Centralia Place

Rezoning & Master Plan Approval

Rev September 16, 2022

Planning Department
Hernando County, Florida

Project Location: This property is a **53.9-acre** site on the south side of Centralia Road, just west of the Suncoast Parkway. The property abuts the Suncoast Parkway on its west side. The property is located in Section 34, Township 21 S, Range 18 E, Hernando County. Its designated key number is 00330056.

Present Zoning: The land is presently zoned AG.

Present Land use: The land is currently designated as RURAL.

Desired Zoning/ Land Use: There is no desire to change the Land Use Classification for this project. The Owner desires to develop the land as a Rural Development. This is a request to change the zoning only to PDP (Rural). This district shall allow all permitted, special exception, and conditional uses allowed in the AG, AR, A/R-1, A/R-2, Country 2.5 and A-C zoning districts. The intent is to provide single family housing in a rural setting along with certain specific uses permitted within the rural zoning classifications such as:

- A. carport, detached garage, or other buildings not used as a dwelling incidental to the principal permitted use of the premises.
- B. Accessory uses customarily incidental to the principal permitted use of the premises.
- C. Home Occupations
- D. Poultry and swine for home consumption maintained at least 75' from adjacent properties.

Surrounding Lands: The majority of the land surrounding this project is "Rural" land use designation with AG zoning. There is one area in the northwest region where the land use is Commercial. All of the surrounding lands are zoned AG. This is shown on the proposed master plan.

Summary of Request: The applicant is desirous to rezone the property to develop the property into 18 - 2.5 acre lots with access and stormwater improvements. The project will access Centralia Road, a County owned and maintained roadway. A County right-of-way use permit will be required for this connection.

Setbacks: Even though allowed in the PDP process, no reduction in typical County setbacks for Rural properties is being requested. Internal Lot line setbacks shall meet County regulations which are:

Front: 75'
Sides: 35'
Rear: 50'

Project Perimeter setbacks per the PDP regulations are as follows:

North: 25'
South: 20'
East: 25'
West: 20'

Parks: Since there are less than 50 dwelling units, there is no requirement to provide neighborhood parks within the development.

Buffers: There are two designated buffers (25' each) shown on the master plan. Each are adjacent to the adjacent roadways. These buffers serve a double purpose. One is the buffer itself. The second is the restrictive access easement which will be platted over this area. This will prevent any legal access to Centralia and the Suncoast Parkway, other than the designated roadway shown on the master plan. There is no need for buffers

against the south and west lines due to those properties being zoned AG, as this property will be as well. *The buffers are to be left un-disturbed by this development. Should bare places be discovered, augmentation of the buffer will be required by the Developer during the development stage. The buffers shall reach 80% opacity within two years.*

Access: A single roadway will access Centralia Road, a County owned and maintained roadway. This roadway shall be extended the length of the project, approximately 2632 feet. This application is requesting a deviation in the length of a dead-end roadway. *The rule for dead-end streets for Hernando County is 600 feet. However, there are no other points of legal egress in the southern reaches of this property. We request this deviation, to allow the street to reach a length of 2632 feet.*

Soils: According to information found on the NRCS database, the soils within this site are Candler fine sand for the most part. Closer to the Parkway lie some soils classified as Williston fine sand. As stated, they are both fine sands and are suitable for development.

Streets: There will be only one street. This street shall be constructed to County standards for a local road with a sixty (60) foot right-of-way, and twenty feet of paving. There will be no curbs and gutter, only open swales. The swales shall be constructed to a reasonable depth to add increased runoff storage to meet stormwater regulations. Upon completion of construction and platting, this street will be dedicated to the HOA.

Sanitary Sewer: Each lot will be required to permit its own individual lot septic system. There is no municipal sewer in the area.

Potable Water: Each lot will be required to permit its own well for potable water. There is no municipal water in the area.

Environmental: The land is prime land to support gopher tortoise. If approved, the site will be required to provide a survey/assessment for the wildlife impact prior to construction.

Floodplain: The project lies adjacent to two retention areas constructed with the Suncoast Parkway. These two areas along with one more area on-site and a couple adjacent off-site areas are denoted on the master plan for 100-year flood plain. If work is proposed within the flood plain, compensation volume will be mitigated. The project is located within the Centralia Flood Plain Study. All drainage design shall take the results of this study into consideration during the design process.

Drainage: If approved, the project will be reviewed for drainage improvements and its effect on neighboring lands by Hernando County and the Southwest Florida Water Management District (SWFWMD). The site will be required to meet the following, for the major system:

- Water quality capture and treatment
- 25-Year peak rates of flow attenuation
- 100-Year detention of runoff volume.
- 100-Year volume encroachment/compensation

Upon completion of construction and platting, the retention areas will be dedicated to the HOA.
