**Master Plan Revision - Project Narrative**  
 6/23/2022

JUL 06 2022

Planning Department  
 Hernando County, Florida

**I. Proposal**

This application proposes to modify the existing Master Plan of the ±128-acre Crystal Waters Property (Hernando County Property Appraiser Parcel Key 00418907 /Parcel # R13 422 17 0000 0020 0010; Parcel Key 01243835/Parcel # R13 422 17 0000 0020 0012; Parcel Key 01357631 /Parcel # R13 422 17 0000 0020 0013; Appraiser Parcel Key 01777492 /Parcel # R13 422 17 0000 0020 0015). The previously approved Master Plan included 176 single family lots for a density of 1.3 units per acre along with a 3.5-acre commercial parcel with C-1 (Commercial) uses on the north end. This request proposes an increase in unit count to 250 lots for an increase in density of 1.9 units per acre. The Property is primarily located within the Residential Future Land Use (FLU) Map Category, which allows for a maximum of 6 units per acre for single family housing and up to 22 units per acre for other unit types. A small portion of the Property is located within the Commercial FLU Map Category, which allows for some residential and mix of uses. This request is consistent with the Hernando County Comprehensive Plan.

Proposed revisions from the previously approved PDP Master Plan are as follows:

	<b>Approved H-07-52</b>	<b>Proposed</b>
<b>Lot Width (Minimum)</b>	55'	40'
<b>Side yard setback</b>	7.5'	5'

**II. Site Characteristics**

The Crystal Waters Property is ±128 acres adjacent to the east of US-19, south of Bourassa Boulevard, and west of Tooke Lake. The project site is currently vacant with vegetation and approximately 58 acres of water features, including wetlands. The subject property is located in the County's Urban Area pursuant to the Urbanized Area Map found in the Hernando County Comprehensive Plan.

**III. Environmental Considerations**

The majority of this property is heavily wooded and contains water features. The project boundary lies within FEMA zones AE and X. This site was formerly issued an Environmental Resource Permit to serve a residential development in 2006 but has since expired. A formal environmental assessment will be conducted at time of Conditional Plat. To date, the applicant has found no evidence of environmental constraints which would prohibit this development.

**IV. Proposed Site Plan Discussion**

The proposed Combined Planned Development Project includes up to 250 single family lots and one commercial parcel to the north. The proposed mix of lot types will include 40-foot-wide and 50-foot-wide lots. There will be three access points to the property. Primary access to the residential portion will be

from US 19. The two secondary access points, shared by the commercial and residential parcels, will be from US 19 as a right-in only drive, and from Bourassa Boulevard, east of the intersection with US 19. The residential development will include internal circulation, providing multiple routes for ingress and egress.

The previous zoning, approved in 2007, included a condition to require 5% minimum usable open space. The applicant requests to remove this condition as more than 50% of the site is a preserved lake. In addition, the project will include all required open space and neighborhood parks along with stormwater retention necessary for development. All buffers proposed will meet County standards.

#### **V. Water and Sewer Services**

As required, the developer will comply with all ordinance requirements related to providing and dedicating the necessary water and sewer services to this project.
