MEMORANDUM

To: Toni Brady: Chief Procurement Officer and Purchasing Manager, MBA, CPM

CC: Ricky Leach, Operations Manager

From: Bruce Batten, Chief Water and Wastewater Plant Operator

Date: April 10, 2023

Re: Centrisys Rental Agreement / Justification and Explanation

HCUD will be taking Centrifuge #1 Out of Service for approximately 90 days to make major repairs to the scroll and bowl on the Centrifuge. During this time, it will be necessary to rent a Centrifuge from Centrisys CNP to meet the sludge processing demands and FDEP regulations of the three Wastewater Treatment Plants. Renting the Centrifuge from Centrisys is the only economically feasible option there is because all the buildings are already designed for this machine, staff is already trained on the Centrifuges, and all the chemicals (polymers) are the same.

Should you require additional information, please contact me. Thank You

Regards,

A handwritten signature in black ink, appearing to read "Bruce Batten".
