TITLE

Ratification of Airport Grant Application With Federal Aviation Administration for Taxiway D and A1 Improvement Project at Brooksville-Tampa Bay Regional Airport

BRIEF OVERVIEW

Brooksville-Tampa Bay Regional Airport is requesting \$646,999.00 of the allocated Bipartisan Infrastructure Law (BIL) eligible federal share of project cost from the Federal Aviation Administration (FAA) for the Taxiway D and A1 Improvement Project.

Taxiway D and A1 was constructed in 1964 and is showing signs of increased deterioration. Additionally, the recent Decoupling of Runway 3/21 CIP project altered the taxiing pattern of aircraft which now directs aircraft to Taxiway A1. The pavement needs to be rehabilitated to accommodate the additional traffic.

Grant Policy 15-01 provides an allowance for the County Administrator to approve submittal of grant applications when time constraints exist. Due to FAA time deadline constraints, the County Administrator signed the Application which was submitted on June 26, 2025. In accordance with Grant Policy 15-01, the grant application is being brought to the Board for ratification.

FINANCIAL IMPACT

None at this time. Once this project is awarded, this project will receive \$646,999 from the FAA towards design and construction to support Taxiway A1 and D Rehabilitation. There is a 2.5% match \$17,027 required that will be funded by Airport Reserves. The Airport also expects FDOT participation in this project of 2.5%.

LEGAL NOTE

The Board is authorized to act on this matter pursuant to Chapter 125, Florida Statutes.

RECOMMENDATION

It is recommended that the Board ratify the County Administrator's signature on the attached FAA grant application.

Airport: BROOKSVILLE-TAMPA BAY REGIONAL AIRPORT (BKV)

City, ST: Brooksville, Florida

Project Description: This project includes construction to rehabilitate a portion of Taxiway D and reconstruct a portion of Taxiway A1.

Project Justification: The approximate area for this section of Taxiway A1 is 20,602 sf. Taxiway A1 west of Taxiway D was constructed in 1964 with 2" of asphalt over 6" of limerock. It was seal coated in 2015. In 2021 as part of the runway decoupling project, this taxiway became a movement area providing access to Runway 3-21 via Taxiway B1 and to the general aviation ramp. This pavement is subjected to more aircraft traffic and is showing increased deterioration. The pavement needs to be strengthened to accommodate the additional traffic. The new pavement section is anticipated to be 4" of asphalt over 8" of limerock. According to the 2021 FDOT Airport Pavement Evaluation Report, the PCI rating for this pavement section is estimated to be 65 by 2025.

The approximate area for this section of Taxiway D is 42,639 sf. Taxiway D was constructed in 1991 with 4" of asphalt over 14" of limerock base course. It is recommended that this pavement to be rehabilitated by milling 2" of the existing asphalt and overlay with another 2". Based on pavement analysis, a 3" pavement may be placed due to the current anticipated aircraft loading. According to the 2021 FDOT Airport Pavement Evaluation Report, the PCI rating for this pavement section is estimated to be 51 by 2025.

Special Circumstances: None

Project Description

The Brooksville-Tampa Bay Regional Airport is rehabilitating 42,639 square-feet (SF) of Taxiway D and reconstructing 20,601 square-feet of Taxiway A1 immediately west of the apron. As a result of the runway decoupling project, Taxiway A1 became a movement area providing access to Runway 3-21 via Taxiway B1 and to the general aviation ramp. This pavement is subject to more aircraft traffic and is showing increased deterioration. The pavement needs to be strengthened to accommodate the additional traffic. Taxiway D has also deteriorated and is subject to additional aircraft traffic.
