Equipment and Facilities List

Clients count on us to respond in their time of need, and we have never failed to deliver. Our ability to respond rapidly is accelerated by utilizing the following:

- **Incident Command System (ICS)**

Structure: Our projects are operated under the ICS structure and have a proven track record of meeting even the most challenging staffing level requirements. ICS allows the Tetra Tech project team to scale as needed, coordinate response, establish common processes for planning and managing resources, and adapt organizational structure to match the needs and complexities of projects.

- **Ability to Hire Rapidly:** Tetra Tech's immediate response staffing plan utilizes our vast network of disaster recovery professionals, including full-time employees, reserve staff from the Tetra Tech Disaster Recovery Unit, and local hires. Our staffing process has rapidly mobilized project teams for major disaster recovery projects nationwide. We prioritize deploying local staff, which benefits the local post-disaster economy and reduces mobilization and transportation costs. In addition to maintaining an extensive field staff database, Tetra Tech can deploy our Field Human Resources (HR) Hiring Center, which is designed to be quickly mobilized, transported, and set up to allow near immediate response for field staffing needs. The number of trained HR representatives can scale up to 20 at a moment's notice, with the ability to hire 200+ staff per day. Under this process, local teams can be hired, trained, and deployed within 24 hours.
- **Depth of Resources:** Tetra Tech maintains a fully stocked warehouse located in Orlando, Florida with over 120 fully stocked bays of debris monitoring supplies capable of supporting over 50 simultaneous recovery operations for over 90 days. We also have dedicated logistics staff that manages resources and supplies and can have a fully functioning field office in a matter of days, and often several simultaneous offices at once. Tetra Tech has consistently deployed large-scale mobilizations of hundreds of staff and thousands of dollars' worth of equipment to multiple clients in a matter of days and on very short notice.

Tetra Tech consistently delivers rapid, reliable support to Hernando County, with response teams mobilized within hours of activation. Our established presence in the region, coupled with pre-positioned resources and strong local partnerships, enables us to begin field operations immediately following an event. Backed by a deep bench of trained personnel, a vast network of monitoring equipment, and cutting-edge technology—including GPS-enabled load tracking, automated reporting tools, and GIS-integrated dashboards—our team ensures every response is organized, efficient, and transparent. This unmatched capacity allows us to scale operations quickly to meet the evolving needs of the County, while maintaining the high level of service and accountability Hernando County has come to expect from Tetra Tech.

Tetra Tech has provided the Equipment List Form on the following pages.

Field Equipment

Tetra Tech ensures that all monitors have access to vehicles, typically using their own personal operating vehicles (POVs), which are appropriately equipped and reimbursed. In addition, rental vehicles are typically provided for field supervisors, operations managers, and project managers to facilitate their mobility and oversight responsibilities. We utilize specialized monitoring equipment, including our proprietary *RecoveryTrac™* ADMS for real-time data capture and reporting. Advanced GIS tools support mapping and data integration, while safety and communication gear ensure the safety and efficiency of our field personnel. Our resource inventory also includes thousands of ADMS handheld units, time and materials forms, truck certification forms, and ticket stubs.

Equipment for Project Sustainment

Tetra Tech maintains an inventory of placards, project manager kits, project coordinator kits, human resources kits, collection monitor kits, disposal monitor kits, leaner/hanger/stump kits, and IT kits. Additionally, we have laptops, sets of PPE, mobile wireless (Mifi) units, high-speed scanners, printers, mobile command offices, and emergency response trailers available for deployment. These resources ensure that our teams are well-equipped to handle any debris monitoring operation efficiently.

Ability to Respond to Simultaneous Contract Commitments

While Tetra Tech is an organization of over 30,000 employees with the capability to mobilize for numerous communities, we are very careful not to overextend our staff and resource capability to ensure that we can successfully meet our clients' expectations. **Upon careful consideration of these contractual obligations and the capacity of our logistics, equipment, staffing, and ability to mobilize across Florida, we certify that Hernando County will receive our full commitment to always ensure this contract's success. Moreover, we are intentionally assessing future engagements in the area to ensure that we can successfully respond and deliver with dedicated attention once awarded the work.** As elaborated throughout this proposal, we have the existing staff, systems, and policies needed to respond to the County's needs rapidly and effectively.

Tetra Tech has never failed to respond to our clients' deployment and mobilization needs, regardless of location or disaster. In 2024, Tetra Tech successfully deployed **more than 4,000 field staff** throughout Florida, Georgia, South Carolina, Tennessee, and Virginia in response to Hurricanes Helene and Milton.

Due to the nature and deep pool of resources of our firm, we can scale to meet the County's need regardless of size or scope of work. As demonstrated by our prior success in multiple simultaneous activations across the country, Tetra Tech's size, depth, and breadth of resources have consistently proven to be an asset for our clients.

Tetra Tech is recognized for its ability to respond to large-scale projects quickly and effectively. Since 1990, Tetra Tech has been providing comprehensive emergency response services to both governmental and private clients. Most notably, we have continuously supported the U.S. Environmental Protection Agency's (EPA) Emergency Response and Removal program since 1995, serving as prime contractor or subcontractor in eight of the ten regions across the country. Over this time, we provided technical consulting expertise on nearly 2,000 emergency response efforts nationwide. We have responded to all types of incidents, including industrial plant explosions, chemical fires, train derailments, oil spills, and pipeline ruptures impacting environmentally sensitive areas, clandestine drug laboratory operations, mercury spills in residences and schools, releases of unknown hazardous substances, chemical and biological agent incidents, and natural disasters, such as floods, tornadoes, and hurricanes.

Rapid Response Methodology

In many cases, we respond rapidly within 24 hours of receiving notice-to-proceed and fully staff projects within 7 days. Our staffing process has rapidly mobilized project teams for major disaster recovery projects nationwide, leveraging both our in-house and on-call staff with demonstrated disaster response training and experience. We prioritize deploying local staff to the maximum extent practical, which not only benefits the local economy but also reduces mobilization and transportation costs. **Our team has successfully deployed large-scale mobilizations of hundreds of staff and thousands of dollars' worth of equipment to multiple clients in a matter of days and on very short notice.**

Ultimately, the strategy, structure, and staffing requirements for the project organization are based on client expectations and the desired outcome. Tetra Tech's project team can scale as needed, coordinate response, establish common processes for planning and managing resources, and adapt organizational structure to match the needs and complexities of projects. A sample of rapid deployments and timeframes is provided below.

Subcontractors

Tetra Tech seeks opportunities to work with small, women-owned, minority-owned, and disadvantaged business enterprises (DBE) where specific and individual capabilities complement our own for the benefit of the successful completion of a project.

While Tetra Tech is a large, multi-national firm with sufficient resources to complete most any project, we are committed to upholding the requirements for contracting with local businesses and small, minority-owned, and/or women-owned businesses included within 2 CFR 200.321 and within the County's RFP.

As evidence of the Tetra Tech Disaster Recovery division's commitment to local and minority participation in our projects, in February 2019, Tetra Tech received the City of Houston Goods and Services Prime Contractor of the Year Award at the 6th Annual Champions of Diversity Awards Ceremony. Tetra Tech is honored to be selected for such award, and it demonstrates our commitment to work with minority, women, small, and disadvantaged business enterprises.

Most recently, Tetra Tech received the 2022 Dwight D. Eisenhower Award for Excellence in the Services Category for our effective small business subcontracting programs. The award recognizes large U.S. prime contractors that have excelled with their small business subcontracting programs by creating optimal opportunities for use of small businesses in all socioeconomic categories. The award was presented during the U.S. Small Business Administration's (SBA) National Small Business Week's virtual award ceremony on May 5, 2022.
