# T-MOBILE RF NEED

Jason Paulley and Mattaniah S. Jahn

Wednesday, April 2, 2025

**RE: Letter of Intent – T-Mobile at 6259 Faber Road, Brooksville, FL 34602 (A2G0137B)**

To Whom It May Concern:

To better serve our customers, T-Mobile Engineering continuously analyzes existing network coverage and deficiencies. T-Mobile Engineering uses several sources of data, including Customer Service logged customer complaints and service-level prediction data. These metrics and techniques hold a great amount of weight in determining the focus of T-Mobile's limited resources to best serve the needs of our customers, efficiently and effectively.

While analyzing our network in Hernando County, T-Mobile Engineering has determined there is a need for improved capacity and coverage in the Hill 'N Dale area east of Brooksville. This area needs improved N1900 in building and expanded in vehicle coverage.

There are no other sites or structures in the search area, that would allow T-Mobile to address the capacity and coverage needs of this area. T-Mobile has determined that there is an appropriate cellular site candidate location that would meet our needs related to service enhancements required in Hernando County.

APC Towers, on behalf of T-Mobile USA, is proposing the construction of a 185ft Monopole Tower to address this need. This telecommunication facility is proposed to be located at 6259 Faber Road, Brooksville, FL 34602.

T-Mobile is requesting an antenna center line of 180ft A.G.L. to provide improved cell site coverage and increased capacity in the surrounding area.

T-Mobile only operates on the specific frequencies licensed or transferred to T-Mobile by the Federal Communications Commission (FCC), and operating these will not interfere with or obstruct any public safety telecommunications.

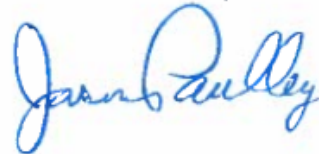

T-Mobile operates on FCC licensed spectrum at A2G0317B as follows:

Band	Transmit	Receive	(in MHz)
E-UTRA band 7	617-622	663-668	
n71	627-642	673-688	
E-UTRA band 1	728-734	698-704	
E-UTRA band 2	1930-1950	1850-1870	
n25	1980-1995	1900-1915	
E-UTRA band 4	2130-2145	1730-1745	
n41	2496-2502	2496-2502	
n41	2518.5-2586	2518.5-2586	
n41	2569-2572	2569-2572	
n41	2578-2690	2578-2690	

The bands allocated by the FCC for public safety telecommunications are (a): well-guarded by the "Guard Band" separation, dictated by the FCC; and (b): transmission and reception of Public Safety telecommunication takes place in a separate portion of the RF spectrum from the AWS, PCS, 700MHz, 600MHz, and B41 spectrum used by T-Mobile.

Equipment used by T-Mobile complies with strict standards contained in Code of Federal Regulations 47 part 24. This sets limits on emissions out of T-Mobile's licensed bands to ensure no adverse effects to any other frequency band.

T-Mobile complies with FCC rules regarding interference to other telecommunication services and all FCC rules regarding human exposure to radio frequency.

Thank you.  
Respectfully,  
Jason Paulley  
RF Engineer, T-Mobile

# Certificate of AM Regulatory Compliance

**Site Name** FL-1885 SR 50  
**Location** N28-15-35.47 W82-16-54.08  
**Client** APC Towers  
**Certification Date** 7/26/2024

According to the Federal Communications Commission (FCC) Rules and Regulations,

"§1 Subpart AA. Disturbance of AM broadcast station antenna patterns  
Part §1.30000 Purpose.

This rule protects the operations of AM broadcast stations from nearby tower construction that may distort the AM antenna patterns. All parties holding or applying for Commission authorizations that propose to construct or make a significant modification to an antenna tower or support structure in the immediate vicinity of an AM antenna, or propose to install an antenna on an AM tower, are responsible for completing the analysis and notice process described in this subpart, and for taking any measures necessary to correct disturbances of the AM radiation pattern, if such disturbances occur as a result of the tower construction or modification or as a result of the installation of an antenna on an AM tower. In the event these processes are not completed before an antenna structure is constructed, any holder of or applicant for a Commission authorization is responsible for completing these processes before locating or proposing to locate an antenna on the structure, as described in this subpart.

Part §1.30002 Tower construction or modification near AM stations.

(a) Construction near a nondirectional AM station. Proponents of construction or significant modification of a tower which is within one wavelength of a nondirectional AM station, and is taller than 60 electrical degrees at the AM frequency, must notify the AM station at least 30 days in advance of the commencement of construction. The proponent shall examine the potential impact of the construction or modification as described in paragraph (c). If the construction or modification would distort the radiation pattern by more than 2 dB, the proponent shall be responsible for the installation and maintenance of any detuning apparatus necessary to restore proper operation of the nondirectional antenna.

(b) Construction near a directional AM station. Proponents of construction or significant modification of a tower which is within the lesser of 10 wavelengths or 3 kilometers of a directional AM station, and is taller than 36 electrical degrees at the AM frequency, must notify the AM station at least 30 days in advance of the commencement of construction. The proponent shall examine the potential impact of the construction or modification as described in paragraph (c). If the construction or modification would result in radiation in excess of the AM station's licensed standard pattern or augmented standard pattern values, the proponent shall be responsible for the installation and maintenance of any detuning apparatus necessary to restore proper operation of the directional antenna."

This certificate verifies that the site at the above coordinates has been screened out to 3.2 km for directional antenna AM stations and 1.2 km distance for non-directional antenna AM stations and found to have no AM broadcast stations currently licensed to operate within those distances. Current FCC rules coordination distances are less as calculated in the above FCC rule §1.30002 adopted February 2014. Structure height is also considered in the current FCC rules. No further AM coordination actions are warranted at this time.

HOUSEKEEPING

Dear Aya Abunada,

The Orange County Sheriff's Office received a public information request from you on 05/13/2022.  
Your request mentioned:

Please provide us with the statistics on the percentage of 911 calls made on land line vs. Wireless phones in Orange County in 2021.

Please find the response received from Communications:

**According to the 2021 report provided to us by the Orange County 911 Office, the categories you describe breakdown as follows:**

**Land line      124,028**

**Wireless      1,024,672**

**If you need further information, please contact Orange County 911 Office.**

**Thank you.**

If you have any questions or need additional information, please feel free to respond to this message or contact us at 407-254-7280.

Sincerely,

Orange County Sheriff's Office

Records Section

## **A message was sent to you regarding record request #25-10851:**

RE: PUBLIC RECORDS REQUEST

Dear Cindy-Jean Le Blanc,

The Orange County Sheriff's Office received a public information request from you on 04/15/2025. Your request mentioned:

I would like to request the 2024 Orange County 911 call statistics, specifically showing the amount of calls received from land line callers and the amount of calls received from wireless callers. The most recent copy I have is for the 2021 calls

**Here are the stats for 911 Calls for 2024 that you requested**

**Total 911 Calls via Landline**

**26,038**

**Total 911 Calls via VOIP**

**45,339**

**Total 911 Calls via TLMA (Telematics)**

**471**

**Subtotal**

**71,848**

**Total 911 Calls via Wireless**

**573,528**

**Total Text to 911 Calls**

**2,531**

**Total 911 Calls:**

**647,907**

If you have any questions or need additional information, please feel free to respond to this message or contact us at 407-254-7280.

Sincerely,

Orange County Sheriff's Office
