

2022- Kudos

Kandi McCorkel:

- I just wanted to let you know how great my interaction has been with Kandi McCorkel. She's been helping me make sure that plans drawn by my civil engineer are correct and her communication has been extremely good and she's very willing and able to explain things. I feel that she's gone out of her way to help and she strikes me as extremely competent. Artisan Windows & Doors
- Thank you all for your help in getting this done! Brennan Smith – Barrette Brooksville
- I just want to take a moment to emphasize that my experience working with Kandi McCorkel has been, and continues to be, no less than EXCELLENT! Kandi is absolutely the most professional person I deal with in any City, County or governmental agency. She is always available to answer questions. She always answers her phone or returns my calls promptly. If she does not have the answer, she always sends me to the best person for the situation. She understands the County Codes, the County Design Guidelines, and she helps us find solutions when we experience severe design obstacles. All of this is the definition of PROFESSIONALISM.

When a client brings me a new project in Hernando County, no matter how complicated it may appear, I know we can find a solution because Kandi McCorkel will be there to help us. – Scott Lincoln LA Civil, Inc.

Laura Borgesi:

- On behalf of the entire staff and clients of Mid Florida Community Services, Inc., we want to thank you for addressing the ROW site issue so promptly. The overgrown grass/bushes were creating a very hazardous traffic problem when turning either right or left from Kennedy Blvd. onto Jefferson St.
Thanks to Laura Borgesi, Traffic Engineer, Todd Crosby and the crew at FOOT, we can now clearly see oncoming traffic at a safe distance to make the turns. - Mid Florida Community Services, Inc

John Burnett:

- I just wanted to take a moment and let you both know how appreciative I am for the time that John is taking to help with Cabot Citrus Farms. He's helping me create a systematic approach to the data we need to evaluate the cave system and helping us develop strategies for a master plan revision and future development of the site. His expertise is greatly appreciated and his patience in explaining things to a geologic novice like myself has been wonderful (I didn't even stay at a Holiday Inn Express last night!) I know you both know how great he is, but a little bit of kudos never hurts.

Michelle Miller

- Thank you for your diligence in this investigation. – Alex Weeks, Florida Department of Environmental Protection

Scott Nelson:

- Wow, thanks for taking the initiative to contact me rather than wait for my monthly inquiry -- in all my years no city or county official has done that, to your credit! Good news you sent, maybe before I croak we'll get this road paved so we can breathe. Thanks again for keeping me advised, I really appreciate it, and you have a great week! Best regards – John Newton

Timea Lewis:

- Mr. Herring, I just want to thank you for the information provided by Ms. Lewis. She was very helpful, responsive and professional. - Bob Holmden, P.E. Florida Rural Water Association
