----------	------------	----------	-------------------	--------------

DO NASA SCIENCE LIVE!

SciStarter is partnering with NASA to present a series of free virtual events featuring NASA citizen science projects, live Q&As with scientists, and step-by-step instructions to get involved in real time! No previous experience or specialized experience is required!

This program aims to engage thousands of people in NASA citizen science projects to help accelerate research, together.

Whether you tune in from home, attend a local livestream watch party, or host your own watch party, you'll find everything you need on this microsite!

Getting Started

Pick an event.

Browse the *Do NASA Science LIVE!* [Events](#) tab and choose a topic that interests you. Each event highlights one NASA citizen science project. Or, if you don't see an upcoming event, pick a project on the [Projects](#) tab and get started on your own!

Decide how to join.

Register to participate from home *or* find a nearby library/community watch party for in-person help.

Set up in minutes.

You'll just need an internet-connected phone, tablet, or computer. The event and project pages provide quick "what to install" or "what to bring" notes (e.g., a notebook or binoculars if helpful).

Do NASA Science, LIVE!

Follow along with simple, step-by-step prompts; ask questions in chat during the event; and submit your observations or classifications in real time

Keep the momentum.

After the event, you'll get a short recap with links to continue contributing, join related projects, and track your impact on your [SciStarter Dashboard](#).

Who can participate?

Everyone! No prior experience required. Events are designed for beginners and families, with optional "level-up" challenges for returning participants.

Accessibility & Cost

Do NASA Science LIVE! is free to join. Most activities work on standard devices; libraries offer Wi-Fi and computers when available. Recordings and step-by-step guides are posted after each event.

[COMING SOON] Need Help?

Soon you'll be able to connect with a local librarian, SciStarter Ambassador or NASA Solar System Ambassador who can answer questions and host small group sessions.

Do NASA Science LIVE! is a virtual event series from SciStarter, supported by NASA.
