### Hernando County Utilities Department (HCUD) Renaming Hexam Water Treatment Plant in Honor of Mark Morgan

9-24-24

To the Morgan Family,

As you know Mark was an integral part of the HCUD for his entire career with Hernando County. Mark worked in various roles at times and witnessed the departments growth from the early 90's until 2023 when he retired. He worked on many projects that are in use today and one project in particular is the HCUD's Hexam Water Treatment Plant. This plant produces over 2 million gallons of potable drinking water every day for HCUD customers. There is an expansion planned in the next 5 – 10 years that will take this plant to over 4 million gallons a day and will be the 2<sup>nd</sup> largest water treatment facility in Hernando County. HCUD is requesting approval and full support from the immediate Morgan Family to rename this site to the "Mark K. Morgan Regional Water Treatment Facility". If approved by the Family the department will take this to the Board of County Commissioners for a posthumously resolution in Marks Honor.

Regards,

Brad Smith  
Capital Program Manager
