Hernando County Zoning Amendment Petition
Narrative Description for Proposed Development of Parcel 1703847
Owner: Maya Motels, Inc

Planning Department
Hernando County, Florida

Summary: Maya Motels is proposing to construct two 4-story apartment buildings with 32 units each on the subject property. The apartment complex will contain a mix of 1 and 2 bedroom apartments, associated amenities, and parking. The projects is proposed in two phases with a 32 unit building being built in each phase. Please see the attached concept site plan which shows the proposed project layout and phasing.

1. Proposal

- a. Proposed land use and their specific acreage: Currently the property is zoned C-1. To construct the apartments on this property Hernando County is requiring a PDP be submitted for the 2.68 AC that is proposed for the apartment buildings. The remaining 1.61 AC of the 4.29 AC parcel is proposed to retain it's current zoning of C-1 Commercial.
- b. Proposed density level of residential uses: Phase one will result in a residential density of $32/2.68 = 11.9$ units per acre. At the completion of phase two this density will be $64/2.68 = 23.9$ units per acre.
- c. Proposed square footage of development and building height(s): Each of the proposed buildings will occupy a footprint of 11,292.56 sf with a total floor area of 39,397.24 sf. The buildings are proposed as 4 stories each with a maximum height of ancillary support equipment and appurtenances not to exceed 50 feet in height above finish grade.
- d. Proposed deviations from code: The code requires a PDP be established for each apartment complex. As such there are no deviations to propose.

2. Site Characteristics

- a. Site size(acres): Total site is 4.29 AC, with the project area consisting of 2.68 AC, with the remaining 1.61 AC to retain it's existing zoning of C-1. The proposed multifamily will provide a nice transition for the single family to the North and the existing commercial property to the South of the proposed project.
- b. Existing land use is C-1 Vacant. Properties to the North – R1C, South – C1, East – C1, West – C1.
- c. Known activities or uses on-site: The proposed project sits on a parcel that was originally permitted with a second phase to the Quality Inn which is located immediately to the South of this proposed development. Currently the property is vacant.

3. Environmental Conditions

- a. Flood Zone: The property is located in Flood Zone (X)
- b. Drainage Features: Currently there is a large DRA that was constructed as part of the originally planned build out for the property. With approval of this Zoning change a modification to the existing drainage permit will be executed with SWFWD to relocate this DRA to the position shown on the attached site plan. This DRA will be sized to

handle the drainage for his project and the future commercial site proposed adjacent to Cortez Boulevard.

- c. Water Features: None
- d. Habitats: None, if Gopher Tortoises are encountered during the construction they will be properly relocated as required by law.
- e. Conditions and impacts on Natural Features: None

4. Site Plan Discussion in the Narrative

- a. A description of the concept of the development plan: Please see summary above.
- b. Proposed buffer sizes and separation widths between proposed land uses: A 15 foot landscape buffer is proposed on the North Boundary adjacent to the Residential Parcel. This buffer also proposes to install a 6' privacy fence along the Norther border of the property and retain all the large trees currently located in this area in addition to installing the landscape required by Hernando County per their LDC. All remaining Landscape Buffers are proposed at 10' with LDC required landscaping.
- c. Proposed Setbacks: a 90' building setback is proposed from the Residential property to the North. A 25' building setback is proposed adjacent to the commercial property to the East, a 24' building setback is proposed adjacent to the commercial property to the South. As the proposed buildings face the center of the parcel this equates to a 90' and 24' side setback and a 25' rear setback with respect to the buildings. The parking has been located to the rear of the parcel to maintain the Residential Protection Standards for buildings that are proposed at higher then 20'. An administrative variance of 10' will be requested to obtain the 90' setback.
- d. Impacts and Improvements to infrastructure: None required.
- e. Proposed uses within pods: N/A

5. Impacts to Public Facilities

- a. Discussion on impacts on infrastructure: With the reduction of the previously approved motel size, and the relatively small size of this development there are no adverse impacts on public facilities to note.
- b. Discussion on improvements proposed: Extensions to the water and sewer systems to include fire suppression will be provided as part of this development.

6. Water and Sewer Services

In our pre-application meeting with the County, water and sewer capacity for this project have been confirmed. It is understood that improvements to water and sewer systems will be designed and constructed to County standards and dedicated to the County as required once the construction is complete and accepted by the County.

7. Senior, Age-Restricted or Affordable Housing

This project is not proposed as an age restricted or affordable housing project.
