Scott,

I appreciate you coming for a visit to our facility to discuss current market conditions.

As we talked about the (AMV) average material value has been down for well over a year now and shows little sign of improvement for 2024.

Along with the rising cost for disposal of residuals, labor, insurance. An overall operating expenses we face in today's market.

Beginning April 1, 2024 there will be a increase of \$45.00 per ton for processing Hernando County's material.

Thank you,

A handwritten signature in cursive script that reads "Gerald Lourenco".

Jerry/Nick

Good morning,

As of April 1st 2024 the Ocala Recycling Facility will be implementing a 45\$ Processing fee increase,
Due to rising operational cost, market changes.

Thank you

Frank Lemily,
Waste Pro
Division Manager,
352-817-0970
