### DETAILS

#### The Airpower XR1 PRO is Tri NFPA certified!

Developed with first responders in mind, these wildland, EMS, and USAR boots can take you to the front line and back with the comfort you need when logging long hours on your feet. With a multi-purpose leather boot that is NFPA certified, you have the convenience of three boots in one. Wear it in the station, on EMS calls, to wildland brush fires, and on Urban Search and Rescue deployments.

Anatomically constructed and built with a lightweight composite toe, HAIX Airpower XR1 Pro boots give your feet plenty of room to move around while protecting them from toe impact and compression because there is nothing worse than a protective toe that pinches or restricts your movement. The added profiled rubber toe bumper keeps the toe area protected from cuts, scrapes, and abrasions that could damage the leather.

#### Maximum protection quad-certified for EMS, Technical Rescue, and Wildland firefighting

Your health is a priority. The Airpower XR1 Pro offers all-around protection for your feet, because it is puncture resistant, protects your toes, and protects you from the dangerous fluids you come in contact with on the job. It is a quad-certified EMS, technical rescue, and wildland firefigh(more...)
