

10/6/2025

The Carport was constructed in its current location due to limitations of our property layout. The pool and its screened enclosure occupy more than half of the back yard. The front yard has a septic tank, leaving no other viable area for placement. The structure is intended to accommodate a single vehicle, has been built to code and enhances the functionality and value of the property. Its presence does not create any adverse impact to neighboring properties.
