitioner stated that the City of Brooksville has a limited moratorium on new water and sewer connections. He stated that approximately a $1.6 million payment would be required to enter the wait list for approval (all parcels combined), and that this adds high risk and cost to any development of the greater property ($4,666 per home if the development is 300 townhomes, plus $200,000 extra for the commercial site more or less; as calculated by the Special Magistrate). This fee may or may not be refundable, and no timetable for approval is known.

23 The Special Magistrate will perform an analysis of the subject transfer at $1,000,000 in February of 2024, as it relates to the values for Petitions 426 and 427 (the largest and central components of the purchase). This sale will be adjusted upwards 4% for improving market conditions, upwards 5% for scale (buying all four parcels in one transaction did allow for some economies of scale), and downwards for 10% for the risk (essentially, half the moratorium risk was accounted for in the purchase presumably), and less 8% COS, time.

This concludes to $904,176 for the greater parcel after these are applied. Deducting the estimated just value of the two residential rear parcels ($115,000 & $240,000) leaves a just value component of $549,176 for Petitioned parcels 426 & 427, based on this transaction. Reviewing the PAO conclusions, 45.9% of the value is placed on Petitioned parcel 426, which equates to $252,071 implied from this transaction for Petition 426 and $297,104 for Petitioned parcel 427. The subject sale does not appear to be at market levels (lacks reliability) and will not be weighted.

24 The Special Magistrate reviewed the PAO land sale comparables for the two larger subject sites (Petitions 426 & 427). Adjustments were made for topography, shape (downward 20% for limited utility issues around and between wet areas), location, COS 8%, scale, and zoning as it applies to the 2 smaller sales. Additionally, a 20% downward adjustment was applied due to the limited moratorium. Commercial and multifamily values were grouped together and a separate additional value for the acreage residential land was applied. After adjustment, the limited land sales data supports a $623,120 just value for Petition 426 and $762,840 just value for Petition 427. This (marginally) credibly and reliably supports that they are each over assessed.

25 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 5-8% (cost of sales adjustment; estimated to be brokerage cost of 4-6%, personal property 0%, and financing costs of 1-2%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

26 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

27 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

28 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

29 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

30 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

***"Factors to consider in deriving just valuation**. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."
The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID NOT overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS NOT shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES NOT exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS NOT satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be denied.

PETITION NO. 25-430

RECOMMENDATION OF SPECIAL MAGISTRATE

VALUE ADJUSTMENT BOARD

HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: Joshua Leelum & Amira J Montes

PARCEL KEY NO: 00243980

SUMMARY OF EVIDENCE

The Petitioner, Joshua Leelum appeared before the Special Magistrate to give testimony. The Property Appraiser was represented by BRANDON JIMENEZ and DOUG MACK. All present parties were put under sworn oath.

The Property Appraiser verified the values accordingly; a just value of $350,131, an assessed or capped value of $350,131, and a taxable value of $299,409. There was no change in value after the process.

The Petitioner estimated just value at $327,000.

Subject Property Type: The subject is a 2,048 SF (heated) single family dwelling with 2,360 adjusted SF that was built in 2004. The subject is located at 1070 Shenandoah Ln, Spring Hill, FL.

The PAO evidence consists of an evidence packet with a case synopsis, PRC with photo and an aerial map of the subject property, a sales analysis report with (3) sales, location map of sales, summary of cost of sale adjustment, PRCs for each sale, and verbal testimony.

The Petitioner's evidence consists of a petition, appraisal of subject property for purchase in 2024, comparable market analysis summary with (3) sales, and redfin market data for each of the (3) additional sales, as well as verbal testimony.

Per testimony by the PAO, the Petitioner submitted their evidence (2) days late. The PAO stated that there was time to review the evidence and had no objection to submission. There were no objections, and all the evidence noted above is considered admissible (unless specifically noted as inadmissible).

Overall, the evidence presented meets specific evidence rules (See Rule 12D-9,025(1) and Rule 12D-9.025(2)b, F.A.C) and is considered sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

The PAO relied upon the sales comparison approach to value and considered CAMA analysis at TRIM. The approach utilized is considered an appropriate methodology by the Special Magistrate.

The PAO presented their evidence packet with a sales analysis report utilizing (3) improved sales (including the subject transfer if applicable) from the subject market area. The PAO performed their analysis utilizing adjusted SF which is generally considered less reliable than utilizing heated SF however, is often used in mass appraisal. The PAO focused on age and location of the subject, and as such, all comparable sales are within 2.38 miles.

The Petitioner provided (3) improved sales (including the subject transfer if applicable) as well as the appraisal made for the purchase of the subject property in 2024 which contained (3) sales and (2) active listings, and an indicated value of $327,000. The subject property sold in 09/2024 for $335,000. Of these sales, (1) was used by the PAO. The Petitioner did not adjust for differences yet provided a summary of the (3) additional sales that were in addition to the appraisal and reflect a market value range of $140-$150 per square foot as well as support a value range of $290,000 to $305,000 for the Petitioner's property.

The PAO had a rebuttal to the Petitioner's evidence stating that after reviewing the Petitioner's appraisal, Sale 3 is a repaired sinkhole. As for the Petitioner's Comparable Market Analysis Summary, the PAO stated that 9307 Mallard St is a 2-story Maronda built home that is a lower quality dwelling, 1171 Lodge Circle is an older home that was built in 1981, is of lower quality and has a pool, and 1282 Deltona Blvd was built in 1989 with a 1998 effective age and is a repaired sinkhole property.

The Petitioner had a rebuttal to the PAO stating that of the (3) sales provided, the Petitioner weighs the sale on 1171 Lodge Circle most heavily.

Of the sales provided, (4) Petitioner and (0) PAO sales are not considered reliable (dissimilar in age, dissimilar design and/or size, lack of or excessive adjustment due to size discrepancies, sale date out of range). The median of the most reliable Petitioner sales, which is the subject property, indicates a just value for the subject of $284,750. The

median of the most reliable PAO sales indicates a just value for the subject of $311,667. The median of all the most reliable sales from both parties is $298,209, which is a credible and reliable just value for the subject based on the available data. The PAO just value conclusion is $350,131. This data reliably supports that the subject is over assessed.

The PAO reported that their internal analysis supports a 15% increase in sale prices from 1/1/2024 to the lien date of 1/1/2025. They also reported that the DOR performed a study across this same period, utilizing qualified sales of like property, and concluded a 15% increase over the same period. The Special Magistrate assumes that the PAO utilized a process of sampling paired sales or some other subset of the available data. The Special Magistrate will equally weigh the DOR study results (15%) utilizing all qualified property sales, and the PAO conclusion (15%) and utilize 15% herein.

The Special Magistrate has applied a qualitative analysis of the data submitted by all parties and has also considered the recent sale of the subject property, if applicable. A COS factor of 15%, market conditions adjustment based on 12% annually, age/condition adjustment, land size/value, a factor for adjusted SF or non-heated area as a % of overall space, extra features differences, a SF adjustment, quality and view adjustments were considered.

The PAO considered the cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 7-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 1-3%, properly considered for the subject). The Special Magistrate will consider this when weighing the appropriateness of each parties' conclusions and the assessment level.

The DOR utilizes 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla

1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs, implying that “just value” is in fact equal to “market value net of typical sales costs”. Based on current training material for Special Magistrates, this consistently and strongly advises a deduction for the 1st and 8th criteria.

The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered in their development of the assessment in regard to the property at hand. The PAO addressed the requirements of FS 193.011 as follows:

“Factors to consider in deriving just valuation. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:

(1) **The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length**;

The PAO, within the CAMA system, makes an adjustment for cost of sale within their direct application of the sales comparison analysis. An adjustment is made for cost of sale as noted under Criteria 8 in their CAMA analysis and in the reconciliation process.

(2) **The highest and best use...,(shortened)** Land use and building codes were considered along with the character of any existing site improvements, the subject is noted to be residential use and was not disputed by either party. Comparable data was selected based on this information.

(3) **The location of the property**; The subject property is assigned a location or neighborhood code within the PAO database related to its specific location. Comparable data is selected with as similar a location as is possible, while also considering other relevant factors.

(4) **The quantity or size of the property**; The size of the building, the site size and site improvements are based on data contained within the PRC and all comparable sales are selected with attention to similarity of size, while also considering and weighing the other relevant factors.

(5) **The cost of said property and the present replacement value of any improvements thereon**; Within the CAMA system, the PAO uses cost data and when

applicable, considers a pure replacement cost new and depreciation factors within a cost approach to value.

(6) **The condition of said property**; The condition of the property, through periodic site inspections, actual age, and information submitted to them by property owners is considered by the PAO. The information is given a % good or % depreciation factor and is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) **The income from said property; and;** When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files, general market statistics, and when available, actual subject performance is considered.

(8) "**The net proceeds of the sale of the property, as received by the seller, after deduction of all the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or atypical terms or financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."**

The cost of sales is considered by the PAO within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID establish a

presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID overcome the presumption of correctness.

The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

The Petitioner HAS shown by a preponderance of evidence that the assessment is excessive. Thus, the assessed value DOES exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, "relevant evidence" is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate has determined that the testimonial and documentary evidence (combined) meet the test of "relevancy and credibility" and WAS sufficient to reach the "preponderance of the evidence" standard of proof required by Rule 12D-9.027(6) FAC.

The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS satisfied the "preponderance of the evidence" standard under the facts as testified to, that the appraiser's assessment is in excess of just value. After weighing all the documentary and testimonial evidence it is concluded that the assessment IS NOT reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be GRANTED in part with a reduction in just value to $298,209.

Special Magistrate

Colleen E Millett

PETITION NO. 25-433

RECOMMENDATION OF SPECIAL MAGISTRATE
VALUE ADJUSTMENT BOARD
HERNANDO COUNTY, FLORIDA

IN RE: THE PETITION OF: LAURA DEON
PARCEL KEY NO: 00612830

SUMMARY OF EVIDENCE

1 The Petitioner, LAURA DEON did appear before the Special Magistrate to give testimony. The Property Appraiser was represented by DOUG MACK. All parties present were put under sworn oath.

2 The Property Appraiser shows a just value of $264,869 ($153/SF heated, $133/SF adjusted), an assessed or capped value of $228,908, and a taxable value of $118,186.

3 The Petitioner did not make a specific value estimate.

4 *Subject Property Type:* The subject is a 1,736 heated base SF (1,988 SF adjusted) single family residence (manufactured home). It was constructed in 2021. The parcel is located at 16167 Brookridge Blvd., Brooksville FL.

5 The PAO evidence consists of verbal testimony, PRC, summary pages, CAMA cost legend, sales map, a statistical sales analysis report, PRC legend, and verbal testimony.

6 The Petitioners' evidence consists of a petition, hearing notice, correspondence, sales data, and verbal testimony.

7 In Hernando County, if the Petitioner is not present at the hearing, then the Petitioner must supply the evidence timely to the PAO and supply a copy of such evidence to the Clerk of Court also. If the Petitioner is present at the hearing, then they must just supply the information in a timely manner to the PAO for a proper evidence exchange. Per testimony, the evidence exchange complied with statutory time-frame requirements. No objections were made by any party present as it relates to data submittal noted above (unless specifically noted). All the evidence noted above is considered admissible (unless specifically noted as inadmissible).

8 Overall, there is sufficient, relevant, and credible information available, from which a reliable estimate of just, assessed, and taxable value can be estimated.

BASIC AND UNDERLYING FINDINGS OF FACT

9 The PAO relied primarily upon the sales comparison approach via a submitted sales analysis report. This implies a heavy weight on CAMA analysis at TRIM, as well as in this hearing. Consideration but no weight was placed on the cost approach, noted in the PRC. No detailed land or cost support was supplied. No weight was placed on the income approach to value. This is considered an appropriate mass appraisal methodology for this property type by the Special Magistrate.

10 The PAO performed their analysis utilizing adjusted SF in their sales analysis report. This methodology is generally considered less reliable than utilizing heated SF in the valuation industry but is often used in mass appraisal.

11 The PAO sales analysis report is a statistical study (a sampling of data used in the CAMA analysis). Market conditions were reported to increase by approximately 4% to 5% in 2024 for single-family homes on average.

12 The subject land transferred for $9,900 in January 2021 (qualified for land only). The manufactured home shows a April of 2021 building permit at $122,137 (the home), as well as a June 2021 building permit for $36,888 for home “additions”. This totaled $168,925 in 2021. The Petitioner stated that including hookups and other fees the total was about $275,000.

13 The PAO supplied 3 improved sales on their statistical grid. No sale(s) was/were an outlier or was too dissimilar to be reliable (and was not weighted). The Special Magistrate will adjust upwards 4%/year for improving market conditions, slight adjustments for land value, age/condition, size/scale, and downwards 10% for COS. After adjustment, these sales indicated a range of $133/SF to $136/SF adjusted before extra features (median $134/SF adjusted). The PAO sales, including extra features, indicate a credible and reliable just value for the subject of ($134/SF adjusted) $266,392 and that the subject IS NOT over assessed.

14 The Petitioner supplied sales from 2025 and 2024. The sales late in 2025 are too far past the lien date to be given any weight.

15 The Petitioner supplied 4 improved sale comparables from 2024. One sale(s) was/were outliers and/or too dissimilar and not weighted (it is too small). The Special Magistrate will adjust the sales via quantitative analysis. Adjustments were made at 4%/year for market conditions, for age/condition, adjusted for land size/value if warranted (data was not available), adjusted for differences in heated SF at $90/SF heated, and in this instance a 10% COS factor is warranted. After adjustment, these remaining sales indicated a range of

$201,330 to $264,150 (median $243,090). The Petitioner sales indicate a credible and reliable just value for the subject of $243,000 and that the subject IS over assessed.

16 Reviewing all the sales presented by both parties, the evidence credibly and reliably supports a just value of $255,000 for the subject and that the subject IS over assessed.

17 The PAO considered cost of sales in their reconciliation process. Proper consideration of the 1st and 8th criteria for the subject property would be approximately 8-12% (cost of sales adjustment; estimated to be brokerage cost of 5-7%, personal property 1-2%, and financing costs of 2-3%, properly considered for the subject). The Special Magistrate will consider this when weighting the appropriateness of each parties' conclusions and the assessment level. Intangible value of approximately 0% is appropriate for the subject property (goodwill, assembled workforce, franchise, etc.).

18 The DOR utilize 15% cost of sales in their oversight function for all property in aggregate. The Magistrate has considered the specific subject property in relation to cost of sales factors as follows (certain scale and property types will vary significantly if cost of sales is to be performed according to statute).

19 Subsection 193.011(8), F.S., requires proper consideration of the "net proceeds of sale," regardless of whether an actual sale of the property has occurred. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001). However, the statute does not require the property appraiser to select the value generated by the application of Subsection 193.011(8), F.S., and apply it in a blanket fashion to all assessments. See Turner v. Tokai Financial Services, Inc., 767 So.2d 494 (Fla. 2nd DCA 2000) review denied 780 So.2d 916 (Fla. 2001).

20 All property is to be assessed at 100% of just value Walter v. Schuler 176 So.2d 81 (Fla 1965). The terms "just value" "fair market value' and "full cash value" are legally synonymous. Id.

21 The 1st and 8th criteria were introduced by the legislature after this ruling, suggesting that the legislature wishes real estate to be taxed net of typical sales costs. This implies that "just value" is in fact equal to "market value net of typical sales costs". The Special Magistrate training material for the current year also consistently and strongly advises a deduction for 1st and 8th criteria.

22 The PAO testified to documentation that pertains to the DOR treatment of the eight criteria required under FS 193.011. The PAO testified to and has documented how each of the criteria was considered and addressed to the property at issue, as part of the development of the assessment. The PAO addressed the requirements of FS 193.011 as follows:

***"Factors to consider in deriving just valuation**. – In arriving at just valuation as required under s. 4, Art. VII of the State Constitution, the property appraiser shall take into consideration the following factors:*

(1) The present cash value of the property, which is the amount a willing purchaser would pay a willing seller, exclusive of reasonable fees and costs of purchase, in cash or the immediate equivalent thereof in a transaction at arm's length;
The sale of similar properties is considered within the PAO CAMA system, as well as within their direct application of sales comparison analysis. An adjustment is made for cost of sales as noted under Criteria 8 in their CAMA analysis and in reconciliation as applicable.

(2) The highest and best use…,(shortened)
Land use and building codes were considered along with the character of any existing site improvements, as noted on the submitted subject property data. Comparable data was chosen based on this information.

(3) The location of said property;
The subject property is assigned a location code within the PAO database related to its specific location. Comparable data is chosen with as similar a location as is possible, while also considering the other relevant factors.

(4) The quantity or size of said property;
The size of building, site and site improvements are based on data contained with the PRC and all comparables are chosen with as similar size as possible, while also considering and weighing the other relevant factors.

(5) The cost of said property and the present replacement value of any improvements thereon;
The PAO uses cost data within their CAMA cost/market hybrid model. When applicable, a pure replacement cost new and depreciation factors are also estimated and utilized within a cost approach to value.

(6) The condition of said property;
The PAO considers condition through periodic site inspections, actual age, and information submitted to them by property owners. A % good or % depreciation factor is noted in their subject documentation and/or PRC card and utilized in the CAMA analysis.

(7) The income from said property; and
When applicable, the PAO prepares an income capitalization analysis based on market data contained in their files as well as general market statistics. Actual subject performance is also considered when that information is available.

(8) The net proceeds of the sale of the property, as received by the seller, after deduction of all of the usual and reasonable fees and costs of the sale, including the costs and expenses of financing, and allowance for unconventional or a typical terms of financing arrangements. When the net proceeds of the sale of any property are utilized, directly or indirectly, in the determination of just valuation of realty of the sold parcel or any other parcel under the provisions of this section, the property appraiser, for the purposes of such determination, shall exclude any portion of such net proceeds attributable to payments for household furnishings or other items of personal property."

The PAO considers cost of sales within their CAMA analysis and in reconciliation when performing discrete sales, income or cost analysis. Sales prices of comparable properties are adjusted downward (reportedly) within CAMA, typically at near 15%.

ULTIMATE FINDINGS OF FACT

Florida Statute section 194.301 elaborates the standards of review that the Special Magistrate must apply to any petition to the Value Adjustment Board. The statute states as follows:

> Pursuant to Section 194.301, the Property Appraiser's assessment shall be entitled to a Presumption of Correctness if the Property Appraiser shows, by a preponderance of the evidence, that the Property Appraiser considered each of the eight criteria set forth in Section 193.011, the Property Appraiser applied the correct appraisal methodology based upon the characteristics of the property, and the Property Appraiser did not use appraisal practices which are different than the appraisal practices generally applied by the Property Appraiser to comparable property in the same county.

1 In accordance with Rule 12D-10.003(5)(a), it is concluded that the PAO DID (marginally) establish a presumption of correctness by properly considering the eight criteria described in FS 193.011. Further, it is concluded that the methodology used by the PAO IS appropriate and DOES comply with professionally accepted appraisal practices for the subject property type. The Petitioner DID overcome the presumption of correctness.

2 The Petitioner HAS NOT shown by a preponderance of evidence that the assessment was based on an arbitrary appraisal practice different from like property in the same county.

3 The Petitioner HAS shown by a preponderance of the evidence that the assessment is excessive. Thus, the assessed value DOES exceed 100% of the fair market value of the property.

CONCLUSIONS OF LAW

The Department of Revenue (DOR) has developed specific evidence rules for presenting relevant and credible evidence. See Rule 12D-9.025(1), Florida Administrative Code (FAC). Generally, “relevant evidence” is evidence that is reasonably related, directly or indirectly, to the statutory criteria that apply to the issue under review. This description means the evidence meets or exceeds the minimum level of relevance necessary to be admitted for consideration, although it does not necessarily mean that the evidence has sufficient relevance to legally justify a particular conclusion. See Rule 12D-9.025(2)(b) FAC.

The Special Magistrate reviewed all evidence presented by all parties. In accordance with DOR guidelines, the Special Magistrate determined that the evidence and testimony was relevant and credible to the valuation at hand. Thus, the evidence as presented was admitted for consideration in relation to the appropriateness of the subject assessment.

The Special Magistrate determined that the testimonial and documentary evidence (combined) meet the test of “relevancy and credibility” and WAS sufficient to reach the “preponderance of the evidence” standard of proof required by Rule 12D-9.027(6) FAC. The Special Magistrate also determined that there IS competent and substantial evidence of value on record in compliance with the criteria of FS 193.011 and professionally accepted appraisal practice to establish the assessment.

The Special Magistrate finds that the Petitioner HAS satisfied the "preponderance of the evidence" standard under the facts as testified to that the appraiser's assessment is in excess of just value. After weighting all of the documentary and testimonial evidence it is concluded that the assessment IS NOT reasonable and within market parameters.

RECOMMENDATION

It is recommended by the Special Magistrate that the relief applied for in this petition be GRANTED in part with a reduction in the just value to $255,000.

_____
Special Magistrate
Steven L. Nystrom, MAI

Doug Chorvat, Jr.
Clerk of Circuit Court & Comptroller - Hernando County
20 N. Main Street, Room 362, Brooksville, FL 34601 - (352) 754-4970

MEMORANDUM

TO: Value Adjustment Board

FROM: Heidi Prouse, Administrative Services Supervisor

SUBJECT: Invoices for Special Magistrate Services

DATE: March 16, 2026

Attached are invoices paid for services rendered by the Special Magistrates appointed to hear petitions filed with the **2025** Value Adjustment Board (VAB):

Joseph Haynes Davis	$ 1400.00
Robert C. Hicks	$ 13,037.50
Shelley Kennedy	$ 3,150.00
Colleen Millett	$ 7,350.00
Steven L. Nystrom	$ 17,587.50
Richard L. Steeves	$ 5,250.00
Robert Sutte	$ 7,831.25
	$ 55,606.50

Florida Statutes, Chapter 194.015 indicates that two-fifths of the expenses of the VAB shall be borne by the district school board and three-fifths by the county commission, as follows:

School Board's share based upon two-fifths funding	$ 22,242.60
County Commission's share based upon three-fifths funding	$ 33,363.90
Total	$ 55,606.50

Name: Robert Sutte CRE, MAI, SRA
Real Property Analysts of Orlando

Address: 2433 Lee Road
Winter Park, Fl. 32789
Mobile: 407-388-4616

The 15	Petition Numbers	Description	Hours	
11-6-25	All 15 Numerically Consecutive	Hearings: 9:08-11:49 Lunch 12:38-1:46 Petitions 25-269 to 25-279 and 25-281 to 25-284	4.00	
		All properties single-family detached residences. Petition 269 was the model recommendation.		
11-13		4:35-6:45	2.50	
		Began study of subject properties, and both valuation models used by Propert Appraiser (PA) and Petitioner (PET).		
11-15		3:55-7:10 Continuation of above. Studied in detail, both appraisal processes.	3.25	
11-17		3:17-7:15 Completed draft of model Rec.269. Phone & email Ms. Prouse. Submit model to Atty. Cosby for approvals.	4.25	
11-18		Made individual study of the written and verbal evidence provided for each petition. Wrote a description of the subject property and the valuation analysis used. Concluded my findings of fact and conclusions of law for each of the 15 petitions.		
11-18		9:20- 6:40 – lunch= 9.0	9.00	

11-24 , 12-1 ' 12-4,12-12-2025	ALL	VAB required magistrate to prepare Fl. DOR form 495V for each real property. Research done to verify correct form to use. Requested permission to obtain correct values from the PA correctly denied by the VAB. Told to use just, assessed and market values from the PA's evidence and if incorrect he could change them. Issues discussed with Ms. Prouse and later on 2-25-26 with Ms. Cosby.		1.75
12-20		Additional hours continued from 11–18-25. 3:34-6:28 =		3.00
12-21		Completion of Recommendations and DOR forms 11:19- 5:29- 70 min. lunch =		5.00.
12-30		Same 4:12-5:15= Submission of work for Atty. Cosbys Review		1.00
		Subtotal: Hours Worked to Date		32.75
1-8-26 to 2-5-26		Received Atty. Cosbys detailed request for revisions and corrections for 8 of the 15 Recs. Much discussing and clarification regarding complex requested changes was necessary. Necessary work on this requirement took place on January 8, 22, 27, 30, and February 5. Total Hours10.00.Since these requests were from the VABs legal consultant there is no charge to the magistrates client.		(10.00) No charge
2-17-26		Received an email from Ms. Nienke Osinga ,Administrative Services Clerk I , stating " Upon request from the Property Appraisers office the following corrections for petitions 25-269 through 25-284 areas follows". This was a listing of 14 of the 15 petitions which requested 23 property value changes, 3 replacement parcel ID numbers,1 street name correction and 1 address change. As discussed with the Administrative Services Supervisor and the VABs attorney, these changes would not be necessary if the Property Appraisers taxation numbers had been provided when requested.in December. Also, during this magistrates 28 years of experience serving 16 Florida VABS including Hillsborough , Orange and Osceola this is the first time I have ever been asked to make changes "at the request of a County Property Appraiser. Applicable Hours worked follows.		
2-17 to 3-3		2-25: 3:00-6:28=3.5 2-26:3:40-7:15=3.5 2-27: 12:45-3:03=2.25 3-3:3:05-5:15+2.0 .Total Hours 11.25. Minus 25% for additional changes requested by Atty. Cosby =8.75 total.		8.75
3-12 & 3-13		Assignment completion, organization, invoice accounting and reporting. 12 :30-2:45 on 3-12 and 11:30-12:35 on 3-13 =3.25		3.25
		Total Hours 44.75 @ $175.00 Total Amount Due to Date $7,831.25

FLORIDA DEPARTMENT OF REVENUE

CERTIFICATION OF THE VALUE ADJUSTMENT BOARD

Section 193.122, Florida Statutes

DR-488
R. 12/09
Page 1 of 2
Rule 12D-16.002
Florida Administrative Code

Tax Roll Year | 2 | 0 | 2 | 5 |

The Value Adjustment Board of Hernando County, after approval of the assessment roll below by the Department of Revenue, certifies that all hearings required by section 194.032, F.S., have been held and the Value Adjustment Board is satisfied that the

Check one. ☑ Real Property ☐ Tangible Personal Property

assessment for our county includes all property and information required by the statutes of the State of Florida and the requirements and regulations of the Department of Revenue.

On behalf of the entire board, I certify that we have ordered this certification to be attached as part of the assessment roll. The roll will be delivered to the property appraiser of this county on the date of this certification. The property appraiser will adjust the roll accordingly and make all extensions to show the tax attributable to all taxable property under the law.

The following figures* are correct to the best of our knowledge:

1. Taxable value of ☑ real property ☐ tangible personal property assessment roll as submitted by the property appraiser to the value adjustment board	$	16,603,983,607
2. Net change in taxable value due to actions of the Board	$	14,755,658
3. Taxable value of ☑ real property ☐ tangible personal property assessment roll incorporating all changes due to action of the value adjustment board	$	16,589,227,949

*All values entered should be county taxable values. School and other taxing authority values may differ.

Certification of the Value Adjustment Board

PROCEDURES

Tax Roll Year | 2 | 0 | 2 | 5 |

The value adjustment board has met the requirements below. Check all that apply.

The board:

☑ 1.	Followed the prehearing checklist in Chapter 12D-9, Florida Administrative Code. Took all actions reported by the VAB clerk or the legal counsel to comply with the checklist.
☑ 2.	Verified the qualifications of special magistrates, including if special magistrates completed the Department's training.
☑ 3.	Based the selection of special magistrates solely on proper qualifications and the property appraiser did not influence the selection of special magistrates.
☑ 4.	Considered only petitions filed by the deadline or found to have good cause for filing late.
☑ 5.	Noticed all meetings as required by section 286.011, F.S.
☑ 6.	Did not consider ex parte communications unless all parties were notified and allowed to object to or address the communication.
☑ 7.	Reviewed and considered all petitions as required, unless withdrawn or settled by the petitioner.
☑ 8.	Ensured that all decisions contained the required findings of fact and conclusions of law.
☑ 9.	Allowed the opportunity for public comment at the meetings where the recommended decisions of special magistrates were considered or board decisions were adopted.
☑ 10.	Addressed all complaints of noncompliance with the provisions of Chapter 194, Part I, Florida Statutes, and rule Chapter 12D-9, F.A.C., that were called to the board's attention.

All board members and the board's legal counsel have read this certification.

The board must submit this certification to the Department of Revenue before it publishes the notice of the findings and results required by section 194.037, F.S.

On behalf of the entire value adjustment board, I certify that the above statements are true and that the board has met all the requirements in Chapter 194, F.S., and Department rules.

After all hearings have been held, the board shall certify an assessment roll or part of an assessment roll that has been finally approved according to section 193.011, F.S. A sufficient number of copies of this certification shall be delivered to the property appraiser to attach to each copy of the assessment roll prepared by the property appraiser.

CONTRACT FOR SERVICES
LEGAL COUNSEL FOR THE HERNANDO COUNTY VALUE ADJUSTMENT BOARD

THIS AGREEMENT made this _____ day of_____, 2026, between the **Hernando County Value Adjustment Board**, referred to as BOARD in this agreement, and **Law Office of Holly E. Cosby, P.A.**, referred to as LEGAL COUNSEL.

WHEREAS, Florida Statute (FS) Chapter 194 requires the BOARD to employ private legal counsel;

NOW, THEREFORE, in consideration of the mutual covenants contained herein, the BOARD and LEGAL COUNSEL hereby agree as follows:

THIS AGREEMENT shall become effective on the last date signed by the LEGAL COUNSEL and the Chairperson of the BOARD. This Agreement shall run from the Effective Date until the BOARD completes all of its duties, concludes its session under Fla. Stat. § 194.032(3), formally adjourns for the 2027 tax year (the "2027 Tax Year") and either renews this Agreement or selects subsequent LEGAL COUNSEL for the 2028 tax year. It is the intent of the BOARD and LEGAL COUNSEL that this Agreement run for a period of two (2) years. This Agreement may be renewed in writing or verbally, by motion and acceptance by the BOARD, during any meeting of the BOARD where a verbatim record or court reporting transcript occurs.

LEGAL COUNSEL will perform services for the BOARD and will represent the BOARD's interests. LEGAL COUNSEL will assign **Holly E. Cosby, Esq**. as LEGAL COUNSEL'S designated attorney for purposes of representing the BOARD. LEGAL COUNSEL will provide legal advice and counsel to the BOARD and perform those duties set forth in Chapter 194, FS. Duties include: (a) attending ALL meetings of the BOARD held in connection with the 2023 Tax Year and all subsequent tax years so long as the contract is in effect, as the BOARD's legal adviser and counsel; (b) consulting with and advising the Special Magistrates should the need arise during the course of any hearing(s) held before said Special Magistrate(s) during the 2023 Tax Year and subsequent tax years, as applicable, and (c) performing such additional services and duties as may be specifically assigned by the BOARD and/or BOARD ADMINISTRATION. The LEGAL COUNSEL understands that *"no meeting of the board shall take place unless counsel* to *the board* is *present"* (FS § 194.015) so that attendance at all scheduled meetings is critical.

The BOARD shall compensate the LEGAL COUNSEL for the performance of the aforementioned advice, counsel and duties at the rate of $250.00 per hour. For any meeting in Brooksville, LEGAL COUNSEL shall not bill for travel time; however, LEGAL COUNSEL shall receive reimbursement for travel mileage in accordance with the rates set forth each year by the Internal Revenue Service, reimbursement of customary costs (e.g. postage and document delivery), and reimbursement for lodging if any scheduled meetings are cancelled or rescheduled and LEGAL COUNSEL is unable to be refunded for lodging for said cancelled or rescheduled meeting.

As a prerequisite for payment, the LEGAL COUNSEL shall provide the BOARD an itemized invoice within thirty (30) days following each period in which advice and counsel are given and duties are performed. Invoices shall be due and payable within 45 days after delivery by LEGAL COUNSEL to the Clerk to the Value Adjustment Board. The funding for this Agreement is subject to budgeting and appropriation by the Hernando County Board of County Commissioners (3/5ths) and the Hernando County School District (2/5ths), respectively, as required under FS § 194.015.

LEGAL COUNSEL will not represent any client which either LEGAL COUNSEL or the BOARD determines to be directly adverse to the BOARD, nor will LEGAL COUNSEL represent the BOARD in matters which it determines to be directly adverse to the interests of any other client of LEGAL COUNSEL.

Pursuant to FS §194.015, Florida Department of Revenue Bulletin PTO 08-12 (dated August 29, 2008), and Attorney General Opinion Number 2010-03 (dated January 13, 2010), LEGAL COUNSEL shall not represent the property appraiser, the tax collector, any taxing authority, or any property owner in any administrative or judicial review of property taxes. Notwithstanding the foregoing, LEGAL COUNSEL represents other Florida Value Adjustment Boards and the BOARD does not deem such representation as a conflict with this Agreement and/or any terms or conditions set forth herein.

IN WITNESS WHEREOF, the parties have executed this agreement the day and year indicated below.

Importance:	High

Good afternoon, Commissioners.

I am embarrassed that this continues, and I am sorry that you continue to get dragged into this. I have no control over Kevin's continued efforts to try to get rid of me, and this is just more of the same. He and the Property Appraiser's Office are clearly collaborating on this effort, which is against F.A.C. 12D-9.023(1), which states, "…The board clerk shall perform his or her duties in a manner to avoid the appearance of a conflict of interest. The board clerk shall not use the resources of the property appraiser's or tax collector's office and shall not allow the property appraiser or tax collector to control or influence any part of the value adjustment board process."

When the Property Appraiser's Office first distributed their email, they copied Commissioner Pendergrass and Kevin's direct email. Kevin is never copied on anything VAB related, he is not part of the day-to-day VAB operations. The two Clerks of Court before Kevin were also not copied on day-to-day VAB operations, VAB Administration (infovab@leeclerk.org) is the email address that should be copied. They were not. Kevin then forwarded his email to others as a BCC; I am not sure who has received that email. The only reason I can think of for the "FOR COMPLIANCE PURPOSES - PLEASE DO NOT REPLY ALL TO THIS EMAIL" heading is that he does not want me to find out who he has copied, which would be revealed if anyone were to "reply to all". This is confusing, since the VAB is "in the sunshine". As such, I am aware that this email will be placed "in the sunshine" at some point, and I am okay with that.

The bottom line is that I am a taxpayer, just like every other VAB petitioner, and I did nothing wrong by filing the petitions I filed with the VAB. I had a plan on how to proceed with these matters to avoid a conflict of interest, and all of it was above board, very ethical, and the legal basis for it is in writing. VAB Administration was well aware that I filed three VAB petitions, it was not a secret to them. I had every intention of bringing my filings, and subsequently the Property Appraiser's letter, to the Board's attention during the Special Meeting that we will have coming up; you should be receiving a quorum roll call request from VAB Administration soon on that. Kevin decided to disseminate this to everyone in advance of any public meeting.

In the meantime, if either of you would like to discuss this with me, please feel free to call me. I have copied both of you together, as you work together in the Commission, I have nothing to hide, and I would like the conversations to remain open and consistent with as many VAB members as possible. I will be reaching out to Mr. Zavada and Ms. Briggs, the VAB citizen members, as well. With regards to the

appointed School Board Member, I will only discuss this with Mr. Fisher on the record and during an open, public meeting. There is nothing to gain from me reaching out to him directly at this time.

Respectfully,
Holly Cosby

****FOR COMPLIANCE PURPOSES - PLEASE DO NOT REPLY ALL TO THIS EMAIL****

Good afternoon Value Adjustment Board Members,

On Wednesday January 21st, the Property Appraiser sent Chairman Commissioner Pendergrass the attached legal opinion. VAB Counsel and myself were copied on that email correspondence. Also attached is your VAB Counsel's current contract.

Based upon the content of these documents, the VAB may choose to take action. Ms. Cosby did withdraw the 3 petitions, but only after the legal opinion was distributed to the Chair.

I request that you all please review these materials and advise how you would like to proceed.

Thank you,

Kevin C. Karnes, MLS

Re: Petitions filed by Value Adjustment Board Attorney for Lee County

Dear Mr. Caldwell:

You have requested my opinion regarding petitions filed with the Lee County Value Adjustment Board (VAB) contesting the assessment of three different real property parcels for the 2025 tax year. Those petitions were filed by Holly Cosby, who also serves as counsel for the VAB. You have inquired as to whether Ms. Cosby, as the VAB attorney, may file petitions contesting the valuation of the property. In sum, it is my opinion that Ms. Cosby's actions constitute a clear violation of the statutes and administrative rules governing the VAB process.

Factual Background

You have advised that Holly Cosby is the attorney for the VAB and has provided representation to the VAB for several years. The biography on her law firm website indicates that she also serves as attorney to the value adjustment boards in Hendry, Glades, Collier, Hernando, and Nassau counties. Ms. Cosby has filed two petitions with the VAB contesting the valuation of properties owned by limited liability companies (LLC) for which she is listed as a manager. She also has filed a petition contesting the valuation of her homestead property, which is owned by a revocable trust for which she is the trustee.

Petition 2025-00920 contests the valuation of a real property parcel owned by Cheap Rent LLC, and seeks a decrease in that valuation. (Exh. #1) The petition was filed by Holly Cosby as manager of Cheap Rent LLC. Ms. Cosby completed part 3 of the VAB petition as the taxpayer. The form advises individuals to "[c]omplete part 3 if you are representing yourself or if you are authorizing a representative listed in part 5 to represent you without attaching a completed power of attorney or authorization for representation to this form." Part 5 of the petition form was not completed.

Review of the Secretary of State's online database reflects that Ms. Cosby was listed as the Manager and Registered Agent of Cheap Rent LLC in the 2025 annual report. (Exh. #2) For 2026, Ms. Cosby is listed as the Manager and Registered Agent. The 2026 annual report also indicates that Charles J. Cosby is an authorized agent. (Exh. #3)

The property is located at 1828 Evans Avenue and is a warehouse industrial property. For 2025, the Just (Market) Value was $2,385,183. The Assessed (Capped) Value was $691,683.

Petition 2025-00921 contests the valuation of a real property parcel owned by Zally and Charlie LLC and seeks a decrease in that valuation. (Exh. #4) The petition was filed by Holly Cosby as manager of Zally and Charlie LLC. Ms. Cosby again completed part 3 of the VAB petition as the taxpayer.

Review of the Secretary of State's online database reflects that Ms. Cosby was listed as the Manager and Registered Agent of Zally and Charlie LLC in the 2025 annual report. (Exh. #5) For 2026, Ms. Cosby is listed as the Manager and Registered Agent. Charlie R. Cosby III also is listed as a manager. The 2026 annual report further indicates that Charles J. Cosby is an authorized agent. (Exh. #6)

The property is located at 1596 Tamiami Trail and contains several mobile homes, a duplex, and other residential buildings. For 2025, the Just (Market) Value of the property was $914,229. The Assessed (Capped) Value was $375,954.

Petition 2025-00922 contests the valuation of a real property parcel, which is Ms. Cosby and her husband's homestead parcel, owned by Holly Cosby as trustee of the Holly E. Cosby Revocable Trust. That petition seeks an *increase* in the valuation. (Exh. #7) Although such petitions still are the exception to the general rule, taxpayers may seek an increase in the valuation of their property. Op. Att'y Gen. Fla. 2009-50 (2009). Typically, such petitions are seeking an increase in the just (market) value of the homestead property because the owner is contemplating moving to another homestead property and wants to increase the accrued assessment differential (portability) amount. *See* § 193.155(8), Fla. Stat. (2025).

The petition was filed by Holly Cosby as trustee. Ms. Cosby also completed part 3 of the VAB petition as taxpayer. Review of the Warranty Deed for the parcel reflects that Ms. Cosby, joined by her husband, conveyed the property to Holly E. Cosby, or her successor, as trustee for the Holly E. Cosby Revocable Trust in 2024. (Exh. #8)

The property is located at 6211 Silver & Lewis Lane. For 2025, the Just (Market) Value of the property was $451,549. The Assessed (Capped) Value was $271,859. The Taxable Value, which reflects the homestead exemption, was $221,137.

A hearing on Petition 2025-00922 currently is scheduled for January 27, 2026. Hearings on Petitions 2025-00921 and 2025-00920 have been scheduled for February 9, 2026.

Legal Analysis

All value adjustment boards in Florida must be represented by private counsel. "The primary role of the board legal counsel shall be to advise the board on all aspects of the value adjustment board review process to ensure that all actions taken by the board and its appointees meet the requirements of law." Fla. Admin. Code R. 12D-9.009(1)(a) (2025). VAB counsel is not an advocate for either the petitioner or the property appraiser; his or her role is to ensure that the proceedings are fair and consistent with the law. *Id.* at (1)(c). The "board legal counsel shall advise the board in a manner that will promote and maintain a high level of public trust and confidence in the administrative review process." *Id.* at (1)(b).

The duties of the legal counsel include:

> (d) Board legal counsel shall advise the board of the actions necessary for compliance with the law.
> (e) Board legal counsel shall advise the board regarding:
> 1. Composition and quorum requirements;
> 2. Statutory training and qualification requirements for special magistrates and members of the board;
> 3. Legal requirements for recommended decisions and final decisions;
> 4. Public meeting and open government laws; and,
> 5. Any other duties, responsibilities, actions or requirements of the board consistent with the laws of this state.
> (f) Board legal counsel shall review and respond to written complaints alleging noncompliance with the law by the board, special magistrates, board clerk, and the parties. The legal counsel shall send a copy of the complaint along with the response to the department. This section does not refer to routine requests for reconsideration, requests for rescheduling, and pleadings and argument in petitions.

Fla. Admin. Code R. 12D-9.009(1)(e) (2025). In sum, counsel for the VAB advises the board on the legal requirements on all aspects of the hearing process.

Importantly, the VAB attorney "may not represent the property appraiser, the tax collector, any taxing authority, *or any property owner* in any administrative or judicial review of property taxes." § 194.015, Fla. Stat. (2025) (emphasis added). There is no geographic limitation on these requirements and, therefore, the private counsel cannot represent any other taxing authority in the state. Op. Att'y Gen. Fla. 2008-55 (2008). In that opinion, the Attorney General advised that counsel for a value adjustment board could not represent a local government entity either within the county or elsewhere within the state. As the opinion stated:

> Based on the language of the statute, it would appear that an attorney who represents a taxing authority outside Nassau County is precluded from representing the Nassau County Value Adjustment Board. Nothing in the language of the amendment or in legislative history places any geographical or jurisdictional limits on these conditions and this office is without any authority to read such a limitation into the statute.

Id.

The reasoning of the Attorney General's opinion would apply to prohibit counsel for the VAB from representing any property owner within Lee County or elsewhere in the state in "any administrative or judicial review of property taxes." § 194.015, Fla. Stat. (2025). Likewise, such representation of property owners would disqualify that attorney from eligibility to serve as counsel for any value adjustment board in the state.

In view of Ms. Cosby's role as counsel to the VAB, your office is correct to be concerned with the legality and propriety of the petitions filed by her on behalf of LLC's of which she is a manager and the homestead property owned by her trust. You have requested my opinion regarding whether Ms. Cosby's petitions would be considered lawfully authorized under section 194.015. If the filing of the petitions were found to be unauthorized under section 194.015, you have further inquired as to the legal consequence of the statutory violation and any potential remedies available to your office.

(1) Whether the filing of petitions with the VAB by its legal counsel is authorized pursuant to section 194.015?

Based upon my review of the applicable statues, administrative rules, Attorney General opinions, and case law, it is my opinion that the filing of petitions with the VAB by its legal counsel conflicts with the plain language of section 194.015 and the underlying legislative intent of the enactment. Section 194.015 prohibits the VAB attorney from "representing the property appraiser, the tax collector, any taxing authority, *or any property owner* in any administrative or judicial review of property taxes." (Emphasis added.) Ms. Cosby's filing of the three petitions clearly violates this statutory prohibition. Review of each of the petitions reflects that Ms. Cosby electronically signed the petitions, either as manager for the two LLC's or as trustee for her revocable trust, and completed the "taxpayer" section of the petition form. On the petition forms, she even uses as the email address cosbylaw@gmail.com, which is the same email address she uses for the Florida Bar.

The filing of the petition also conflicts with Ms. Cosby's obligations as VAB attorney under the administrative rules. The VAB attorney cannot function as "an advocate for either party in a value adjustment board proceeding, but instead ensures that the proceedings are fair and consistent with the law." Fla. Admin. Code R. 12D-9.009(1)(c) (2025). "An attorney may represent a value adjustment board, even if another member of the attorney's law firm represents one of the enumerated parties *so long as the representation is not before the value adjustment board.*" Fla. Admin. Code R. 12D-9.008(4) (2025). That rule also commands that legal counsel "should avoid conflicts of interest or the appearance of a conflict of interest in their representation." *Id.* at (5). The filing of petitions contesting the valuation of property owned by entities in which Ms. Cosby has a personal interest is textbook example of a conflict of interest. She cannot act as an advocate for entities managed or controlled by herself and, at the same time, function as counsel for the VAB. The two interests are diametrically opposed.

Ms. Cosby cannot avoid the application of section 194.015 and the referenced administrative rules by asserting that she is merely filing the petitions in a pro se capacity and, therefore, is not "representing" any property owner as prohibited in the statute. Section 194.015 does not contain any exception for pro se filings. In any event, such a pro se filing would violate the prohibition against conflicts of interest set forth in rule 12D-9.008(5).[1]

[1] This opinion does not address the implications of the conflict of interest prohibitions in the Rules Regulating the Florida Bar.

Any argument that Ms. Cosby is merely proceeding pro se also would be contrary to well established case law regarding pro se representation of corporate entities and trusts. Because such entities are considered to be separate and apart from their officers, stockholders, members, and/or trustees, courts routinely have disallowed any claim that they may be represented by such individuals pro se.

With regard to the petitions filed on behalf of the LLC's of which Ms. Cosby is a manager, it is well settled that the member of an LLC has no ownership interest in assets contributed to it. *Palma v. S. Fla. Pulmonary & Critical Care, LLC,* 307 So. 3d 860, 866 (Fla. 3d DCA 2020) ("[A]n LLC is an autonomous legal entity, separate and distinct from its members."). "All property originally contributed to the limited liability company or subsequently acquired by a limited liability company by purchase or other method is limited liability company property." § 605.0110(1), Fla. Stat. (2025). "It is basic hornbook law that 'corporate property is vested in the corporation itself, and not in the individual stockholders, who have neither legal nor equitable title in the corporate property.'" *Brevard Cnty. v. Ramsey*, 658 So. 2d 1190, 1196 (Fla. 5th DCA 1995) (quoting *In re Miner*, 177 B.R. 104, 106 (Bankr. N.D. Fla. 1994) (emphasis added)). Consequently, an LLC member has "no interest in any specific limited liability company property." § 605.0110(4), Fla. Stat. (2025) (emphasis added). *See also S & A Prop. Inv. Servs., Inc. v. Garcia*, 360 So.3d 432, 437 (Fla. 3d DCA 2023) ("Taxpayer has cited no authority for the proposition that owners or members of an LLC who convey, via quitclaim deed, real property to an LLC retain, as a matter of law, the equitable title to the conveyed property because those owners or members control the LLC.").

It is a well-founded principle in Florida law that corporations and LLC's cannot represent themselves or appear in a court of law without an attorney. *Running Cars, LLC v. Miller*, 333 So.3d 1177, 1179 (Fla. 1st DCA 2022) (citing *Magnolias Nursing & Convalescent Ctr. v. Dep't of Health & Rehab. Servs., Off of Licensure & Certification*, 428 So.2d 256, 257 (Fla. 1st DCA 1982)); *Joe-Lin, Inc. v. LRG Restaurant Group, Inc.*, 696 So.2d 539, 540 (Fla. 5th DCA 1997); *Szteinbaum v. Kaes Inversiones y Valores, C.A.*, 476 So.2d 247, 248 (Fla. 3d DCA 1985); *Nicholson Supply Co. v. First Fed. Sav. & Loan Ass'n of Hardee Cnty.*, 184 So.2d 438 (Fla. 2d DCA 1966). Although an individual may represent himself or herself in court without employing an attorney, a corporation is not permitted to do so and a pleading signed in the corporate name by one of its agents or officials is a nullity and must be disregarded. *Magnolias Nursing & Convalescent Ctr.*, 428 So.2d at 257.

The rule is the same for the petition filed by Ms. Cosby as trustee for her revocable trust. Multiple Florida courts have determined that a trustee is unable to appear pro se on behalf of a trust because it constitutes the unauthorized practice of law. *Lavine v. JPMorgan Chase Bank*, 226 So.3d 327 (Fla. 5th DCA 2017); *Griner v. Rockridge Prop. Owner's Assoc.*, 59 So.3d 1143 (Fla. 2d DCA 2011); *EHQF Trust v. S & A Capital Partners, Inc.*, 947 So.2d 606 (Fla. 4th DCA 2007).

In *EHQF Trust*, the notice of appeal was filed by a trust and was not signed by an attorney licensed to practice law in the state of Florida. 947 So.2d at 606. The Fourth District cited precedent from other states to support its determination that a trustee cannot appear pro se on behalf of a trust. *Id.* A trustee represents the interests of others, so allowing a trustee to appear pro se would constitute the unauthorized practice law. *Id.* Because the trustee was not authorized to appear pro se, the court dismissed the appeal. *Id.*

Two other Florida appellate courts relied on the holding in *EHQF Trust* to reach the same conclusion. *Lavine*, 226 So.3d at 327; *Griner*, 59 So.3d at 1. In *Lavine*, the trustee of the revocable trust signed the notice of appeal for a final judgment of foreclosure. 226 So.3d at 327. The appellate court determined that because the trustee was not an attorney, he was unable to represent the trust because doing so constituted the unauthorized practice of law. *Id.* As a result, the appeal was dismissed. *Id.* Similarly, in *Griner*, the Second District Court dismissed an appeal where a trustee appeared pro se on behalf of a trust. 59 So.3d at 1.

The Eleventh Circuit has addressed whether a trustee can act on behalf of a trust when filing documents in court. *J.J. Rissell, Allentown, PA Trust v. Marchelos*, 976 F.3d 1233 (11th Cir. 2020). In reaching its decision, the court noted that a trust is like a corporation in that it "can act only through agents, cannot appear *pro se*, and must be represented by counsel." *Id.* at 1235. The court determined that although the trustee was an attorney, he was disqualified from representing the trust. *Id.* at 1236. As a result, the trustee was in the same position as a nonlawyer trustee, and a nonlawyer trustee has no authority to represent a trust in court. *Id.* Ms. Cosby would appear to be similarly disqualified from representing her trust "pro se."

(2) What are the legal consequences resulting from a violation of section 194.015?

Section 194.015 prohibits the VAB attorney from "representing the property appraiser, the tax collector, any taxing authority, or any property owner in any administrative or judicial review of property taxes." The statute, however, does not include within its language any specific remedy for a party that believes a violation has occurred.

Based upon the plain language of the statute, Ms. Cosby is precluded from representing any property owner in VAB proceedings in Lee County and elsewhere in the state as long as she serves as VAB attorney. Because Ms. Cosby has violated section 194.015 by filing the three petitions in Lee County, the statute would require that she be disqualified from serving as counsel for the VAB. For that matter, the statute would require that she be disqualified from serving as counsel for any other value adjustment boards elsewhere in the state. Op. Att'y Gen. Fla. 2008-55 (2008). Whether Ms. Cosby should be disqualified from serving as counsel for the VAB is an issue within the purview of the VAB and/or the VAB Clerk. The property appraiser is not involved such matters.

The more troublesome question is whether your office has any remedy under the statutes and administrative rules governing the VAB process. VAB members and special magistrates "shall recuse themselves from hearing a petition when they have a conflict of interest or the appearance of a conflict of interest." Fla. Admin. Code R. 12D-9.022(3) (2025). Either party may communicate a reasonable belief that a special magistrate does not hold the qualifications required for their position or communicate a reasonable belief that a VAB member or special magistrate should recuse himself or herself for bias, prejudice or conflict of interest. Fla. Admin. Code R. 12D-9.022 (2025). The basis for any such belief shall be included in the record or submitted to the VAB's counsel prior to the hearing. *Id.* The resolution to any request for recusal or disqualification shall be entered into the record. *Id.*

No similar provisions exist whereby a party may request the recusal of the VAB attorney or, in a similar manner, where the VAB attorney can recuse himself or herself from involvement in the

VAB proceedings. The lack of any potential remedy by way of recusal makes sense in that section 194.015 and the administrative rules operate so as to theoretically prevent such conflicts of interest from occurring in the first instance.

The pro se filing of a complaint or other legal pleading in circuit court on behalf of an LLC or a trust would be deemed a legal nullity. The quasi-judicial nature of the VAB process, however, allows anyone – including nonlawyers – to represent petitioners. Any argument that the three petitions filed by Ms. Cosby are a legal nullity and cannot be considered by the special magistrate, therefore, may not be sustained. Of course, these arguments would be forwarded by the special magistrate to the VAB attorney for counsel and advice. Again, such an event reflects the obvious conflict of interest resulting from Ms. Cosby's filing of petitions contesting the valuation of property in which she has an interest with a quasi-judicial body responsible for adjudicating the petition upon advice of its legal counsel, which is Ms. Cosby.

Without any delineated remedy within the statutes or administrative rules, the property appraiser's only recourse would be to make an appropriate objection at the VAB hearings involving Ms. Cosby's petitions. Without question, Ms. Cosby cannot continue to serve as counsel for the VAB while filing petitions contesting the valuation of property and appearing on behalf of the property owners at the hearings before the special magistrates. Such conduct violates section 194.015 and Florida Administrative Code Rules 12D-9.008 and 9.009.

Should you have any questions, please do not hesitate to contact my office.

Very truly yours,

Loren E. Levy

FLORIDA

PETITION TO THE VALUE ADJUSTMENT BOARD
REQUEST FOR HEARING

Section 194.011, Florida Statutes

DR-486
R. 11/23
Rule 12D-16.002
F.A.C.
Eff. 11/23

You have the right to an informal conference with the property appraiser. This conference is not required and does not change your filing due date. You can present facts that support your claim and the property appraiser can present facts that support the correctness of the assessment. To request a conference, contact your county property appraiser.

For portability of homestead assessment difference, use the Petition to the Value Adjustment Board – Transfer of Homestead Assessment Difference – Request for Hearing Form (DR-486PORT). For deferral or penalties, use the Petition to the Value Adjustment Board – Tax Deferral or Penalties – Request for Hearing Form (DR-486DP). Forms are incorporated, by reference, in Rule 12D-16.002, Florida Administrative Code.

COMPLETED BY CLERK OF THE VALUE ADJUSTMENT BOARD (VAB)

Petition # 2025-00920	County Lee	Tax year 2025	Date received 09/09/2025

COMPLETED BY THE PETITIONER

PART 1. Taxpayer Information

Taxpayer name	CHEAP RENT LLC	Representative	
Mailing address for notices	6211 SILVER AND LEWIS LN FORT MYERS, FL 33966	Parcel ID and physical address or TPP account #	134424P3025030100 / 1828 EVANS AVE
Phone	9416772521	Email	COSBYLAW@GMAIL.COM

The standard way to receive information is by US mail. If possible, I prefer to receive information by ☒ email ☐ fax.

☐ I am filing this petition after the petition deadline. I have attached a statement of the reasons I filed late and any documents that support my statement.

☐ I will not attend the hearing but would like my evidence considered. (In this instance only, you must submit duplicate copies of your evidence to the value adjustment board clerk. Florida law allows the property appraiser to cross examine or object to your evidence. The VAB or special magistrate ruling will occur under the same statutory guidelines as if you were present.)

Type of Property
☐ Res. 1-4 units ☒ Industrial and miscellaneous ☐ High-water recharge ☐ Historic, commercial or nonprofit
☐ Commercial ☐ Res. 5+ units ☐ Agricultural or classified use ☐ Vacant lots and acreage ☐ Business machinery, equipment

PART 2. Reason for Petition Check one. If more than one, file a separate petition.

☒ Real property value (check one): ☒ decrease ☐ increase
☐ Denial of classification
☐ Parent/grandparent reduction
☐ Property was not substantially complete on January 1
☐ Tangible personal property value (You must have timely filed a return required by s.193.052. (s.194.034, F.S.))
☐ Refund of taxes for catastrophic event
☐ Denial of exemption Select or enter type: _____
☐ Denial for late filing of exemption or classification (Include a date-stamped copy of application.)
☐ Qualifying improvement (s. 193.1555(5), F.S.) or change of ownership or control (s. 193.155(3), 193.1554(5), or 193.1555(5), F.S.)

☐ Check here if this is a joint petition. Attach a list of units, parcels, or accounts with the property appraiser's determination that they are substantially similar. (s. 194.011(3)(e), (f), and (g), F.S.)

30 Enter the time (in minutes) you think you need to present your case. Most hearings take 15 minutes. The VAB is not bound by the requested time. For single joint petitions for multiple units, parcels, or accounts, provide the time needed for the entire group.

☒ My witnesses or I will not be available to attend on specific dates. I have attached a list of dates.

You have the right to exchange evidence with the property appraiser. To initiate the exchange, you must submit your evidence directly to the property appraiser at least 15 days before the hearing and make a written request for the property appraiser's evidence. At the hearing, you have the right to have witnesses sworn.

You have the right, regardless of whether you initiate the evidence exchange, to receive from the property appraiser a copy of your property record card containing information relevant to the computation of your current assessment, with confidential information redacted. When the property appraiser receives the petition, he or she will either send the property record card to you or notify you how to obtain it online.

Your petition will not be complete until you pay the filing fee. When the VAB has reviewed and accepted it, they will assign a number, send you a confirmation, and give a copy to the property appraiser. Unless the person filing the petition is completing part 4, the taxpayer must sign the petition in part 3. Alternatively, the taxpayer's written authorization or power of attorney must accompany the petition at the time of filing with the signature of the person filing the petition in part 5 (s. 194.011(3), F.S.). **Please complete one of the signatures below.**

Received On: 9/9/2025 3:14:00 PM Petition Petition No: 2025-00920

PART 3. Taxpayer Signature

Complete part 3 if you are representing yourself or if you are authorizing a representative listed in part 5 to represent you without attaching a completed power of attorney or authorization for representation to this form.
Written authorization from the taxpayer is required for access to confidential information from the property appraiser or tax collector.

☐ I authorize the person I appoint in part 5 to have access to any confidential information related to this petition.
Under penalties of perjury, I declare that I am the owner of the property described in this petition and that I have read this petition and the facts stated in it are true.

CHEAP RENT LLC BY HOLLY COSBY - MANAGER	CHEAP RENT LLC BY HOLLY COSBY	09/09/2025
Signature, taxpayer	Print name	Date

PART 4. Employee, Attorney, or Licensed Professional Signature

Complete part 4 if you are the taxpayer's or an affiliated entity's employee or you are one of the following licensed representatives.

I am (check any box that applies):

☐ An employee of _____ (taxpayer or an affiliated entity).

☐ A Florida Bar licensed attorney (Florida Bar number _____).

☐ A Florida real estate appraiser licensed under Chapter 475, Florida Statutes (license number _____).

☐ A Florida real estate broker licensed under Chapter 475, Florida Statutes (license number _____).

☐ A Florida certified public accountant licensed under Chapter 473, Florida Statutes (license number _____).

I understand that written authorization from the taxpayer is required for access to confidential information from the property appraiser or tax collector.

Under penalties of perjury, I certify that I have authorization to file this petition on the taxpayer's behalf, and I declare that I am the owner's authorized representative for purposes of filing this petition and of becoming an agent for service of process under s. 194.011(3)(h), Florida Statutes, and that I have read this petition and the facts stated in it are true.

Signature, representative	Print name	Date

PART 5. Unlicensed Representative Signature

Complete part 5 if you are an authorized representative not listed in part 4 above.

☐ I am a compensated representative not acting as one of the licensed representatives or employees listed in part 4 above AND (check one)

☐ Attached is a power of attorney that conforms to the requirements of Part II of Chapter 709, F.S., executed with the taxpayer's authorized signature OR ☐ the taxpayer's authorized signature is in part 3 of this form.

☐ I am an uncompensated representative filing this petition AND (check one)

☐ the taxpayer's authorization is attached OR ☐ the taxpayer's authorized signature is in part 3 of this form.

I understand that written authorization from the taxpayer is required for access to confidential information from the property appraiser or tax collector.

Under penalties of perjury, I declare that I am the owner's authorized representative for purposes of filing this petition and of becoming an agent for service of process under s. 194.011(3)(h), Florida Statutes, and that I have read this petition and the facts stated in it are true.

INFORMATION FOR THE TAXPAYER

Keep this information for your files. Do not return this page to the VAB clerk.

Informal Conference with Property Appraiser

You have the right to an informal conference with the property appraiser. This conference is not required and does not change your filing due date. You can present facts that support your claim and the property appraiser can present facts that support the assessment. To request a conference, contact your county property appraiser.

PART 1. Taxpayer Information

If you will not attend the hearing but would like your evidence considered, you must submit two copies of your evidence to the VAB clerk before the hearing. The property appraiser may respond or object to your evidence. The ruling will occur under the same statutory guidelines as if you were present.

The information in this section will be used by the VAB clerk to contact you regarding this petition.

PART 2. Petition Information and Hearing

Provide the time you think you will need on page 1. The VAB is not bound by the requested time.

Exchange of Evidence Rule 12D-9.020(1)(a)-(c), F.A.C.:

(1)(a)1. At least 15 days before a petition hearing, the petitioner shall provide to the property appraiser a list of evidence to be presented at the hearing, a summary of evidence to be presented by witnesses, and copies of all documentation to be presented at the hearing.

2. To calculate the fifteen (15) days, the petitioner shall use calendar days and shall not include the day of the hearing in the calculation, and shall count backwards from the day of the hearing. The last day of the period shall be included unless it is a Saturday, Sunday, or legal holiday, in which event the period shall run until the end of the next previous day that is neither a Saturday, Sunday, or legal holiday.

(b) A petitioner's noncompliance with paragraph (1)(a) does not affect the petitioner's right to receive a copy of the current property record card from the property appraiser as described in s. 194.032(2)(a), F.S.

(c) A petitioner's noncompliance with paragraph (1)(a) does not authorize a value adjustment board or special magistrate to exclude the petitioner's evidence. However, under s. 194.034(1)(h), F.S., if the property appraiser asks in writing for specific evidence before the hearing in connection with a filed petition, and the petitioner has this evidence and knowingly refuses to provide it to the property appraiser a reasonable time before the hearing, the evidence cannot be presented by the petitioner or accepted for consideration by the board or special magistrate. Reasonableness shall be determined by whether the material can be reviewed, investigated, and responded to or rebutted in the time frame remaining before the hearing. These requirements are more specifically described in subsection (8) of this rule and in paragraphs 12D-9.025(4)(a) and (f), F.A.C.

If you provide this evidence and make a written request for the property appraiser's evidence, the property appraiser must give you his or her evidence at least seven days before the hearing.

At the hearing, you have the right to have witnesses sworn.

ADDITIONAL INFORMATION

Required Partial Payment of Taxes (Section 194.014, F.S.)

You are required to make a partial payment of taxes if you have a VAB petition pending on or after the payment delinquency date (normally April 1, following the assessment year under review). If the required partial payment is not made before the delinquency date, the VAB will deny your petition. The last day to make a partial payment before the delinquency date is generally March 31. Review your tax bill or contact your tax collector to determine your delinquency date.

You should be aware that even if a special magistrate's recommended decision has been issued, a partial payment is still required before the delinquency date. A special magistrate's recommended decision is not a final decision of the VAB. A partial payment is not required only if the VAB makes a final decision on your petition before April 1. The payment amount depends on the type of petition filed on the property. The partial payment requirements are summarized below.

Value Appeals:

For petitions on the value of property and portability, the payment must include:

* All of the non-ad valorem assessments, and
* A partial payment of at least 75 percent of the ad valorem taxes,
* Less applicable discounts under s. 197.162, F.S.

Other Assessment Appeals:

For petitions on the denial of a classification or exemption, or based on an argument that the property was not substantially complete on January 1, the payment must include:

- All of the non-ad valorem assessments, and
- The amount of the ad valorem taxes the taxpayer admits in good faith to owe,
- Less applicable discounts under s. 197.162, F.S.

FLORIDA

PETITION TO THE VALUE ADJUSTMENT BOARD
REQUEST FOR HEARING

Section 194.011, Florida Statutes

DR-486
R. 11/23
Rule 12D-16.002
F.A.C.
Eff. 11/23

You have the right to an informal conference with the property appraiser. This conference is not required and does not change your filing due date. You can present facts that support your claim and the property appraiser can present facts that support the correctness of the assessment. To request a conference, contact your county property appraiser.

For portability of homestead assessment difference, use the Petition to the Value Adjustment Board – Transfer of Homestead Assessment Difference – Request for Hearing Form (DR-486PORT). For deferral or penalties, use the Petition to the Value Adjustment Board – Tax Deferral or Penalties – Request for Hearing Form (DR-486DP). Forms are incorporated, by reference, in Rule 12D-16.002, Florida Administrative Code.

COMPLETED BY CLERK OF THE VALUE ADJUSTMENT BOARD (VAB)

Petition # 2025-00921	County Lee	Tax year 2025	Date received 09/09/2025

COMPLETED BY THE PETITIONER

PART 1. Taxpayer Information

Taxpayer name	ZALLY AND CHARLIE LLC	Representative	
Mailing address for notices	6211 SILVER AND LEWIS LN FORT MYERS, FL 33966	Parcel ID and physical address or TPP account #	02442411000000020 / 1596 N TAMIAMI TRL
Phone	9416772521	Email	COSBYLAW@GMAIL.COM

The standard way to receive information is by US mail. If possible, I prefer to receive information by ☒ email ☐ fax.

☐ I am filing this petition after the petition deadline. I have attached a statement of the reasons I filed late and any documents that support my statement.

☐ I will not attend the hearing but would like my evidence considered. (In this instance only, you must submit duplicate copies of your evidence to the value adjustment board clerk. Florida law allows the property appraiser to cross examine or object to your evidence. The VAB or special magistrate ruling will occur under the same statutory guidelines as if you were present.)

Type of Property
☐ Res. 1-4 units ☐ Industrial and miscellaneous ☐ High-water recharge ☐ Historic, commercial or nonprofit
☒ Commercial ☐ Res. 5+ units ☐ Agricultural or classified use ☐ Vacant lots and acreage ☐ Business machinery, equipment

PART 2. Reason for Petition Check one. If more than one, file a separate petition.

☒ Real property value (check one): ☒ decrease ☐ increase
☐ Denial of classification
☐ Parent/grandparent reduction
☐ Property was not substantially complete on January 1
☐ Tangible personal property value (You must have timely filed a return required by s.193.052. (s.194.034, F.S.))
☐ Refund of taxes for catastrophic event
☐ Denial of exemption Select or enter type: _____
☐ Denial for late filing of exemption or classification (Include a date-stamped copy of application.)
☐ Qualifying improvement (s. 193.1555(5), F.S.) or change of ownership or control (s. 193.155(3), 193.1554(5), or 193.1555(5), F.S.)

☐ Check here if this is a joint petition. Attach a list of units, parcels, or accounts with the property appraiser's determination that they are substantially similar. (s. 194.011(3)(e), (f), and (g), F.S.)

30 Enter the time (in minutes) you think you need to present your case. Most hearings take 15 minutes. The VAB is not bound by the requested time. For single joint petitions for multiple units, parcels, or accounts, provide the time needed for the entire group.

☒ My witnesses or I will not be available to attend on specific dates. I have attached a list of dates.

You have the right to exchange evidence with the property appraiser. To initiate the exchange, you must submit your evidence directly to the property appraiser at least 15 days before the hearing and make a written request for the property appraiser's evidence. At the hearing, you have the right to have witnesses sworn.

You have the right, regardless of whether you initiate the evidence exchange, to receive from the property appraiser a copy of your property record card containing information relevant to the computation of your current assessment, with confidential information redacted. When the property appraiser receives the petition, he or she will either send the property record card to you or notify you how to obtain it online.

Your petition will not be complete until you pay the filing fee. When the VAB has reviewed and accepted it, they will assign a number, send you a confirmation, and give a copy to the property appraiser. Unless the person filing the petition is completing part 4, the taxpayer must sign the petition in part 3. Alternatively, the taxpayer's written authorization or power of attorney must accompany the petition at the time of filing with the signature of the person filing the petition in part 5 (s. 194.011(3), F.S.). **Please complete one of the signatures below.**

Received On: 9/9/2025 3:14:00 PM Petition Petition No: 2025-00921

PART 3. Taxpayer Signature

Complete part 3 if you are representing yourself or if you are authorizing a representative listed in part 5 to represent you without attaching a completed power of attorney or authorization for representation to this form.
Written authorization from the taxpayer is required for access to confidential information from the property appraiser or tax collector.

☐ I authorize the person I appoint in part 5 to have access to any confidential information related to this petition.
Under penalties of perjury, I declare that I am the owner of the property described in this petition and that I have read this petition and the facts stated in it are true.

ZALLY AND CHARLIE LLC BY HOLLY COSBY - MANAGER	ZALLY AND CHARLIE LLC BY HOLLY C	09/09/2025
Signature, taxpayer	Print name	Date

PART 4. Employee, Attorney, or Licensed Professional Signature

Complete part 4 if you are the taxpayer's or an affiliated entity's employee or you are one of the following licensed representatives.

I am (check any box that applies):

☐ An employee of _____ (taxpayer or an affiliated entity).

☐ A Florida Bar licensed attorney (Florida Bar number _____).

☐ A Florida real estate appraiser licensed under Chapter 475, Florida Statutes (license number _____).

☐ A Florida real estate broker licensed under Chapter 475, Florida Statutes (license number _____).

☐ A Florida certified public accountant licensed under Chapter 473, Florida Statutes (license number _____).

I understand that written authorization from the taxpayer is required for access to confidential information from the property appraiser or tax collector.

Under penalties of perjury, I certify that I have authorization to file this petition on the taxpayer's behalf, and I declare that I am the owner's authorized representative for purposes of filing this petition and of becoming an agent for service of process under s. 194.011(3)(h), Florida Statutes, and that I have read this petition and the facts stated in it are true.

Signature, representative	Print name	Date

PART 5. Unlicensed Representative Signature

Complete part 5 if you are an authorized representative not listed in part 4 above.

☐ I am a compensated representative not acting as one of the licensed representatives or employees listed in part 4 above AND (check one)

☐ Attached is a power of attorney that conforms to the requirements of Part II of Chapter 709, F.S., executed with the taxpayer's authorized signature OR ☐ the taxpayer's authorized signature is in part 3 of this form.

☐ I am an uncompensated representative filing this petition AND (check one)

☐ the taxpayer's authorization is attached OR ☐ the taxpayer's authorized signature is in part 3 of this form.

I understand that written authorization from the taxpayer is required for access to confidential information from the property appraiser or tax collector.

Under penalties of perjury, I declare that I am the owner's authorized representative for purposes of filing this petition and of becoming an agent for service of process under s. 194.011(3)(h), Florida Statutes, and that I have read this petition and the facts stated in it are true.

Signature, representative	Print name	Date

Received On: 9/9/2025 3:14:00 PM Petition Petition No: 2025-00921

INFORMATION FOR THE TAXPAYER

Keep this information for your files. Do not return this page to the VAB clerk.

Informal Conference with Property Appraiser

You have the right to an informal conference with the property appraiser. This conference is not required and does not change your filing due date. You can present facts that support your claim and the property appraiser can present facts that support the assessment. To request a conference, contact your county property appraiser.

PART 1. Taxpayer Information

If you will not attend the hearing but would like your evidence considered, you must submit two copies of your evidence to the VAB clerk before the hearing. The property appraiser may respond or object to your evidence. The ruling will occur under the same statutory guidelines as if you were present.

The information in this section will be used by the VAB clerk to contact you regarding this petition.

PART 2. Petition Information and Hearing

Provide the time you think you will need on page 1. The VAB is not bound by the requested time.

Exchange of Evidence Rule 12D-9.020(1)(a)-(c), F.A.C.:

(1)(a)1. At least 15 days before a petition hearing, the petitioner shall provide to the property appraiser a list of evidence to be presented at the hearing, a summary of evidence to be presented by witnesses, and copies of all documentation to be presented at the hearing.

2. To calculate the fifteen (15) days, the petitioner shall use calendar days and shall not include the day of the hearing in the calculation, and shall count backwards from the day of the hearing. The last day of the period shall be included unless it is a Saturday, Sunday, or legal holiday, in which event the period shall run until the end of the next previous day that is neither a Saturday, Sunday, or legal holiday.

(b) A petitioner's noncompliance with paragraph (1)(a) does not affect the petitioner's right to receive a copy of the current property record card from the property appraiser as described in s. 194.032(2)(a), F.S.

(c) A petitioner's noncompliance with paragraph (1)(a) does not authorize a value adjustment board or special magistrate to exclude the petitioner's evidence. However, under s. 194.034(1)(h), F.S., if the property appraiser asks in writing for specific evidence before the hearing in connection with a filed petition, and the petitioner has this evidence and knowingly refuses to provide it to the property appraiser a reasonable time before the hearing, the evidence cannot be presented by the petitioner or accepted for consideration by the board or special magistrate. Reasonableness shall be determined by whether the material can be reviewed, investigated, and responded to or rebutted in the time frame remaining before the hearing. These requirements are more specifically described in subsection (8) of this rule and in paragraphs 12D-9.025(4)(a) and (f), F.A.C.

If you provide this evidence and make a written request for the property appraiser's evidence, the property appraiser must give you his or her evidence at least seven days before the hearing.

At the hearing, you have the right to have witnesses sworn.

ADDITIONAL INFORMATION

Required Partial Payment of Taxes (Section 194.014, F.S.)

You are required to make a partial payment of taxes if you have a VAB petition pending on or after the payment delinquency date (normally April 1, following the assessment year under review). If the required partial payment is not made before the delinquency date, the VAB will deny your petition. The last day to make a partial payment before the delinquency date is generally March 31. Review your tax bill or contact your tax collector to determine your delinquency date.

You should be aware that even if a special magistrate's recommended decision has been issued, a partial payment is still required before the delinquency date. A special magistrate's recommended decision is not a final decision of the VAB. A partial payment is not required only if the VAB makes a final decision on your petition before April 1. The payment amount depends on the type of petition filed on the property. The partial payment requirements are summarized below.

Value Appeals:

For petitions on the value of property and portability, the payment must include:

* All of the non-ad valorem assessments, and
* A partial payment of at least 75 percent of the ad valorem taxes,
* Less applicable discounts under s. 197.162, F.S.

Other Assessment Appeals:

For petitions on the denial of a classification or exemption, or based on an argument that the property was not substantially complete on January 1, the payment must include:

- All of the non-ad valorem assessments, and
- The amount of the ad valorem taxes the taxpayer admits in good faith to owe,
- Less applicable discounts under s. 197.162, F.S.

The standard way to receive information is by US mail. If possible, I prefer to receive information by ☒ email ☐ fax.

☐ I am filing this petition after the petition deadline. I have attached a statement of the reasons I filed late and any documents that support my statement.

☐ I will not attend the hearing but would like my evidence considered. (In this instance only, you must submit duplicate copies of your evidence to the value adjustment board clerk. Florida law allows the property appraiser to cross examine or object to your evidence. The VAB or special magistrate ruling will occur under the same statutory guidelines as if you were present.)

Type of Property ☒ Res. 1-4 units ☐ Industrial and miscellaneous ☐ High-water recharge ☐ Historic, commercial or nonprofit
☐ Commercial ☐ Res. 5+ units ☐ Agricultural or classified use ☐ Vacant lots and acreage ☐ Business machinery, equipment

PART 2. Reason for Petition Check one. If more than one, file a separate petition.

☒ Real property value (check one): ☐ decrease ☒ increase
☐ Denial of classification
☐ Parent/grandparent reduction
☐ Property was not substantially complete on January 1
☐ Tangible personal property value (You must have timely filed a return required by s.193.052. (s.194.034, F.S.))
☐ Refund of taxes for catastrophic event

☐ Denial of exemption Select or enter type: _____
☐ Denial for late filing of exemption or classification (Include a date-stamped copy of application.)
☐ Qualifying improvement (s. 193.1555(5), F.S.) or change of ownership or control (s. 193.155(3), 193.1554(5), or 193.1555(5), F.S.)

☐ Check here if this is a joint petition. Attach a list of units, parcels, or accounts with the property appraiser's determination that they are substantially similar. (s. 194.011(3)(e), (f), and (g), F.S.)

30 Enter the time (in minutes) you think you need to present your case. Most hearings take 15 minutes. The VAB is not bound by the requested time. For single joint petitions for multiple units, parcels, or accounts, provide the time needed for the entire group.

☒ My witnesses or I will not be available to attend on specific dates. I have attached a list of dates.

You have the right to exchange evidence with the property appraiser. To initiate the exchange, you must submit your evidence directly to the property appraiser at least 15 days before the hearing and make a written request for the property appraiser's evidence. At the hearing, you have the right to have witnesses sworn.

You have the right, regardless of whether you initiate the evidence exchange, to receive from the property appraiser a copy of your property record card containing information relevant to the computation of your current assessment, with confidential information redacted. When the property appraiser receives the petition, he or she will either send the property record card to you or notify you how to obtain it online.

Your petition will not be complete until you pay the filing fee. When the VAB has reviewed and accepted it, they will assign a number, send you a confirmation, and give a copy to the property appraiser. Unless the person filing the petition is completing part 4, the taxpayer must sign the petition in part 3. Alternatively, the taxpayer's written authorization or power of attorney must accompany the petition at the time of filing with the signature of the person filing the petition in part 5 (s. 194.011(3), F.S.). **Please complete one of the signatures below.**

PART 3. Taxpayer Signature

Complete part 3 if you are representing yourself or if you are authorizing a representative listed in part 5 to represent you without attaching a completed power of attorney or authorization for representation to this form.
Written authorization from the taxpayer is required for access to confidential information from the property appraiser or tax collector.

☐ I authorize the person I appoint in part 5 to have access to any confidential information related to this petition.
Under penalties of perjury, I declare that I am the owner of the property described in this petition and that I have read this petition and the facts stated in it are true.

HOLLY E COSBY	HOLLY E COSBY	09/09/2025
Signature, taxpayer	Print name	Date

PART 4. Employee, Attorney, or Licensed Professional Signature

Complete part 4 if you are the taxpayer's or an affiliated entity's employee or you are one of the following licensed representatives.

I am (check any box that applies):

☐ An employee of _____ (taxpayer or an affiliated entity).

☐ A Florida Bar licensed attorney (Florida Bar number _____).

☐ A Florida real estate appraiser licensed under Chapter 475, Florida Statutes (license number _____).

☐ A Florida real estate broker licensed under Chapter 475, Florida Statutes (license number _____).

☐ A Florida certified public accountant licensed under Chapter 473, Florida Statutes (license number _____).

I understand that written authorization from the taxpayer is required for access to confidential information from the property appraiser or tax collector.

Under penalties of perjury, I certify that I have authorization to file this petition on the taxpayer's behalf, and I declare that I am the owner's authorized representative for purposes of filing this petition and of becoming an agent for service of process under s. 194.011(3)(h), Florida Statutes, and that I have read this petition and the facts stated in it are true.

Signature, representative	Print name	Date

PART 5. Unlicensed Representative Signature

Complete part 5 if you are an authorized representative not listed in part 4 above.

☐ I am a compensated representative not acting as one of the licensed representatives or employees listed in part 4 above AND (check one)

☐ Attached is a power of attorney that conforms to the requirements of Part II of Chapter 709, F.S., executed with the taxpayer's authorized signature OR ☐ the taxpayer's authorized signature is in part 3 of this form.

☐ I am an uncompensated representative filing this petition AND (check one)

☐ the taxpayer's authorization is attached OR ☐ the taxpayer's authorized signature is in part 3 of this form.

I understand that written authorization from the taxpayer is required for access to confidential information from the property appraiser or tax collector.

Under penalties of perjury, I declare that I am the owner's authorized representative for purposes of filing this petition and of becoming an agent for service of process under s. 194.011(3)(h), Florida Statutes, and that I have read this petition and the facts stated in it are true.

Signature, representative	Print name	Date

Keep this information for your files. Do not return this page to the VAB clerk.

Informal Conference with Property Appraiser

You have the right to an informal conference with the property appraiser. This conference is not required and does not change your filing due date. You can present facts that support your claim and the property appraiser can present facts that support the assessment. To request a conference, contact your county property appraiser.

PART 1. Taxpayer Information

If you will not attend the hearing but would like your evidence considered, you must submit two copies of your evidence to the VAB clerk before the hearing. The property appraiser may respond or object to your evidence. The ruling will occur under the same statutory guidelines as if you were present.

The information in this section will be used by the VAB clerk to contact you regarding this petition.

PART 2. Petition Information and Hearing

Provide the time you think you will need on page 1. The VAB is not bound by the requested time.

Exchange of Evidence Rule 12D-9.020(1)(a)-(c), F.A.C.:

(1)(a)1. At least 15 days before a petition hearing, the petitioner shall provide to the property appraiser a list of evidence to be presented at the hearing, a summary of evidence to be presented by witnesses, and copies of all documentation to be presented at the hearing.

2. To calculate the fifteen (15) days, the petitioner shall use calendar days and shall not include the day of the hearing in the calculation, and shall count backwards from the day of the hearing. The last day of the period shall be included unless it is a Saturday, Sunday, or legal holiday, in which event the period shall run until the end of the next previous day that is neither a Saturday, Sunday, or legal holiday.

(b) A petitioner's noncompliance with paragraph (1)(a) does not affect the petitioner's right to receive a copy of the current property record card from the property appraiser as described in s. 194.032(2)(a), F.S.

(c) A petitioner's noncompliance with paragraph (1)(a) does not authorize a value adjustment board or special magistrate to exclude the petitioner's evidence. However, under s. 194.034(1)(h), F.S., if the property appraiser asks in writing for specific evidence before the hearing in connection with a filed petition, and the petitioner has this evidence and knowingly refuses to provide it to the property appraiser a reasonable time before the hearing, the evidence cannot be presented by the petitioner or accepted for consideration by the board or special magistrate. Reasonableness shall be determined by whether the material can be reviewed, investigated, and responded to or rebutted in the time frame remaining before the hearing. These requirements are more specifically described in subsection (8) of this rule and in paragraphs 12D-9.025(4)(a) and (f), F.A.C.

If you provide this evidence and make a written request for the property appraiser's evidence, the property appraiser must give you his or her evidence at least seven days before the hearing.

At the hearing, you have the right to have witnesses sworn.

ADDITIONAL INFORMATION

Required Partial Payment of Taxes (Section 194.014, F.S.)

You are required to make a partial payment of taxes if you have a VAB petition pending on or after the payment delinquency date (normally April 1, following the assessment year under review). If the required partial payment is not made before the delinquency date, the VAB will deny your petition. The last day to make a partial payment before the delinquency date is generally March 31. Review your tax bill or contact your tax collector to determine your delinquency date.

You should be aware that even if a special magistrate's recommended decision has been issued, a partial payment is still required before the delinquency date. A special magistrate's recommended decision is not a final decision of the VAB. A partial payment is not required only if the VAB makes a final decision on your petition before April 1. The payment amount depends on the type of petition filed on the property. The partial payment requirements are summarized below.

Value Appeals:

For petitions on the value of property and portability, the payment must include:

* All of the non-ad valorem assessments, and
* A partial payment of at least 75 percent of the ad valorem taxes,
* Less applicable discounts under s. 197.162, F.S.

Other Assessment Appeals:

For petitions on the denial of a classification or exemption, or based on an argument that the property was not substantially complete on January 1, the payment must include:

- All of the non-ad valorem assessments, and
- The amount of the ad valorem taxes the taxpayer admits in good faith to owe,
- Less applicable discounts under s. 197.162, F.S.

Dates I will not be able to attend:
01/01/2026, 01/02/2026, 01/05/2026, 01/06/2026, 01/07/2026, 01/08/2026, 01/09/2026, 01/12/2026, 01/13/2026, 01/14/2026, 01/15/2026, 01/16/2026, 10/01/2025, 10/02/2025, 10/03/2025, 10/06/2025, 10/07/2025, 10/08/2025, 10/09/2025, 10/10/2025, 10/13/2025, 10/14/2025, 10/15/2025, 10/16/2025, 10/17/2025, 10/20/2025, 10/21/2025, 10/22/2025, 10/23/2025, 10/24/2025, 10/27/2025, 10/28/2025, 10/29/2025, 10/30/2025, 10/31/2025, 11/03/2025, 11/04/2025, 11/05/2025, 11/06/2025, 11/07/2025, 11/10/2025, 11/11/2025, 11/12/2025, 11/13/2025, 11/14/2025, 11/17/2025, 11/18/2025, 11/19/2025, 11/20/2025, 11/21/2025, 11/24/2025, 11/25/2025, 11/26/2025, 11/27/2025, 11/28/2025, 12/01/2025, 12/02/2025, 12/03/2025, 12/04/2025, 12/05/2025, 12/08/2025, 12/09/2025, 12/10/2025, 12/11/2025, 12/12/2025, 12/15/2025, 12/16/2025, 12/17/2025, 12/18/2025, 12/19/2025, 12/22/2025, 12/23/2025, 12/24/2025, 12/25/2025, 12/26/2025, 12/29/2025, 12/30/2025, 12/31/2025

WARRANTY DEED

THIS DEED is made on December 12, 2024, between Holly E. Cosby (the "Grantor"), joined by her husband, Charlie R. Cosby, (a/k/a) Charles R. Cosby, III, whose address is 6211 Silver and Lewis Lane, Fort Myers, FL 33966, and Holly E. Cosby, or her successor(s), as Trustee(collectively, the "Trustee") of the Holly E. Cosby Revocable Trust (the "Trust") created under Trust Agreement dated December 12, 2024 (the "Trust Agreement"), whose address is 6211 Silver and Lewis Lane, Fort Myers, FL 33966. Evidence of the Trustee's death shall consist of a certified copy of the death certificate. Evidence of the Trustee's disability shall consist of a certificate of two (2) licensed physicians establishing that the Trustee is incapable of performing the duties of Trustee of the aforesaid Trust Agreement. Evidence of the Trustee's resignation shall consist of a resignation, duly executed and acknowledged.

WITNESSETH, that the Grantor, for and in consideration of the sum of Ten Dollars ($10.00) and other good and valuable consideration in hand paid by the Trustee, the receipt whereof is hereby acknowledged, does hereby grant, bargain, sell and transfer unto the Trustee, those lands described as follows:

See EXHIBIT A

Site Address: 6211 Silver and Lewis Lane, Fort Myers, FL 33966

SUBJECT TO easements, restrictions and reservations of record.

TOGETHER with all the tenements, hereditaments, and appurtenances thereto belonging or in anywise appertaining.

THIS DEED HAS BEEN PREPARED WITHOUT BENEFIT OF SURVEY OR TITLE EXAMINATION.

TO HAVE AND TO HOLD the Property in fee simple upon the trusts and for the uses and purposes herein and the Trust Agreement.

AND the Grantor hereby covenants with said Trustee that the Grantor is lawfully seized of said land in fee simple; that the Grantor has good right and lawful authority to sell and convey said land, and hereby warrants, the title to said land and will defend the same against the lawful claims of all persons whomsoever; and that said land is free of all encumbrances, except any outstanding taxes.

TOGETHER WITH full power and authority to improve, subdivide, protect, conserve, sell, lease, encumber or otherwise manage and dispose of the Property or any part thereof pursuant to Florida Statutes Section 689.071, as the same may be amended.

Any contract, obligation or indebtedness incurred or entered into by the Trustee in connection with the Property shall be as a Trustee of an express trust and not individually and the Trustee shall have no obligation whatsoever with respect to any such contract, obligation or indebtedness except only so far as the Property in the actual possession of the Trustee shall be applicable for the payment and discharge thereof; and it shall be expressly understood that any representations, warranties, covenants, undertakings and agreements of the Trustee are nevertheless made and intended not as personal representations, warranties, covenants, undertakings and agreements by the Trustee or for the purpose or with the intention of binding the Trustee personally, but are made and intended for the purpose of binding only the Property specifically described herein, and that no personal liability or personal responsibility is assumed by nor shall at any time be asserted or enforceable against the Trustee individually on account of any instrument executed by or on account of any representation, warranty, covenant, undertaking or agreement of the Trustee, either expressed or implied, all such personal liability, if any, being expressly waived and released and all persons and entities whomsoever and whatsoever shall be charged with notice of this condition from the date of the filing for record of this Deed.

In no case shall any party dealing with the Trustee in relation to the Property, or to whom the Property or any part thereof shall be conveyed, contracted to be sold, leased or mortgaged by the Trustee, be obliged to see to the application of any purchase money, rent or money borrowed or advanced on the Property, or be obliged to see that the terms of the Trust Agreement have been complied with, or be obliged to inquire into the necessity or expediency of any act of the Trustee, or be obliged or privileged to inquire into any of the terms of the Trust Agreement; and every deed, trust deed, mortgage, lease or other instrument executed by the Trustee in relation to the Property shall be conclusive evidence

in favor of every person relying upon or claiming under any such conveyance, lease or other instrument, (a) that at the time of the delivery thereof the trust created by this Deed and the Trust Agreement was in full force and effect, (b) that such conveyance or other instrument was executed in accordance with the terms, conditions and limitations contained in this Deed and the Trust Agreement or in some amendment thereof and binding upon all beneficiaries thereunder, (c) that the Trustee was duly authorized and empowered to execute and deliver every such deed, trust deed, lease, mortgage or other instrument and (d) if the conveyance is made to a successor or successors in trust, that such are fully vested with all the title, estate, rights, powers, authorities, duties and obligations of any predecessor in trust.

Notwithstanding anything contained herein to the contrary, each Grantor reserved in the Trust Agreement the right to reside upon the Property placed in the Trust as his or her permanent residence during his or her lifetime, it being his or her intention to retain the requisite beneficial interest and possessory right in and to the Property to comply with Florida Statutes Section 196.041, as the same may be amended from time to time, such that said beneficial interest and possessory right constitute in all respects "equitable title to real estate" as that term is used in Section 6, Article VII of the Constitution of the State of Florida.

IN WITNESS WHEREOF, each Grantor has hereunto set hand and seal on the day and year above written.

AGREEMENT FOR LEGAL SERVICES

This Agreement is made this **13th** day of **August, 2025**, between the Lee County Value Adjustment Board, Post Office Box 2469, Fort Myers, Florida 33902-0398, (hereinafter referred to as "VAB"); and Law Office of Holly E. Cosby, P.A., 602 Center Road, Fort Myers, FL 33907, (hereinafter referred to as "Attorney").

In consideration of the mutual promises and covenants herein, the parties agree as follows:

1. ATTORNEY'S DUTIES

The Attorney will be employed by VAB as the Attorney representing the Lee County Value Adjustment Board. The Attorney will become familiar with the Florida Statutes concerning the VAB and any Florida Administrative Code or cases necessary in providing legal representation to the VAB. The Attorney shall report directly to the VAB and provide the VAB with legal advice on all matters necessary to protect its interest in performing VAB duties and responsibilities as prescribed by the Florida Statutes and the Florida Administrative Code.

2. ETHICS OF ATTORNEY

The Attorney will abide and perform all duties in accordance with the ethics of the profession in all federal, state, and municipal laws, regulations and ordinances relating to the practice of law.

3. COMPENSATION

In consideration for the services rendered by the Attorney under this Agreement, the Attorney will receive a fee of Fifty Thousand Dollars ($50,000.00) per year **(July 1 thru June 30),** payable monthly, in arrears, in equal monthly installments. Attorney may not request an increase in the consideration set forth in this Paragraph 3 for a period of two (2) years.

4. CONFLICTS

In the event of a potential conflict of interest the Attorney must expose such potential conflict to the VAB Clerk and the Minutes Department. In the event that Attorney is able to resolve a conflict, and perform Attorney's duties.as set forth herein without bias, Attorney shall be permitted to proceed pursuant to this Agreement without further delay. In the event that Attorney is unable to perform Attorney's duties as set forth herein without bias, Attorney shall secure alternate legal representation from another attorney or law firm, licensed and in good standing with The Florida Bar, to provide appropriate legal representation to the VAB during the period or event of conflict. Prior to any VAB action the Attorney must provide the VAB written notice (to the Clerk to the Value Adjustment Board and the Minutes Department, via U.S.P.S. Regular Mail, to PO Box 2469, Fort Myers Florida, 33902-2469 or via email, to **VAB Administration and Clerk's Office County Records Services Manager**) of a potential conflict of interest, the resolution of such conflict of interest, and if an alternate attorney is needed, Attorney shall include the name of the attorney or

law firm that will be providing legal representation to the VAB during the period or event of conflict. The VAB will be responsible for providing compensation to cover the cost of alternate legal services during the period of conflict at a rate not to exceed Attorney's hourly rate as set forth in Paragraph 9 herein.

The Attorney is prohibited by Fla. Stat. Chapter 194 from representing any of the following parties in any administrative or judicial review of property taxes:

A. The Property Appraiser's Office
B. The Tax Collector's Office
C. Any taxing authority (including cities and counties); or
D. Any property owner.

In the event of a conflict of interest, even though the Attorney will have secured alternate legal representation of the VAB as set forth above, the Attorney, including any partner, member or employee of the Attorney, cannot represent an applicant appearing before the VAB. This prohibition cannot be waived by the VAB.

5. LICENSE AND INSURANCE

The Attorney will continue to maintain Professional Errors and Omissions Insurance in the amounts of $200,000.00 single limit and $600,000.00 aggregate limit ("Required Insurance"). The Attorney will maintain a valid and active license to practice law in the State of Florida, and agrees to immediately provide proof of the same upon written request by the VAB.

6. TERMS

The term of this Agreement shall begin on **August 13, 2025**, shall apply retroactively from **July 1, 2025**, and shall continue until modified or terminated in writing by either the Attorney or the VAB.

7. RECORDS

The Attorney will be responsible for keeping accurate records of the matters handled by the Attorney. All records will be maintained in accordance with Florida Public Records Law and the Florida Department of State Division of Library and Information Services.

8. RELATIONSHIP WITH THE PARTIES

The relationship created herein is not an employer/employee relationship. The Attorney is an independent contractor in charge of the manner and method of performing the work on behalf of the VAB. The Attorney has no authority to represent Lee County, the Lee County Board of Education, or any individual VAB Special Magistrate, and is hired solely to represent said VAB.

9. SCOPE OF REPRESENTATION

The Attorney is required to present and provide legal counsel at all meetings of the VAB

through the term of this contract. The Attorney is to provide necessary and adequate representation to the VAB at all times during the term of this Agreement, whether in attendance at meetings or hearings before the VAB or otherwise. The Attorney may not commence litigation on behalf of the VAB unless requested to do so by the VAB. Attorney agrees that Attorney shall commit the necessary time required to the VAB in any VAB year, which for purposes of this Agreement shall begin July 1 and end June 30. The Compensation as set forth in Paragraph 3 of this Agreement shall compensate Attorney for the following regular VAB attorney and VAB designee functions:

A. any and all good cause determinations for late filed petitions, rescheduled hearings and hearing attendance,
B. recommendation worksheet reviews in order to ensure statutory and rule compliance,
C. advise the VAB with regards to the portions of the Florida Statutes and the Florida Administrative Code which govern Florida value adjustment boards,
D. attendance at all VAB meetings,
E. review, draft and· modify all local procedures, local forms, VAB contracts and notices sent to parties, and
F. any other designated legal function of the VAB, including the duties set forth in Section 12D-9.009, F.A.C.

Compensation, as set forth in Paragraph 3 of this Agreement, shall not include any VAB matters which require litigation. In the event that the VAB becomes a party defendant to any civil suit, or in the event that the VAB requests that litigation be initiated on behalf of the VAB, Attorney shall represent the VAB to the extent that such representation does not exceed Attorney's competency level, and Attorney shall be compensated for any such litigation at a rate of Three Hundred and no/100 Dollars ($300.00) per hour. Additionally, Attorney shall be compensated for reasonable expenses incurred for all matters litigated, which shall be invoiced in a detailed manner, and shall be payable monthly, in arrears. Notwithstanding the foregoing, in the event that any litigated matter requires representation which exceeds Attorney's competency level, Attorney shall be responsible for securing alternate legal representation for any such matter, and the VAB shall be responsible for any and all reasonable legal fees and costs from such alternate legal counsel. Additionally, in the event that Attorney secures alternate legal representation for any litigated matter which exceeds Attorney's competency level, Attorney shall assist such alternate attorney when Attorney is competent to assist, and such assistance shall be a designated legal function of the VAB as set forth in Section 9(f) of this Agreement.

10. TERMINATION

The VAB has the right to terminate, decrease, or suspend the Attorney's services hereunder at any time with or without cause. In the event of termination or suspension, the Attorney will be compensated for all services performed and reasonable expenses incurred prior to the effective date of the termination or suspension. In the event of a decrease in said services, the parties may negotiate a reasonable adjustment in compensation hereunder.

11. NOTICE

Any notice required to be given under the Agreement will be sufficient, if in writing, sent by

United States mail to the Attorney's business address stated herein, except as provided in Paragraph 4.

12: PUBLIC RECORDS

A. IF ATTORNEY HAS QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, FLORIDA STATUTES, TO ATTORNEY'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THIS AGREEMENT, ATTORNEY SHALL CONTACT THE CUSTODIAN OF PUBLIC RECORDS AT 239-533-2328, INFOVAB@LEECLERK.ORG and/or THE LEE COUNTY VALUE ADJUSTMENT BOARD AT P.O. Box 2469, Fort Myers Florida, 33902-2469.

B. Attorney must comply with all public record laws, including, but not limited to:
   i. Keep and maintain public records required by the VAB to perform the service.
   ii. Upon request from the VAB's custodian of public records, provide the VAB with a copy of the requested records or allow the records to be inspected or copied within a reasonable time at a cost that does not exceed the cost provided in Chapter 119, Florida Statutes or as otherwise provided by law.
   iii. Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of this Agreement term and following completion of this Agreement if Attorney does not transfer the records to the VAB.
   iv. Upon completion of this Agreement, transfer, at no cost, to the VAB all public records in possession of Attorney or keep and maintain public records required by the VAB to perform the contracted services. If Attorney transfers all public records to the VAB upon completion of this Agreement, Attorney shall destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. If Attorney keeps and maintains public records upon completion of this Agreement, Attorney shall meet all applicable requirements for retaining public records. All records stored electronically must be provided to the VAB, upon request from the VAB's custodian of public records, in a format that is compatible with the information technology systems of the VAB.

C. A request to inspect or copy public records relating to VAB's contract for services must be made directly to the VAB. If the VAB does not possess the requested records, the VAB shall immediately notify Attorney of the request, and Attorney must provide the records to the VAB or allow the records to be inspected or copied within a reasonable time.

D. If Attorney does not comply with the VAB's request for records, the VAB shall enforce this Agreement provisions in accordance with this Agreement, and in the event that Attorney fails to provide public records to the VAB within a reasonable time may be subject to penalties under §119.10, Florida Statutes and further civil action, including any attorney fees associated therewith.

13. MISCELLANEOUS

Amendments: No amendment or variation of the terms or conditions of this Agreement will be valid unless in writing and signed by both parties.

Assignability: The Attorney's rights and obligations under this Agreement are personal and not assignable, except as provided in Paragraphs 4 and 9 herein.

Validity Provision: The validity or unenforceability of any particular provision of this Agreement will not affect the other provisions hereof, and the Agreement may be construed in all respects as if such invalid or unenforceable provision were omitted.

IN WITNESS WHEREOF, the parties have executed this Agreement effective the day and year first written above.

Good afternoon, again.

I have completed and provided the withdrawal forms for all three matters to VAB Administration, as promised.

Once VAB Administration has the opportunity to withdraw petitions 2025-00920, 2025-00921, and 2025-00922, this issue will be fully resolved.

Please let me know if you have any questions or concerns.

Very truly,
Holly

Good afternoon.

After receiving this information for the first time, and after brief review of the same, I will be withdrawing my VAB petitions by the end of the day today, to ensure that my role as VAB Counsel is not questioned or compromised in any way.

As a property owner and taxpayer, I have the right to file an appeal on my own properties; however at this time, I am not going to argue about this and erode any public trust in me as VAB Counsel.

Please let me know if you have any questions or concerns.

Very truly,
Holly

FLORIDA DEPARTMENT OF REVENUE
VALUE ADJUSTMENT BOARD OVERSIGHT
INFORMATIONAL BULLETIN

To: Value Adjustment Board Attorneys
From: Steve Keller, Office of General Counsel
Date: November 4, 2025

This bulletin provides information about the status of rule amendments and new forms for implementing chapter 2025-208, section 10, Laws of Florida, providing for **Electronic Appearances at the Value Adjustment Board,** which will be **effective January 1, 2026**. At its rule workshop held on October 15, 2025, the Department received questions on the use of telephone technology for hearings.

The Department recommends technology which enables a comprehensive and sophisticated substitute for an in-person hearing with real-time, two-way communication using electronic means in which participants are able to see, hear, and communicate with one another.

The Department does not recommend or encourage telephone hearings due to reduced functionality in swearing in witnesses and parties and the potential effect on cross examination and due to inability to observe witness answers, comportment, facial expressions, etc.

The following features are being drafted for inclusion in the rules and forms based on the law change:

- In counties that conduct hearings using the telephone as the prearranged default option, the VAB must provide petitioners the option to appear in person or by audio visual technology.
- In counties that conduct hearings using audio visual technology as the prearranged default option, the VAB must provide petitioners the option to appear in person.
- Counties must notify the petitioner of their right to a hearing in person or using audio visual technology and may only use telephone hearings when petitioners do not request a hearing in person or a hearing using audio visual technology.
- A petitioner cannot be required to attend a hearing by use of telephone where the petitioner requests a to appear in person or by audio visual technology.
- Provide a way for public attendance to observe hearings via electronic or other communication equipment. In counties that conduct hearings using the telephone as the prearranged default option, the VAB must permit the public to request to attend. This process would entail posting the list of scheduled hearings.
- For hearings that are scheduled using electronic or other communication equipment, the log on information, link and passwords must be posted to allow public attendance.

The Department will schedule another Rule Development Workshop to inform interested parties and receive public comments on the next draft of the rules and forms.

Questionnaire:

In an effort to gather additional information for the draft rule amendments, the Department requests your response to the questions below by November 18, 2025. Please send your response by email to **VAB@floridarevenue.com**.

Questions:

1. What is the technology your VAB is considering: Zoom, Webex, Teams, telephone, etc.?

2. Has your county offered telephonic hearings previously?

3. If your county is considering audio visual technology such as Zoom, Webex, Teams, what are any problems issues or concerns with this technology? Please feel free to comment.

Organizational Meetings to Implement New Procedures

The value adjustment board (VAB) should hold another organizational meeting to discuss and implement these new procedures in order to make them available to petitioners. This organizational meeting is necessary because the legislation, chapter 2025-208, section 10, Laws of Florida, included the requirement that the VAB provide electronic or other communication equipment to allow petitioners to appear remotely at hearings and requires that such equipment is adequate and functional for clear communication among participants, to create hearing records required by law, and to ensure that petitioners can submit and transmit evidence to the VAB in a format that can be processed, viewed, printed, and archived. The organizational meeting is necessary so the VAB can ascertain adequate and functional electronic or other communication equipment is provided.

Questions
The Department has provided this bulletin for your general information. Send any questions by email to **VAB@floridarevenue.com**.

Reference
The full text of the implementing law (chapter 2025-208, section 10, Laws of Florida), which amends section 194.0032, F.S., is available at https://laws.flrules.org/2025/208.

Implementing Date
This section of law is effective January 1, 2026, and first applies to the 2025 tax roll.

Hernando County Value Adjustment Board (VAB) Responses to Department of Revenue (DOR) November 4, 2025 Questionnaire Regarding Remote Hearings

Question 1: What is the technology your VAB is considering: Zoom, Webex, Teams, telephone, etc.?

Response: At this time, the Hernando County VAB provides petitioners with the ability to participate in remote hearings via telephone. In the event a different directive is mandated by law, Hernando County will certainly endeavor to comply with the law.

Question 2: Has your county offered telephonic hearings previously?

Response: Yes.

Question 3: If your county is considering audio-visual technology such as Zoom, Webex, Teams, what are any problems, issues, or concerns with this technology? Please feel free to comment.

Response: Hernando County VAB's concerns with utilizing audio-visual technology would be:

1) Petitioner inability to access or utilize Zoom/Webex/Teams/etc.
2) Ability to provide remote VAB hearings that are ADA compliant (i.e. providing captions for the hearing impaired).
3) Protecting a party's confidential information displayed during an audio-visual hearing, which would be accessible to anyone, with the potential ability to screen-shot confidential information by anyone in attendance,
4) Connectivity issues – landline is more stable than internet, and
5) Potentially interfering with a party's due process by offering hearing options that are not accessible to a party (i.e. a party is able to participate by telephone but unable to participate by Zoom/Webex/Teams/etc.)

I hereby affirm that the above is provided after conferring with my client.

Respectfully Submitted,

/S/ Holly E. Cosby

12D-9.013 Organizational Meeting of the Value Adjustment Board.

(1) The board shall annually hold one or more organizational meetings, at least one of which shall meet the requirements of this section. The board shall hold this organizational meeting prior to the holding of value adjustment board hearings. The board shall provide reasonable notice of each organizational meeting and such notice shall include the date, time, location, purpose of the meeting, and information required by Section 286.0105, F.S. At one organizational meeting the board shall:

(a) through (j) No change.

(k) Adopt or ratify by resolution any filing fee for petitions for that year, in an amount not to exceed $50 ~~$15~~; ~~and,~~

(l)1. Ascertain that the board has provided electronic or other communication equipment, to allow petitioners to appear at hearings, that is adequate and functional for clear communication among participants and for creating hearing records required by law, and that petitioners can submit and transmit evidence to the board in a format that can be processed, viewed, printed, and archived; or

2. Alternatively, in any county having a population of less than 75,000, adopt a resolution or motion to opt out of providing hearings using electronic or other communication equipment, as provided by law; and,

(m)~~(l)~~ No change.

(2) through (3) No change.

12D-9.019 Scheduling and Notice of a Hearing.

(1) through (2) No change.

(3)(a) The notice of hearing before the value adjustment board shall be in writing, and shall be delivered by regular or certified U.S. mail or personal delivery, or in the manner requested by the petitioner on Form DR-486, so that the notice shall be received by the petitioner no less than twenty-five (25) calendar days prior to the day of such scheduled appearance. The Form DR-486 series is adopted and incorporated by reference in Rule 12D-16.002, F.A.C. The notice of hearing form shall meet the requirements of this section and shall be subject to approval by the department. The department provides Form DR-481 as a format for the form of such notice. The

DRAFT - 12/9/25

~~Form DR-481,~~ Value Adjustment Board – Notice of Hearing~~,~~ (Form DR-481, is adopted and incorporated by reference in Rule 12D-16.002, F.A.C.).

(b) The notice shall include these elements:

1. through 12. No change

13. If the hearing is in person, information for the petitioner to appear remotely at the hearing using electronic or other communication equipment if the county has not opted out as provided by law.

14. The notice shall contain the following statement:

If this notice sets forth a communication mode using audio visual technology you may request an in person hearing.

If this notice is for a telephone hearing you may request a hearing using audio visual technology or an in person hearing.

(c) If the petitioner requests an in person hearing the clerk shall accommodate the petitioner for the date, time, hearing address, and room. The clerk shall so accommodate a petitioner's request for a hearing using audio visual technology, if the prearranged default mode is in person or telephone. Requests for hearing using electronic or other communication equipment must be made as provided in Rule 12D-9.026, F.A.C.

(4) through (8) No change.

Rulemaking Authority 194.011(5), 194.034(1), 195.027(1)~~, 213.06(1)~~ FS. Law Implemented 194.011, 194.015, 194.032, 194.034, 195.022 FS. History–New 3-30-10, Amended 9-26-11, 6-14-16, 7-1-16, 3-13-17, 9-19-17, _____.

DRAFT - 12/9/25

12D-9.020 Exchange of Evidence.

(1)(a)1. At least 15 days before a petition hearing, the petitioner shall provide to the property appraiser a list of evidence to be presented at the hearing, a summary of evidence to be presented by witnesses, and copies of all documentation to be presented at the hearing. This provision does not preclude rebuttal evidence that was not specifically requested of the petitioner in writing by the property appraiser.

2. At least 15 days before a petition hearing, the property appraiser shall provide to the petitioner a list of evidence to be presented at the hearing, a summary of evidence to be presented by witnesses, and copies of all documentation to be presented at the hearing. The property appraiser's evidence list must contain the current property record card. This provision does not preclude use of rebuttal evidence by the property appraiser. If the property appraiser does not provide the information to the petitioner within the time required, the hearing shall be rescheduled to allow the petitioner additional time to review the property appraiser's evidence.

(b)~~2.~~ To calculate the fifteen (15) days, the petitioner and property appraiser shall use calendar days and shall not include the day of the hearing in the calculation, and shall count backwards from the day of the hearing, using the calendar day before the hearing as day 1. The last day of the fifteen (15) day period shall be included unless it is a Saturday, Sunday, or legal holiday, in which event the period runs ~~shall run~~ until the end of the next previous day that is neither a Saturday, Sunday, or legal holiday.

~~(b) A petitioner's noncompliance with paragraph (1)(a), does not affect the petitioner's right to receive a copy of the current property record card from the property appraiser as described in Section 194.032(2)(a), F.S.~~

(c) No petitioner may present for consideration, nor may a board or special magistrate accept

DRAFT - 12/9/25

for consideration, testimony or other evidentiary materials that were specifically requested of the petitioner in writing by the property appraiser in connection with a filed petition, of which the petitioner had knowledge and denied to the property appraiser. If the property appraiser asks in writing for specific evidence before the hearing in connection with a filed petition, and the petitioner has this evidence and knowingly refuses to provide it to the property appraiser, the evidence cannot be presented by the petitioner or accepted for consideration by the board or special magistrate. Such evidentiary materials shall be provided to the property appraiser no later than fifteen (15) days before the hearing in accordance with the exchange of evidence rules in this section. A petitioner's ability to introduce the evidence, requested of the petitioner in writing by the property appraiser, is lost if not provided to the property appraiser as described in this paragraph. ~~A petitioner's noncompliance with paragraph (1)(a), does not authorize a value adjustment board or special magistrate to exclude the petitioner's evidence. However, under Section 194.034(1)(h), F.S., if the property appraiser asks in writing for specific evidence before the hearing in connection with a filed petition, and the petitioner has this evidence and knowingly refuses to provide it to the property appraiser a reasonable time before the hearing, the evidence cannot be presented by the petitioner or accepted for consideration by the board or special magistrate. Reasonableness shall be determined by whether the material can be reviewed, investigated, and responded to or rebutted in the time frame remaining before the hearing. These requirements are more specifically described in subsection (8), of this rule, and in paragraphs 12D-9.025(4)(a) and (f), F.A.C.~~

~~(2)(a) If the property appraiser receives the petitioner's documentation as described in paragraph (1)(a), and if requested in writing by the petitioner, the property appraiser shall, no later than seven (7) days before the hearing, provide to the petitioner a list of evidence to be~~

DRAFT - 12/9/25

~~presented at the hearing, a summary of evidence to be presented by witnesses, and copies of all documentation to be presented by the property appraiser at the hearing. The evidence list must contain the current property record card. There is no specific form or format required for the petitioner's written request.~~

~~(b) To calculate the seven (7) days, the property appraiser shall use calendar days and shall not include the day of the hearing in the calculation, and shall count backwards from the day of the hearing. The last day of the period so computed shall be included unless it is a Saturday, Sunday, or legal holiday, in which event the period shall run until the end of the next previous day which is neither a Saturday, Sunday, or legal holiday.~~

~~(3)(a) If the petitioner does not provide the information to the property appraiser described in paragraph (1)(a), the property appraiser need not provide the information to the petitioner as described in subsection (2).~~

~~(b) If the property appraiser does not provide the information to the petitioner within the time required by paragraph (2)(b), the hearing shall be rescheduled to allow the petitioner additional time to review the property appraiser's evidence.~~

(4) through (6) Renumbered as (2) through (4) No change.

~~(7) A property appraiser shall not use at a hearing evidence that was not supplied to the petitioner as required. The remedy for such noncompliance shall be a rescheduling of the hearing to allow the petitioner an opportunity to review the information of the property appraiser.~~

~~(8) No petitioner may present for consideration, nor may a board or special magistrate accept for consideration, testimony or other evidentiary materials that were specifically requested of the petitioner in writing by the property appraiser in connection with a filed petition, of which the petitioner had knowledge and denied to the property appraiser. Such evidentiary materials shall~~

DRAFT - 12/9/25

~~be considered timely if provided to the property appraiser no later than fifteen (15) days before the hearing in accordance with the exchange of evidence rules in this section. If provided to the property appraiser less than fifteen (15) days before the hearing, such materials shall be considered timely if the board or special magistrate determines they were provided a reasonable time before the hearing, as described in paragraph 12D-9.025(4)(f), F.A.C. A petitioner's ability to introduce the evidence, requested of the petitioner in writing by the property appraiser, is lost if not provided to the property appraiser as described in this paragraph. This provision does not preclude rebuttal evidence that was not specifically requested of the petitioner by the property appraiser.~~

(5)~~(9)~~ No change.

Rulemaking Authority 194.011(5), 194.034(1), 195.027(1), ~~213.06(1)~~ FS. Law Implemented 194.011, 194.015, 194.032, 194.034, 194.035, 195.022 FS. History–New 3-30-10, Amended 6-14-16, 4-10-18,_____.

12D-9.025 Procedures for Conducting a Hearing; Presentation of Evidence; Testimony of Witnesses.

(1) through (3) No change.

(4)(a) No evidence shall be considered by the board or special magistrate except when presented and admitted during the time scheduled for the petitioner's hearing, or at a time when the petitioner has been given reasonable notice. ~~The petitioner may still present evidence if he or she does not participate in the evidence exchange. However, if the property appraiser asks in writing for specific evidence before the hearing in connection with a filed petition, and the petitioner has this evidence and refuses to provide it to the property appraiser, the evidence~~

DRAFT - 12/9/25

~~cannot be presented by the petitioner or accepted for consideration by the board or special magistrate. These requirements are more specifically described in paragraph (f), below.~~

(b) No change.

(c) In a hearing other than a remote hearing under Rule 12D-9.026, F.A.C., in order to be reviewed by the board or special magistrate, any evidence filed with the board clerk shall be brought to the hearing by the party. This requirement shall not apply where:

1. through 2. No change.

(d) through (e) No change.

(f)1. No petitioner shall present for consideration, nor shall the board or special magistrate accept for consideration, testimony or other evidentiary materials that were specifically requested of the petitioner in writing by the property appraiser in connection with a filed petition, of which the petitioner had knowledge and denied to the property appraiser. If the property appraiser asks in writing for specific evidence before the hearing in connection with a filed petition, and the petitioner has this evidence and refuses to provide it to the property appraiser, the evidence cannot be presented by the petitioner or accepted for consideration by the board or special magistrate.

2. Such evidentiary materials shall be considered timely if provided to the property appraiser no later than fifteen (15) days before the hearing in accordance with the exchange of evidence rules in Rule 12D-9.020, F.A.C.~~, and, if provided to the property appraiser less than fifteen (15) days before the hearing, shall be considered timely if the board or special magistrate determines they were provided a reasonable time before the hearing.~~

DRAFT - 12/9/25

3. A petitioner's ability to introduce the evidence, requested of the petitioner in writing by the property appraiser, is lost if not provided to the property appraiser as described in this paragraph.

4. This provision does not preclude rebuttal evidence that was not specifically requested of the petitioner by the property appraiser. ~~For purposes of this rule and Rule 12D-9.020, F.A.C., reasonableness shall be assumed if the property appraiser does not object. Otherwise, reasonableness shall be determined by whether the material can be reviewed, investigated, and responded to or rebutted in the time frame remaining before the hearing. If a petitioner has acted in good faith and not denied evidence to the property appraiser prior to the hearing, as provided by Section 194.034(1)(h), F.S., but wishes to submit evidence at the hearing which is of a nature that would require investigation or verification by the property appraiser, then the special magistrate may allow the hearing to be recessed and, if necessary, rescheduled so that the property appraiser may review such evidence.~~

5.~~2.~~ No change.

(g) No change.

(5) No change.

(6)(a) through (b) No change.

(c) In a petition to decrease the just value, the board or special magistrate may not revise the value above the property appraiser's presented value. In a petition to decrease the just value, the following limitations shall apply if the property appraiser seeks to present additional evidence that was unexpectedly discovered and that would increase the assessment.

1. through 6. No change.

DRAFT - 12/9/25

(d) In a petition to increase the just value, the property appraiser may provide an increased just value to the petitioner before the hearing or at the hearing. In such case, if the petitioner agrees with the property appraiser's increased just value, the petitioner may settle or withdraw the petition. If the petitioner does not agree with the property appraiser's increased just value, the hearing shall not be canceled on that ground. This provision applies only in petitions to increase the just value. In a petition to increase the just value, the board or special magistrate may not revise the value below the property appraiser's presented value.

(7) through (10) No change.

Rulemaking Authority 194.011(5), 194.034(1), 195.027(1) FS. Law Implemented 193.092, 194.011, 194.032, 194.034, 194.035 FS. History–New 3-30-10, Amended 6-14-16, 9-19-17, 8-17-21, 11-26-23, _____.

12D-9.026 Procedures for Requesting and Conducting a Hearing by Electronic Media.

(1) This rule sets forth additional criteria for hearings to those found in Rules 12D-9.024 and 12D-9.025, F.A.C. Hearings conducted by electronic media shall occur ~~only~~ under the conditions set forth in this rule section. The board must reasonably accommodate parties that have hardship or lack necessary equipment or ability to access equipment.

~~(a) The board must approve and have available the necessary equipment and procedures.~~

~~(b) The special magistrate, if one is used, must agree in each case to the electronic hearing.~~

~~(c) The board must reasonably accommodate parties that have hardship or lack necessary equipment or ability to access equipment. The board must provide a physical location at which a party may appear, if requested.~~

(2) A petitioner may request to appear at a hearing using electronic or other communication

DRAFT - 12/9/25

equipment by submitting a written request at least 10 calendar days before the date of the hearing. ~~For any hearing conducted by electronic media, the board shall ensure that all equipment is adequate and functional for allowing clear communication among the participants and for creating the hearing records required by law. The board procedures shall specify the time period within which a party must request to appear at a hearing by electronic media.~~

(a) The written request must:

1. Contain petition number and date of upcoming hearing.

2. Contain petitioner's name.

3. Be sent to the value adjustment board email address listed on Form DR-481 that notices this hearing.

4. Contain an email address for response and follow up by the clerk.

(b) To calculate the ten (10) days, the petitioner must use calendar days and not include the day of the hearing in the calculation, and count backwards from the day of the hearing, using the calendar day before the hearing day as day 1. The last day of the ten (10) day period is included unless it is a Saturday, Sunday, or legal holiday, in which event the period runs until the end of the next previous day that is neither a Saturday, Sunday, or legal holiday.

(c) The clerk must ensure that all parties are notified of such written request.

(d) If a request is received in any county in which the board has opted out of providing hearings using electronic communication equipment, the clerk shall promptly notify any petitioner requesting a hearing using electronic or other communication equipment of such opt out, in accordance with Section 194.032(2)(b)4., F.S.

(3) A hearing must be noticed by the clerk sending a Value Adjustment Board - Notice of Remote Hearing (Form DR-481REM, incorporated by reference in Rule 12D-16.002, F.A.C.).

DRAFT - 12/9/25

~~Consistent with board equipment and procedures:~~

(a) The notice must read: ~~Any party may request to appear at a hearing before a board or special magistrate, using telephonic or other electronic media. If the board or special magistrate allows a party to appear by telephone, all members of the board in the hearing or the special magistrate must be physically present in the hearing room. Unless required by other provisions of state or federal law, the board clerk need not comply with such a request if such telephonic or electronic media are not reasonably available.~~

Your hearing will be conducted using electronic or other communication equipment. You will be attending the hearing using electronic or other communication equipment.

(b) The notice must: ~~The parties must also all agree on the methods for swearing witnesses, presenting evidence, and placing testimony on the record. Such methods must comply with the provisions of this rule chapter. The agreement of the parties must include which parties must appear by telephonic or other electronic media, and which parties will be present in the hearing room.~~

1. Contain the petition number;

2. Contain the petitioner's name;

3. Contain the hearing date and time;

4. Identify the specific form of communication technology to be used and provide instructions for access to the communication technology in the body of the notice with telephone numbers, meeting codes, passwords and other access information;

5. Contain a statement that the petitioner must upload evidence no later than 9:00 AM the non-holiday workday before the hearing date;

DRAFT - 12/9/25

6. Contain the evidence upload email address or weblink;

7. Contain the clerk's telephone number;

8. Contain the clerk's email;

9. Contain the clerk's or deputy's name and signature;

10. Any information necessary to comply with federal or state disability or accessibility acts.

(4) The board must have available the necessary equipment and procedures for using the equipment in hearings.

(a) "Electronic or other communication equipment" means:

1. Technology in compliance with applicable law which enables real-time, two-way communication using electronic means in which participants are able to see, hear, and communicate with one another; or

2. telephone; or

3. a combination thereof.

(b) The board must provide electronic or other communication equipment, to allow petitioners to appear using electronic or other communication equipment at hearings, that is adequate and functional for clear communication among participants and for creating hearing records required by law, and that petitioners can submit and transmit evidence to the board in a format that can be processed, viewed, printed, and archived.

(c) Petitioners requesting remote hearings must ensure they have the necessary connectivity and equipment.

(5)(a) Hearing procedures must include applicable procedures in Rules 12D-9.024 and12D-9.025, F.A.C.

(b) If the board or special magistrate allows a party to appear using electronic or other

DRAFT - 12/9/25

communication equipment, all members of the board in the hearing or the special magistrate must be physically present in the hearing room.

(6)(a) Evidence, including rebuttal evidence must be uploaded and received no later than 9:00 a.m. on the workday before the hearing date. If a hearing is on Monday, then evidence must be uploaded by 9:00 a.m. on the previous Friday.

(b) The petitioner must submit and transmit evidence to the board in a format that can be processed, viewed, printed, and archived. The documents must be in portable document format (".pdf").

(c) The documents must have a cover page which includes:

1. Petition number;

2. Parcel or folio number(s);

3. Petitioner name;

4. Which party is submitting the documents;

5. Telephone number;

6. Witnesses' names and telephone numbers if they are not at petitioner's telephone number.

(d) Pages of the documents must be sequentially numbered if the clerk's software does not number pages automatically.

(e) The process of uploading the documents into the value adjustment board's computer system described in this subsection is a separate process from the evidence exchange between a petitioner and the property appraiser described in Rule 12D-9.020, F.A.C. The evidence exchange process happens outside of the purview of the value adjustment board. Petitioners must participate in both of these processes, separately.

(7) Witnesses must be available.

DRAFT - 12/9/25

(a) The petitioner is responsible for ensuring all witnesses called by petitioner are available, have the necessary electronic or other communication equipment, and have copies of documents necessary to their testimony.

(b) Witness information for witnesses that will not be at petitioner's location must be included on the cover page to the documents as specified in paragraph (6)(c).

(8)(a)~~(4)~~ The board must provide a physical location at which a party may appear, if requested. Such hearings must be open to the public ~~either~~ by providing the ability for interested members of the public choose either to join the hearing electronically or to monitor the hearing at the location of the board or special magistrate.

(b) To be open to the public using electronic or other communication equipment, proper notice must be given and interactive access by members of the public provided.

1. A list of hearings must be posted on the board's website.

2. For hearings using audio visual technology, the log on information, links and passwords must be posted in the board's website to allow public access via the Internet,

3. For hearings using the telephone, the board must permit members of the public to request to attend, and must accommodate such requests by providing call in numbers or allowing the members of the public to be called.

Rulemaking Authority 194.011(5), 194.034(1), 195.027(1)~~, 213.06(1)~~ FS. Law Implemented 194.011, 194.032, 194.034, 195.035, 195.022, 195.084 FS. History–New 3-30-10, Amended _____.

Subject:	Hernando County VAB Special Magistrate Inquiry - Response Requested
Date:	Thursday, March 5, 2026 5:21:00 PM
Importance:	High

Good afternoon, Hernando County VAB Special Magistrates.

During the 2025 Organizational Meeting, VAB Administration and I elected to remove a few procedures on a trial basis for telephonic hearings for the 2025 VAB Session. I am sure you all noticed that there was no requirement for any remote party to have a Notary Public present during a telephonic hearing to administer an oath or complete an affidavit. The Board agreed to the suspension of the Notary Public and affidavit requirements, with the caveat that they would like to know how the appointed Special Magistrates and VAB Administration were able to navigate remote hearings with those steps/tasks removed.

Please respond to this email by noon (12:00 PM EST) Friday, March 13, 2026, and provide me with any comments or concerns that you had during the Hernando County 2025 VAB Session regarding the removal of the Notary Public and affidavit requirements for remote hearings.

Thank you, in advance, for your time and consideration.

Very truly,
Holly Cosby
VAB Counsel

MEMORANDUM

TO: Value Adjustment Board

FROM: Heidi Prouse, Administrative Services Supervisor

SUBJECT: Response from VAB Administration RE: O-2

DATE: March 6, 2026

- Value Adjustment Board Request at Organizational Meeting of August 7, 2025 – *For Administration to provide a report to the Board after the culmination of the 2025 season regarding how telephonic hearings went without the affidavit and notary process.*
  - After completion of 30-days of hearings for 433-petitions, VAB Administration has the following feedback regarding telephonic hearings:
    - Administration conducted 277 telephonic hearings. All of which were requested by taxpayer representatives.
    - There were 0 telephonic hearings conducted by request of a direct taxpayer/property owner.
    - By comparison, at culmination of the 2024 season, Administration had conducted 18 telephonic hearings, of which 16 were requested by taxpayer representatives and 2 were requested by a direct taxpayer.
    - By removing the requirement of notary/affidavit process, there has definitely been a great increase in the number of telephonic hearings, as opposed to hearings being conducted by "evidence in absence" or having a representative attend the hearings in person.
    - Not having to obtain the affidavits after hearing from remote testimony made the process for Administration less time consuming as Administration did not have to request, follow up or process additional paperwork after the telephonic hearing.
    - The increased volume of telephonic hearings did create more issues with communication as the representatives would phone into the incorrect phone number, not following the direction of the approved telephonic hearing transmittal from administration.
    - The increased volume of telephonic hearings also highlighted the hurdles of our current hearing space for speaker volume, amplification of sound and overall need for a more adequate hearing room to conduct telephonic or remote hearings going forward.

Administration is ready to answer any additional questions of the Board.

AttorneyCosby and Board Members:

Forgive my informal convenient email reply to your inquiry on this late beautiful Friday afternoon.

Robert Sutte CRE, MAI, SRA , Special Magistrate Real and Tangible Property served your VAB this tax cycle 2025 for the first time. Thank You. My Special Master then Special Magistrate experience spans 28 years commencing Orange VAB August 14, 1997 and Brevard VAB July 16, 1998. Subsequently, I have worked in 14 other Florida VAB's.

Simply stated, I have never seen the services of a notary public required for any of my hearings. Conclusion…they are conducted appropriately. Also it is my learned opinion that witnesses are only required to be sworn "to tell the truth, the whole truth and nothing but the truth, so help them God " if requested by either the Property Appraiser or the Petitioner witnesses.

In closing, a much different thought ! I strongly suggest that you require virtual hearings and require all participating witnesses to be visible . We communicate with each other 70% of the time with our " Body Language ". Having that situation is a terrific help to me when trying to clearly understand all presented evidence.

Respectfully Submitted,

Bob Sutte

Good afternoon Ms Cosby:

Thank you for the opportunity to provide feedback regarding the suspension of the Notary Public and affidavit requirements for telephonic hearings during the 2025 VAB Session.

During the hearings I presided over, I did not encounter any issues related to the absence of a Notary Public or the affidavit requirement. The proceedings moved efficiently, and the administration of the oath directly during the hearing appeared to be sufficient to maintain the integrity of the testimony and the overall process.

From my perspective, removing those requirements simplified the logistics for participants while still allowing the hearings to be conducted in an orderly and professional manner. All parties were able to be sworn in at the beginning of the hearing, and I did not observe any procedural difficulties or concerns arising from the change.

Based on my experience during the 2025 session, the telephonic hearing format functioned effectively without those additional steps.

Please let me know if any additional information would be helpful.

Best regards,

Colleen E Millett

Hi Holly!

My experience may differ somewhat from that of other Special Magistrates, as I hear only residential petitions. Additionally, during my first year serving in this capacity, all of the hearings I conducted involved petitions presented by a corporate representative.

In each instance, the individual participating in the telephonic hearing was the same representative identified in the application documentation. As a result, I did not encounter any issues related to the absence of a Notary Public or affidavit requirement during the remote hearings.

Feel free to reach out if you need any further clarification or commentary.

Shelley Kennedy

Fond regards,

With the requirement for a Notary removed I just proceeded as normal with all other hearing steps. Few counties require an extensive Notary confirmation step and so Hernando County is now like most of my other counties. No problems were encountered.

All the best,

MEMORANDUM

TO: Value Adjustment Board

FROM: Heidi Prouse, Administrative Services Supervisor

SUBJECT: Response from VAB Administration RE:O-3

DATE: March 6, 2026

- Value Adjustment Board Request at Organizational Meeting of August 7, 2025 – *For Administration to provide a report to the Board after the culmination of the 2025 season regarding homestead versus non-homestead petitions filed.*
  - Hernando County had a total of 433 petitions filed for the 2025 season.
  - There were 339 Residential petitions filed, of which 27 petitions were on homestead properties (312 petitions on non-homestead properties).
  - Of those 27 petitions filed on homestead properties, below is a summary of the outcome.
  - To be noted that 12 of the 27 petitions filed were filed by a taxpayer representative and 15 were filed by the taxpayer themselves.

Decision of Petition	Total
Granted (reduction)	▪ 7 petitions
Denied (no change)	▪ 6 petitions
Settled (agreed to value with PAO)	▪ 6 petitions
Withdrawn (petition did not proceed to hearing)	▪ 7 petitions
Late File – Rejected (did not go to hearing)	▪ 1 petition
	▪ 27 Total Petitions

Administration is ready to answer any additional questions of the Board.

	The VAB introduced the board clerk and any designee of the board clerk and provided the board clerk's contact information - **Organizational Meeting Agenda Items A3, B and G2; Verbatim**
	The VAB appointed and/or ratified special magistrates - **Organizational Meeting Agenda Item H; Verbatim**
	The VAB made F.A.C. 12D-9 available to the public, special magistrates and board members, containing the uniform rules of procedure for hearings before value adjustment boards and special magistrates – available at organizational meeting and on the website of the board clerk - **Organizational Meeting Agenda Item M1; Ex. 5; Verbatim**
	The VAB made F.A.C. 12D-10 available to the public, special magistrates and board members, containing the rules applicable to the requirements for hearings and decisions – available at organizational meeting and on the website of the board clerk - **Organizational Meeting Agenda Item M1; Ex. 5; Verbatim**
	The VAB made the requirements of Florida's Government in the Sunshine / open government laws including information on where to obtain the current Government-In-The-Sunshine manual available to the public, special magistrates and board members – available at organizational meeting and on the website of the board clerk - **Organizational Meeting Agenda Item M4; Ex. 5; Verbatim**
	The VAB made F.A.C. 12D-51.001, 12D-51.002 and 12D-51.003 available to the public, special magistrates and board members – available at organizational meeting and on the website of the board clerk - **Organizational Meeting Agenda Item M2; Ex. 5; Verbatim**
	The VAB made the associated forms that have been adopted by the DOR available to the public, special magistrates and board members – available at organizational meeting and on the website of the board clerk - **Organizational Meeting Agenda Item M6; Ex. 5; Verbatim**
	The VAB made all local administrative procedures and forms of the board or special magistrates available to the public, special magistrates and board members – available at organizational meeting and on the website of the board clerk - **Organizational Meeting Agenda Item N; Ex. 5; Verbatim**
	The VAB made F.S. Chapters 192-195 available to the public, special magistrates and board members as reference information containing the guidelines and statutes applicable to assessments and assessment administration – available at organizational meeting and on the website of the board clerk - **Organizational Meeting Agenda Item M3; Ex. 5; Verbatim**
	The VAB discussed, took testimony on and adopted or ratified with any required revision or amendment any local administrative procedures and forms of the board, as necessary - **Organizational Meeting Agenda Item N; Verbatim**
	The VAB local procedures are ministerial in nature and are not inconsistent with governing statutes, case law, attorney general opinions or rules of the department - **Organizational Meeting Agenda Items N and P3; Verbatim**
	The VAB discussed general information on Florida's property tax system, respective roles within this system, taxpayer opportunities to participate in the system, and property taxpayer rights – this issue has a separate agenda item, supplemented with additional local

	informational handouts: this discussion will be reflected in the verbatim record and minutes - **Organizational Meeting Agenda Item M7; Verbatim**
	The VAB adopted/ratified, by resolution, any filing fee for petitions for the current VAB session, in an amount not to exceed $50.00 - **Organizational Meeting Agenda Item J; Verbatim**
	The VAB announced the tentative schedule for the value adjustment board, taking into consideration the number of petitions filed, the possibility of the need to reschedule and the requirement that the board stay in session until all petitions have been heard - **Organizational Meeting Agenda Item H4; Verbatim**

I, Holly E. Cosby, Esq., Hernando County Value Adjustment Board Attorney, hereby verify the following on July 8, 2025 and July 14, 2025:

1) that the above information regarding pre-hearing and pre-organizational requirements were verified, reviewed, and considered on July 8, 2025 and July 14, 2025,
2) that the Organizational Meeting for the Hernando County 2025 VAB Session was held on August 7, 2025, and the above information regarding organizational meeting requirements was verified, reviewed, and considered at said meeting, and
3) that hearings for the Hernando County 2025 VAB Session will commence on or after October 16, 2025.

Holly E. Cosby, Esq.

I, Holly E. Cosby, Esq., Hernando County Value Adjustment Board Attorney, hereby verify the following on August 7, 2025:

1) There are three (3) items above, which could not be verified before or during the organizational meeting, which are:
   a. VAB Attorney has received the DOR training and has passed the corresponding exam,
   b. All appointed special magistrates have received the DOR training and have completed the same, and special magistrates with less than five years of required experience successfully completed the DOR's training including any updated modules and an examination, and were certified, and
   c. Notice has been given to the chief executive officer of each municipality as provided in F.S. §193.116.
2) Items 1(a) and 1(b) could not be verified because the current DOR training was released on August 15, 2025, and VAB Attorney was not able to reasonably complete said training prior to the instant meeting; further, it is only reasonable to expect that all special magistrates complete the DOR training in a timely manner, which would be defined as completing the DOR training prior to holding VAB hearings in Hernando County,
3) Item 1(a) will be verified as soon as the DOR training is released and VAB Attorney is able to complete the same, which will be done in a prompt and timely manner,
4) Item 1(b) will be verified prior to special magistrates holding VAB hearings in Hernando County,
5) Item 1(c) could not be verified because no VAB hearings had been scheduled prior to the organizational meeting, for such notices to be required,
6) Once the above referenced, unverified items are able to be verified, VAB Counsel will provide the VAB with documentation and continued updated verification for the same.

Certification of Training Completion

The Florida Department of Revenue provides this document for a person to certify that he or she, personally and without any assistance, has completed the Department's 2025 Value Adjustment Board Training, including the exam, for Board Members or Board Attorney.

I certify that I,

Holly E Cosby

Personally, and without any assistance, have carefully reviewed and studied the content of Modules 1 through 11 of the Department of Revenue's 2025 Value Adjustment Board Training, for learning such content, and further certify that I, personally and without any assistance, have completed and passed the Department of Revenue's corresponding examination.

This certification becomes valid only when signed and dated below by the person who completed the training including exam as described above. By my dated signature below, I further attest to my preceding statements.
