Present Land use: The current land use in accordance with the FLUM map, is Residential.

Desired Zoning: The Applicant is desirous to revise the existing expired Master Plan. The original Master Plan included the parcel to the north as well this is only for key #1590497.

This master plan proposes a total of 11,000 sf of office with a future building of 5,000 sf of additional office.

Standard County Setbacks: Front: 75' Jacqueline & 37' Jayson Drive.
North & East: 35'

Buffers: The master plan calls for a 10' buffer along all property lines.

Access: The site has only one access and this is from Jacqueline Road.

Soils: According to information found on the NRCS database, the existing soils are Candler fine sand. The soils are well drained soils, this is typical in this area.

Sanitary Sewer: HCUD has sewer in the area by means of a force main on the north side of Jacqueline Road. A lift station will be required on-site to connect to the existing County force main.

Potable Water: A connection would be made to HCUD services located on the south side of Jacqueline Road, for a single meter, based on the water needed at the office building.

Environmental: The existing soils and vegetation support habitat for gopher tortoise. The Developer, prior to any construction, will conduct a wildlife assessment.

Traffic: Based on the latest tables from the ITE manual, the proposed project may generate up to **18 Peak PM Trips**. This will be further addressed at the time of concurrency when a traffic study may be required.

The present zoning of the property allows for Office Professional space. A reasonable yield of square footage for such a site is 22% of the total land area. $4.0 \text{ Acres} \times 43560 \text{ sf/acre} \times .22 = 38,332.8 \text{ sf}$ of office space, which would generate approximately **44 peak hour trips**.

9. A minimum of one acre of open space shall be provided on a revised plan.
10. The development shall be served by central water and sewer.
11. The revised plan shall show enhanced buffering along the east lot line.
12. The developer shall make improvements to provide 40 mph design speed and to improve the sight distance at the intersection of Jayson Drive and Jacqueline Road, and shall improve on Jacqueline Road in front of the project to collector road standards.
13. The petitioner shall provide a revised site plan within 30 days of BCC approval.
14. Four (4) acres of OP shall be allowed at the front of the development.
15. The setbacks for the OP area shall be as follows:
From Jacqueline Road: 75'
From Jayson Drive: 35'
From the residential pod: 35'
From the east lot line: 20'
From internal roadways: 35'

Note: For clarity, the staff modified condition #4 to specify the perimeter setbacks applicable to the residential component of the approval. The revisions are italicized and underlined.

Additionally, the petitioner provided an artist's rendering of the proposed office professional component which is included in the BCC's packet. If the office professional is approved, the roof pitch and colonnade

features proposed by the petitioner in the visual representation would be required in addition to meeting the county's commercial design standards.

BCC ACTION:
