Project:

County Administration Building  
 15470 Flight Path Drive  
 Brooksville, FL 34604  
 Exterior Masonry Surfaces  
 Refinishing Proposal

Description	Quantity	Price Each	Amount
Brief Overview:		0.00	0.00
<ul style="list-style-type: none"> <li>• Washing of building sidewall masonry surfaces with ExoPro10X biodegradable cleaner followed by a thorough rinse</li> <li>• Removal of existing failed control joint sealants and backer materials</li> <li>• Installation of appropriately sized backer rod within control joints and within roof cap flashing to sidewall transitions for proper joint design</li> <li>• Application of Dymonic 100 urethane sealants over properly prepared transitions, tooled to create weatherproof seals</li> <li>• Priming of all masonry sidewall surfaces with PPG PermaCrete penetrating bonding primer</li> <li>• Finish coating of all sidewall and soffit surfaces with PPG AcriShield Max with Portersept anti-microbial additive for additional mold and mildew resistance, applied as per manufacturer's recommendations</li> <li>• Finish of doors, frames, and decorative awnings with PPG Breakthrough Exterior Enamel, as per manufacturer's recommendations</li> </ul>			
Accented Metal Awnings - 825 sq. ft. x 2 applications = 1,656 sq. ft.	1,656	0.60	993.60
Caulking/Sealants - 596 ln. ft. x 2 applications = 1,192 ln. ft.	1,192	1.50	1,788.00
Coatings	12,404	0.20	2,480.80
Coatings - 12,404 sq. ft. x 2 applications = 24,808 sq. ft.	24,808	0.26	6,450.08
Doors - 3 sides x 2 applications = 6 sides	6	18.00	108.00
Frames - 3 sides x 2 applications = 6 sides	6	17.00	102.00
Pressure Washing	13,652	0.07	955.64
Lift Equipment	1	2,100.00	2,100.00
Material Value	1	5,123.00	5,123.00
<b>Total</b>			<b>\$20,101.12</b>

 Window Sealants Proposal

Description	Quantity	Price Each	Amount
Brief Overview:		0.00	0.00
Window Perimeter Glass to Metal Transitions • Removal of existing failed gasket system • Installation of backerrod within track system • Application of silicone sealants within track to create uniform seal below metals • Application of silicone sealants at metal to glass transitions to create a uniform cant bead to weatherproof windows			
Window Glass to Glass Transitions • Removal of existing failed silicone sealants within transition • Installation of bond break tape over transition seam • Application of silicone sealants, tooled to uniform square beads to complete weatherproofing			
Window Metal Frame to Masonry Perimeter Transitions and Metal Flashing to Masonry Sill Transitions • Removal of existing failed sealants at masonry to frame transitions • Installation of backer rod within properly prepared perimeter joints and beneath flashing to complete proper joint design • Application of silicone sealants over backing material to complete cant and square bead installations and provide weather tightness			
Caulking/Sealants - 1,362 ln. ft. x 2 applications = 2,724 ln. ft.	2,724	1.50	4,086.00
Caulking/Sealants - 812 ln ft. x 4 applications = 3,248 ln. ft.	3,248	1.50	4,872.00
Material Value	1	8,943.00	8,943.00
<b>Total</b>			<b>\$17,901.00</b>
